THE

PREFACE.

R. POTTER, the late learned Archbishop of Canterbury, in his Antiquities of Greece, tells us, the ancient Atticans, were of Opinion, that in the Beginning of the World, Men and Women, like Plants, were in the several Parts thereof, produced out of the fertile Womb of one common Mother, the Earth, by some strange prolific Virtue. This, though quite contrary to the Mosaic System, is nevertheless much more rational and creditable than the making all Men, every where, spring from one Man only; hence the Northern, &c. as well as the Eastern Nations might be, as they certainly were, peopled at one and the same Time. And in this there doth not appear the least Absurdity or Inconsistency, since that Almighty Power, which in Eden produced the first Man and Woman, was equally capable of causing the Earth in every Part of it, Island as well as Continent, he thought proper, to produce therein also a first Man and Woman.

And the the ancient Fathers were not of this Opinion, yet they often in their Diffusives to the People from the too eager Pursuit of Riches, and in their Reflexions on a

nies assert, that Almighty God has in every Country and Nation, provided at Hand all Things necessary for the Support and Convenience of Life, and that whatever we want more is not absolutely necessary, but are the Inventions of Luxury and Vice.

The Study of Trade and Commerce therefore in the early Ages of Christianity gave Place to Religion and Devocion; and from hence it happened, that a wast Number of Monasteries and religious Houses were erected and endowed with large Estates in this and all other Parts of Christendom; but at length it pleased God, to expel the Darkness of Popish Superstition, the Worship of Images, blind Devotion, and implicit Faich, with all the Traditions and lying Wonders of designing Men by the Introduction or Restoration of primitive Christianity under the Dispensation of Protestantism, which has not unstitly by some of our most learned Divines been stiled, the Beginning of Christ's Reign here on Earth, predicted in the Revelation of St. John.

Henry the Eighth observing, that almost all Property was centered in the Hands of the Ecclesiasticks of his Time, and being justly weary of the Tyranny and Oppression of the See of Rome discovered the most effectual Manner to put an End to the Dominion and Hierarchy of the Church by selling and disposing of the Abby and facred Lands, to the Laity, which produced this great Blessing that the new Nobility and Gentry created thereby, would sight for their Property, and support his Supremacy.

Till the glorious Reign of Queen Elizabeth we made but an inconfierable Figure in commercial Affairs, and it must be allowed, that the Discovery of the Indies have greatly improved the Trade, Shipping, Navigation and her faithful Council Jenfible of the great Utility of a Trade to East India incorporated a Society of Merchants to carry it on by a Common Fund, who extended their Commerce to Arabia, India, China and Japan; to all which Parts they have from Time to Time exported confiderable Quantities of our Manufactures. Besides which, this Trade is one of the greatest Nurseries of Seamen, above Five Thousand whereof are continually employed in the Service of this Company.

We yearly export to these Parts great Quantities of Bullion, Lead, Tin, all Sorts of our Cloths, especially Broad Cloths, Stuffs, Callimancoes, Long-Ells, &c. and in Return import, China-ware, Tea of all Sorts, Cabinets, Raw and Wrought Silk, Muslin, Callicoes, Cotton-Cloths, Coffee, Canes, Diamonds, Drugs of many Kinds, and Grocery Wares of various Sorts.

This Trade has hitherto proved the most beneficial of all others to this Nation, and the Government truly sensible thereof has with the utmost Expedition sitted out a Fleet to protect it from the daring Insults of the French, or of any other Power who should have the Effrontery to obstruct it.

As to the general Benefit of Trade to this Island, it is now become so important, that it is the Basis of our Liberty and Happiness, the Support of the State, the Bulwark of our Religion, and the Source of our Wealth. It is from hence, that we are able to maintain and man our Navy, and keep in Pay a Standing Army. It is Commerce that makes our Lands valuable, our Estates saleable, and our Funds useful. And if it should be said there are some Inconveniences arising from forcign Trade, not quite so agreeable to the primitive Simplicity, this is not the Fault of the Thing itself so much as it is an Evidence

The PREFACE.

îv dence of the general Corruption and Depravity of Mankind.

These Considerations and the Importance of the East-India Trade have induced me to draw up the following History thereof, with brief Observations on the Religion, Customs, Manners and Commerce of the Inhabitants. Ishall therefore now leave the Reader to the Perusal of the ensuing Work, which, with how little Art soever it may be executed, will yet from the Importance of the Subject merit some Share of the public Attention.

THE

CONTENTS

			CH	AI	P. I.			- 1
Λ	Brief Narrative Islands.	of	the	first	Discovery	of	the	Philippine
T	. Islands.			4.1				Page 3

C H A P. II. Contains a Description of the Spice Islands, viz. the Molucca, Banda, Amboyna, and Ceylon, with those that cover them. 33

C H A P. III.

The first Voyage of the Portuguese to India, in the Year 1798.

C H A P. IV.

Contains a Description of the Sunda Islands, with Captain Beckman's Opinion concerning the Management of the Trade to Borneo.

77

C H A P. IV.
Contains a Description of the Islands of Sumatra and Java. 97

CHAP. V.
Describes the Kingdom of Tonquin and Couchin-china. 134

C H A P. VI.

Contains a Description of Siam, and of the Kingdoms of Pegu,

Ava and Arracan.

145

Gives a short Description of the Islands in the Ethiopian Seas, with some remarkable Passages historical and accidental. 172

Gives a Description of Zeyla's Sea-coast, and of a Part of Ethiopia, Zuakin and Upper Egypt. 176

Gives a little Description of the Coast of Arabia the Happy, from Mount Sinai to Mocha, with some Observations on the Religion, Customs and Laws, as they are now established. 181

CHAP. X.

Contains a Description of Aden, with some historical Remarks about the Turkish Expedition from thence into India: Also an Account of the Sea-coast of Arabia Petræa, as far as Muskat and Bassora; with a particular Account of an English Ship lost on the Island of Maceira.

CHAP. XI.

Treats of the Kingdom and City of Muskat, and of their religious and civil Customs; with some historical Account of their Wars and Oeconomy. And a little Account of the Sea-coast of Arabia Deserta, also of Bassora, with the samous River of Euphrates.

CHAP. XII.

Observations on the Empire of Persia, giving an Account of its Magnitude, the Reduction of Ormuse to the Obedience of Persia by the Assistance of the English. Also of the late Revolution by Meriweys.

CHAP. XIII.

Treats of the Mogul's Dominions on the River Indus, particularly of the ancient Kingdom of Sindy; its Product and Commerce, Religion and Customs of the Inhabitants; with a Defeription of the River Indus.

219

CHAP. XIV.

Gives an Account of the ancient Kingdom of Guzerat now a Province annexed to the Mogul's Dominions, its Situation, Product, Manners and Religion; with some Account of the Pirates that inhabit Part of it, and some Observations on Diu, a Portuguese City on the Island appertaining to Guzerat. 227

CHAP. XV.

Gives an Account of the Cities of Cambay, Baroach, and Surat; with several Occurrences that happened to them, and of the Sea-coast from Damaan to Bombay.

234

CHAP. XVI.

Gives a Description of Bombay, with historical Remarks on its Wars, Government and Trade, till the Year 1687, when the Foundation of a War was laid which proved the Ruin of the then English East-India Company.

CHAP. XVII.

Gives an Account of the Sundah Rajah's Dominions, the Product, Religion, and Customs of his Country, with Observations on his War with the English East-India Company in the Year 1718; with a short Description of Canara:

291
C H A P.

CHAP. XVIII.

Observations on the Samorin and his Country, and of Couchin; their Religion, Laws and Customs, Product of the Country, and its Commerce; an Account of their Commerce with the Dutch, begun in the Year 1708, and the Consequences of it.

CHAP. XIX.

Gives a short Description of Fort St. George, its first Settlement and Rise, its Situation and Sterility, and some Remarks on its Government, and the Actions of some of its Governors, with some Occurrences that happened to the English Factory at Vizogapatam.

CHAP. XX.

Gives an Account of the famous Kingdom of Pegu, its Situation and Product; with its Laws, Customs, and Religion, &c.

CHAP. XXI.

Treats of Merjee and Tenacerin, and of the Sea-coast in the King of Siam's Dominions, of the Massacree there of the English in the Year 1687.

CHAP. XXII.

Gives an Account of the Islands and trading Ports on the Coast of Sumatra and of the Island of Java, &c. 344

CHAP. XXIII.

Gives an Account of Borneo.

and the stage of the proof of the

353

CHAP. XXIV.

Gives an Account of Cambodia, its Trade; also of a late War brought into their Country by the Siamer, and the ill Success they had.

372

CHAP. XXV.

Treats of Couchin-china, and Tonquin, their Religion, Laws, Customs.

CHAP. XXVI.

Gives some Account of the Religion, Laws, Customs, Commerce, Riches, Cities, Temples, Gods, Goddesses, Priests, Military Forces, Produce, and Manusactories, &c. of China.

CHAP. XXVII.

Some Occurrences that happened among the English at Amoy in 1 the Year 1700.

382

CHAP.

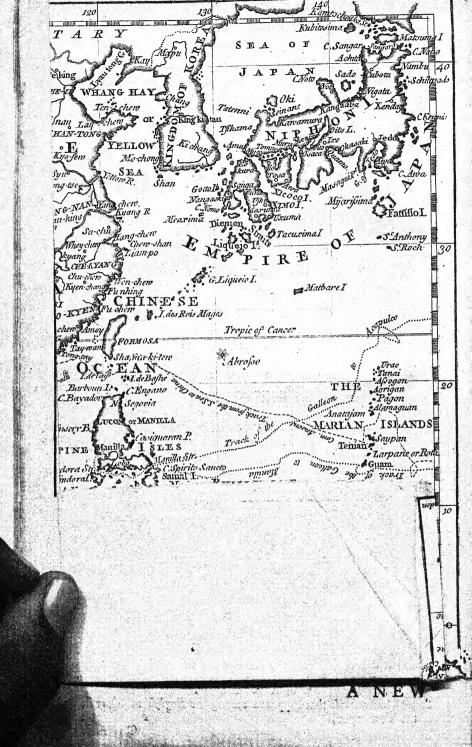

CHAP. XXVIII.

A short Account of the Taking of the Manila Ship, in the East-Indies by Mr. Anson in the Ship the Centurion, in the Year 1743.

APPENDIX.

- SECT. I. THE Success of an English Squadron in the East-Indies. 393
- SECT. II. An Account of an Engagement between the French and English Fleets, and the Taking of Madras, in a Letter from Fort St. David, dated Aug. 17.
- SECT. III. An Account of the Dutch surprising the Island of Madras. Written by a Person on the Spot, and authenticated by the Testimony of several others present.
- SECT. IV. Some Account of Angria the Pirate, and the Taking of Geriah by Vice-Admiral Watson.
- SECT. V. An Account of the Loss of the Company's Settlements at Bengal; in a Letter from a Gentleman at Fort St. George. 415
- SECT. VI. An Account of the Retaking of Calcutta, and the other Forts.
- SECT. VII. An Account of an Engagement between three East Indiamen and two French Men of War, in a Letter from Captain Wilson, of the Suffolk.
- SECT. VIII. An Account of the Taking of feveral Forts by the English, and of the Articles of Peace acceded to and figned by the Nabob of Bengal: And also the Articles agreed to between Admiral Watson and the Council of the French East-India Company: In three Letters from Vice-Admiral Watson.

with Pleasure the Accounts of People, their Customs and A 2 Manners,

ANEW

C H A P. 1.

A brief Narrative of the first Discovery of the Philippine Islands.

T is generally agreed, that the Knowledge of the World is the most useful and entertaining Subject, a Man can employ his Thoughts upon: The reading Novels and Romances indeed, ingrosses a great deal of the Time of the present Generation; but I perfuade myself, that a Majority of these

Readers would rather apply themselves to the Study of instructive History, if it could be rendered equally pleasant

and interesting.

Many Colonies of our Countrymen having within these two hundred Years, since Trade, Commerce and every Science began to revive and slourish under the auspicious Reign of the ever memorable Elizabeth, being from Time to Time established on the vast Continents of established and America, we are hence naturally induced to read with Pleasure the Accounts of People, their Customs and

A 2

Manners.

Manners, which before were unknown to us; but fince which Period most of us have, through the great Increase of Commerce, Friends and Relations concerned in the Traffic carried on to those Places, and many of us have Sons and Kindred settled there. It is therefore I humbly presume, the following Treatise concerning the English Settlements and Trade to the East-Indies, and the neighbouring Continent, describing the Religion, Government, Customs and Manners of the Natives of those Parts will be acceptable to the Reader.

THE Globe is divided into two great Continents; the Eastern comprehending Asia, Africa and Europe, and the

Western America only.

THE Antients were not acquainted with half the eastern Continent, and as to America, and great Part of Afia and Africa, neither Antients nor Moderns knew any thing of them three hundred Years ago. The Atlantick Ocean divides Europe and Africa from America; the Pacifick Ocean divides America from China. That Part of the eastern Continent which is denominated Asia, is bounded by the Ice-Sea, or Frozen Ocean, on the North; by the Pacifick Ocean on the East; by the Indian Ocean on the South; and on the West by the Rivers Oby and Don, the Palus Moetis, the Euxine Sea, the Bolphorus, Hellespont, Epean Sea, or Archipelogo, and by the Levant, the Red Sea, and the 19thmus of Suez, which separate it from Eu-Pope and Africa. Asia lies between the Equator and leventy-two Degrees of North Latitude, and between twenty-five and a hundred and forty-eight Degrees of eaftern Longitude; and comprehends China, Siberia, Porha, Arabia, Afiatick Turkey, and the two Indies, Bult and West.

The Porthquese having discovered the Way to India by the Way of the Cape of Good Hope, planted the Coasts of Africa and Asia, till they arrived at length at the Kingdom of China.

"JOHN, King of Portugal, having expelled the Moors from that Kingdom, purfited them to the Coast of Africa, and took Centa from them, in the Year 1415. King John was accorded in that Expedition by his Sun Prince Heavy, who tems informed, while in Africa, that the Moors traffick-

ed with the Coast of Guinea, over Land by their Caravans, and brought home Gold Dust, Ivory, &c. from thence, projected the Discovery of that Coast by Sea, and, accordingly, equipped a Squadron of Ships at his Return to Portugal, and commanded them to make what Discoveries they could on the South-West Coast of Africa, and after forty Years diligent Search, the Portuguese advanced, by slow Degrees; as far as Sierra Leon, on the Guinea Coast, in seven Degrees of North Latitude, planting Colonies on the Shoars all the Way they went; and their Language is spoke almost all along the Coast of Africa at this Day.

PRINCE Henry dying in the Year 1463, the Portuguele proceeded to plant the Gold Coast, in the Year 1469, and erected the Fortress called St. George del Mina, now in Possession of the Dutch: And in the Reign of King John II. in the Year 1486, Bartholomew Diaz, the Portuguele. Admiral discovered the Cape of Good Hege, the most fouthern Promontory of Africa, which lies in thirty four Degrees one half of South Latitude, but found the Ocean so tempestuous, that he gave it the Name of Calo Tormentofa, and did not think it feizable to pais it at that Time. King John dying in the Year 1495, his Successor, Don Emanuel, commanded his Admiral, Vafco de Geira, to endeavour to furround this stormy Cape, which being effected, King Emanuel gave it the Name of the Cape of Good Hope, as he had now a fair Prospect of tracing our the Way to India by Sea: The Admiral having doubled the Cape on the eighteenth of November, 1497, which is their Summer Season, failed along the eastern Coast of Africa, till he arrived at Melinda, three Degrees South of the Egninoctial, from when he shaped his Course to the Eastward, and arrived at Calicut, on the Malabar Coast of the Hither India, on the 20th of May, 1498...

The Partiquese soon after made several Settlements, and planted Colonies on the Coast of the Farther India, and in the Spice Islands, and arrived at Cauton in Chrea, in the Year 1517, where they were permitted to trafic, and fix a Colony on the little Island of Macao, at the Mouth of the River of Canton, which the Partiquese possess at this Day; but as Subjects to the Crown of China. Their Missionaries were not permitted, however, to go A 2

over to the Continent, till some Years after Francis Xavier, from his indefatigable Labours, stiled the Apostle of the Indies, who died in the Year 1552, was never suffered to set his Foot a-shoar upon the Continent of China: The Portuguese laboured for more than thirty Years after in vain, to get their Missionaries admitted into that Kingdom.

ROGER and Riccii, two Jesuits, were the first that were permitted to refide on the Continent, who became very acceptable by their Skill in the Mathematicks; but the Chinese were amazed, when they saw them produce a Map of the World, to find that China was so very small a Part of it. These Jesuits were permitted to compose a Catechism, and explain the Christian Doctrines, and gained great Numbers of Converts among People of Figure; but at the same Time were insulted by the Mob. They continued their Mission, however, for seven Years, till a new Viceroy came to Canton, and obliged them to retire to Macao; however they were foon after recalled, and obtained Leave to reside in the capital City of Pekin, whither they carried Prefents for the Emperor, among which was a Clock and repeating Watch; but a little before they arrived at Pekin, they were stopped by an Eunuch, a Commissioner of the Customs, and imprisoned, on Pretence that a Crucifix which they carried in a Portmanteau. was a Charm, which might affect the Emperor's Life: however, an Order foon after arrived, for bringing those Foreigners up to Pekin, where they were well received by the Emperor, and their Presents accepted, and a House and a Maintenance were affigued them, with the Liberty of making what Profelytes they could, among whom they relate were many Princes of the Blood; and the Converts encreased so fast, that in the Province of Kiamsi alone there were ninety Churches, and forty-five Oratories. The Bonzes (the Priests of the God Fo) raised several Persecutions against them; but nothing proved more fatal to them than the Opposition they met with from the Dominican Friars at Macao; one of this Order declaring that the Jesuits had a Design to depose the Emperor, and usurp his Throne. That the Places they were fettled in between Canton and Pekin, favoured their Delign, and that the

Dutch Fleet, which was then upon the Coast, was intended to protect them; that the Governor of Pekin was in their Interest, and that the Christians of Japan were ready

to join them.

The state of the s

The Viceroys and Governors of Places were exceedingly alarmed at this pretended Conspiracy, and one of the Missionaries passing through Cantan before the Forgery was discovered, was condemned to the Bastinado, under which he died; but Riccii was protected by the Emperor at Pekin, and the Falsity of the Report being proved, he lived in that Capital in Peace, till the Year 1610, when he died, aged eighty-eight Years, twenty-seven whereof he had resided in China; and the Emperor had such a Regard for him, that he ordered a Piece of Ground to be assigned for building him a Tomb, which was afterwards

the Tefuits Burying-place.

A PERSECUTION being raised against the Jesuits and their Profelytes in the Year 1617, they were obliged to retire to Mação; but there happening a War with the Tertars, in the Reign of the succeeding Emperor, he recalled them again, knowing they would be very uleful to him in the Management of his Artillery, and they lived unmolested in the Kingdom until the Year 1628. Two Years after the Jesuit, Adam Shaal, resorted to the Court of Pekin, and was mightily careffed by the Emperor and his Ministers, on account of his Skill in the Mathematicks; and the fame Year the Dominicans and Franciscans got Admission into China, and, as well as the Jesuits, boast of the numerous Converts they made; and notwithftanding the Revolution that happened in the Year 1640, when Xunchi, King of Niuch, made a Conquest of China, the Jefuits maintained their Ground, and were no less in Fayour with the Emperors of the present Tartar Race, than they were with those of the Chinese. Adam Shaal was made President of the Society of Mathematicians by the Emperor Xunchi, which had been under the Direction of the Mahemetans for three hundred Years before. It was Adam that reformed the Kalendar, which still encreased his Interest at Court, and the Emperor was so sensible of the Service the learned Europeans were capable of doing him, that he fent for fourteen more of the Missionaries to Court,

Court, among whom was Father Verbieft; and the Jesuits insinuate, that they should have made a Convert of the Emperor, if the Ladies of the Court had not prevented it, on his reproving that Prince for entertaining one of them.

On the Accession of Kanghi, the Son of Xunchi, the first Tartar Emperor, Adam Shaal was made Preceptor to the young Monarch, who was then but eight Years of age, and the Bonzes (Priefts of Fo) were expelled the Palace; whereupon the Bonzes presented a Petition to the Regents, fetting forth, that the Jesuits had been banished their Country for their Difaffection to their natural Princes, and would infallibly raise a Rebellion in China: That they had introduced a Multitude of Foreigners into the Empire, who travelled through the Provinces, and made Plans of their strong Towns, and that they only waited a favourable Opportunity to raife a Rebellion. To this Petition they annexed a Book, published by Adam, containing a List of their Churches, and of the Converts they had made, which the Bonzes fuggefted was the Muster-Roll of an Army, which they could bring into the Field on the first Signal; that their Beads were Marks whereby the Conspirators knew one another, and shewed, in the Popish Books they distributed, the Picture of Christ crucified, saying, Bebold the God of the Christians nailed to a Cross, for attempting to make himself King of the Jews; this is the God they invoke to favour their treasonable Conspiracies against the Government.

This Charge against the Jesuits being brought before the Tribunal of Rites, they were imprisoned and laid in Irons, and the Christian Religion was declared to be a faste and permicious Doctrine. Adam Shaal was condemned to die, and though the Sentence was never executed, he died under the Hardships he suffered in the Year 1666; twenty-five of the Missionaries were banished to Macao; but four were still permitted to remain at Court, who sometime afterwards procured an Order for recalling the rest of their Brethren, and procured a Declaration from one of the principal Tribunals; That the Christian Law bad been unjusty condemned, and that it taught nothing intensificat with the Westare of the State. The Christians

were thereupon tolerated, and put into Possession of their Churches again, in the Year 1671. Father Verbiest taught the Emperor Mathematicks, and caused light Brass Cannon to be cast, which gained the Emperor great Advantages in his Wars, by which he became so much in Fayour, both with Prince and People, that Multitudes of Converts were daily made, and Verbiest wrote to Europe for more Missionaries, whereupon Lewis XIV. fent over fix lefuits from France, among whom was Le Compte, who refided in the Chinese Court many Years, and wrote the best History of that Kingdom which has been published. These Jesuits arrived at Nimpo in China, in the Year 1688; Verbiest being dead before their Arrival, they were presented to the Emperor soon after, who always kept some of them near his Person, who improved him so far in the Mathematicks, that he wrote a Book upon that Subject. Some of the Viceroys in the diffant Provinces, however, raised a Persecution against the Christians, in which they were countenanced by fome Tribunals, land it was as much as the Emperor could do so protect them; he advised them to be very circumspect in their Conduct, and give as little Offence as possible, or his appearing their Protector might endanger his Throne. 100 100 protection

The Encouragement the Missionaries received from the Emperor, brought over more of them from France; and the present French King Ledis XV. settled an annual Revenue of 9000 Livres a Year upon twenty of them that were sent to China and India. The Fathers Gerbillon and Bouret having cured the Emperor of an Ague, he gave them a large Sum towards building a Church, which they simished, and made it one of the sinest Temples in

that Part of the World

The Jesuit Missionaries were so complaisant to the Chinese Christians, in suffering them to retain the Worthip of Confacius, their Ancestors, the Heavens, &c. that they might have remained in China, and made Proselytes to this Day, if the Daminican and Franciscan Friars had not opposed this Practice, and charged the Jesuits with countenancing Idolatry, which creating great Feuds among the Fathers, they prosecuted one another in the Courts of China with great Violence, representing their Opponents

as disaffected to the Government, and several of them were imprisoned, and severely used by the Chinese Magistrates. At length both Parties appealed to the Pope. The Jefuits represented, that unless they complied with the Chinese in these Articles, the Christians would infallibly be expelled the Country; and infifted, that thefe Compliances were very innocent; that it was not intended to pay divine Honour to Confucius, when they prostrated themselves before his Image, but only to pay their Respect to him as a Legislator: That the Libations and Ceremonies observed before the Images of their Parents. only expressed the Veneration and Affection they had for their deceased Relations; and this they procured the Emperor of China to certify the Pope: Whereupon his Holiness deputed the Cardinal de Tournon his Vicar in China, with full Authority to examine and determine this Matter. The Cardinal having admonished the Missionaries to lay aside their Animosities and Disputes, which had given great Scandal to the Infidels, as well as to those who had been converted to Christianity, he decreed and commanded all the Missionaries, especially the Jesuits,

1. THAT in their Writings and Sermons they should disapprove and condemn only such Doctrines and Customs of the Chinese, as were inconsistent with the Christian

Faith.

2. THAT they should declare, that the Offerings made by the Chinese to Heaven, the Moon, and other Planets, to Spirits and Inventors of Arts, were only due to God, the Creator of all Things; that they should condemn particularly the Offerings to Confucius, and the Adoration of the Pictures of deceased Men, as inconsistent with the Service of the true God, and with the Declaration of the Pope, the infallible Guide of the Christians, in all Matters that concern Religion.

Signed,

Dated at Nanlin, 28 January, 1707.

CHARLES,

Patriarch of Antioch, Cardinal, &cc.

The Jesuits and Missionaries of other Orders continued to wrangle on these Heads, until the Year 1720, the Jesuits being all the while caressed at Court, while the others were thrown into Prisons, and severely persecuted. At length a Deputation being sent to the Pope, to know if he would admit of no Alteration in the Decree of Cardinal de Tournon, Cardinal Messarba, titular Patriarch of Alexandria, was sent over with the Pope's Answer; but the Jesuits so managed Matters, that he was not permitted to see the Emperor for some Time, and could only read the Answer of his Holiness to the Mandarins, who were sent to receive it; the Tenor whereof follows:

I. THE Missionaries may tolerate in private Houses, the Use of Tablets, containing only the Name of the dead Person, putting on the Side of it a convenient Explica-

tion.

2. THEY may tolerate all the Chinese Ceremonies towards deceased Persons, which are not superstitious, but

merely civil.

3. THEY may render to Confucius a Worship merely civil, adding a convenient Explication; and it may be lawful to light Candles, burn Incense, and offer Meat, by way of Oblation, before the Tombs, or the dead Bodies themselves.

5. THEY may permit Tables to be fet with all manner of Meats and Fruits before the Tombs of the Deceased, as a civil Honour and Act of Piety towards them, without observing any superstitious Rite.

Signed,

CA. Alexandrinus & Legatus Apostolicus.

THE Mandarins thereupon declared, that the Emperor would be fatisfied with this Answer; but Suarez, the Jesuit observed to them it was all a Trick, for the Words, This is the Seat of the Soul of the Deceased, were to be omitted; however the Jesuits and Mandarins being of another Opinion, the Answer was translated, put in Writing, and carried to the Emperor.

ON

On the twentieth of November 1720, the Legate was admitted to an Audience, and directed to appear in the fame Ecclesiastical Habit he wore in Italy; but the Emperor presenting him with his own Robe at the Audience, he put it over his European Habit, and after an Entertainment, at which the Emperor gave him a Glass of Wine with his own Hand, he proceeded to ask the Legate several Questions, particularly whom those Pictures reprefented, which the Missionaries brought from Europe? He answered, they might be the Pictures of the Lord Jesus, the Bleffed Virgin, or of some Saints or Angels; but why, fays the Emperor, do you put them on Wings? This is what the Chinese can't understand: It is absurd to give Wings to Men. The Emperor then taking up three Pieces of Silk off the Table, one white, the second red, and the third yellow; and addressing himself to the Assembly, faid, If any one should maintain that the red was white, or the white yellow, what would any of you think of it? Intimating, that the Missionaries required them to believe Inconfiftencies, in their pretended Explanation of the Chinese Rites, as well as in the Doctrines they taught: The Legate answered, Christ being ascended to Heaven had constituted the Pope and his Successors his Vicars on Earth, to determine Controversies; and that Clement II. enlightened by his Spirit could not be deceived. The Emperor replied, Can the Pope judge of the Rites of China, which he has never had any personal Knowledge of, any more than I can judge of the Affairs of Europe? The Legate answered, He does not pretend to be a Judge of the Affairs of China, but of what Customs and Usages the Christians should be allowed to practise, and what ought to be prohibited, as inconfistent with Christianity.

The Emperor told the Legate that he had tried to unite all the Missionaries of different Nations, Portuguese, French, Italians and Germans; but they were always quarrelling among themselves, and even the Jesuits could not agree together; he was surprized at their Dissunion, as they all professed to propagate the same Religion. And he wondered the Pope could give any Credit to them, since some affirmed what the other denied: From such contradictory Representations, how can the Pope take upon

him,

him, fays his Majesty, to judge of the Affairs of China? The Legate answered, he was affisted in his Determinations by the Holy Spirit, who never suffered his Holiness to err in religious Matters: His Majesty answered, I love your Religion much, I adore the fame God you do, and if there be any Thing you do not understand in our Rites, I will explain it to you; intimating again, that the Pope could be no Judge of them, for want of sufficient Evidence; adding, that the Decrees concerning the Chinese Rites, had not been made with a View to Religion, but were levelled purely against the Jesuits. At another Audience, the Emperor faid he should not suffer the Pope to determine any Thing concerning the Chinese Rites; that belonged to him, his Viceroys and Governors: And when Messabarba defired he might remain Superior of the Missionaries in China, he received no Answer to that, and the Emperor confirmed the Decree of the Tribunal of Rites, That no Europeans should for the future be suffered to propagate their Law, which he apprehended might produce fatal Effects: And the Legate was foon after infulted by the Mandarins in a most outragious Manner, for maintaining the Authority of the Pope's Bulls, and declaring his Determinations infallible; and feveral of the Dominican and Franciscan Missionaries were sent to Prison.

MESSABARBA however obtained the Release of the Prisoners, and then retired to Macao, where he resided six Months, and in the Year 1722 returned to Europe; about which Time the Emperor Kangbi died, and being succeeded by Yong Ching, the Missionaries were banished to Macao in the Year 1723, and their Churches

destroyed.

Some European Mathematicians, who were useful to the Court (that is, the Jesuits) were still suffered to remain at Pekin; but the Chinese Converts that resused to apostatise, and return to their antient Superstition, amounting to three Hundred Thousand Souls, as is computed, were used with great Rigour, particularly one of the Princes of the Blood, and his Family, were banished to the Desarts of Tartary, amounting to three Hundred of both Sexes. Other Converts were imprisoned, underwent the Bastinado, and other Punishments: But the Chinese

nese seemed to have had more Mercy on them, than Christians in this Part of the World have on one another, for sew of them were condemned to die for their Religion.

The Perfection of Cardinal Tournon, formerly the Pope's Vicar there, proceeded from the Jesuits themselves, who did not cease to accuse him to the Emperor, till they effected his Ruin; and, however the Jesuits may apologize for their Conduct in this, and other Instances of the like Nature, it appears that the late Pope Benedict confirmed the Decrees of his Predecessors against the Worship of Confucius, reproached the General of the Jesuits with the Practices of their Order, in China, and prohibited his sending any more Missionaries thither without his Leave; from whence, and some other Circumstances, it appears to me that the Jesuits have never been entirely expelled from China; but are suffered to make a Kind of half Christians still; that is, such as worship both Popish and Chinesian Idols; and this has given Birth to that Report,

that Christianity is again tolerated in China.

THE Popish Missionaries, though they are very ready to indulge their Converts in many Instances, yet insist peremptorily on their parting with all their Women but one; and that the Women should leave the Husband that entertains other Females; which may have checked the Progress of Christianity, as much as their Doctrine of Transubstantiation does; nor is it practicable, for the Laws of the Country will not admit of their putting away their Wives, unless for some very substantial Reason. Her Relations may demand Satisfaction, if he should attempt it; and what must become of the Children of the feveral Mothers in this Case? I am apt to think, that Christ and his Apostles were so sensible of the Confusion this must create in Families, that they never mentioned their parting with their Wives; though every one knows, that neither Jews or Gentiles confined themselves to one Woman in that Age: They only recommended the taking but one Woman, therefore, for the future. As to the Wife, fhe is in such Circumstances in this Country, that there is no Possibility of her parting from her Husband: He might reclaim her if the did, and punish her for eloping from him; he purchased her, and, no doubt, thinks

of the EAST-INDIES.

thinks he has as good a Right to her, as to the rest of his Goods.

THE Philippine Islands are situate in the Chinesian Sea. Part of the Pacifick Ocean, between one hundred and fourteen, and one hundred and twenty-feven Degrees of Eastern Longitude, and between five and nineteen Degrees of North Latitude, about one hundred Leagues South East of China. There are some hundreds of them, and feveral very large. The chief and the most Northerly of them is Manila or Luconia, situate between thirteen and nineteen Degrees of North Latitude, being about four hundred Miles long, and one hundred broad in most Places. The Capital of this Island, and of all the rest, is the City of Manila, situate on a Bay in the South-West Part of the Island, being two Miles in Circumference, furrounded by a Wall and other Works, a very commodious Harbour, but of difficult Access, on Account of the Rocks and Sands which lie before it; a Castle defends the Entrance.

.. THE chief Buildings are the Cathedral, Parish Churches and Convents; one of the Religious Houses is appropriated to the Support of Orphans, Daughters of the Inhabitants, who are provided for during their Lives: Or, if they chuse to marry, have a Portion of two or three hundred Crowns given them. Their Churches, Chapels and Altars are richly adorned, and their Procefsions on Holidays as splendid as in Spain. The College of the Jesuits here, as in most other Popish Countries, is more magnificent than any of the rest.

THE Writer of Commodore Anson's Voyage gives the following Description of Manila, and its Produce and Traffick.

THE Island of Luconia, or Manila, says that Gentleman, is esteemed healthful, and the Water in it the best in the World. It produces all the Fruits of warm Climates, and has an excellent Breed of Horses carried thither from Spain. It is well situated for the Indian and Chinese Trade; and the Bay and Port, which lies on the West Side of it, is a large circular Bason of ten Leagues Diameter, entirely Land-locked. The City of Manila,

which

which stands on the East Side, is large and populous; and at the Beginning of the late War was an open Place, only defended by a little Fort; but considerable Additions have lately been made to its Fortifications. The Port peculiar to the City is that of Cabite, which lies two Leagues to the Southward, and here the Ships employed in the Acapulco Trade are stationed.

THE City is healthfully fituated, and well watered, and has a very fruitful Country in its Neighbourhood; but it is fome Difadvantage to its Trade, that it is difficult getting out to Sea to the Eastward, through fuch a Number of Islands; here the Spaniards waste Abundance of Time,

and are often in great Danger.

THE Trade from hence to China and India confifts chiefly in fuch Commodities as are intended to fupply Mexico and Peru, namely, Spices, Chinele Silks, and Manufactures, particular Silk Stockings, of which no lefs than fifty thousand Pair have been shipped in one Cargo, with vast Quantities of Indian Stuffs, Calicoes and Chints, which are much worn in America, together with other fmall Articles, fuch as Goldsmiths Work, &c. wrought at the City of Manila by the Chinese, of which Nation there are not less than twenty thousand residing there, as Servants, Manufacturers, or Brokers. All these Articles are transported annually to the Port of Acapulco in Mexico: This Trade is not open to all the Inhabitants of Manila, But is restrained to the Convents of Manila, principally to the Jestits, being a Donation to support the Missions for the Propagation of the Catholick Faith. The Tonnage of each Ship is divided into a certain Number of Bales, all of the fame Size; and the Convents have a Right to embark fuch a Quantity of Goods on board the Manila Ship, as the Tonnage of their Bales amounts to.

The Trade is limited by royal Edicts to a certain Value; according to it should not exceed six hundred thousand Dollars, but it is known to amount three Million of Dollars frequently: It has been represented to the Court of Spain, that this Trassick is prejudicial to the Mother-Country, especially their Silk Manusacture; and that the Linen sent from Cadiz is much injured in the Sale, since the Chinese Silks coming directly to Acapulco,

can

of the EAST-INDIES. 1

can be afforded confiderably cheaper there, than any European Manufactures; and the Cottons from the Coast of Coromandel, make the European Linens a Drug in Mexico, and this Manila Trade renders both Mexico and Peru less dependent on Spain, and exhaufts those Countries of Silver which would otherwise be brought to Europe, and center in Spain. Whereas now the only Advantage arising from the Manila Trade, is the enriching the Jefuits, and some private Persons in those remote Parts of the World; and Don Joseph Patinho, the Spanish Minister, was so far convinced of this, that he had determined to abolish this Trade about the Year 1725, and would have permitted no Indian Merchandize to be brought into any of the Spanish Ports of America, except what were fent thither by the Register Ships from Europe; but the Jesuits found Means to divert the Court from putting that Project in Execution.

THE Trade between Manila and Acapulco is carried on by one (or two) annual Ships, which fail from Manila in July, and arrive at Acapulco about Christmas; and having landed the Cargo, return again towards Manila in March following, arriving there in June; and though there is often but one Ship freighted, yet there is always one ready for the Sea when the other arrives; therefore the Commerce at Manila is provided with three or four flout Ships, that if any Accident happens, the Trade may not be suspended, the largest of these Ships being little less than a first Rate Man of War, and the other are of twelve hundred Ton and upwards, and usually carry from three hundred to fix hundred Hands, including Paffengers, and have upwards of fifty Guns each, and these being all King's Ships, one of the Captains is stiled the General, and carries the Royal Standard at the Main-Top.

THE Ship fails from the Port of Cabite, the Port-Town to Manila, about the Middle of July, taking the Advantage of the westerly Monson, which sets in about that Time, and the Passage through the Channel called the Boccadero is so difficult, that it is sometimes the End of August before they get through it; when they are got clear of the Islands, they stand to the Northward of the

B

East, till they arrive in thirty Degrees, where they expect to meet with a westerly Wind to carry them over to Galifornia, in which Voyage they see no Land; not one Port or Road is yet found out between the Philippines and the Coast of California. The Ship never lets go her Anchor till she comes thither. This Voyage seldom takes up less than fix Months, and as the Ship is deep loaded, and crouded with People, it is difficult to imagine how they can be supplied with a sufficient Stock of fresh Water for fo many Months; and first it must be observed, that the Spaniards in the Pacifick Ocean do not keep their Water in Casks, but in earthern Jars, and taking in more Water than can be stowed between Decks, they hang the rest of the Jars all round the Outside of the Ship upon the Shrouds and Stays, which make a very odd Figure; but as it is impossible to take in Water for such a Number of People for three Months, much less for fix, by any Contrivance whatever, they depend upon the Rains which they constantly meet with between thirty and forty Degrees of North Latitude, and catch enough of it to replenish their Jars, by preparing Troughs, into which the Rain runs from a Slope contrived with Mats for that Purpose; and when the Voyage has proved longer than usual, they have filled their Jars feveral Times: Nor has this Method ever failed them, and they feldom lose many Men in this tedious Passage, unless they happen to be afflicted with the Scurvy; and I find it is the Opinion of the Writer of Lord Anson's Voyage, that if they stood further North, the Voyage might be performed in half the Time the Spaniards perform it; and then he proceeds to give a further Account of the Manila Ship.

HE fays, that having flood North until she meets with a westerly Wind, and run about one hundred Degrees of Longitude from Spirito Santto, they fee a Plant floating on the Sea, called Porra, a Kind of Sea Leek, when they believe themselves near California, and then stand to the South, and rely fo much on the Certainty of it that all the Ship's Company fing Te Deum on the Occasion, imagining all the Difficulties and Dangers of the Paffage to be over. They correct their Longitude on the Appearance of this Plant, before they come within Sight of

Land. After this they fail Southward, without endeavouring to approach the Coast, till they draw near the fouthern Extremity of California, in order to arrive at Cape St. Lucar, where they get Intelligence whether there are any Enemies upon the Coast, and if not, the Ship proceeds to Cape Corientes, and then coasts it along to Acapulco, where she arrives about the Middle of January usually, sometimes a Month sooner, and at other Times a Month later.

THIS is the fafest and most commodious Port on the Coast of Mexico, being a spacious Bason, surrounded by Mountains; but the Town is a most unhealthful Place, there being no Passage for the Air, and no fresh Water. It is deferted by the Inhabitants therefore, except at the Mart, when the Galeon is there, and then it is thronged with People, who come to purchase the Merchandize of the East. The Cargo being disposed of, the Silver and other Goods from Mexico are taken on board with the Passengers, amounting in all to about fix hundred People. The Captain then leaving Acapulco, fails in the Latitude of thirteen or fourteen Degrees till he comes in Sight of Guam, one of the Ladrone Islands; and that he may not miss it in a dark Night, Orders are given for making Fires on the high Land all the Month of June; here the Galeon meets with Refreshments, but makes no Stay; the Road of Guam being a very dangerous Situation: She continues her Course therefore to Cape Spirito Sancto or Samar, one of the Philippine Islands, where Signals are again made to inform him if there be any Enemy upon the Coast; and if there be none, he sails to Port Cabite, the Port to the City of Manila, and the Station of the Acapulco Ship.

THE Bulk of the People of Manila are of Chinese or Maylan Extraction, and there are some Blacks. The Spaniards, tho' least in Number, have the Government in their Hands. The adjacent Country is full of fine Plantations, Farms, and Country-Houses of the principal Inhabitants. Upon the Mountains, in the Middle of the Country, the People live in Tents and Huts, under the spreading Trees. The Plains are overflowed in the rainy Season, the Houses built upon high Pillars, and the Peo-

2

ple have no Communication but by Boats, during the Rains, which usually fall in June, July, August and September, and then are terrible Storms of Wind and Thunder. Earthquakes are frequent, the City of Manila has suffered several Times by them, and from the Volcano's which abound here, issue Torrents of Fire and melted Minerals. These are the Inconveniences we meet with, but the fair Season is usually exceeding pleasant.

THE Complexions of the several People who inhabit these Islands, are very different. The Blacks are as black as the Caffres of Africa, but differ from them in their Features and long Hair, and therefore are supposed to have been of Indian Extraction; and as they posses the mountainous and inaccessible Parts of the Country, it is conjectured, that they were the original Inhabitants, and

driven up thither by succeeding Adventurers.

THE Descendants of the Malays (Inhabitants of Malacca) are very tawny, the Chinese not so dark, and the Spaniards are pretty near the Colour of the Chinese. There is also a Nation of painted People, called Pintado's, who

colour their Skins like our Ancestors the Piets.

THE Natives are for the most Part of a moderate Stature, and their Features just, the Spaniards have taught them to cloath themselves except the Blacks, who only tie a Cloth about their Loins, and another about their

Heads, and usually go bare Foot.

RICE and Fish are most eaten by those who live near the Sea-Coasts, and the Mountaineers eat the Flesh they take in Hunting, and the Fruits of the Earth, which grow spontaneously in great Plenty. Their Liquor is Water, which they usually drink warm as the Chinese do. They have also Palm Wine, and spirituous Liquors distilled from the Juice of the Sugar-Cane, Rice, &c. They bathe twice a Day in cold Water, either for Health or Diversion, or both: Plays are another Diversion, and they are entertained frequently with Dancing and mock Fights.

THESE Islands are extreamly well situated for Trade; all the rich Merchandize of *India* is sent from hence to *America*, and the Treasures of *Mexico* and *Pera* are brought hither

hither annually, by which Exchange, it is faid, they

make a Profit of four hundred per Cent.

Few Countries enjoy a more fruitful Soil; the People in many Places live upon what the Earth produces fpontaneously, and the Surface of the Ground is exceeding beautiful; the Trees are ever green, and seldom without Fruit.

THEIR neat Cattle run wild in the Mountains, and are hunted as well as Deer, wild Hogs and Goats. Wax is fo plentiful, that they make no other Candles, and never burn Lamps. Their Bees are of feveral Kinds, fome of them very large, and make their Combs in the Woods, producing such Quantities of Honey as would almost sub-sist the Natives.

MEDICINAL and fweet Gums issuing from the Bodies of Trees are Part of the Produce: Serpents of various Kinds are found in these Islands; but the Fathers who relate that some of them are so large, they will swallow a Stag, Horns and all, furely do not expect to be believed any more than when they relate, that the Leaves of Trees are converted into Infects; but the last of these Stories may proceed from a Mistake, for 'tis certain that some Infects deposit their Eggs upon the Leaves of Trees, which are hatched there, as is the Case of the Cochineal Fly; and they might imagine that those Insects proceeded from the Leaf. Among their Birds are Parrots and Cocatoes, Fowls with black Bones, and the Bird Tavan, which lays a Number of Eggs in Trenches in the Sand, and leaves them to hatch there. The Saligan fastens her Nest to some Rock, as a Martin does against a Wall, which diffolving into a Kind of Jelly in warm Water, is esteemed delicious Food.

THEIR Fruits are Mangoes, Plantains, Bananoes, Cocoas, Tamarinds, Cassia, and the Cacao or Chocolate Nut, which has been brought over from Mexico, Oranges, Lemons, and all Manner of tropical Fruits. The Cinnamon and Nutmeg Tree have been planted here, but degenerate and are good for little.

A GREAT deal of good Timber and dying Woods grow in these Islands; and the Calamba, or Sweet-wood, a Kind of Cane, grows in the Moontains, which, if cut,

 \mathbf{B}_{3}

yields a Draught of Water, and is of great Service to the Natives.

FLOWERS and sweet Herbs grow wild here, but they do not cultivate them in their Gardens, and there are Abundance of Medicinal Herbs, as well as poisonous Plants, which frequently infect the Air, when they are in Brossom. The Camandag is so venomous, that with the Juice of it they poison their Darts and Arrows; there are also several Herbs which are Antidotes against Poison.

THE general Language spoke in these Islands is the Malayan Tongue, besides which every People have a Language peculiar to them. They write on Cocoa-Nut Leaves, with an Iron Stile; and Arts and Sciences have been introduced by the Spaniards, the Natives having nothing of this Kind to boast of before their Arrival.

ALL these Islands, except Mindanao and Paragoa, are under the Jurisdiction of a Spanish Viceroy, who has Governors under him in every other Island and Town of Consequence; and the like Courts are erected for the Trial of civil and criminal Causes, as in Old Spain.

THE Archbishop of Manila, the Bishops and their Commissaries determine ecclesiastical Causes as in Europe; but there lies an Appeal from them to the Pope's Delegate, who resides in one of the Islands. The Inquisition

also have a Commissary here.

The Chinese were formerly so numerous here, that they disputed the Authority of the Spaniards over them; forty thousand of them, it is computed, resided in and about the City of Manila; but the Spaniards compelled them to submit, and banished some Thousands of them, the rest were permitted to remain here to carry on their Manusactures; for they are almost the only Artificers. The Spaniards tolerate them in their idolatrous Worship, and suffer them to game, on paying to the Government 10,000 Crowns per Annum, for none are more addicted to Gaming than the Chinese, who will frequently hazard all they have in the World on the Chance of a Die. They are also much given to Sodomy, and did not imagine it to be a Crime, till the Spaniards punished them for it. Notwithstanding the Spaniards are represented as Sove-

reigns

reigns of these Islands, this must only be understood of the open Country and the Sea-Coasts, in which there may be three hundred thousand Souls; but these are not a tenth Part of the Inhabitants. The rest look upon themselves as a free People; every Mountain almost is possessed by a different Tribe, and make War upon one another; the Spaniards seldom intermeddling in their Quarrels: Their Arms are Bows and Arrows, and Lances or Spears, Broad Swords, and Tubes or Trunks, through which they blow poisoned Arrows, the slightest Wounds whereof are mortal, if immediate Remedies are not applied. They have Cane Shields also covered with a Bussalo's Hide, and a Head-Piece for defensive Arms.

THESE Savages, as the Spaniards call them, worship one supreme God, and their Ancestors, as the Chinese do, from whom most of them are descended; they worship also the Sun and Moon, and almost every thing they see, whether animate or inanimate, Groves, Rocks, Rivers, and one particular Tree, which they would esteem it Sacrilege to cut down, believing the Souls of some of their Friends may reside in it; and that in cutting the Tree they may wound a near Relation. Inflead of Temples they have Caves, wherein they place their Idols, and facrifice to them: Some beautiful young Virgin first wounds the Victim with a Spear, and then the Priests dispatch the Animal, and having dreffed the Meat, it is eaten by the Superitition prevails amongst them, they Company. have their lucky and unlucky Days, and if certain Animals cross the Way when they are going upon any Busineis, they will return Home, and go out no more that Day.

THE Men purchase their Wives here as in China, and the Marriage is performed by a Priestess, who facrifices some Animal on the Occasion; after which the Bride is led Home, and the Ceremony concludes with an Entertainment as in other Places. They marry in their own Tribe, and with their nearest Relations, except the first Degree; some of them are confined to one Wise, other Tribes allow a Plurality of Women, and Divorces for reasonable Causes on either Side. They bury their Dead

as in China, and do not burn them.

B 4

THE next Spanish Island to that of Manila is Samar or Philippina, between which and Manila is a narrow Channel, called the Strait of Manila, the North-East Point whereof is cailed Spirito Santto; the Island is near four hundred Miles in Circumference, the chief Town Cathalagan, governed by a Spanish Alcade. The Island of Sebu, which lies in ten Degrees South Latitude, is the Place where Magellan first set up the Spanish Colours; the chief Town, named Nombre de Dios, afterwards made a Bishop's See, has in it a Cathedral and several other Churches and Monasteries. The Island of Negros lies West of Sebu, and was so named because it is inhabited chiefly by Blacks. Mindanao lies the most southerly of any of the Philippine Islands, and is the largest of them except Manila, being near two hundred Miles in Length, and one hundred and fifty in Breadth. It is possessed by People of different Nations and different Religions; but the Mahometans, who are situate on the Sea-Coasts, are much the most numerous, whose Sovereign is stiled Sultan of Mindanao. Those who possess the Middle of the Island are called Hillanoons, and another Nation stiled Solognes, are fituate on the North-West Coast. The Air of this Island is not so hot as might be expected, being refreshed frequently by the Sea Breezes, and the periodical Rains, which lay the Country under Water. The Winds blow from the East, from October to May, and then turn about and fet westerly; next Month the Rains and Storms fucceed: At first there are not more than two or three Showers a Day; they afterwards come oftener with violent Hurricanes and loud Thunder, and the Wind continues westerly until November, during which Time they have fuch Storms that Trees are blown up by the Roots, the Rivers are overflowed, and they do not fee the Sun or Stars sometimes in a Week: About August the Air is very cool, the Rain and Wind are moderate in September, and in Ottober the Wind blows from the East again, and it continues fair till April and fometimes May.

MINDANAO, the Capital City, lies on the South Side of the Island, in one hundred twenty-two Degrees of Eastern Longitude, and fix Degrees odd Minutes North Latitude, near the Mouth of a River, and about two

Miles

Miles from the Sea; the Houses being built on Bamboo Pillars, fixteen or eighteen Feet above the Surface of the Ground, on Account of the annual Floods, when they have no Communication with one another but by Boats. The City is about a Mile in Length, built along the winding Bank of the River; the Sultan's Palace is supported by one hundred and eighty Trees, and has twenty Cannon mounted in the Front; and feveral of the Nobility have great Guns in or before their Houses. Large Ships cannot come up to the Town, there being scarce eleven Feet Water on the Bar, at the Entrance of the River. The Natives are held to be Men of a sprightly Genius, but very lazy and indolent, and will rather thieve than work; but none are more active when they find there is a Necessity for it; and there may be two Reasons for their lazy Difposition, one from the Heat of the Climate, and the other from the Tyranny of the Government, no Man being fure he shall enjoy what he acquires by his Industry. The Mindanayans are of a low Stature, and very flender, of dark, tawny Complexions, black Eyes and Hair, flat Faces, fhort Nofes, wide Mouths, and black Teeth, which they take Abundance of Pains to dye of that Colour; and they wear the Nails of their Left Hands almost as long as their Fingers, scraping and dying them with Vermilion.

THE Men have a haughty Mien, and yet are faid to be very complaifant to Foreigners, unless they are insulted, and then they seldom fail to resent the Affront, and destroy their Enemy by Poison or a Dagger, never hazard-

ing their Persons in a Duel.

THEIR Habit is a linen Frock and Drawers, and a small Piece of linen Cloth tied about their Heads; but they go barefoot: The Complexion and Features of the Women are better than those of the Men; but they too much resemble the other Sex, and cannot be admired for their Beauty; they wear a Frock like the Men, and a Piece of Cloth round their Waists; the Sleeves of the Frock being large, and coming down to their Wrists. Their Hair tied up in a Roll at the hinder Parts of their Heads. As for the Men their Heads are shaved all but a Lock that is left in the Middle of the Crown, like other Mahometans;

Mahometans; the Mens Beards are very thin, being pulled up by the Roots with Tweezers. People of Figure are cloathed in Silk or fine Calico, the Women go bare-foot as well as the Men; Bracelets and Rings adorn their Arms and Fingers. The Women are not reftrained from con-

verfing with their Countrymen or Foreigners.

THE Food of People of Condition is Flesh, Fish and Fowl of all Kinds, except Hog's Flesh, which the Mahometans never touch. The poorer Sort content themselves with Rice and Sago. Rice is the principal Part of the Meal with all of them: this they take up with their Hands, using neither Knives or Spoons; and the Meat, whatever it be, is boiled to Rags, that it may very easily be pulled to Pieces with their Fingers. They usually drink Water; but make a pretty strong Liquor with Plantains; they wash before and after every Meal, and bathe several Times a Day. Swimming is one of the chief Diversions of the Women, as well as the Men, to which they are used from their Infancy.

Upon joyful Occasions the Dancing Girls, as they are called, are sent for to divert the Company; but this Dancing consists only in skrewing themselves into lascivious Postures, and addressing their great Men with flattering Speeches. They have Plays and mock Fights also acted before them, and Hunting of wild Beasts is their principal rural Sport, in which their Women partake; but their Hunting is only driving the Deer and other Game into an Inclosure, from whence they cannot escape,

and then shooting at them.

MINDANAO is a fruitful Soil, well watered with Rivers, and their Mountains afford excellent Timber. Of the Libby, or Sago Tree there are large Groves; the Sago is the Pith of a Tree, which the Natives eat instead of Bread, and is frequently brought over to Europe, being so grained, that it is sometimes taken for a Seed. They have no Corn but Rice. Plantains, Guava's, Mangoes, and all tropical Fruits abound here; Cloves and Nutmegs have been transplanted hither, and appear fair to the Eye, but degenerate, and the Fruit is good for nothing, 'tis said; but if these Plants were cultivated, possibly they might equal those of the Spice Islands, which

which it would be worth the while of our *East-India* Merchants to make a Trial of, as they are under a Necessity of purchasing these Spices of the *Dutch* at extrava-

gant Rates.

HERE are no Beafts of Prey in this Island, but almost every other uleful Animal, fuch as Horses, Cows, Buffaloes and Hogs, with Bunches over their Eyes; here are also Snakes, Scorpions, and other venomous Insects; and the feathered Kind are the same as in Manila. The Malayan Language is generally spoken here, and the Mahometans have the Alcoran and Books of Devotion in the Arabick Language. The liberal Arts do not flourish here, they are forced to employ the Chinese to keep their Accounts for them; nor have they so much as a Clock or a Watch in the Country, but beat upon Drums every three Hours, that People may know the Time of Day. The only working Trades almost are the Goldsmiths, Carpenters and Blacksmiths, who perform their Work very well with the Tools they have, for the Smiths have neither Vice or Anvil, nor the Carpenters any Saws; but when they have split their Planks plane them with the Axe or Adze. Their Diseases are Fluxes, Fevers, and the Small-pox; and some are afflicted with a Kind of Leprofy, or dry Scurf, which covers the Body, and itches intolerably.

THE Religion of the Sultan, and those who inhabit the Sea-Coasts is Mahometanism; and the Religion of the Inland People is Paganism, differing from that of the Chinese. It is sufficient to observe also, that in allowing a Plurality of Wives and Concubines, the Mahometans of this Island imitate those of Turkey, only they allow their Women greater Liberties, suffering them to converse freely with their Acquaintance or Strangers: but 'tis faid they are so prejudiced against Swine's Flesh, that one of their great Men refused to wear a Pair of Shoes made him by a European, when he was informed that the Threads with which they were fewed were pointed with Hog's Briftles. They look upon themselves to be defiled, if they touch any Thing which belongs to a Hog; they durst not kill them, left they should be defiled by the Touch of the Weapon they make use of, which occasions these Animals to multiply fo fast, that the Island is over-run with them.

They are very glad to see the Europeans kill them; but must undergo several Ablutions or Washings, if they should happen to touch a Man that had eaten its Flesh.

THE Sultan of Mindanao is an absolute Prince, and his Throne hereditary; both the Persons and Purses of his Subjects are in his Power, and if he knows any of them abound in Wealth; he borrows it of them. He has one great Minister, in whom he lodges the Administration of the Government, both civil and military, to whom both Natives and Foreigners must apply themselves for Liberty to Trade. Their Wars are chiefly with the Mountaineers, who inhabit the Middle of the Island, with whom they are very cautious of coming to a general Engagement; but when the Armies are pretty near, they begin to intrench and cannonade each other, and will remain in the same Camp some Months, sending out Parties to make Incursions into the Enemy's Country, and surprize defenceless Their Arms are a Crice or fhort Dagger, and a Broad Sword, a Spear, and Bows and Arrows.

THE most considerable of the *Philippines* that have not been mentioned, are *Mindora*, South West of *Manila*; *Panay* and *Leyte*, which lie North of *Mindanao*, and the Island of *Paragoa*, which lies very near the North Part of *Borneo*, and is subject to one of the Princes of that Island.

THE Ladrone Islands, which Magellan touched at a little before he arrived at the Philippines, remain still to be described. Magellan, a Marine-Officer, who had served under Albuquerque, the great Portuguese General in the East-Indies, at the Reduction of the Cities of Goa and Ma-Jacca, being refused the trifling Addition to his Pay of a Ducat a Month, or rather seeing himself slighted by his Superiors, deserted the Service of Portugal his native Country, and applied himself to the Court of Spain, representing to them, that there was a Probability of failing to the East-Indies by the West, which would entitle the Spaniards to a Share in the fine Spices, if fuch a Way could be traced out. The Emperor Charles V. who was then upon the Throne of Spain, apprehending fuch a Voyage practicable, ordered five Ships to be equipt and mann'd with three hundred Men, of which he made Magellan Admiral, and the Fleet failed from Seville on the 10th of August, 1519. He stood over to the Coast of

Brafil,

Brefil in South America, and continued his Voyage to fifty-two Degrees of South Latitude, where he discovered a Strait which led from the Atlantick to the Pacifick Ocean, being about one hundred Leagues in Length, and in iome Places scarce half a League broad, which he pass'd through, and arrived in the South-Sea or Pacifick Ocean on the 28th of November, 1520, which Straits have ever fince been called by the Name of this Adventurer, the Magellanick Straits. From these Straits he sailed three Months to the North-West, without Sight of Land, but the Wind generally fair, and on the 6th of March 1521, discovered the Ladrone Islands, to which he gave that Name on Account of the thievish Disposition of its Inhabitants; they are also denominated the Marian Islands. Here he landed, and took in some Refreshments, and fetting Sail from thence, he arrived at Sebu, one of the Philippine Islands, where he fet up the King of Spain's Standard; and being come thus far in Search of the Spice Islands, he had the Misfortune to be killed in a Skirmish with the Natives of the Philippines, before he arrived at the Moluccas, or Clove Islands. Thus much it was thought proper to premise upon entering on a Description of the Ladrone Islands.

THESE Islands are situate in the Pacifick Ocean, in one hundred and forty Degrees of Eastern Longitude, and between twelve and twenty-eight Degrees of North Latitude. Guam or Ignana, the largest, is situate in thirteen Degrees twenty-one Minutes, North Latitude, seven thousand three hundred Miles West of Cape Corientes in Mexico, according to Dampier. The other Islands are, 2. Sarpanta. 3. Bonavista or Tinian. 4. Sespara. 5. Anatan. 6. Sarignan. 7, Guagam. 8. Alamaguan. 9. Pagon. 10. The Burning Mountain of Griga. 11. Magna. 12. Patas. 13. Disconocida; and, 14. Malabrigo. Guam is about twelve Leagues long, and four broad, lying North and South. It is pretty high champain Land, floping down towards the Coast. The East Side, which is the highest, is fenced with fteep Rocks, on which the Waves conftantly beat, driven by the Trade Wind. The West Side is low Land, in which are feveral little fandy Bays divided by Rocks.

THE Natives are of a good Stature, have large Limbs, a tawny Complexion, black long Hair, small Eyes, and

think

thick Lips, and are long visaged. They are sometimes afflicted with a Kind of Leprosy, otherwise the Country is healthful, especially in the dry Season. The Rains begin

in June, and last till October, but are not violent.

THE Island produces Rice and most tropical Fruits, and one Sort, which Dampier has named Bread Fruit, grows upon a Tree like Apples, and at its sull Bigness is as large as an ordinary Foot-ball; it has a hard thick Rind, and within a soft yellow Pulp, of a sweetest Taste; the Natives eat it instead of Bread, having first baked or roasted it in the Embers: It is in Season eight Months of the Year, and grows only in these Islands.

DAMPIER relates, that when he was there (about the Year 1700) there were not above one hundred *Indians* upon the Island, though he was informed there had been three or four hundred some Time before; and the Reason there was no more at that Time was, that most of them had burnt their Plantations, and fled to other Islands on

their being used ill by the Spaniards.

THEIR swift sailing Sloops, or slying Proas, are the Admiration of all that see them; the Bottom of the Vessel, or the Keel, is of one Piece, made like a Canoe, twenty-eight Feet in Length, built sharp at both Ends, one Side of the Sloop slat, and the other rounding with a pretty large Belly; being four or five Feet broad, with a Mast in the Middle. They turn the slat Side to the Wind, and having a Head at each End, sail with either of them foremost, and have never any Occasion to tack. Dampier computed they would sail twenty-four Miles an Hour. The Tide never rises above two or three Feet at this Island.

The Writer of Commodore Anson's Voyage relates, that they arrived at the Island of Tinian or Bonavista, one of the Ladrone Islands, which lies North of Guam, on the 27th of August, 1742, being situate in sisteen Degrees eight Minutes North Latitude, and one hundred and fourteen Degrees, sifty West of Acapulco in America. This Island is twelve Miles in Length, and six in Breadth, extending from the S. S. W. to N. N. E. The Soil is dry and sandy, and the Air healthful; the Land rises in gentle Slopes from the Shore to the Middle of the Island, interrupted

terrupted by Vallies of an easy Descent. The Vallies and gradual Swellings of the Ground, are beautifully diversified by the Encroachments of Woods and Lawns; and the Woods consisted of tall spreading Trees, celebrated for their Aspett or their Fruit; the Turf of the Lawns clean and uniform, composed of sine Trefoil, intermixed with a Variety of Flowers; the Woods, in many Places, open, free from Bushes, and Underwood, affording most elegant and ensertaining Prospects.

THE Cattle on this Island were computed to amount to ten thousand (I suppose he means Horned Cattle) all perfectly white except their Ears; besides which there were Hogs and Poultry without Number. The Cattle and Fowls were so fat that the Men could run them down, and were under no Necessity of shooting them. The Flesh of both is exceeding good and easy of Digestion, as well as that of the wild Hogs, which they took with the Dogs, a Party of Spaniards had brought into the Island just

before they arrived.

THE Fruits produced here are Cocoa Nuts, Guavoes. Limes, fweet and four Oranges, and Cabbages growing at the Tops of Trees; here were also Water Melons, Dandalion, creeping Porslain, Mint, Scurvy Grass and Sorrel, all which contributed to cure their Men of the Scurvy in a fhort Time, though they buried ten in a Dayat their first Coming thither. They had Fish in great Plenty also; but some of their Men being surfeited with them, they did not eat much Fish. They met with great Plenty of wild Fowl here, which reforted to two little Lakes or Pieces of Water in the Middle of the Island; but it feems, there is not one Rivulet or running Stream in it, though they have excellent Well Water, which lies near the Surface: There are no People refiding constantly on the Island of Tinian. It is a Plantation that serves to Supply Guam (where the Spaniards have a Town and Fort) with all Manner of Provisions.

THE Writer of the Voyage above mentioned, observes that there are above twenty of these Islands, if we count all the little Rocks above Water, and that on the Island of Guam. The Spaniards have two Castles on the Sea Shore, viz. St. Angelo, lying near the Road, where the Manila

Manila Ship usualy anchors, which is but a triffing Fortrefs, mounting only five Guns, and the Castle of St. Lewis, standing four Leagues North-East of St. Angelo. defigned to protect the Road where a small Vessel anchors that arrives here every other Year. Besides these Forts. there is a Battery of five Cannon on an Eminence near the Shore. The Spaniards have three Companies of Soldiers in the Island of Guam, about fifty Men in each; and the Natives are about four thousand Men: Sixty Years ago there were above fifty thousand of them upon the three Islands of Guam, Rota, and Tinian, and the rest were peopled in Proportion, but were deftroyed by a Kind of Plague about Sixty Years ago. Those that were left after this Misfortune in the other Islands, were all removed to Guam, which made Malecontents of many of them; and the Spaniards are so apprehensive of a Revolt, that they won't fuffer the Natives to have any Arms.

The same Writer in speaking of the Ladrone Sloops, or slying Proas, says, they will fail twenty Miles an Hour; and that there is usually six or seven Men in one of them, two of them sitting in the Head and Stern, who steer alternately, and the others are employed in trimming

the Sail.

IT is difficult to reconcile these two Accounts. Dampier relates, that there were one hundred Indians upon the Island of Guam, and thirty or forty Soldiers; and that there never had been more than three or four hundred Indians there; while the Writer of Commodore Anson's Voyage affures us there were one hundred and fifty Spanish Soldiers, and four thousand Indians upon the Island of Guam, when he was at Tinian; and that there had been fifty thousand on the three Islands of Guam, Rota and Tinian fixty Years before, which was but a little before Dampier was there. The Description of the Island of Tinian also has so much the Air of a Romance, that it is enough to make a Man suspend his Belief of some other Parts of the Relation. I am apt to think that the Spanish Serjeant, who was made Prisoner by Commodore Anson, was the Person who gave the Writer that Account of the Numbers of Indians and Soldiers in the Island of Guam, to deter the Commodore from making a Descent there.

CHAP.

CHAP. II.

Contains a Description of the Spice Islands, viz. the Moluccas, Banda, Amboyna, and Ceylon, with those that cover them.

HE Islands of the Moluccas are situated in one hundred twenty-five Degrees of Eastern Longitude. and between one Degree South, and two Degrees North Latitude; having the Island of Gilolo (near which Coast they lie) on the East, and the Island of Celebes or Macassar on the West, and the Phillippine Islands on the North, and are five in Number, viz. 1. Backian. 2. Mackian. 3. Motyr. 4. Ternate; and, 5. Tydore. Backian is fituate a very little South of the Equator, in which is a good Harbour, defended by a Fort, to which the Dutch have given the Name of Barnevelt; here is Plenty of Sago, and the tropical Fruits, and it formerly had Plantations of Cloves. Machian lies almost under the Equinoctial; the Land is very high, and of a pyramidal Form. It was once very fruitful in Cloves, and yielded the Dutch a greater Quantity than any of the other Islands; they have three Forts upon it, situate on inacceffible Rocks. Motyr resembles Machian in its mountainous Appearance, but is not fo large, and lies about half a Degree North of the Equator. This Island also formerly produced a great Quantity of Cloves, and is defended by a Fort on the North. Tydore lies a little North of Motyr, and is something more than thirty Miles in Circumference. Here is a pretty good Harbour, but the Entrance of it hazardous, on Account of a Chain of Rocks which lies before it. The chief Town is Tydore, ftrongly fituated, and well fortified by the Dutch after the Modern Way; but the chief of all the Moluccas is Ternate, which lies in one Degree of North Latitude, and is about twenty-four Miles in Circumference, the chief Towns being Gamolamo, Malayo, Tallaco and Tycone. The Fort of Tallaco is the first the Dutch built here, and after that the strong Castle of Orange.

THE Inhabitants of the Moluccas live chiefly upon Sago (the Pith of a Tree) made into Cakes; there is neither Corn or Rice, and scarce any Meat but Goats Flesh in these Mands. Their Liquor is Water, and the Milk of the Cocoa Nut, or Toddy, drawn from the Body of that Tree: Besides the Cocoa and Sago, here are Almonds, Oranges, Lemons, and other tropical Fruits; but their greatest Riches were their Cloves, which they bartered with other Nations for every Thing elfe they wanted. This Tree is like the way Tree, the Cloves grow in Clusters at the End contest Branches, where they hang like Bunches of Gragon, they are first white, then green, afterwards red, and when full ripe they turn brown. After they are gathered and cried in the Sun, they are almost black; nothing the sow under the Branches of these Trees, and a Franches Cloves laid in a Room, 'tis faid, will fuck up a Pail of Water, and thereby increase their Weight.

THE Banda, or Nutmeg Islands, are situate in the Indian Ocean, having the great Island of Ceram on the

North, and are five in Number, viz.

i. POOLOWAY is a most delightful Country, the Nutmeg and other Fruit Trees being cut into pleafant Walks thro' the Island, and form one beautiful Garden; but here are neither Springs or Rivulets; it is the rainy Season, which lasts some Months every Year, that supplies them with Water, that is preferved in Cifterns. The Dutch have a Fort on the East Side of the Island, called the Revenge, being one of the strongest Fortresses in India.

2. ROSINGEN is one of the smallest of these Islands, and I do not find there are any Fortifications

upon it.

3. GENAPI has the Castle of Nero for its Security, by which Mame the Island is frequently called. This Fort stands on a Plain, close to the Water-side; but being commanded by a rising Ground, about a Musket-Shor Distance from it, the Dutch have built another strong Fore on that Eminence, and on the East of them have a numerous Garison.

4. POLERON has not much Spice upon it, but is fortified to prevent other People settling so near the Mands that have Fruit. 5. BANDA.

5. BANDA, or Lanter, is the biggest and most Truitful of all the Nutmeg Islands. The chief Town of Lanter is situate on the Top of an inaccessable Rock; and the Dutch have improved the Strength of the Situation, by the Fortisications they have erected about it. Banda is about sixty Miles round; none of the rest are near so much: Several of them are Vulcano's, which occasion frequent Earthquakes, and Eruptions of Fire, and melted Minerals that run down like Torrents, and do a great Deal of Mischief to the Plantations as well as the Buildings.

AMBOYNA is not one of the Molucca Islands; but is now the only Country that produces Cloves, the Dutch having rooted them up in the Molucca Islands, and planted them here, where they can best defend their Possession of that Fruit. This Island is situate in one hundred twentyfix Degrees of Eastern Longitude; and in three Degrees forty Minutes South Latitude; one hundred Miles North-Welt of the Banda Islands, and a little South of the Island of Geram. Besides Cloves, it has plenty of most tropical Fruits and Fish, nor do they want good Water; but Flesh is very scarce here. Here is a quadrangular Fort, and other Works, in which the Dutch have a Garison of feven or eight hundred Men to defend the Approaches to this Island, which is esteemed the most profitable Government the Hollanders have in India, next to that of Batavia. They encourage no Plantations here but Cloves; on the contrary, they endeavour to render this, and the other Spice Islands as barren as possible, that they may depend entirely on their Masters; and that no Nation may find a Subfistence if they should invade them.

THE next Spice Island, and the only one where the true Cinnamon grows, is that of Ceylon, which I shall describe next, though it lies at a great Distance from the Spice Islands already mentioned, because it seems proper to give an Account of all the sine Spices together, and they are all subject to the Dateb.

CETLON is fituate between feventy-eight and eighty-two Degrees of Eastern Longitude, and between fix and ten Degrees of North Latitude, lying about forty Miles South-East of the Peninsula of the Hither India;

and is two hundred and fifty Miles long, and two hundred broad.

IT is for the most Part a mountainous Country, covered with Wood; but there are several fruitful Plains and Vallies, well watered by Rivulets. The most remarkable Mountain, which stands on the South Side of Conduda, the Name of the Northern Division, is by the Natives called Hamalet, and by the Europeans, Adam's Peak, being of a piramidal Form, only on the Top is a little rocky Plain, with a Print of a Man's Foot on it, near two Foot long, to which the Natives come in Pilgrimage once a year to worship the Impression, having a Tradition that their God Buddon ascended to Heaven from hence, leaving this Print of his Foot, which the Portuguese, when they possessed this Island, called Adem's Foot, and the Mountain Pico de Adam. In this Mountain rife the principal Rivers, which run into the Sea in different Directions. The largest of these is the Mavillagonga, which runs North-East of the Cities of Candy and Alatneur, discharging itself into the Ocean at Trincomale. These Rivers run with fuch Rapidity, and are fo full of Rocks, that none of them are navigable: The Rains, which happen when the Sun is vertical, encrease their Waters, and create Abundance of Torrents, which are not visible in the dry Season. The Air is for the most Part healthful, except near the Sea, and the North Part of the Island, where they have no Springs or Rivers; and if the Rain fails them, they are sure to be afflicted with Famine and Sickness. Their chief Towns are,

I. CAND Y, the Capital of the Island, is an open Town, without Fortifications, and yet almost inaccessible, being surrounded by Rocks, and thick Woods, that are impassable, except through some Lanes, which are senced with Gates of strong Thorns; and yet it appears, that the Portuguese made themselves Masters of Candy, and almost demolished it, obliging the King to retire to Digligyneur, sive Miles South-East of Candy.

is a great Port Town, has a good Harbour, defended by a Castle, and several Batteries of Guns. In this Castle resides the Governor, Merchants, Officers, and Soldiers

belonging

belonging to the East-India Company; and four thousand Slaves have their Huts between the Castle and the Sea. The Dutch have two Hospitals here; one for the Sick and Wounded, and another for the Orphans: As the Boys grow up, they are entered into the Sea and Land Service; and the Girls are married at twelve or thirteen Years of Age, and they have a Malabarian School for teaching the Indian Language.

3. NEGUMBO, another Port Town, is situate

about twenty-five Miles North of Columbo.

4. CHILAO, one of the best Harbours on the Coast,

lies twenty Miles North of Negumbo.

5. JAFFN APATAN, the Capital of the Province or Jaffnapatan, the Northern Division of this Island, is regularly fortified; for though there is no Cinnamon in this Part of the Island, the Dutch have fortified it all round, to prevent any other Nation sending Colonies hither.

6. TRINCOMALE is situate on the East Side of the Island, about eighty Miles South of Punta Pedra,

the most Northerly Promontory on the Island:

7. BATTACALAO is another Fortress, fifty Miles

South of the former.

THE Country Villages of the Natives are not divided into Streets, but every one encloses a Piece of Ground for himself, which he fences in, and twenty or thirty such Enclosures, lying pretty near together, are called a The Houses consist but of two or three Rooms on the Ground Floor, built with clay Walls, and thatched; they are not so much as white-washed, unless they can obtain a Royal Licence for it. People of Figure have a large Square in the Middle of the House, and a Bank or Sopha about it, on which they fit cross-legged at their Meals, and when they receive Visits. A Mat, two or three Stools, fome China-Ware, and Brazen Pots and Bowls, are the principal Part of their Furniture. Master of the House only has a Bedstead covered with Mats to lie on, without a Feather-Bed, Tester, or Curtains: As for the Women and Children they lie on Mats, about a Fire, which burns all Night; their Covering is only the Cloths they wear about them in the Day-Time. Their C 3

Their Fuel is Wood, which is fo plentiful, that every

body is at Liberty to cut what he pleafes.

Some of their Pagoda's, or Temples, are built with Stone, adorned with images both on the Infide and Out; but are wretched dark Rooms, having no Windows in them, but lighted Lamps, which, with the Heat of the Country, renders these Places excessive hot and stiffing: They sacrifice, and perform their Devotions therefore, in a Portico in the Front of the Temple. Besides the publick Pagoda's, every Man almost has a little Chapel in his Yard, not above two or three Foot square, in which he places the Idol he has most Veneration for, lighting Lamps, and strewing Flowers before it; and here he performs his Morning Devotions.

THE original Inhabitans, of whom the Body of the People confift at prefent, are called Cinglasses; besides whom there are a great many Moors, Malebars, Portuguese

and Dutch in the Mand.

The Natives are effected Men of good Parts and a pretty Address, grave, and of an even Temper, eat and sleep moderately, but lazy and indolent, which is the Case in most hot Countries. They are not given to Thieving, 'tis said, though addicted to Lying, which, to me, seems a Paradox; for a Man that will lie and deceive me, would not make much Scruple to cheat me. They are far from being jealous, or restraining their Women from taking innocent Freedoms.

THE Men are of a moderate Stature, and well proportioned, wear long Beards, and have good Features; they have long black Hair and black Eyes, dark Complexion, but not black as the Natives upon the neighbouring Continent of *India* are. They fit on Mats and Carpets on the Floor, but have a Stool or two for Strangers of Diffinc-

tion; the Vulgar are prohibited to fit on Stools.

Young Men of Figure wear their Hair long and combed back, but in a more advanced Age, Caps in the Form of a Mitre are worn. Their Dress is a Waistcoat of Calico, and a Piece of the same wrapped about their Waists, in which they put their Knife and Trinkets, and have a Hanger by their Side, in a Silver Scabbard; besides which they walk with a Cane or Tuck, and a Boy

carries

carries a Box with their Betel and Arek Nut after them, which they continually chew, as many do Tobacco

amongst us.

THE Women wear their Hair long without any Covering, and make it shine with Cocoa-Nut Oil, though this Oil has a very strong Smell with it, perhaps the Natives esteem it a Perfume, for Custom will bring People to like any Thing almost. The Women are dressed in a Calico Waistcoat, which discovers their Shape, and they wrap a Piece of Calico about them, which falls below their Knees, and does the Service of a Petticoat, and these are longer or shorter, according to the Quality of the Person that wears it; they bore Holes in their Ears, in which they hang such a Weight of Jewels, or fomething that refembles them, that you may put a Half-Crown through the Hole of their Ears; they load their Necks alfo with weighty Necklaces, which fall upon their Breafts, containing a great many Strings or Rounds of Beads, &c. Bracelets adorn their Arms, a great Number of Rings their Fingers and Toes, and a Girdle of Silver Wire and Plate furrounds their Waists; when they go abroad they throw a Piece of striped Silk over their Heads, which resembles a Hood.

THE, usual Salute here, is the Salam, that is, the carrying one or both Hands to their Heads according to the Quality of the Person they falute. The nearest Relations and Friends do not talk much when they visit, but sit filent great Part of the Time. Talkative People are in no

THIS Island produces Rice, the common Food of the Esteem. Inhabitants in all hot Countries: Of this they have feveral Kinds; one of them will be feven Months before it comes to Maturity, some six, and others sive between the Seed-Time and Harvest; that which grows in Water yields most, but the other is better tafted. Of this the Natives fow but little, but are at great Expence in levelling their Rice Grounds, and banking them about that they may hold Water. If they can find Water on the Top of a Hill, they convey it down into the Squares they have made from the Bottom to the Top, which looks like Stairs at a Distance. In those Parts of the Island where they have C 4

neither Springs or Rivers, as is the Case in the North, they preserve the Rain Water in vast Reservoirs, in the Time of the Monfons, and convey it gradually by Rills to their Fields and Gardens, until the Rice is almost ripe; and foon after, the Sun having exhaled the Water, and left the Fields dry, they begin the Harvest, treading out the Corn with Oxen and Buffaloes in the Field where it grew; they prepare a circular Piece of Ground of about twenty-five Foot Diameter, digging it a Foot and half deep, and the Women bringing in the Bundles or Sheaves of Rice on their Heads, the Cattle are driven round the Pit, tell they have trampled it out of the Straw, and then a new Floor of Sheaves is laid; half a Dozen Oxen will tread out fifty Bushels of Rice in a Day. When they enter upon Business of this Nature, they always pay their Devotions to some Idol, and beg a Bleffing on their Labours.

THIRE are several other Kinds of Grain, which they make Bread of the latter End of the Year, when Rice is scarce, particularly the Coracan, which is a very small Seed; this grows on a dry Soil, and will ripen in three or four Months. The Grain Tanna does not differ much from this, of which also they make Bread; but it is a very dry infipid Food. Of the Seed Tolla they make an Oil, with which they anoint their Bodies; and here I can't but observe, that in every hot Country almost, the Natives anoint their Bodies either with Oil or Fat.

THE Fruits this Country yields are the Betel Nut, of which they use to export great Quantities to the Coast of Coromandel, making a confiderable Profit of it, till the Dutch shut up all their Ports, and reduced them to a State

of Servirude.

THE Fruit Jack, of which they will fometimes make a Meal, is of a round Form, and as big as a Peck Loaf, covered with a green, prickly Rind, in which are enclosed Kernels, as big as Chesnuts, and in Colour and Taste not unlike them; they gather this Fruit before it is ripe, and being boiled it eats like Cabbage; they eat them raw also, when they come to Maturity. Another Fruit called Jambo tastes like an Apple, and is exceeding beautiful upon the Tree. They have Fruits also that resemble the European

European Plums and Cherries, and abound in Mangoes, Cocoa's, Pine Apples, Oranges, Citrons, and all Man-

ner of tropical Fruits.

THEIR Kitchen Gardens are well stored with Roots, Plants, and Herbs, and the Portuguese and Dutch have introduced almost all Manner of European Plants that grow in our Kitchen Gardens. They abound also in Medicinal Herbs, which they know very well how to apply, and

perform many notable Cures.

FLOWERS also of various Colours, and a delicious Scent, are found here, which grow spontaneously, but are never cultivated; however, the young People of both Sexes adorn their Hair with them. Among other Flowers, they have white and red Roses, as sweet and as beautiful as those of Europe, and a white Flower resembling Jassamine, which the King reserves for his own Use, no Subject being allowed to wear it. There is another Flower, which is observed to open about Four every Evening, and close again about Four in the Morning.

Among their Trees, the Tallipot is much taken Notice of, which grows very tall and strait, a Leaf of which will cover fifteen or twenty Men, and will fold up like a Fan; they wear a Piece of it on their Heads on a Journey, to skreen them from the Sun: These Leaves are so tough, that they make their Way with them through the Bushes and Thickets without tearing them, they serve the Sol-

diers for Tents to lie under in the Field.

THERE is a Tree called Ressule, a Kind of Palm, as high as a Cocoa Tree, from whence they draw a pleasant Liquor, but not strong; an ordinary Tree yielding three or four Gallons a Day, and when boiled, makes a kind of brown Sugar, called Jaggory; the Wood of this Tree

is black, hard and very heavy.

THE Tree of most inestimable Value to the Dutch, as it was formerly to the Arabs and the Portuguese, is the Cinnamon, which is found in no other Country, but grows commonly in the Woods, on the South-West Part of the Island. This Tree is of a middle Size, and has a Leaf of the Form of a Laurel Leaf. When the Leaves sirst appear, they are as red as Scarlet, and rubbed between the Fingers, smell like Cloves. It bears a Fruit like an Acorn,

Acorn, which neither smells not tastes like the Bark ? but if boiled in Water, an Oil swims on the Top, which fmells fweetly, and is used as Ointment in several Distempers; but as they have great Plenty of it, they frequently burn it in their Lamps. The Tree having two Barks. they strip off the outside Bark, which is good for little. and then cut the inner Bark round the Tree with a Pruning-Knife; after which they cut it long-ways in little Slips. and after they have firipped these Pieces off, lay them in the Sun to dry, and they roll up in the Manner we see them brought over. The Body of the Tree is white, and ferves for Building and other Ufes, but has not the Smell or Taske the Bark has. When the Wind sets off the Island. the Cinnamon, Groves perfume the Air for many Miles. out at Sea, of which we have incontestable Evidence; probably, it is at that Time of Year, when the Cinnamon Trees are in Bloffom.

THIS Island abounds in Elephants of a very large Size: they have also Oxen and Buffaloes, Deer, Hogs and Goats, and fome wild Beafts, with Monkies in Abundance; but they had neither Horses, Asses, or Sheep, till they were imported by the Europeans, nor have they any Lions, or Wolves; and here is an Animal in all Respects like a Deer, but not bigger than a Hare: The wild Elephants feed upon the tender Twigs of Trees, Corn and Grass, as it is growing, and do the Husbandmen a great deal of Mischief, by trampling down his Corn, as well as eating it, and breaking and spoiling his Trees. The Monkies have black Faces, and white Beards, very much resembling old Men. Alligators, or Crocodiles, abound here, and Serpents of a monstrous Size; but the Story of the Snake that swallowed a Stag with the Horns, does not deferve much Credit, especially, as Mr. Know, who relates it, had it by Hearfay, and never met with one above the common Size, though he refided in the Island twenty Years.

THEY are almost over-run with Vermin and Insects, particularly with Ants, which eat every Thing they come at, except Iron and other Minerals as hard. Their Houses are pestered with them; if a Dish of Meat is set down, it is immediately full of Ants: In the Fields they

raise Hills six Feet high, of a pure white Clay, so hard, that a Pick-Ax will hardly demolish them; and of this Clay it is that the Priests frequently form their Idols: These Insects are not long-lived; when they are full grown they have Wings, and sly up in such Clouds, that they intercept the Light of the Sun; soon after which they fall down dead, and are eaten by Fowls, who devour them also at other Times, or there would be no living at Quiet for them.

THE common Sort of Bees build in hollow Trees or in Holes of the Rocks; but there are much larger Bees, of a more lively Colour, which form their Combs upon the high Boughs of Trees, and at the Season for taking them, the Country People go out in the Woods and take their

Honey.

WHEN the Rains begin to fall, they are troubled with little red Leeches, which are not at first much bigger than a Hair: These run up Peoples Legs as they travel, for they all go bare-legged, and fixing themselves there, are not easily removed till the Blood runs about their Heels: The best Remedy against them, is to rub their Legs with Lemon and Salt. The Bite of these Creatures is so far from being attended with any ill Consequences, that this Bleeding is esteemed very wholesome.

THEIR Fowls are Geese, Ducks, Turkies, Hens, Woodcocks, Partridges, Pigeons, Snipes, wild Peacocks, and Parokeets, and a beautiful Sparrow as white as Snow, all but his Head, which is black, and a Plume of Feathers standing upright upon it; the Tail is a Foot long.

THE Natives make favoury Soups of Flesh or Fish, which they eat with their Rice; People of Condition will have several Dishes at their Tables, but they consist chiefly of Rice, Soups, Herbs and Garden-Stuff; they eat but little Flesh or Fish: Their Meat is cut into little square Pieces, and two or three Ounces of it laid on the Side of their Dish by their Rice, and being seasoned very high, gives a Relish to the inspid Rice. They use neither Knives or Forks, but have Ladles and Spoons, made of the Cocoa-Nut Shell; their Plates are of Brass or China Ware: The poor People have a broad Leaf instead of a Plate, and sometimes several Leaves sewed together with Bents,

Bents, where broad ones are not to be had. It is amazing to fee what vast Quantities of Rice an Indian will eat at a Meal, and it is no doubt much wholesomer Food than Meat in hot Countries. Water is their usual Drink, which they pour out of a Cruise or Bottle, holding it more than a Foot above their Head: Some of them will swallow near a Quart of Water in this Manner without gulping once. There is neither Wine or Beer made in this Country; but Arrack or Spirits they draw from Rice, and several other Ingredients.

NEITHER the People in high or low Life eat with their Wives. The Man fits down by himself and his Women wait upon him, and when he has done the Women and Children are allowed to eat. I should have taken Notice that they never eat Beaf, the Bull and Cow being

Objects of Adoration here.

THERE are no Wheel Carriages in this mountainous and woody Country, unless what belong to the *Dutch*, near the Sea-Coast. The Baggage is usually carried upon

the Backs of their Slaves.

THE chief Manufacture here is the Calico, or Cotton Cloths, which they fpin and weave; they make also Brass, Copper, and Earthen Vessels, Swords, Knives, and working Tools used by Smiths, Carpenters, and Husbandmen; Goldsmiths Work, Painting and Carving also is performed tolerably well, and they now make pretty good Fire-Arms.

Their foreign Trade may be traced up to the earliest Ages. They supplied Persia, Arabia, Egypt and Ethiopia, with their Spices before Jacob went down into Egypt, which is above three thousand Years since, as appears by the History of Joseph's being sold to the Ishmaelite Merchants, who were travelling with a Caravan cross Arabia to Egypt, with the Spices of India, of which the Cinnamon of Ceylon, that lies near the Coast of Hither India, was, no doubt, the chief: So profitable was this Branch of Trade, that all the Nations above-mentioned sent Colonies hither, whose Descendants were planted here when the Portuguese sirst visited these Coasts, as will appear when the History of the Spice Islands is further considered.

45

THE Portuguese Language is spoken upon the Coast; the Natives, however, have a Language of their own, which comes nearest to that spoken on the Malabar Coast; and there is a dead Language only spoke by their Bramins or Priests, in which the Books relating to their Religion are written.

THEY write upon the Leaves of the Talipot cut into Pieces of three Fingers broad and two Foot long, with a Steel Stile or Bodkin. They have long studied Astronomy, which they learnt from the Arabian Colonies, which fettled on the Coasts, and foretel Eclipses pretty exactly. They are great Pretenders also to Astrology, and by the Planets calculate Nativities, foretel future Events, and direct People, when will be the most lucky Days to enter upon any Affair of Moment, or to begin a Journey; and they find Men weak enough to be imposed upon, if they have been never so often disappointed. Their Year is divided into three hundred fixty-five Days, and every Day into thirty Pays or Parts, and their Night into as many; and they have a little Copper Dish, with a Hole at the Bottom of it, which being put empty into a Tub of Water, is filled during one of their Pays, when it finks, and it is put into the Water again to measure another Pay; for they have neither Sun-Dials nor Clocks.

As to Physick, every one almost understands the common Remedies, applying Herbs or Roots, according to the Nature of the Complaint, and they have an Herb which cures the Bite of a Snake; but there are neither Physicians or Surgeons amongst them, who make a Profession of this Science. As they abound in poisonous Herbs and Plants, so they have others that are Antidotes against them. Their Diseases are chiefly Fevers, Fluxes, and the

Small-Pox.

THE Natives worship God, but make no Image of him; however they have Idols, which are Representatives of some great Men that formerly lived upon Earth, and are now, they imagine, Mediators for them to the supreme God in Heaven. The Chief of these Demi-Gods is Buddou, who, according to their Tradition, originally came from Heaven to procure the Happiness of Men, and ascended thither again from Adam's Mountain already mentioned,

tioned, leaving the Impression of his Foot on the Rock. They worship also the Sun and Moon, and other Planets. Every Town has its tutelary Demon, and every Family their Houshould God besides, to whom they build Chapels. in their Courts, facrifice and pay their Devotions every Morning; but to the supreme God they erect no Temples or Altars. There are three Clusses of Idols, and as many Orders of Priests, who have their several Temples, and to which is states in Lands are appropriated. The God Buddou, already mentioned, is the chief of these subordinate Deities. and his Priests in the greatest Esteem, being all of the highest Class or Tribe in the Nation. They wear a yellow Vest and Mantle, their Heads shaved, and their Beards grow to a great Length. Their Disciples fall down on their Faces before them; and they have a Stool to fit on wherever they visit, which is an Honour only shewn to their Princes and Magistrates.

THESE Priests have no Commerce with Women, drink no strong Liquor, and eat only one Meal a Day, but are debarred from no Flesh except Beef. They are ffiled Sons of the God Buddou, and can't be called to Account by the Temporal Power, whatever Crimes they

commit.

THERE is a fecond Order of Priests that officiate in the Temples of other Idols; these are allowed to profess any fecular Employment, and are not diffinguished from the Laity by their Habit, but have, however, a certain Revenue. Every Morning and Evening they attend the Service of their Temples, and when the People facrifice Rice and Fruits, the Priest presents them before the Idol, and then delivers them to the Singing-Men and Women, and other Servants that belong to the Temple, and to the Poor that come to perform their Devotions, who eat the Provision: No Flesh is ever sacrificed to the Idols of this Class.

THE third Order of Priests have no Revenues, but build Temples for themselves, without any Election or Consecration, and beg Money to maintain them. Wednesdays and Saturdays are the Times they refort to the Temples; and at the New and Full Moon they offer Sacrifices to the God Buddou, and on New-Year's Day, in the Month of

March, they offer a folemn Sacrifice to him on a high Mountain, or under a fpreading Tree, which is effeemed facred. This Tree, according to Tradition, like the Chapel of Loretto, has travelled through feveral Countries, and passing the Sea, at length planted itself in this Island, under whose Branches the God Buddou used to repose himfelf; for the Truth whereof I will not answer, but certain it is, near this Place are the Remains of Temples hewn out of the Rocks, of such Magnitude and Workmanship, that the Natives believe they must have been erected by a certain Race of Giants they annually commemorate.

THE Figures of many of their Idols represent Creatures that never had a Being, partly human, and partly Fish, or some Quadruped; but those in the Buddon's Temples, are only the Images of Men sitting cross-legged in yellow Vests, resembling the Habits of their Priests. Before the Eyes of the Image are made it is not accounted sacred, but thrown about like a common Block; but when the Eyes are finished, it is esteemed complete, and becomes the

Object of Adoration.

AT the New Moon in July, annually, begins a folemn Festival, which lasts till the Full Moon, when forty or fifty Elephants, magnificently accoutered, march through the principal Streets of their Cities, followed by People resembling Giants, in Memory of that Race of Giants above-mentioned, who once inhabited the Earth, according to their Traditions; and after these come the Mufick and Dancing Girls, dedicated to their Temples. Then follows one of the Priests of the God Buddon, mounted on an Elephant of an extraordinary Size, and covered with white Cloth, and the richest Trappings, adorned with Colours, Streamers and Flowers. The Priest representing the Allout neur Dio, or the supreme God, another Priest holding an Umbrello over his Head, and on the Right and Left are two Priests of the inferior Deities, mounted upon These are followed by Hundreds of Ladies Elephants. of the first Quality with lighted Lamps; and the Generals at the Head of their Troops, with the Courtiers and Officers of State, close the Procession, making the Tour of the City once in the Day-Time, and once in the Night; and this is repeated every twenty-four Hours, from the New New Moon to the Full, the Intervals being spent in Feast ing, Singing, and Dancing, none following their Trades

or Business during the Solemnity.

THERE are great Numbers of Portuguese Christians in the Island, descended from the Proselytes made by the Popish Missionaries, while the Portuguese possessed the Island; there are also some Churches, which the Portuguese built near the Sea-Coasts, but none in the upland Country.

WHEN a Contract has been made by the Parents of the young Couple designed to be married, the intended Bridegroom fends his Spouse a Piece of Callico and a slowered Linen Waittcoat, and a Time is appointed for the Wedding, or rather the Husband's bringing Home his Wife, and he goes the Evening before with his Friends to her Father's, where he entertains the Bride with Sweetmeats, and the

best Provision he can get.

AFTER Supper they sleep in the same Room, and having dined at his Wife's Father's, the next Day a grand Procession begins to the Bridegroom's House; but nothing is faid of the Priest's repeating the Words of the Contract, or even bleffing the Marriage; one Reason whereof may be, that it is but a temporal Agreement. The Parties, after they have tried one another, are at Liberty to part, and take another Spouse; and this they will do several Times before they fix upon one they think proper to spend their Lives with; but as the Father gives a Portion with his Daughter, either in Money, Cattle, or Slaves, these, or an Equivalent must be returned with the Woman, and though a Man is allowed but one Wife at a Time, a Women frequently marries or cohabits with two Men, and these sometimes Brothers, and keep House together, which I take to be no more than some frugal Gentlemen do in Europe, i. e, keep one Mistress between them: It is faid also, that Parents seldom refuse to let a young Fellow lie with their Daughter, in Hopes of his marrying her, if it is likely to prove an advantageous Match.

WHERE a Man of Quality visits his Inferior, it is frequent for the Man of the House, after Supper, to compliment his Guest, with his Wise or his Daughter, to sleep with him, though it would be esteemed a Crime to offer

offer either to one that is his Inferior; and the taking a Man's Wife against his Consent, is so great an Offence, that the injured Husband is justified if he kills them both,

when he takes them together.

THE Women here make no Use of Midwives, and think it no Crime to procure Abortion; when a Child is born, a pretended Astrologer is fent for and confulted, whether it is like to prove fortunate, and if he is of Opinion it will not, after he has confulted the Stars, they expose the Child or drown it, or else give it to some Neighbour; for though it would be unhappy with the Parents, it may prove lucky to another, they pretend. When the Children grow up, they are called by the Name of the Family, or the Place where they refide. During their Minority the Parents call them by what Name they please, which they lose when they are grown

WHEN a Person dies, the Corpse is burnt; it is carried on an open Bier to the Top of some neighbouring Hill, and laid upon the Wood about three Foot from the Ground, then more Wood is heaped upon the Body to a confiderable Height; and if it be a Person of Distinction, an Arch is erected over the Pile, adorned with Flags and Streamers, and the Whole confumed in the Flames; the Ashes being afterwards (wept together, and furrounded by a Wall, some Days after, a Priest is sent for to the House of the Deceased, and a melancholy Dirge is sung, the Women of the Family letting loofe their Hair, crying and bewailing their Loss, which is repeated every Morning and Evening for feveral Days, the Male Relations standing by fighing and groaning, as if they would break their Hearts; but it is no strange Thing, however, to fee the Wife married again in a very little Time, the Laws not requiring the Woman to be burnt with her Husband, as on the neighbouring Continent of India. On the contrary, 'tis faid, that the Government of Ceylon exempts Widows from all Manner of Taxes.

THE Islands of Celebes or Macassar, Gilolo, Ceram, Bouro, and Bouton, lie near the Molucca and Banda Islands, and though they produce none of the fine Spices, are of great Consequence to the Dutch, who have subdued and fortified

fied them in order to defend their Possession of the Spice

Iflands.

CELEBES, or Macassar, lies under the Equinoctial, and on both Sides of it, being fituate between one hundred fixteen and one hundred twenty-four Degrees of Eastern Longitude, and between two Degrees North, and fix Degrees South Latitude, and is five-hundred Miles long, and for the most Part two hundred Miles broad. The Air is hot and moist, the rainy Season lasting the greatest Part of the Year; but then the Mornings usually are fair. During the Rains there are innumerable Torrents tumbling from the Hills. At other Times there is but one navigable River, running from North to South, and difcharging itself into the Bay of Macassar, running under the Walls of that City.

MACASSAR is a larrge Port Town, the Capital of the Mand, situate on the South-West Part of it, confisting of spacious Streets, planted with Ever-greens. The Palaces and Mosques are built with Stone, the rest of Wood. It contained upwards of one hundred thousand Men, able to bear Arms, formerly; but fince the Dutch have subdued the Island, and monopolized the Trade, there are not half that Number here; the Dutch have a strong Fort garifoned with seven or eight hundred

Men.

JAMPADAN is another Port Town, about fifteen Miles South of Macaffar, one of the best Harbours in India, and the first Town the Dutch took from the Natives; here they funk or feized all the Portuguese Fleet when they were in full Peace with that Nation. The rest of the Towns and Villages lying in the flat Country near the Sea or the Mouths of Rivers, are for the most Part built with Wood or Cane, and stand upon high Pillars on account of the annual Flood, when they have a Communication with one another only by Boats.

THE Natives are of a middle Stature, and of a deep Copper Colour, their Features not very engaging, having very high Cheek Bones, flat Noses, and black Teeth, which are not natural, but a great deal of Pains is taken to make them fo; and they anoint themselves with Oil from their Infancy. Their shining black Hair they tie up in a Roll,

and

and a white Cloth or small Turbant about their Heads, and have fcarce any other Cloathing than a linen Cloth wrap-

ped about their Loins.

THEY are an ingenious People, and very brave, inspired with just Notions of Honour and Friendship, retaining such a Love of Liberty, that they long defended themselves against the whole Power of the Dutch, and were the last Nation in the Indian Seas that were subdued by them, after a very long and bloody War; and as the Men are brave,

the Women are remarkably chafte.

THEIR Princes and great Men wear a Vest, tied with a Sash, in which their Dagger is placed, their Knife, Crice, and other little Trinkets. People of Figure dye the Nail of the little Finger of the Left-Hand red, and let it grow as long as the Finger. The Women wear a Shift, or rather Waistcoat, close to their Bodies, and a Pair of Breeches, which reach down to the Middle of the Leg, made of Silk or Cotton, and have no other Head-Dreis than their Hair tied up in a Roll, with fome Curls hanging down their Neck; they throw a loose Piece of Linen or Muslin over all when they go abroad; nor have they any Ornaments but a Gold Chain about their Necks.

THEY are fond of a fine Equipage and a great Number of Servants to attend them, and if they have not fo many of their own as their Quality requires, they will not ftir out, till they have got the ufual Number, by hiring or borrowing them. The Furniture of their Houses confists chiefly of Carpets and Cushions, and the Couches they fieep on. They fit cross legged on Mats and Carpets, as

most Asiaticks do.

THIS Island produces most Animals except Sheep. There are Monkies in Abundance, that will fet upon Travellers; some of them are as big as Mastiffs, and a Man must be well armed to defend himself against them. They hunt in Packs, and will run down a wild Beast; they are afraid of nothing but Serpents, which frequently attack these Gentlemen, pursuing them to the Tops of the Trees, and wounding them. There are no Elephants in the Island, but they have a small Breed of Horses, on which the Natives ride without a Saddle, having a painted Cloth, without Stirrups, instead of it; a Cord serves inflead stead of the Reins of a Bridle, and a Piece of Wood for a

Bit. They ride also upon Oxen and Buffaloes.

BAMBOUS of a great Length and Thickness, and other Canes grow here; also Cotton Trees, Ebony, Calambac, Sanders, and other dying Woods and Timber, proper for building Houses, Ships, and Boats. The Pepper Plant also abounds here, as well as Rice, Sugar, Oranges, and the tropical Fruits; but of all their Plants, those that afford Opium are most cultivated; for of this they eat great Quantities, and no Country abounds more with poisonous Plants and Herbs, which afford a Liquor, into

which they dip their Darts and Daggers.

THE Natives don't scruple eating any Flesh but Pork, this no Mahometan will touch; but their Food is chiefly Rice, Fish, Herbs, Fruits and Roots; Flesh they eat but little of. Their chief Meal is in the Evening, they chew Betel and Arek, or fmoak Tobacco mixed with Opium most Part of the Day. Their Liquor is Tea, Coffee, Sherbet, or Chocolate, and they have Palm Wine, Arrack, or Spirits, which they sometimes indulge in, though 'tis prohibited by their Religion. They loll upon Carpets at their Meals, and eat off of Dishes made of China, Wood, Silver or Copper, which are fet before them on little low lacquered Tables; and take up the Rice with their Hands instead of Spoons, which they feem not to know the Use of.

Young Gentlemen here are taught to ride, to shoot, and handle the Crice and Scymetar; and particularly they are instructed how to blow their little poisoned Darts through a Tube, or hollow Cane, about fix Foot in Length; with these they engage their Enemies, and if they make the least Wound with these Darts, it is said to be mortal. Though these Weapons would not be much dreaded among People that are well cloathed; yet as the Natives engage naked, their Skins are easily penetrated, and the Poison operates so speedily, that it is difficult curing them. It is related of an Englishman who had killed one of the Natives, and was delivered up to the Officers of Jultice to execute, that the King shot such a poisoned Dart as has been mentioned, and wounded one of his Tocs, having agreed, that if the Europeans could fave him him afterwards, he should live; and though two Surgeons flood by and immediately cut off the Toe of the Criminal,

he expired immediately after.

THE King of Macassar was an absolute Prince before the Dutch subdued him, and usurped his Throne. Monarchs were succeeded by their next Brothers, and not by their Sons: The Forces of this Kingdom were a well regulated Militia; never chargeable to the Government, but when they were called out to actual Service. The Soldier carries a light Shield made of Cane, and covered with a Buffaloe's Hide, and he has a Sword, Dagger, and Sampit (the Tube above mentioned) which serves instead of a Spear, being armed with a Dagger like a Bayonet at the End of it, so that when he has used it as a missive Weapon, and discharged the poison'd Dart thro' it, he ftands firm, as a Pike-Man, ready to defend himself, or advance towards the Enemy.

There are no written Laws in this Country, but what are to be met with in the Alcoran. The Judges, or Cadis, who are Mahometan Priests, interpret them, and every Man pleads his own Cause; there are no Lawyers amongst them, and in several Cases, private Men are allowed to do themselves Justice; as in Adultery, Robbery and Murder of a Relation, where the Offender is taken in the Fact, they don't wait for the Judge's Sentence.

COTTON Linen is their principal Manufacture. Women are taught to spin and weave, and make their own and their Husbands Cloaths, as well as their Childrens. The Men make their Arms, Utenfils, and Instruments of Husbandry; there are no particular Trades that work for others, but every Family provide themselves with what they want, and they will imitate any thing they fee very

exactly.

MACASSAR had formerly a very great foreign Trade, supplying the Molucca's and Banda with Rice and other Provisions, and taking their Nutmegs and Cloves in Return, which they conveyed to India, Persia, Arabia and Egypt, and were by them distributed among the western Nations of Europe and Africa, before the Navigation round the Cape of Good Hope was discovered.

THEIR common Language is the Malayan Tongue, but the Alcoran and religious Books are written in Arabick; for the Religion of this People is Mahometanism.

The Island of Gilolo is situate between one hundred and twenty-five and one hundred and twenty-eight Degrees of East Longitude, and between three North and two South Latitude; the Islands of Molucca's lying very near the West Coast of this Island, for which Reason it has been strongly fortified by the Dutch, to prevent any other Nation approaching them, though there are no Spices growing here. The chief Town is Batochins, the Name by which the Island is frequently called, situate on a Bay of the Sea, on the South-West Part of the Island. The Climate, Soil, Produce, and Inhabitants differing very little from those of Gelebes, need no particular Description here.

CERAM is fituate between one hundred and twentyfix and one hundred and twenty-nine Degrees of Eastern Longitude, and in a Manner covers the Mands of Amboyna and Banda, where Cloves and Nutmegs are produced; which was the Reason the Dutch fortified this as well as Gilelo. The first Adventurers that visited this Island and those in the Neighbourhood of it, give out that they were Canibals, though the only Reason given for it was, that they retaliated the Cruelties that had been exercised on them by the Portuguese and Dutch, who came to take their Country away and enflave them, and particularly that they roasted some of the Prisoners, that fell into their Hands, alive. There does not appear to have been any Witness that ever faw them devouring human Flesh; but this was given out by those Invaders, for the same Reason the Spaniards accused the Americans of the same Crime, namely, to excuse their own Cruelty and Injustice.

BOURO and Bouton are two Islands that lie between Macassar and Ceram, which the Dutch also have fortified, in order to defend the Avenues to the Spice Islands.

It is now between three thousand and four thousand Years since this Part of the World hath been acquainted with the Spices of *India*, and perhaps longer. The first Time we read of Spices being brought from thence was, when Joseph was sold to the *Islamaelites*, who were travel-

ling

Fing with a Caravan of Camels cross Arabia to Egppt with Spices, among other Merchandize of the East. This was one thousand seven hundred and sive Years before the Birth of Christ, to which if we add one thousand seven hundred and sifty-sour Years since the Beginning of the Christian Æra, the whole makes three thousand four hundred and sifty-nine Years, since Joseph was carried into Egypt; and though this be the first sime we read of this Trasick between India and Egypt, it is very probable the Trade was begun several Years before, it not being mentioned as a Trade then newly begun: And yet the Islands where the sine Spices grow were never visited, or even known to the Europeans, until the Portuguese discovered the Way to India by the Cape of Good Hope, about two hundred

and fifty Years ago.

THE Necessaries of Life were common to all the World from the Beginning, but the fine Spices are only to be had in some small Islands in the Indian Seas; and tho' Spices may be reckoned among the Number of Superfluities, nothing has been more fought after on Account of their giving an agreeable Relish to our Food. The fearthing after them first promoted Commerce and Navigation, and brought one Part of the World acquainted with the other. This Trafick feems first to have been carried on, for the most Part, by Land, though it was necessary to pass some Straits and Arms of the Sea, before this Merchandize could be loaded on the Backs of Camels. The Ancients mult have had some Boats and Vessels in order to go over and people these Islands; and in the like Vessels they, no doubt, carried their Produce to the adjacent Continent, and traficked with their Mother-Country, in which Voyages they were feldom out of Sight of Land, and if they were at any Time, the Sun and the northern Stars were a Direction for them; they seldom went to Sea but in the fair Season, when the Heavens were clear, and when the Monfons or periodical Winds fat right for them, as they always do fix Months in the Year, in the Latitude of the Spice Islands.

THE Cloves and Nutmegs of the Molucca's and Banda were probably transported also by the Natives to the Island of Celebes or Macassar, which lies near them,

D 4 from

from whence they were transported to Berneo; and the Inhabitants of Borneo might carry them to Malacca on the Continent of India, which was but a little Distance from thence, and the greatest Mart for Spices in that Part of the World; from Melacca they might coast it along to Bengal, from whence the Caravans of Camels might take this Merchandize, and carry it cross the Hither India, Perhe and Arabia, which is contiguous to Erypt, and it might be transported over the narrow Strait of Babelmandel into Abysinia, or the Upper Ethiopia; for we find the Queen of Speba, the Severeign of Ethiopia, made a Prefent of the fine Spicies to King Solomon, which she might have also of the Phanician Merchants, who must sail close to her Coasts, in their Voyages to and from India: Or she might have Colonies in India herielf, as I am most inclined to believe she had, because the Natives of Ethiopia, and those of India are alike both in their Features and Complexion; and this Ethiopia lies more convenient for trading with India than the Country of the Phanicians. It is nearer to India also by the whole Length of the Red-Sea, which is not less than one thousand two hundred Miles, and the most difficult Part of the Navigation to India.

As Cinnamon grows only in the Island of Ceylon very near the Hither India, there was no Dissiculty in carrying that over to the Continent in the smallest Vessels, and then there are no Seas to cross between that and Egypi; and here it seems very evident that India and the remotest Islands in those Seas were planted very early, for it was not much above sive hundred Years after the Flood, before we hear of the sine Spices being brought through Arabia

from these Islands.

The Phanicians, the first great maritime Power, who were seated in Palestine, on the Shores of the Levant, and were Masters also of some Ports on the Red-Sca; observing what a Demand there was for these Spices in the West, ventured to send their Fleets as far as India, and brought the Spices and other rich Merchandize from thence all the Way by Water-Carriage; but it is probable they went no farther for them than Malacca, which was very early, the great Mart for those Goods: And indeed, this might well take up three Years, as they were forced to coast it along,

along, and they could only fail fix Months in the Year, when the Monfon was favourable for them. It is evident, that the *Phanicians* had used this Voyage before *Solomon*'s Time; for it is said, that *Solomon* defired the King of Tyre (the Capital of *Phanicia*) to send his Mariners to affift his People in the Voyage to *India*, because they had Knowledge of that Sea.

THE Navigation to India being better known fome Time after to all the Nations bordering on the Red-Sea, viz. the Egyptians, Ethiopians and Arabians, they fent Colonies to the Continent of India and the Islands, whose Posterity remained there, and continued to trafick with the Countries, from whence their Ancestors came, even to our Time. The Portuguese found them possessed of most of the Coasts both of the Continent and Islands of India, when they arrived there; which brings me to give an Abstract of the most remarkable Voyages and Expeditions to the Spice Islands, during the two last Centuries.

CHAP. III.

The first Voyage of the Portuguese to India, in the Year One thousand four hundred and ninety-eight.

N the Reign of Don Emanuel, King of Portugal, Vasco de Gama, his Admiral passed the Cape of Good Hope, and arrived at Calicut in India, on the 19th of May, 1498, where he was opposed by the Moors or Arabians and Egyptians, who at that Time monopolized the Trade of that Coast; however, upon his Return to Europe, the Portuguese equipped a more considerable Fleet, and made themselves Masters of several Places on the Continent of India. And in one thousand five hundred and eleven, Albuquerque, the Portuguese General, took the Cities of Goa and Melacca, after which he fent Antonius Ambreus in Search of the Spice Islands, who coming to the Molucca's, found the two Kings of Ternate and Tydore engaged in a War; most of the adjacent Islands being in an Alliance with the one or the other of them, and both of them courting the Friendship of the Portuguese, suffered them to build

Forts in their Territories, and establish themselves there, as they did foon after at the Banda Islands, monopolizing the Trade both of Cloves and Nutmegs, the Produce of those Countries. They enjoyed the sole Trasick to the Molucca's and Banda, until the Year 1520, when Magellan, being employed by the Spaniards to discover a Way to India, by the West, passed the Straits in South America, which go by his Name, and arrived at the Philippines, where happening to be killed, John Sebastian del Cano took the Command upon him, and fettled a Factory at the Clove Island of Tydore, and left one of his Ships there, while he returned in another to Spain, by the Way of the Cape of Good Hope, being the first Commander that ever furrounded the Globe; and as by Agreement between the two Nations, confirmed by the Pope, all the Discoveries Westward were allotted to Spain, as all the Eastern Discoveries were to Portugal, the Spaniards looked upon themselves now to be entitled to a Share in the Spice Trade; however, the Portuguese demolished the Spanish Factory upon the Island of Tydore, and made Prize of the Ship that was left there; which occasioning a Quarrel between the two Nations, the Portnguese at length agreed to lend the Spaniards, or rather Charles V. 350,000 Ducats to relinquish their Pretentions, which Sum was never repaid, and the Partaguese had the sole Trade to the Spice Mands afterwards, until Sir Francis Drake passed the Straits of Magellan, and arrived at the Island of Ternate on the 14th of November, 1579, when the King of Ternate, weary of the Tyranny of the Portuguese, defired his Protection, and acknowledged the Queen of England his Sovereign, and as a Tellimony thereof, fent her Majesty his Signet; and the Admiral having promifed to return again with a greater Force, and taken in a Loading of Cloves, set Sail for England, by the Way of the Cape of Good Hope, and arrived in England on the 3d of November, 1580, being the second Commander that surrounded the Globe.

THE Court of England neglected the Indian Trade, however, until the Year 1591, when the Captains Lancaster, Kendal and Raymond, were, in the latter End of the Reign of Queen Elizabeth, sent on a trading Voyage thither.

thither. Captain Lancaster, in one of the Ships, arrived in the Straits of Malacca, but lost his Ship in his Return Home, and the other two never reached India.

THREE other Ships were fent to China, commanded by Captain Wood, in the Year 1596, who carried a Letter from Queen Elizabeth to the Emperor of China; but they all died in the Voyage thither except four, who were cast away on alittle Island near Hifpaniola, and were murthered by the People of the Island.

THESE Misfortunes did not discourage the Merchants of London from making another Effort to begin a Trafick with the Indies; they formed themselves therefore into a Company, and were incorporated by Queen Elizabeth, by a Charter dated the 30th of December, 43 Eliz. 1600, Mr. Thomas Smith, Alderman of London, being their first

Governor.

Four Ships were thereupon equipped, having four hundred and eighty Men on board, and the Command of them given to Captain Lancaster, was constituted their Admiral, or General, as he was called; the three other Ships were commanded by Captain John Middleton, Captain Brand,

and Captain Hayward.

THEY fet fail from Dartmouth, April 22, 1601, and arrived at Achin, in the Island of Sumatra, June 5, 1602, where they took in as much Cinnamon, Cloves, and Pepper as they could meet with at that Port; and having delivered the Queen's Letter and Prefents to the King of Achin, the Admiral settled Articles of Trade with that Prince, from whence he went to Priaman, on the West. Coast of Sum tra, and took in more Cloves and Pepper. Then he proceeded to Bantam, in the Island of Java, and settled a Factory there; and having ordered a Vessel with Factors on Board to fail to the Molucca's and Banda Islands, and begin a Trade there, he returned to England, where he arrived, September 11, 1603. In the mean Time the Dutch began to trade with India, the City of Amsterdam fitting out four Ships in the Year 1595, which arrived at Bantam, in the Isle of Java, in June, 1596. Here the Portuguese inciting the Government of Bantam, to make some of the Dutchmen Prisoners that were on Shore; the Dutch made Prize of several Portuguese Vessels in the Harbour, bour, and fired upon the Town, after which they failed to Jacatra, now Batavia, a little to the Eastward of Bantam; and here having taken in a Cargo of Spice and other Merchandize, they returned to Holland in August, 1597, with-

out feeing the Spice Islands in this Voyage.

THE first Time the Dutch traded directly to the Spice Islands, was in the Year 1599; for having fitted out eight Ships, and given the Command of them to Admiral Neccius, in the Year 1598, he arrived at Bantam the Year following, where he loaded four of his Ships with Pepper, and the other four he fent to trade with the Molucca's, Amboyna and Banda, where they fettled Factories, and took in their Loading of Cloves, Nutmegs and Mace, and returned to Holland in the Year 1600. These Ships succeeded so well, feveral other Companies were erected in Holland, besides that of Amsterdam, and great Numbers of Ships were daily dispatched to India; whereupon the States foreseeing of what Advantage it would be to their Country, if they could monopolize the Spice Trade, formed them all into one Body, that they might be the better able to contend with fuch European Powers as should attempt to rival them in this Commerce. This was their grand Concern at that Time, and this we shall find they effected by most iniquitous Practices, and the most unaccountable Indolence and Folly in the Powers that were concerned to prevent it.

THEY proceeded therefore to raise a Stock of fix Millions of Florins (fix hundred thousand Pounds Sterling) fitted out strong Fleets for *India*, attacked the *Portuguese* Settlements there, and took their Ships wherever they met them, the Kingdoms of *Spain* and *Portugal* being at that Time united under one Prince, and consequently the *Portuguese* involved in that War the *Spaniards* were engaged in

with the Dutch.

THE Command of another Fleet bound to India was given to Admiral Neccius, in the Year 1602, who attacked the Portuguese in the Molucca's the following Year; but the Portuguese maintained their Ground at that Time. This did not discourage the Hollanders, who sent another Fleet to the Spice Islands, commanded by Admiral Van Hagen, in the Year 1605, who defeated the Portuguese, and reduced the Castle of Amboyna. They afterwards attacked the Fort belong-

ing

ing to the Portuguese in the Island of Tydore, and the Magazine of Powder blowing up, and destroying great Part of the Wall, the Besieged were under a Necessity of surrending it; but the Spaniards in the Philippines sitting out a Fleet, soon after recovered the Forts the Dutch had taken in the Molucca's again, and the War continued between Spaniards and the Dutch some Years afterwards.

In the mean Time the Dutch fent a Fleet of Men of War, with Land Forces on board, to the Banda Islands, requiring the Orancayas, or States of those Islands, to permit them to build a Fort on the Island of Nero; which the Bandanese refusing, the Dutch landed a Body of Troops, and massacreed great Numbers of the Natives, who finding it impossible to defend themselves against so formidable a Power, submitting to the erecting a Fort; but the Dutch insisting that they should exclude all other Nations from traficking with them, the Bandanese, under Pretence of a Treaty, drew the Dutch Admiral Varboos, and several of his Officers into an Ambuscade, where they fell upon them, and cut them off, sacrificing the Dutch to the Manes of their Countrymen, whom they had massacreed without any Provocation a little before.

And now the Bandanese and the Dutch being at open War, the English, who trading thither at that Time, and were one of the Nations the Dutch insisted should be excluded from the Trasick of those Islands, were called into the Assistance of the Natives against those Usurpers, and the Orancayas, or Governors of those Islands, made a formal Surrender of their Country to James I. then King of Great-Britain; and consequently the English having the most unexceptionable Title to those Spice Islands, that it is possible for any Power to have, the Dutch must ever be

looked upon as Usurpers by us.

THE Hollanders, not long before, had hindered Captain Middleton from taking in a Cargo of Cloves at Amboyna, and prohibited the Natives to trafick with any English Ships: By the same Authority they would have excluded us from Banda, that is, by Force, without any Colour of Right. Whereupon Captain Middleton sailed to Ternate, where the King seeming inclined to trade with him, the Dutch threatned his Ternatian Majesty that they would

would join his Enemy, the King of Tydore, if he did; affirming. That the English were Pirates and Robbers, and that the King of Holland was more powerful at Sea than all the Princes of Europe. To which the Captain answered, that the Dutch had been entirely ruined, and treated as Traitors and Slaves by the King of Spain, their Sovereign, if the Queen of England had not taken Pity of them, and skreened them from his Fury.

THE Captain, notwithstanding the Opposition of the Dutch, having loaded his Ship with Cloves, returned to England, where he arrived the 6th of May, 1606, bringing Letters from the Kings of Ternate and Tydore to King

Fames I. of which the following are Extracts.

THE King of Ternate, in his Letter dated 1605, obferves, That Captain Drake visited that Island about thirty Years before, in the Reign of his Father, and that his Father fent a Ring to the Queen of England, in Token of his Friendship, and that he lived many Years in Expectation of Captain Drake's Return, as he himself had done fince. In the mean Time, several other Nations had arrived there, who represented that his Majesty's Subjects came thither with a Defigh to usurp his Throne; though he was very fenfible to the contrary, and was exceedingly rejoiced on the Arrival of Captain Middleton: He acknowledged, however, that after waiting many Years for the Forces Captain Drake had promised him, and being out of Hopes of Relief from the English, he had been compelled to defire the Affiftance of the Dutch, against his ancient Enemies of Portugal, and that they had affifted him to drive them out of his Country, on his promising not to trade with any other Nation: That he readily confented to Captain Middleton's leaving an English Factory there; but the Hellanders would not admit of it: That, notwithstanding the chief Captain of the Hollanders infisting that he should have no Friendship with the English, nor have any Regard to his Majesty's Letters, if he pleased to fend thither again, his Subjects should be welcome, and as a Mark of his Friendship he had sent him a Bahar of Cloves.

THE King of Tydore, in his Letter to King James I. informs him, That the King of H lland's Forces had joined those

those of his antient Enemy, the King of Ternate, and that they had over-run, and plundered his Country, and were determined to destroy him and his Subjects. He desired his Majesty, therefore, to take Pity on them, that they might not be destroyed by the Kings of Holland and Ternate, to whom he had done no Wrong; and as great Kings were ordained by God to releave the Oppressed, he applied to his Majesty to preserve him from Destruction, and that he would send over Captain Henry Middleton, or his Brother, with whom he was well acquainted, with a Reinforcement of Troops; praying that God would enlarge his Majesty's Kingdoms, and bless his Councils.

CAPTAIN Keelyng, or board the Hettor, arriving at the Island of Banda, February the 8th, 1608, with the Leave of the Orancayas, erected a House for the Use of the Company's Factors, and agreed upon Articles of Trade with them. He did the like with the Orancayas of the Island of Pooloway, and received of them two hundred and twenty-five Cattees of Mace, and one thousand three hundred and feven Pounds of Nutmeg. The Dutch Admiral, Varboof, coming into Banda Road, foon after acquainted the Bandanese, that he was impowered by Count Nassau and the States-General, to treat with them, and required that he might build a Fort on the Island; which the Bandanese refusing, the Dutch landed one thousand two hundred Men, and killed many of the Bandanese; whereupon the People of the Island drew the Admiral and several of his Officers into an Ambuscade, as mentioned above, and destroyed them. The Dutch Vice-Admiral having landed more Men, laid Siege to the Town of Sabataca, and took it, and burnt feveral Bandanese Vessels he found there, and commanded Captain Keelyng to quit the Island; having made a Conquest of it, he said, and erected the Fort of Nassau for its Defence: Captain Keelyng, however, staid at Banda till he had taken in his Loading of Spice, after which he failed to Bantam, and having fettled a Factory there, he returned to England, where he arrived on the 10th of May, 1610.

Captain Middleton afterwards coming to the Island of Nero, the Dutch did not only oppose his dealing with the Natives of Nero and Lator, but were contriving to destroy

his Ship, which induced him to leave Nero, and fail to Pooloway, where he loaded his Ship with Nutmegs and Mace.

CAPTAIN Saris, who commanded a Ship belonging to the English East-India Company, coming to the Molucca's in the Year 1612, found the Dutch building Forts there, in order to exclude all other Nations from traficking with them.

THE Natives, however, came on board the Captain, and agreed to fell him a Quantity of Cloves, and fent their Boats loaded with Cloves, to the Ship: Of which the Dutch took fome, and threatened the Natives to cut them in Pieces if they brought any more. The Dutch, also, fent two Ships to lie close to the English Ship, to prevent any Cloves being brought on board of her, pretending, the People of the Island had agreed to fell them all they had for defending them against the Spaniards, and they looked upon the Natives as their Subjects, by Right of Conquest, and would not suffer any other People to deal with them. The Captain answered, he should continue to trade with the Natives as long as they would deal with him, and did not regard those idles Stories of Conquest and Compact, which were inconsistent, and continued still to take Cloves on board.

The Kings of Ternate and Tydore being still at War, the Prince of Tydore sailed by Captain Saris, with the Heads of one hundred Ternatians, among which was the Head of the Prince of Ternate, his younger Brother; and in the same Action, where these Ternatians were cut off, the King of Gilolo, his Confederate, was killed. This Prince of Tydore had a little before taken a Dutch Man of War, and sent a Compliment to Captain Saris, to let him know he designed him a Visit; but he appeared so enterprising a Prince, that the Captain was jealous of his Design, and to

avoid him, fet sail for Japan.

THE Orancayas of Pooloway, one of the Banda Islands, dreading the Tyranny and Cruelty of the Dutch, sent a Deputation to the English Factory at Bantam, in the Year 1615, desiring their Protection, to which the English Factors answered, that they durst not oppose the Dutch, without Orders from England: So exceeding cautious were our Merchants in India of quarrelling with the usurping Hollanders.

Ano-

ANOTEHR Instance of the Goodness of our East-India Merchants towards the Dutch, we have from Macassar, where Captain Courthope arriving in the Year 1616, a Dutch Ship fent her Boat on Shore with eight Men, who had been cut to Pieces by the Natives, if the English had not interposed and faved their Lives, the Hollanders having committed great Outrages near Macassar, on the Island of Celcbes, and taken several of the Natives Prisoners, among whom was one of their Sabandras or Governors. The next Day the Dutch Ship being in great Distress for Provision, was fending another Boat on Shore for Rice, at which the King of Macassar was so exasperated, that he commanded his Gallies to board the Boat, and they killed every Dutchman in it before they reached the Shore, which the English could not prevent, but the Dutch Ship being in a starving Condition, the English Commodore, Courthope, was so exceeding obliging as to supply them with as much Rice as they wanted; how these Kindnesses were returned, will be feen hereafter.

CAPTAIN Courthope departing from Macassar with two English Ships, viz. the Swan and the Defence, and arriving at the Banda Islands, December 13, 1616, the Orancayas of Pooloway and Pooleron entered into a Treaty with him, wherein it was agreed, That in Confideration of their being protected against the Hollanders, and annually supplied with Rice, Cloathing, and other Necessaries by the English, they should acknowledge themselves Subjects of the King of Great-Eritain; but before the Treaty was figned, the Captain demanded, if they had ever entered into any Contract with the Dutch, or made a Surrender of their Country to the Hollanders; to which they answered, they never had, nor never would; They knew the Dutch to be the greatest Enemies they had, adding, that before the Hollanders came into the Road of Pooloway, the Orancayas of Pooleron and Pooloway had made a voluntary Surrender of those Islands, into the Hands of Captain Richard Hunt, to the Use of his Majesty King James, and that the Orancayas of Pooloway had fet up the English Colours on the Fort which the Dutch shot down several Times, and were guilty of fuch reproachful Language towards that Prince and his Subjects, as none but Dutchmen would utter against a crowned

crowned Head, and a Nation to whom they understood they were infinitely obliged: That the Orancayas of Pooloway had defended that Island as long as they were able for the King of England; and when they could keep it no longer, they fled to Pooleron, and the adjacent Islands; but never submitted to the Hollanders. The Articles for transferring those Islands to the British Crown, were figned on the 14th of December, 1616, in which they agreed to fell the Produce of their Country, namely, Mace and Nutmegs, only to the King of England and his Subjects. On the other Hand, it was stipulated, that the Natives should not be diffurbed in their Religion, which was Mahometanism, or any Things practised that might reflect upon it: that their Women should not be meddled with; that no Swine should be kept in their Country; that their Goods should not be taken from them, or any one misused, nor any Thing done contrary to their Laws.

THAT if an Englishman chose to profess their Religion, it should be allowed; and if any of the Natives chose to profess Christianity, it should be permitted, so as it was done upon mature Advice and Consideration at a Council of both Nations: And at the Signing thereof, a Turf of Earth was delivered to the Commodore of the English Ships, as an Evidence of their Cession of their Country to the

King of England.

THE like Ceffion of the Islands of Rosinging and Wayre was made to the Crown of England by their Orancayas.

Some few Days after this Transaction, several Dutch Ships approached the Island of Pooleron, and taking down their Colours, hoisted a bloody Flag, as if they designed to attack the English Ships. The English thereupon landed several Pieces of Cannon, and erected a Battery which commanded the Road. Five or six Days after, three other large Dutch Ships arriving, the English shewed them the Cessions of the Islands above-mentioned to the Crown of England, and demanded that Pooloway might be delivered up to them. The Dutch were then so far from pretending to have a prior Grant of those Islands, that they acknowledged they had none. The Hollanders had, however, attacked the English Ships, if they had not discovered the Batteries on Shoar. They deferred discovering their hostile

stile Intentions, therefore, at that Time; but Captain Davis, who commanded the Swan, going over to the Island of Wayre, which was not then in the Power of the Dutch, two Ships of Holland poured in their Broad-Sides upon him, and took him after some little Resistance.

though they were then at Peace with England.

COMMODORE Courthope, after the Loss of the Swan. finding it impracticable to defend himself against the Dutch at Sea, landed the rest of his Guns, and erected a Fort on the Shore, believing he should be able to defend himself against the Dutch, till re-inforced from England or Bantam; but the few Men he had left on board his Ship thought fit to defert, and carry the Ship over to the Dutch; who plundered both Ships of every Thing that was valuable, throwing the rest over-board. Then they loaded the Men with Irons, imprisoning them in stinking Dungeons, and in Contempt of the English Nation, dunged upon their Heads; and here many of them perished in the Stench, while others were put in Cages, and shewn to the Natives, to whom the Hollanders declared, That the English were their Vassals and Slaves in Europe, where they frequently used them as they did these Prisoners, telling the Natives, that this was but a Trifle to the Punishments they intended to inflict for the future, on all that durst oppose them; and, indeed, nothing could be more barbarous than the Usage the English met with from the Dutch, who were obliged to this Nation, by all the Ties that Gratitude or Religion could lay upon them; such as none but the English would have tamely borne, or rather that mercenary Ministry that was then at the Head of Affairs, and whom the Dutch had the Forehead to declare, they had in their Pockets. Surely, the greatest Misfortune that can befal this, or any other Nation, is a felfish mercenary Ministry, that has no Regard to the public Welfare.

In this unhappy Situation, Captain Courthope dispatched Mr. Spurway, Factor to the East-India Company, to Bantam, with several of the Orancayas of the Banda Islands to represent the State of his Affairs to the Factory there; but they were not in a Condition to relieve him, whereupon Mr. Spurway wrote to the Company in England, entreating and conjuring them that they would have some Compas-

ficn

fion on their Servants, whom the Hollanders had imprifoned: That the Outrages they had committed might be fo refented in Europe, that the Dutch might be afraid to commit the like Villanies again; representing, that if a Reinforcement was not speedily sent to Pooleron, the English Name must undergo the greatest Disgrace in that Part of the World, and the Nation must suffer such a Loss, by being deprived of their Spice Islands, as could never be retrieved.

BESIDIS this Representation of Mr. Spurway, and the Bantam Factors, it may be proper to recite some Passages, in Relation to these Transactions, from Commodore Courthope's Journal: He relates, that the Hollanders offering to restore his Ships, on Condition he would abandon the Island of Pooleron, he answered, he could not give away the King and the Nation's Rights, and defert the Islanders, his Majesty's Subjects, without incurring the Guilt of High-Treason, and drawing the Blood of that People on his Head, who had thrown themselves on his Majesty's Protection; but if the Dutch would restore the Ships, with the Crews and Merchandize, and give Security that no Attempt should be made on the Islands, till the Right to them was fairly decided, he would leave the Islands. To which the Dutch replied, that they would force him out.

In March following, two English Ships came within Sight of the Fort of Peoleron, but were attacked by four great Dutch Ships before they arrived there, and after a smart Fight, which lasted seven Hours, were taken; but had not one of them been so loaden with Rice for the Bandanese, that she could not make use of her lower Tire, it might have been otherwise, especially, if a third English Ship, which came out with them, had not parted from

them a little before.

Ir is usual with the *Dutch* to deny that their Officers had any Authority from the Government to commit such Outrages. In answer to which, it appears, that their Generals and Admirals declared, they were commissioned by the States to take all Ships that approached the *Banda* Islands: And what makes it surther evident, is, that their Officers were never called to Account by their Superiors for

for what they had done, and that the Hollanders retain the Possession of these invaluable Islands, which they robbed the English of, to this Day.

In the late Engagement, there were several of the Bandanese on board the English Ships, who fought bravely, and feveral Times cleared the Decks of the Dutchmen; and many of them, as well as of the English, were maifacred in cold Blood after the Engagement.

NOTWITHSTANDING these Mistortunes, the Natives' still continued faithful to the English. The Orancayas of Lantor came over to Captain Courthope, and affured him they would endeavour to hold out another Year, in Hopes that some Ships from England would arrive to their Relief in that Time, though the Captain had now but thirty-eight-Englishmen left in the Fort, and no other Provision but Rice,

and fuch Fish as they could take on the Coast.

THE Commodore takes Notice in his Journal, that the Duich Officers boafted they had Copies of all English Commissions before the Company's Ships set fail from England, and they told the Bandanese, that they must never expect to enjoy any Peace, until they submitted to the Hollanders, for there was no Nation in the World able to contend with them; but ftill that brave People choic to hazard every Thing, and fuffer the most pinching Wants and Hardships, rather than submit to the Dutch: On the contrary, the Town of Lantor, which was flill in Possesfion of the Natives, being affaulted by the Hollanders, they were beaten off and forced to retire.

In another Part of Commodore Courthope's Journal, he fays, he had not only the Dutch Forces and many Mardships to contend with, but the Importunities of the English Sailors, who were perishing in the Dutch Prisons, and begging him to make Peace with their Tormentors on any Terms. That he fent a Flag of Truce thereupon to the Dutch, to represent the cruel and inhuman Treatment their Prisoners suffered, and sent them some Rice, Oranges, and fuch little Refreshments as he could spare, assuring them, that if any Thing less than the betraying the Interests of his King and Country had been required of him, he would not have failed to comply with them; but that he himielf was ready to fuffer, and to hazard every Thing, rather rather then abandon a People, who had put themselves under the Protection of the Crown of England, and to whom he had engaged himself in the solemnest Manner.

In the midst of this Distress, viz. on the 27th of January, 1618, the Captain received an Express from Sir Thomas Dale, Commander of a strong Fleet of English Ships, informing him, that he was arrived at Bantam, and had defeated the Dutch Fleet, and compelled them to quit the Coast of Java; that he would speedily be with him at Banda, and oblige the Dutch to do the English Justice.

THE Commodore, however, waited another full Year in Expectation of Succours, but received neither Intelligence or Supplies from Bantam or England. In this melancholy Situation, however, the Orancayas of Lantor, or Banda Proper, repeated their Cession of that Island to the Crown of England; for the Dutch pretended they had made an entire Conquest of it. The Natives, however, often attacked them with Success. The Hollanders had not the peaceable Possession of any one of the Banda Islands while the brave Courthope lived, and encouraged the Bandanese to defend their Country against those Invaders; but what a Shock must it have been to the Commodore and his little Garrison, after they had defended the Fort under all these Disadvantages for two Years, on which depended the whole Trade to Banda, to hear, on the 20th of March 1619, that Sir Thomas Dale, who commanded the English Fleet, was dead, and that the rest of the Captains, not agreeing amongst themselves afterwards, had dispersed to several Parts of India, and that by this unaccountable Conduct, seven of their Ships had been taken by the Enemy, and consequently the Fort of Pooleron had very little Expectation of being relieved? Mr. Courthope himself now began to look upon his Affairs as desperate, as appears by his Letter to the English President at Bantam, where he informs him, that he must long ago have furrendered for Want of Food, if a Portuguese Ship had not accidentally touched there, and furnished him with Rice; he pressed him therefore to fend him Supplies immediately, adding, God grant me well out of this Country, for the People have spent their Gold and Estates, and many of them lost their Lives or Liberties, in Expectation of English Succours. Can every

other Nation come into these Seas, and are the English only afraid to venture hither? You bid me rub on another Year, we have rubbed off the Skin already, I pray look to it. However, the Commodore resolved to maintain his Post to the last Extremity, and procured some Country Vessels to fetch him Rice from Macassar; he also repaired and improved his Fortifications, and fet fo good a Face upon the Matter, that the Dutch never durst attack him in his Fort: But, unfortunately for England, Mr. Courthope going over to one of the neighbouring Islands to regulate some Affairs, was met by two Dutch Vessels on the 26th of October, 1619, and having fought them bravely, was shot in the Breast, and after a little Pause, threw himself into the Sea, that he might not fall into the Hands of the Hollanders alive, as is conjectured, or possibly, he might hope to reach the Shore, as some of the Bandanese did, by Swimming, and escaped; but he was never heard of more: The Relation of this tragical Event may possibly draw Tears from many of his Countrymen; but furely, they ought rather to rejoice. that Britain has produced a Man of fuch confummate Virtue, whose Courage, Conduct, Fidelity and Patience were put to the severest Trial in his Country's Service, and that he never could be conquered while he lived: That he exposed himself to the greatest Difficulties and Dangers in the remotest Parts of the Globe, to stem the Encroachments of the ungrateful Hollanders, who, like a Torrent, were breaking in upon our Commerce. Surely, the Name of Courthope will ever be gratefully remembered by the English, and his illustrious Example induce others to imitate him, whom neither private Interest, or an elegant Retirement, to which his Friends invited him, could ever prevail on him to give up his Country's Cause, or abandon a People who confided in the Promises of British Aid. This he was fensible was the Crisis, when, if the English had exerted themselves in Defence of their Traffick, and their Empire at Sea, the Hollanders had never been able to have infulted our Coasts, as they did fome Time afterwards. The Spices are the Basis of their Trade, as they might have been of ours. The Silver Mines of Peru are not fo valuable to the Spaniards; for the Spices produce Treasure, without the Trouble of search-

E 4

ing the Bowels of the Earth for it, and with these the Dutch purchase most of the valuable Merchandize of Asia and Europe, setting what Price they please upon them, as

they have monopolized the whole.

In aggrandizing the Dutch, indeed, it is faid, we promoted our own Security; they are become a Barrier between us and some Popish Powers on the Continent: But had we been Masters of the fine Spices, we had needed no such Barrier. Power is usually an Attendant on Wealth, and if the Produce of the Spice Islands has rendered that little Bog, the Hollanders Country, so considerable, what a Figure might Great-Britain have made, if she had been Mistress of the same rich Produce? Besides, it may be demonstrated in many other Instances, that our Alliances with the Dutch have generally done us more Hurt than Good; how did they shrow the Burthen of the War upon us in the Reigns of King William and Queen Anne? And how did they stand by and see the British Troops cut to Pieces in the late War? If we had not depended upon them, we had

never suffered so much Disgrace.

But further, the Dutch are pleased to tell us, that the Spice Islands have been great Gainers, by coming under their mild Government: The Tranquillity to be met with there, is not to be parallelled; we hear of no Rebellions or Insurrections in those Islands: But this Tranquillity feems to refemble what we meet with in the Prisons of the Inquisition, where none durst speak or stir, for sear of awaking their merciless Persecutors to inslict new Tortures on them; for the Sufferings of the Bandanese, as well as the English, in that Part of the World, from our good Allies, have made fuch Impressions on that wretched People, as can never be defaced; fome they have massacred, others they have enflaved, and have extirpated more than twenty Nations in the Indian Seas, to aggrandize their petty State: Nor do we find, that the Natives are fo pacifick and infentible of their Wrongs in every Place, as has been represented. How many Conspiracies do they themselves relate that the Chinese and Javanese, in the Neighbourhood of Batavia, have exercised them with? How many of these poor People have they tortured and broke alive upon the Wheel, for Offences, as they call them,

them, Treason against those High and Mighty States, who have usurped the Dominion of their Country. If every Thing was called by its right Name, possibly it will be found, that the *Hollanders* are the real Traitors and Usurpers, who being admitted to trade with those distant People, constantly enslaved them.

To return to the Garrison, in the Fort of Pooleron: The brave Courthope having loft his Life in the Manner above related, Mr. Hayes, with the Confent both of the English and Bandanese, took upon him the Command, and two or three Days after intercepted a Dutch Packet, whereby it appeared, that a Treaty of Peace had been concluded between England and Holland, in relation to the Spice Trade, which Packet he fent to the Dutch Governor at Nero, that he might have no Pretence for committing any Acts of Hostility for the future; but the Governor laughed at it, and required the Bandanese to acknowledge themselves fubject to their State; which when the Natives refused, the Dutch hoisted a red Flag, and attacked the Town of Lanter, where they were a lecond Time repulsed, and pursued by the Bandanese, who cut many of them in Pieces.

In February, 1620, arrived a Dutch Fleet, with Land Forces on board, in order to make an entire Conquest of the Spice Islands. Mr. Hayes thereupon communicated the Treaties the Bandanese had made with England, ceding their Islands to the British Crown, to which the Dutch Admiral made no other Answer to the Messenger, than that he should be gone instantly, at his Peril; and upon the Orancaya's refusing to surrender the Town of Lanter to him, he stormed the Place, took it, and having plundered and massacred many of the Natives, laid it in Ashes. The English Factors, who were in the Place, he stripped naked, beat and abused them; and having tied them Hand and Foot, carried them on board his Ships, where they were laid in Irons. He then proceeded to feize the Effects of the English, confisting of twenty-three thousand Weight of Mace, and one hundred and twenty thousand Weight of Nutmegs, besides their Money, Cloth, and other Merchandize.

THE Dutch then proceeded to attack Pooleron, threatening the Natives, if they did not immediately furrender, they would have no more Mercy on them, than they had on the Inhabitants of Lantor. They answered, they were Subjects of the King of England; and as there was Peace between the two Nations, they hoped the Hollanders would not now commit any Acts of Hostility; but if the English neglected to defend them, they must submit; whereupon the Dutch took Possession of the Island, and made the Natives demolish the Fort and other Works in the Island, the English never offering to interrupt them, under Pretence that they durst not act in a hostile Manner, now the Peace was made. In the mean Time, the Hollanders compelled all the rest of the Islands to submit to their Tyranny, which when they had effected, they commanded the Natives to fell the English no more Spice, and fuch of the Orancayas, or Magistrates of these Islands, as had shewn the greatest Affection to the English, they cut to Pieces in cold Blood, under Pretence they were in a Conspiracy against these High and Mighty Hollanders. Thus an unlucky Peace was concluded with the Dutch, as Mr. Herbert observes, that was more destructive both to the English and Bandanese, than the most unsuccessful War could ever have proved; but this Treaty, by which the Dutch would have been great Gainers, if they had observed it, they broke through immediately after it was made: Such a Treaty as never would have been made but by a mercenary, corrupt Ministry; and it was not at last a Treaty between the two Nations, for they were not at War at that Time; but a Treaty between the English and Dutch East-India Companies, ratified by the Sovereign of each Nation, the English Ministry compelling the English Company to accept such Terms as they were pleased to dictate.

By this Treaty the English were to have but a third Share of the Trade to the Molucca's and Banda, but were to be at half the Expence, in defending that Commerce. It was agreed also, that each Party shold remain in Possession of the Towns and Forts they respectively possessed; but how this was performed, has been shewn already. The Treaty was signed the 7th, and ratissed at London on the

observing what an advantageous Bargain the Dutch had made for themselves, did not doubt their Design to perform their Part of the Contract; and therefore, as the Treaty empowered them, settled Factories in the Molucca's, Amboyna and Banda, to carry it on in the Proportion of Trade agreed on.

But the Dutch from the Beginning never intended to keep one Article of the Treaty, as is evident from the Outrages they committed at Amboyna, before three Years were expired, where they pretended that the English and Faponese were in a Conspiracy to seize one of their Forts at Amboyna, and tortured a Japonese and Portuguese in the English Service till they made them say what their Tormentors dictated to them, and then fending for Mr. Towerson, the Chief of the English Factory, charged him and the rest of the English Factors with a Conspiracy to seize their Fort; some of them they imprisoned, and others they loaded with Irons, and fent on board their Ships: they feized also all the English Merchandize, with their Books and Writings, as if the English had really been their Vasfals and Slaves, as they had represented them to the Indians.

AFTER this, they proceeded to torture the English Factors, both by Water and Fire, compelling them to swallow Water (or drown) till one Body was swelled as big as two, and the Water gushed out at their Ears and Nostrils, and their Eyes were ready to start out of their Heads. Then taking them down from the Boards they had fastened them to, and having made them bring up the Water again, if they did not say what was distated to them, they repeated the Torture.

OTHERS they burnt by Inches from the Foot upwards, to make them confess the pretended Plot; some had the Nails of the Fingers and Toes torn off, and in some they made Holes in their Breasts, ramming in Wild-Fire, and then set Fire to it; but were so merciful at last as to put them to Death. Mr. Clark and Mr. Thomson were so mangled that they were forced to be carried to their Execution, after they had lain five or six Days in a Dungeon, in that miserable Condition, where they would not suffer

a Surgeon

a Surgeon to come near them, their Flesh putrissed and bred Maggots, and their Wounds strenk to that Degree, that they were loathsome to themselves, and all that came near them.

Such of the unhappy Sufferers as could speak to be heard, declared in the most solemn Manner, that they knew nothing of any Plot, but were entirely innocent of

what the Dutch had charged them with.

THE Dutch, however, suffered some of the Factors to come to England (who made Oath of the Truth of the barbarous Proceedings) for which I can assign no other Reason than that the World might know how they had treated the English, their Allies, and might be deterred from visiting those Seas where the Spice Islands lie. It is observed, that the Governor of Amboyna, as Jezabel did formerly, proclaimed a Fast when he perpetrated this Villainy, and so far exceeded Jezabel, that he pretended to do all this in the Name of the Lord.

To the Narrative which was printed of this inhuman Proceeding, the English East-India Company annexed many convincing Reasons to shew the Improbability that their Factors should be egaged in any such Conspiracy.

As first, that the Dutch had a Garrison of three hundred Men in the Fort, besides the Burghers in the Town, and feveral other Forts and Garrisons in the Island, whereas the English and their Servants did not amount to twenty Men, and had no great Guns; finall Arms, or Ammunition to effect such a Design as they were charged with; nor was there one English Vessel in the Hurbour, whereas the Dutch had eight Ships riding near the Town: Then to what End should the Factors attempt to surprize this Fort, fince if they had taken it, they could never have maintained it with fo small a Party, against such Numbers of the Dutch, so well provided with Cannon, Arms and Ammunition of all Kinds? Nor could the Factors expect to be countenanced by their Principals in England, who had accepted of the Terms specified in the late Treaty, and there was not found one Paper or Letter when the Dutch broke open the Delks and Trunks of the Factors, which had any Relation to the pretended Conspiracy; from whence they concluded it was all a Dutch I'lot, to

expel the English from the Spice Islands, and monopolize that Trade, as was abundantly manifest, from their seizing the English Factories in the rest of the Mands immediately afterwards.

On the like Pretence of a Plot, they did about the fame Time put to the Torture one hundred and fixty two of the Natives of Pooleron at once, some of them dying under the Torture, and all the rest were executed by their Hangman, their Wives and Children being made Slaves of; and one of their Priests presuming to declare their Innocence, they ordered to be cut afunder in the Middle. If it be demanded again, to what Purpose should the Dutch be guilty of this Barbarity? Could they not have feized on the English Company's Effects, and expelled their Factors, or put them to Death, without torturing them, when they had fuch a Number of Castles and Garrisons in the Islands, and the English had not a Fort or Military Man amongst them, but lived in ordinary, defenceless Houses, dispersed over all the Island? The true and only Reason that can be imagined, as I have hinted already, must have been to deter the English and all other Nations from venturing into those Seas.

CHAP. IV.

Contains a Description of the Sunda Islands, with Captain Beckman's Ofinion concerning the Management of the Trade to Borneo.

HE Chief of the Sunda Islands are those of Borneo, Sumatra, and Java, fo denominated from lying near the Straits of Sunda. I shall enter first upon the Description of Borneo.

THE Island of Borneo, the largest in the known World, is situate in the Indian Ocean, between one hundred and feven and one hundred and seventeen Degrees of Eastern Longitude, and between feven Degrees North, and four Degrees South Latitude, having the Island of Celebes or Macassar on the East, and the Island of Sumatra on the West, being about seven hundred Miles long, and near

as much in Breadth; and as it lies under the Equinoctial. or near it, the Days are about twelve Hours long all the Year round, and never twelve and a half long in any Part of it. The Air must be hot, as the Sun is over their Heads great Part of the Year; but the Heats are rendered tolerable by the Rains, which continue more than half the Year, laying the flat Country under Water, and the Sea Breezes. which blow from the Sea most Part of the Day, contribute to make it cool. The Sea Coasts being annually flooded for several hundred Miles, on the retiring of the Waters, the Surface is nothing but Mud, or a fost Ouze, which the Sun fhining upon with perpendicular Rays, occasions thick Fogs that are not dispersed till Nine in the Morning, and the Frogs and other Vermin and Infects the Waters leave behind, being killed with the Heat, cause an intolerable Stink, and corrupt the Air. The cold chilling Winds alfo that succeed the hottest Days, contribute to render the Air unhealthful.

From September to April the Winds are Westerly here, and this is their rainy Season, when they have terrible Storms of Thunder, and scarce two Hours fair Weather in the four and twenty. The rest of the Year is their dry Season, but even then they have a Shower almost every Day when the Sea Breeze comes in.

This is a mountainous woody Country in the Middle, but the Coast is flat and level almost all round the Island, and overslowed in the Time of the Rains; and even in this Part are very extensive Woods of excellent Timber.

THEIR chief Rivers are, 1. Banjar. 2. Tatas. 3. Java.

4: Succadanea.; and, 5. Borneo.

The River Banjar is a fine River, rifing in the Mountains in the Middle of the Island, and running South, discharges itself into a Bay on the South-East Part of the Island, being navigable for several hundred Miles; the Banks planted with tall Trees ever green. The River Tatas falls into the Mouth of Banjar River, and is frequently called the China River, because the China Junks lie in the Mouth of it. The Rivers Java and Succadanea run from the North-East to the South-West, and fall into the Bay of Succadanea in the South-West Part of the Island.

THE River Borneo falls into the Bay of Borneo, in the North-West Part of the Island. The Tides in the River Banjar flow but once in twenty four Hours, and that in the Day-time; they never rise more than half a Foot in the Night (unless in a very dry Season) which is occasioned by the rapid Torrents, and the Land Winds blowing very strong in the Night-Time. There lie three Islands within the Entrance of the River, the first of which is covered with tall Trees, that may be seen at Sea, and are a good Mark for failing over the Bar. If a Ship be aground, the Ebb is so very strong, occasioned by the Land Floods, that fhe will run the Hazard of being broke to Pieces; and the Trees continually driving down the River, render the Navigation still more dangerous. The best Anchoring Place is a Mile or two within the River; it is best to fail up with the Flood, the Tide of Ebb runs fo strong. There are a great many fine Bays and Harbours on the Coast, but that most resorted to is at the Mouth of the River Banjar.

THE Natives of Borneo confift of two different People, that are of different Religions; those upon the Sea Coast are usually called Banjareens, from the Town of Banjar, to which most Nations resort, to trade with them. The Banjareens are of a low Stature, very swarthy, their Features bad, refembling most the Negroes of Guinea, though their Complexions are not fo dark; they are well proportioned, their Hair is black, and shines with the Oil with which they perpetually greafe it. The Women are of a low Stature and small Limbs, as the Men are, but their Features and Complexion much better, and they move

with a good Grace. The common People go almost naked; they have only a little Bit of a Cloth before, and a Piece of Linen tied about their Heads Their Betters, when they are dreffed on Days of Ceremony, were a Vest of red or blue Silk, and a loose Piece of Silk or fine Linen tied about their Loins, and thrown over their Left Shoulder. A Pair of Drawers they wear, but no Shirt, and their Legs and Feet are bare; their Hair is bound up in a Roll, and a Piece of Muslin or Calico tied over it; a Crice or Dagger in their Sash they THE

always carry when they go abroad.

THE Byayas or Mountaineers are much taller and larger bodied Men than the Banjareens, and a braver People, which their Situation and Manner of Life may account for, being inured to Labour, and to follow the Chace for their daily Food; whereas the Banjareens use very little Exercise, travelling chiefly by Water.

THE Byayes go almost naked, but not admiring their tawny Skins, paint their Bodies blue, and like all other People that live in hot Climates, anoint themselves with Oil, which smells very strong; and 'tis said, every Man of Figure amongst them, almost, pulls our his Teeth to place a Set of Gold Teeth in their Room; but this I can-

not believe, and think it wants Confirmation.

THE Banjareens are an hospitable, friendly People, where they are not abused, or apprehend Foreigners have a Defign upon their Liberties; they seem to be Men of good Sense, but, not being acquainted with the World, are frequently imposed upon in their Traffick with the crasty Chinese.

RICE is the chief Part of their Food here, as it is in other hot Countries, but with it they eat Venison, Fish, or Fowl, and all Kind of Meat almost, except Hogs Flesh; and Men of Figure are served in Gold or Silver Plate; the common People are content with Brass or Earthen Dishes. and all fit cross-legged upon Mats or Carpets at their Meals, and indeed almost all Day long, chewing Betel and Arek, or smoaking Tobacco, which both Sexes are very fond of when it is mixed with Opium. The whole Company ulually smoak out of one Pipe; the Master of the Feast having smoaked first, passes it round the Company, and they will fometimes fit smoaking so long, that they grow flupid. At other Times they divert themselves with Comedies, and the Chinese have taught them to game; their rural Sports are Hunting, Shooting, and Fishing. They have fuch Plenty of Fish, that they may take as many as will serve them a Day at one Cast, from their Houses, which are built upon Floats in their Rivers.

THEIR usual Salute is the Salam, lifting their Hands to their Heads and bowing their Bodies a little; and before their Princes they throw themselves prostrate on the Ground: No one presumes to speak to a great Man, till he is first spoke to, and required to tell his Business: They

ufually

usually travel in covered Boats upon their Rivers; but the great Men who live in the inland Country ride on Elephants or Horses.

THE Produce of this Country, besides Rice, already metioned, is Cocoa Nuts, Oranges, Citrons, Plantains, Melons, Bananas, Pine-Apples, Mangoes, and all Manner of tropical Fruits; Cotton, Canes, Rattans, and Plenty of very fine Timber; Gold, precious Stones, Camphire, Bezoar, and Pepper. There are three Sorts of black Pepper; the first and best is the Molucca, or Lout Pepper; the fecond is called Caytongee Pepper, and the world Sort is the Negaree Pepper; of which there is the greatest Plenty. This is small, hollow and light, and commonly full of Dust, and the Buyer will be imposed on if he buys it by Measure, and does not weigh it. He must take Care also, that the Pepper be not mixed with little black Stones, which are not eafily feen. The white Pepper grows on the same Tree that black Pepper does, and yet bears twice the Price: It is conjectured to be the best of the Fruit which drops of itself, and is gathered up by the poor People in small Quantities, before it turns black, and that it is the Scarcity of it which occasions it to be so dear; but I think we want a more fatisfactory Account of this Matter.

THERE are the same Animals here as on the Continent of India, viz. Elephants, Buffaloes, Deer, Gc. but the most remarkable Animal, and which is almost peculiar to this Island, is that monstrous Monkey called the Oran-Ootan, or Man of the Woods, near fix Foot high, and walks upon his hinder Legs. He has a Face like a Man, and not so ugly as some of the human Species, no Tail, or any Hair on his Body, but where a Man has Hair. Mr. Beckman, Captain of an Indiaman, purchased one of them, who would drink Punch, and open his Cafe of Brandy to get a Dram, if he was left alone with it, drink a Quantity, and then return the Bottle to the Cafe. He would lay himself down to sleep as a Man does: If the Captain appeared angry with him, he would whine and figh till he was reconciled. He would wrestle with the Seamen, and was stronger than any of them, though he was not a Year old when he died; for the Captain lost him as foon as

he came into cold Weather, having been bred in the hottest Climate.

Among their Minerals is Gold, which the Mountaineers get out of the Sands of their Rivulets in the dry Season, and dispose of it to the *Banjareens*, from whom the *Eugrpeans* receive it: There are also Iron Mines, and the Load-Stone

may be had here.

THE Merchandize the Europeans chiefly import from Borneo is Pepper, Gold, Diamonds, Champhire, Bezoar, Aloes, Mastick and other Gums; and the Goods proper to be carried thither, besides Bullion and Treasure, are small Cannon, from one hundred to two hundred Weight, Lead, Calimancoes, Cutlery Wares, Iron Bars, small Steel Bars, Hangers, the smallest Sort of Spike Nails, Twenty-Penny Nails, Grapplings of forty Pound Weight, red Leather Boots, Spectacles, Clock-Work, small Arms with Brass Mountings, Horse Pistols, Blunderbusses, Gunpowder and Looking-Glasses. The purchasing Gold is a profitable Article, and Diamonds may be had reasonably, tho' they are generally small ones: They purchase Gold usually with Dollars, giving a certain Number of Silver Dollars for the Weight of one Dollar in Gold.

Some are of Opinion, that the Trade to Borneo might be made as advantageous as that to any other Country of India; for here lies the China Fleet great Part of the Year, which will supply the Merchants with the Goods of China, upon as easy Terms almost as at Canton; and if it be considered how much longer the Voyage to China is, the Customs, Port Charges, the Extortions of the Hippo's or Custom-House Officers, we may deal with the Chinese to greater Advantages, perhaps, at Borneo than at China. Here the Europeans also meet with the Macassar Praws, which, notwithstanding all the Care the Dutch can take, still bring thither Cloves, Nutmegs, Mace, Gumbage, Cassia, Lignum Aloes, and many other Sorts of rich Merchandize.

CAPTAIN Beckman has given us the following Directions for the Management of this Trade to Borneo, and observes, in the first Place, that if Ships arrive there in the Beginning of August, it is Time enough to contract for the Purchase of the Pepper of the last Year's Crop, which is better

than

than the new Crop, because the Natives have had full Time to cure it, and it will not waste and lose so much in the Weight; he advises the Ships to anchor at Poolo Cocket, an Island at the Mouth of the River Banjar, and from thence send by a Country Boat to the Sultan of Caytongee, to acquaint him with their Arrival; for the Country would be alarmed by sending up the Pinnace before they had Notice of their Coming; and when the Natives come on board, it will not be prudent to shew any Fear or Distrust of them, by arming the Sailors; for if they suspect the Ship to be a Man of War or a Pirate, they will not trade, being a timorous Sort of People, that dread the least Appearance of Danger.

THERE will be always some of the Natives, who under Pretence of doing you Service in your Trade, will expect a Present, nor must they be neglected; but it will be adviseable to seed them with small Sums, from Time to Time, and keep them always in Expectation, and not give them too much at once. The greatest of their Officers or Noblemen are not assumed to accept sour or sive Dol-

lars wrapped up in a Piece of Paper.

WHATEVER Contracts are made, let them be drawn up fo clear as to leave no Room for Misunderstandings; and among other Things, the Merchant will do well to contract for a House in the Town of Tatas; to make a Warehouse of, for which they will make extravagant Demands, if the Price is not agreed on at first: And though a peaceable, quiet Behaviour be recommended, yet a Merchant cannot be too much upon his Guard; it will be better to fend two small Ships thither for that Reason, than one large one, they will be in a much better Condition to defend themselves, if any Difference should happen with the Natives, and two small Ships will be much sooner loaded than a large one; for one might lie at a Distance while the other goes up to Tatas to take in her Lading, it not being adviseable to trust your whole Force in their Power; and the fending down every Parcel of Pepper in the Country Boats, will take up a great deal more Time than the taking it on board at the Town.

CARE ought to be taken, that the Sailors are not too free with the Banjareen Women that bring Provision; and

though the House will be often crowded with People that come thither, under Pretence of Trade, this must be borne with, rather than affront them; but they must be watched very narrowly, for the Natives are a thievish Generation.

THE Chinese will carry it very civilly towards you, tho' they are Rivals in the Trade, and you ought in outward Appearance to be as civil to them; for you may purchase several Sorts of Goods of them to Advantage, which are

not to be had in that Country.

The Banjareers don't know the Value of European Goods so well as the Crinese, and it will be proper to ask twice as much as you design to take, for they will not bid a fourth Part of what you ask; and on the other hand they will frequently ask ten times as much for their Goods as they design to take, and there is no relying upon their Samples or Weights. They have learnt of the Chinese to be as great Sharpers as themselves, and, like them, think it no Disgrace to be detected in their Knavery.

THE Gum Dragant or Dragons Blood, which this Country produces, is in great Effeem; that which appears of the brightest Colour, after it is rubbed on Paper, is the best, and is fold at about forty Dollars the Pecul.

Canes are another Article the Europeans purchase here, and are fine small Joints, usually called Jambee Canes, an Hundred of which may be bought for four Dollars or Crowns. When the Natives come to sell Gold Bars, they must be cut through and touched, or you must expect a Mixture of other Metals with it. The Gold here, as in other Places, being taken out of the Sands or Rivulets, is sometimes mixed with Iron Dust, and is cleared of it by rubbing a Load Stone amongst the Dust in a Dish, the Iron Particles adhering to the Load-Stone. The highest coloured Gold is the best, when it has no Alloy.

The Bezoar Stone, called Monkey Bezoar, is fold for five Times the Weight in Silver; they weigh from a Penny-weight to an Ounce, and the best are of a greenish Hue; the largest are supposed to be Goat Bezoar. The Natives have a Composition, which resembles the right Bezoar. The Way to discover the Fraud, is to rub White Lead, Lime, or Chalk on a white Paper, and then rubbing the

Bezoar.

Bezoar, upon it, it will change the White Lead or Chalk to a greenish Colour, if it be right. The best Camphire also is produced here. The delicious Birds-Nests also are to be had at *Borneo*, where they are fold for one hundred Dollars the Pecul. Pepper is usually fold for four or five Dollars the Pecul.

THE Chinese keep Shops at Tatas, and are the only People that sell Goods by Retail here, particularly Silks, Chints, Calicoes, Beteles, and other Muslins; Tea, Drugs,

China, and Japan Goods.

The chief Town in Borneo was Banjar Massen, which once lay about twelve Miles up the River Banjar, and was built on Floats, or Rasts, in the River, but is now removed to Tatas, six Miles higher up the River; these floating Towns being removed with very little Trouble, the Reason of which Removal seems to have been for

Security against the Insults of Foreigners.

This floating Town forms one long Street, no House having more than one Floor, divided into Rooms, according to the Number of the Family; their Walls and Partitions made of split Cane, and their Roofs covered with Palm Branches, the Eaves reaching within five Feet of the Bottom, to shelter them from the scorching Sun. These Houses lie at an Anchor, and are fastened together with Hooks and Rings; but as they are subject to Fire, they are easily unloosed and set a drift, which saves the rest of the Street. The Tide of Ebb is so strong at Tatas, that fometimes the Houses on these Floats break loose from their Moorings, and are driven out to Sea; but besides this floating Town before Tatas, there is another built of more substantial Materials on Shore, and others that stand upon Pillars, several Feet above the Surface. and having no Communication but by Boats during the rainy Seafon.

The Town of Caytongee, the Residence of the greatest Prince in the Island, may now be deemed the Capital; it lies above two hundred Miles up the River Banjar, of which I meet with no Description; but before the Palace is a large Room sifty Yards long and thirty broad, built upon Pillars, open on all Sides, but covered with a Roof, in the Middle whereof is the Sultan's Throne, being a

F 3

wooden

wooden Chair gilded, and over it a large Canopy of Gold and Silver Brocade, and about the Room are feven or eight great Guns upon broken Carriages.

About eighteen Miles below Caytongee are two Wooden Castles, on which are twelve great Guns pointed down the River, the Works so out of Repair, that no Danger

is to be apprehended from them.

The Town of Matapoora is situate in a Part of the Country to which the Floods never reach, being about ten Miles from Caytongee, where the Prince of Negaree resides, who has a good Magazine of Fire-Arms, and some great Guns mounted before the Gates of his Palace.

THE City of Ecrneo was formerly the Capital, being the Residence of the Sultan, then the most powerful Prince in the Island. It is situate on a fine Bay of the Sea, in the North-West Part of the Island, in sour Degrees thirty Minutes North Latitude. This Town has not much

Trade at present.

SUCCADANEA is fituate on a commodious Bay in the South-West Part of the Island, in one Degree of South Latitude, and was formerly more reforted to by the Europeans than any Port. The Island of Borneo is divided into a great many Governments, which have each of them their Sultan or Sovereign, the most powerful whereof is at present the Emperor of Ceytongee, who is probably the richest; most of the Pepper Plantations being within his Territories, which brings a Multitude of foreign Merchants thither. The Mouth of the River Banjar, or rather Tatas, is now one of the greatest Marts in the Indian Seas, where most of the Produce of Afia and Europe may be met with. As to the Sultan's Forces by Land, they appear to be very indifferent Militia; I don't find he has any Standing-Army, and the Fortifications of his Towns and Castles are very mean. Here are no Ships of War, nor many Merchant-Ships belonging to the Country; but they have swift-sailing Vessels, like those in the Ladrone Islands, which will fail above twenty Miles an Hour.

This Island, no doubt, was first peopled from the neighbouring Continent of India and China. The Arabians and Egyptians, 'tis probable, succeeded the first Inhabitants, as the Portuguese sound them Masters of this Coast and of

the Coasts of the adjacent Islands; when they arrived here, and had driven the first Possessions up the Mountains, where they still remain, being divided into numerous Tribes, under their respective Chiefs, and not subject to the Banjareens on the Coast. The Arms of the Byayos, or Mountaineers, are their Crice or Dagger, and the Sampit, which is a Trunk or Tube about six Footlong, through which they blow the little poisoned Darts, mentioned in the Island of Celebes; and at the End of the Sampit is fixed a Kind of Bayonet, which serves them instead of a Spear, and is sometimes thrown as a Lance.

The new English East-India Company, in the Year 1700, sent Captain Coatsworth, in the Julian, to settle a Factory at Banjar Masseen, appointing Mr. Landan President, and sour other Merchants to be of his Council, if

the Defign should succeed.

At their Arrival they made some considerable Presents to the Sultan of Caytongee, and received his Chop or Great Seal, for a Licence to trade, and to erect such Houses at Banjar as should be necessary to lay their Goods in; and soon after provided themselves with three Lantings or floating Houses, and another erected on Pillars or the Bodies of Trees, several Feet above the muddy Shore,

which was usually flooded at High-Water.

Ar this Time there were three hundred fuch floating Houses, ranged on each Side the River, inhabited by Chinese, Malays, Macassars, and native Banjareens; but the Natives removed higher up the River to Tatas on the Arrival of the English; the rest remained at Banjar, to the Number of two hundred Families; and of this floating Town Mr. Landan, the English President, was looked upon as Governor. The English Factors traded with the Banjareens for three Years, without any Disturbance; but then the Natives having about twenty thousand Dollars of the Company's Money in their Hands, upon a Promise to deliver their Factors the Value in Pepper; the Banjareens sold the Pepper, they had agreed to deliver the English to the Chinese, and when the Injustice of this Practice was represented to them, the Natives pretended they had lost their Crop, and were not in a Capacity to deliver the Pepper; and as the shortest Way to wipe off the

Score, secretly plotted to destroy the English Settlement, of which their Factors being informed, did not give much Credit to the Report, till they saw one Morning great Numbers of Boats and Guntings, Vessels of about forty Tuns Burthen, full of armed Men, prepared for an Engagement; and though the Banjareens did not think fit to attack the English at that Time, they came to an Anchor a little Distance from them.

THE Ship Borneo, Captain Barre Commander, being in the River of Banjar at this Time, the President confulted with him upon the Occasion, and they agreed, for their mutual Safety, to hire as many of the Macassar Soldiers out of their Praws as they could (for there were not above fixty Englishmen in the Ship and Factory.) Having manned a Gunting, therefore, and mounted two great Guns upon her, and waited two or three Days in Expectation the Banjareens would have attacked them; they advanced towards the Enemy, but were foon stopped by a Boom, or Chain, which the Natives had laid cross the River, a little under Water, and fastened to the Trees on the Sides; however, the Macassar Soldiers soon unfastened it, and the little Fleet moved forwards, whereupon the Banjareens discharged several great Guns at them; but being ill Marks-men did them no Mischief. The English advancing still, fired some Shot, and the Banjarcens fled before them; but two of their largest Vessels; not being able to keep up with the rest, fell into the Hands of the English, and the Men on board jumped into the River, and escaped to Shore. Two Days after the English arrived at Tatas, ten Miles up the China River, which they found deferted by the Natives, and every Thing of Value carried off, except fome Pepper, which Captain Barre brought on board; and then fetting Fire to the Town, the English returned to Banjar.

No Enemy appearing, Captain Barre, about ten Days afterwards, failed up the great River Banjar, with some large armed Vessels, attended by forty Praws, or Macassar Boats, and arrived within ten Miles of the Town of Negaree, which lies between two and three hundred Miles up that River, he discovered the Enemy had built a Kind of floating Castle upon the Water, one hundred Foot

long,

long, and forty broad, with two Decks, having four Iron and two Brass Guns mounted on the lower Deck, and fixty Patereroes on the upper Deck; the Sides of this Castle being near a Yard thick, walled with Ratans, like Basket-Work, which covered their Men both from great and small Shot, the Banjareens began to fire at a great Distance, and seemed resolved to dispute the Passage of the River: Captain Barre advanced, however, without firing, till he came very near their floating Castle, when he was fo fortunate as to fire into their Port-Holes, difmount one of their Guns, and killed feveral of their Men, which so frightened the Banjareens, that they fled out of the Machine, through the opposite Port-Holes, unperceived, and hid themselves in the Woods. The Captain observing their Fire ceased, advanced close to the Machine with fome Caution; and hearing no Noise, he ventured to board the floating Castle, and became Master of it; but not thinking it prudent to advance further, returned to Banjar with the Prize, which was fo unwieldy, that they spent a Fortnight in bringing it down the River. The Prefident, who remained with the Ship Borneo at Banjar, to fecure the Factory from any Surprize, prefented the Captain with the two Brass Guns he had taken, and the Captain brought them to England on his Return thither.

THE Exists Factors now reflecting, that notwithstandess, it could never be the Interest of their Masters fain in a State of War with the Natives, as they must expect no further Trade with them while it continued, and beginning to be in great Diffress for Provisions, having received none out of the Country fince this Rupture, they fent a Letter, by some of the Prisoners they had taken, to the Banjareens, to demand the Reason of their treating them in that Manner they had done, when they had given them no Provocation. On the contrary, they had advanced them great Sums of Money for Goods, which they had not yet received; with their Letter they fent a confiderable Present to the Sultan of Caytongee, defiring he would fend a Boat with a white Flag to the Factory, if he thought fit to treat with them; but having waited some Time, and received no Answer, the President deter-

determined to try again what Force would do, and failed up the River again, almost as far as Caytongee, when they discovered a Float, like the Wall of a Town, extended cross the River, with several great Guns upon it; but as they were advancing to it, a Praw came off, with a white Flag on board, wherein was an Officer, who acquainted the President, that the Sultan would send some of his Ministers to treat with him, if he would promise that they should return in Sasety. The President promising to protect them, Commissioners arrived, among whom was the Sultan's Son, without fo much as requiring Hostages; and entering upon a Treaty, it was agreed, that the Banjareens should pay the Charges of the War, and deliver Pepper in lieu of the Money the English had advanced, without requiring any Duties or Cultoms for the future, according to the former Grant for a free Trade; the whole Demand amounting to forty thousand Dollars: Which Treaty was ratified by the Sultan and the Mufti, or chief Priest.

This Agreement was ill observed on the Part of the Banjareens; for, pretending the Season had been very bad for Pepper, they never delivered more than fifteen Coyang, worth about one thousand Dollars; and the Factors seeing no Probability of getting more, they embarked for Batavia, from whence the President went to Bengal, and

Captain Barre to England in the Borneo.

Still the East-India Company were of Opinion, that Banjar was the most advantageous Situation in India to settle a Factory at, because there they met the Ships of the Chinese, from whom they might have the Merchandize of their Country on easier Terms than at Canton; and they did not doubt but they would settle there, rather than at Batavia, if the Company was in a Condition to protect them; and as to the Trade of Borneo, Gold, Bezoar, Camphire, Pepper and Precious Stones were the Produce of the Country, and the People of Macassar would sometimes bring over Cloves and Nutmegs clandestinely, without the Knowledge of the Dutch, and Banjar might become as considerable a Mart for the English, as Batavia was so the Hollanders.

In the Year 1704, therefore, several Ships were equip-

ped for Borneo; and Rojet, who was one of the Council in the former Voyage, was fent President of the intended Factory in this, and was very acceptable to the Banjareens, especially as he made no Demand of the old Arrear. The Natives, therefore, continued to trade with the Factory a considerable Time; but the Company understanding, that if a Fort could be erected on the firm Land, and they had a Strength there sufficient to protect the Chinese and other Nations, this Settlement might be vastly improved; they sent over Captain Barre again, who was well acquainted with the Country, and a good Engineer, with Directions to build a Fort at Banjar; and the Captain, in Pursuance of his Orders, carried over what was necessary to fortify the Place; and Rojet dying, was

fucceeded by Captain Barre, as President.

THE Captain hereupon imported great Quantity of Earth and Stone, and drove down some Thousands of Piles or great Trees, to make a Foundation for the defigned Fort, the Place being a perfect Morais, and without raising the Ground, he could not secure his Works from the Flood. He also employed some of the Chinese to make Bricks at Tomborneo, which is situate eighty Miles East of the River Banjar, where the Company had a House, and at the fame Time agreed with a Dutchman on the North Coast of Java, to supply him with Timber, which the Dutchman, to prevent being discovered, desired might be sent for by the China Junks, that the Government of Batavia might not suspect for what it was designed. It is no inconfiderable Advantage to the English Company, that the Dutch Officers and Governors in India have more Regard to their private Interests, than to that of their Matters. There are not many of them, provided they can be concealed, but will deal with our People for a fmall Profit, otherwise the Traffick of the English to India would be much worse than it is.

While the Fort was building at Banjar, a Chinese Junk coming thither with Timber, happened to be cast away at Bendava, a little West of Banjar River, which the Viceroy of that Province understanding was designed for Banjar Fort, seized the Ship, and caused all the Chinese he found on board to be murdered in his Presence; only one of them

them escaped to Barjar, and gave this tragical Account

of their Voyage.

THE President hereupon complained to the Sultan of this barbarous Insult, but he denied he knew any Thing of it, declaring it was not done by his Order; and that if Gooffee Ganton, the Governor of Mendavy, could be brought to Justice, he should be punished for it; but that he was a desperate Man, and it would be difficult to apprehend him. Not long after Gooftee went to the Court of Caytongee, and the Factors applied themselves to the Sultan again to do them Justice; he answered, that Gooftee brought fuch Numbers of armed Men with him, that he could not be apprehended. The President therefore receiving Intelligence, that Gooftee was to go by Water from Tatas to Banjar River, he armed his Pinnace, and several of the Macassar Praws, and lay in a convenient Part of the River to intercept him, and foon after discovering Gooftee and feveral Vessels belonging to the Sultaness, which came leisurely down the Stream, as if they apprehended no Danger, he waited till they came near him; but then they plied their Oars so well that they soon got out of his Reach, neither the Pinnace or Micassar Praws could come near them; the Captain thereupon firing a Piece or two after them, a Ball happened to enter the Praw the Sultaness was in, on board of which Gooftee had put himself, as believing the English would not have attacked the Sultaness, and it is pretended indeed that they did not know the Sultaness was upon the River; however, this Outrage, as the Banjareens termed it, the Sultan would never forgive, and from this Day 'tis faid the Bandanese determined to extirpate the English the first Opportunity that presented itself, though they did not shew their Resentment till afterwards. The Prefident proceeding in fortifying Banjar, had made firm Ground to build the Fort upon, erected fine Barracks for the Soldiers, and over them handsome Apartments for the Factors; the Bastions for the Fort also were marked out (being designed for a Pentagon,) and as the Place was surrounded with Water, the whole Power of the Banjareeus could not have taken it, if the brave Captain Barre had lived; but unfortunately for the English Company, he died before he had enjoyed the Presidentship a Year, the Command

mand devolving on the second in Council, who took upon him the Command, and pursued the Steps of his Predecessor about four Months, when the unfortunate Cunningham arrived, who had just escaped from the Massacre of Poolo Condore, having been appointed by the Company President of Banjar, and entered on this Command in the Year 1706, which he had not enjoyed six Months, before he received Advice, that all the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, which were the Banjareens were in Arms, with a Defended that the Banjareens were in Arms, with a Defended the Banjareens were in Arms, which are the Banjareens were in Arms,

fign to drive the English from their Coasts. Two East-India Ships lay at this Time in the River of Banjar, viz. the Blenheim and the Carlton. Cunningham, the President, not thinking himself safe in the half-built Fort, constantly lay on board the Blenbeim. He seemed to have nothing else in his View but to lave one; he neither took the Macassar Soldiers into his Pay, or hired any Vessels to defend the Factory, but left the Care of it to the third in Council, who being attacked by the Banjarcens, bravely repulsed them. The Carlton being boarded at the fame Time, the Seamen shut themselves up in close Quarters, and cleared the Decks of the Banjareens, with their small Arms. Captain Philips only, who upon a Point of Honour, would not quit the Quarter-Deck, was killed, and the Banjareens, who had done nothing more than fired the Town, and murdered the unarmed Inhabitants, would probably have abandoned the Enterprile, if the Ships had kept their Stations; Cunningham imagining it was in vain to make any further Resistance, ordered the English to set Fire to the Factory, and come on board, and then commanded the Ships to cut their Cables and fall down the River, which they did with fuch Precipitation, that they left their Top-Masts, great Part of their Rigging, and Provisions behind them, abandoning also fifty poor unarmed Slaves, that ferved the Workmen in the Fort, to be cut in Pieces. The Chinese and most of the other Inhabitants, that imagined they were fafe under the Protection of the English, also were murdered in cold Blood. the East-India Company lost this important Post, by making Choice of one to command in it, who was no Military

Man, and by Profession an Apothecary.

THE second in Council, who had been for some Time at Homborneo for the Recovery of his Health, found the

two Ships lying at the Mouth of the River like Wrecks, and one of them aground, and was informed that *Eanjar* was loft, which had been so long fortifying with infinite Labour, and a vast Expence, by the President's Order, before the Factory was in any Danger, and not twenty

Englishmen lost in the whole Action.

THE Banjarcens being elated with Success, grew bold, and falling down the River attacked the Blenkeim, but of three hundred Men that boarded her, very few escaped; however, as there was now no Hopes of resettling the Factory, without being reinforced from England, Cunningham, the President, sailed to Batavia, and from thence to Bengal, where he embarked on board the Anne Indiaman for England, which Ship soundered, or was otherwise lost in her Passage, Cunningham sharing the Fate of the rest of the Crew; and I should have remembered, that all the Ghinese, who were making Bricks at Tamborneo, with two English Soldiers who remained there with them, were cut in Pieces soon after the Banjar Factory was destroyed.

ABOUT seventeen or eighteen Years after this Misfortune, two Indiamen, one of them commanded by Captain Beckford, arrived at Borneo, and the Captain was so fortunate as to procure an Audience of the Sultan of Caytongee, being introduced by the Prince of Negaree. When he came to his Audience, he was directed to fit down upon a Carpet, about ten Foot before the Throne, and foon after the Sultan came in, dressed in a Vest and Breeches, not unlike a Rope-Dancer's, with scarlet Stockings and Slippers, an Atlice Gown wrought with Gold and Silver. and a rich Crice, or Dagger, fet with Diamonds, in his Sash. On the Sultan's Coming into the Hall of Audience. the Captain and the rest of the English Gentlemen rose up very unluckily; for this was the greatest Affront they could have been guilty of. The Sultan's great Officers fell down on their Faces as they fat. They always approach their Prince on their Knees, bowing to the Ground when they come near him, and when they retire they creep back as they advanced.

THE Sultan having viewed the English Gentlemen, after fome Paule bid them welcome, and thanked them for their Present, and enquired if those were Company's Ships

they

they came in, which they flatly denied, apprehending they should have been used ill if they had been known. The Sultan proceeded to shew his Refentment against the Company's Factors, who came thither, he faid, under Pretence of trafficking with his People, and instead of building a Warehouse, erected a Castle, mounted Cannon upon it, and infulted his Subjects, which he had borne a great while; but their Infolence was fuch, that he was at length compelled to demolish their Castle and expel them his Country. The Audience being over, the Gentlemen were entertained in the Sultan's Palace, the Dinner ferved up in Gold and Silver Dishes, and set on the Carpet, without any Linnen. It consisted of Pilau (Rice and Fowls) coloured with Turmerick, Curree, or strong Soup, made of Fish or Flesh, broiled Fowls, Beef and Venison; but they have no other Liquor than Water, the Mahometans drinking no strong Liquors. The King's Musick playing during the Entertainment, and the English Trumpets in the Intervals, with which the Sultan was extreamly pleafed. After Dinner, little Boards were brought in with the Betel Leaf and Arek Nut, which they chew great Part of the Day; and some of the Sultan's Dancing Girls being sent for, four beautiful Virgins, about feventeen Years of Age. made their Appearance; they were cloathed in filk Velts. with gilded Coronets round their Temples, their Hair falling gracefully on their Shoulders; their naked Arms and Legs were painted yellow, and they had Bracelets of Gold on their Arms and Legs. These advanced towards the Throne, prostrated themselves on their Faces before the Emperor three Times, and then began what was called a Dance, throwing themselves into various Postures, some of them wanton enough, but scarce ever listed their Feet from the Ground. After the Company had been entertained thus about an Hour, the Girls proftrated themselves again three Times before the Throne, and then retired, and the English were foon after dismissed.

THE East-India Ships that have been sent over since, are forced to conceal that they have any Relation to the Company, 'tis said; but I am rather inclined to believe, that the Natives don't care to be too inquisitive about the Matter, receiving for the most Part Silver for the Produce

of their Country. They chuse therefore to wink at what they can't well be ignorant of, as so many other Nations trade thither who are our Rivals, and would not fail to let them into the Secret: It is evident to me, that the Banjareens would be glad to traffick with any Europeans where their Liberties are not endangered by it. The Portuguese formerly, and the Dutch after them, began to erect Forts in their Country, but the Natives would not bear it. They have seen the Dutch enslave the adjacent Islands of Celebes, Java, &c. and they cannot but apprehend Danger therefore, when they see Foreigners attempting to fortify their Settlements.

A TRAVELLER who resided some Years in Borneo, is of Opinion, that the Byaya's, or Mountaineers of that Island, are as savage a People as they are usually represented to be. Their very Conutenances, he thinks, shews it, and they will never have any Friendship, or even Conversation with Foreigners, though they come down to Banjar often, and sell them Hogs, Fowls, and other Provision; and if they meet with a poor Fisherman, or any defenceles People upon the River, they seldom fail to take their Heads; those that have killed most Men, being in the greatest Esteem in their Country; but as I understand him, he means those of another Religion or Nation: There are none but Europeans and Christians that look upon the taking away the Life of a Friend or Acquaintance in a Duel, to be an heroick Action.

THE English, I perceive, affect to be very much afraid of the Byayo's, though they usually run away from them when they meet in the River, and get into the Woods, where they will maintain a Tree-Fight sometimes; that is, they skulk behind great Trees, and shoot Darts at their Enemies, and then run away; but will seldom meet an Enemy in a fair Field, any more than any other Indians,

unless they have a very great Superiority.

The Byayo's are all Pagans, whose Rites differ but little from those of the Pagans on the neighbouring Continent; and the Inhabitants of the Sea-Coasts are for the most Part Mahometans; they have both of them a great deal of Superstition, pretending to charm away Diseases, and to to to retel future Events, and the like.

Вотн

BOTH Pagans and Mahometans allow of a Plurality of Wives and Concubines in this Country; but as to their Ceremonies of Marriage, and the Solemnity of their Funerals, both of the Mahometans and Pagans, these have been described in Part already.

CHAP. IV.

Contains a Description of the Islands of Sumatra and Java.

SUMATR A is one of the Sunda Islands, situate in the Indian Ocean, between ninety-three and one hundred and sour Degrees of Eastern Longitude, and between five Degrees and a half North Latitude, and five Degrees and a half South Latitude, the Equinoctial Line running cross the Middle of it; having Malacca on the North, Borneo on the East, Java on the South-East, and the Indian Ocean on the West, and is nine hundred Miles long, and about one hundred and sifty broad. The Air is generally unhealthful near the Coast, the Country being very hor, and very moist, and changing suddenly from sultry Heat in the Day-Time, to cold chilling Winds in the Night.

THERE are no Physicians in Sumatra, but they rely upon the Skill and Experience of some good old Women, who are acquainted with the Nature of their Simples. The Flux is the Distemper that usually carries off Foreigners, against which the Fruit Guava and the Pomoranate are certain Remedies, if taken before the Diftemper becomes violent; but most other Fruits promote the Dilease. Bathing in the cold Water is esteemed another Remedy for the Flux. Their Water, unboiled, as well as Sherber, is very unwholesome; full Meals of Flesh ought to be avoided, occasioning a Distemper called the Mori Duckin, which is attended with a violent Vomiting and Purging, and usually carries off the Patient in twenty-four Hours. Those Gentlemen that drink strong Liquors to Excess, usually avoid the Flux, but are carried off by Fevers. The Cholick and Small-Pox are often fatal to the Natives, as well as Foreigners; but they are feldom troubled with Dropfies. Gout, or Stone.

PEOPLE that are careful of their Health, eat and drink moderately, and boil their Water; nor do they avoid Wine or Arrack Punch altogether, for these drank moderately in this moist Air preserve, rather than destroy Health.

A CHAIN of Mountains runs the whole Length of the Mand, from the North-West to the South-East, and here the Air is something better than on the Coast; but the European Factories are generally situated at the Mouths of Rivers near the Sea, for the Conveniency of Trade, and here three Years may be reckoned a long Life, the faltftinking Ouse sends up such an unwholesome Vapour, that it perfectly poisons Foreigners that are tent thither.

THE Monfons, or periodical Winds, shift here at the Equinoxes, as they do in other Parts of the Indian Seas, blowing fix Months in one Direction, and fix Months in the opposite Direction; and near the Coast there are other periodical Winds, which blow the greatest Part of the Day from the Sea, and in the Night-Time and Part of the Morning from the Land; but these scarce extend seven

Miles from the Coast.

THERE is a Mountain called Singledemond, about forty Miles South-East of Bencoolen, which is a Mile in Height perpendicular; those near the West Coast are generally barren Rocks, producing little besides Shrubs; but towards the Bottom of them grows some good Timber. The Country has a great many small Rivers, but none of them navigable much beyond their Mouths, falling from high Mountains, and discharging themselves precipitately into the Sea, either on the East or West, after a very short Course; the Rains continuing here, as they do in most Places near the Equinoctial, fix Months every Year and upwards, and no where with more Violence. The Waters of the River Indapoora, during Rains, look red for two Miles beyond the Mouth out at Sea, occasioned, 'tis faid, by the great Number of Oaks that grow in their boggy Grounds, and are almost covered when the Floods are highest. The Waters of all their Rivers, which overflow the Low-Countries, are very unwholesome, foul, and

not fit to be drank till they are fettled, nor indeed till they have been boiled, and Tea or some other wholesome Herbs infused in them; and this, no doubt, is one Reason of the Unwholesomness of the Air, it being a very just Observation, that wherever the Water is bad, the Air is so too.

SUMATRA was antiently divided into a great many Kingdoms and States, as it is at present, of which Achen was the most considerable, and had some Influence over the rest; and the King of Achen is still the most powerful Prince in the Mand, and the North Part of it is in a Man-

ner subject to him.

ACHEN City is also still the Capital of this Kingdom, and of the whole Mand, being fituate in ninety three Degrees thirty Minutes East Longitude, and five Degrees thirty Minutes North Latitude, about one thousand Miles South-East of Fort St. George in the Hither India. The City stands in a Plain, surrounded by Woods and Bogs, fomething more than a Mile distant from the Sea; it is an open Town, and the King's Palace tlands in the Middle of it. Great Banks of Earth, instead of a Wall, are cast up round about the Palace, and planted with Canes and Reeds, that grow to such a Height that they cover the Palace, and render it inaccessible: It is about a Mile and a half in Circumference; a Rivulet runs through it, lined with Stone, in which they usually bathe. Though Achen has no Wall for its Defence, the Country round about it is so surrounded by Marthes and thick Woods of Cane and Bamboo, which are not easily cut, and little Forts erected at proper Distances, that an Enemy would find a great deal of Disticulty to come at it. The King has a great Number of standing Forces, but his Elephants are what he most depends on; these are taught to trample upon Fire, and not to dread the Noise of Cannon.

THE City contains feven thousand Houses and upwards, which are not contiguous, each House being surrounded by a Palifadoe, which stands some Distance from it, except some Streets where the Markets are kept, and where Foreigners inhabit, who chuse to live near one another, to defend themselves from Thieves, Robberies being very common here. Most of their Houses are erected upon Pillars ten Foot high, the Waters overflowing the Streets in the Time of the Rains. The Houses are built of splis Cane or Bamboo, and shoored with the same, and every one has a Stone Vault to secure his Treasure and most valuable Effects; their Houses being built of such combustible Materials, that it is almost impossible to put a Stop to a Fire, if there happens to be any Wind. Their Mosques, or Mahometan Temples, are built of Stone, and very numerous, but small Buildings. Factors both from the European and Assaick Countries reside here, but the Chinese are more numerous than any of the rest.

PEDIR is fituate about thirty Miles East of Achen, Pacim and Dely farther to the South-East, once Capitals of Kingdoms, but not very confiderable at present. Jamby is fituate on a River on the East-Side of the Island, about fifty Miles from the Sea, in two Degrees South Latitude, and is the Capital of all the Dutch Settlements on this Coast. Palambam, another considerable Town on this

Coast, is situate in four Degrees South Latitude.

Upon the West Coast of Sumatra, the first English Settlement, coming from the South, is Sillebar, which stands at the Mouth of a River on a fine Bay, in four

Degrees odd Minutes South Latitude.

BENCOOLEN, the principal English Settlement on this Coast, is situate in one hundred and one Degrees of Earstern Longitude, and four Degrees South Latitude. The Seamen know it by a high Mountain, of a piramidal Form, about twenty Miles within the Land, called the Sugar-Loaf. The Town is two Miles in Circumference, inhabited chiefly by the Natives, who build their Houses. on Pillars, on account of the annual Floods. The English, Chinese, and Portuguese have each their several Quarters, and all build with Wood, as the Place is subject to Earthquakes. This is a most unhealthful Place, Multitudes of English have perished here; Deaths are so frequent and so much expected, that they cease to be terrible. The Soldiers would fit finging over a Bowl of Punch, inciting one another to drink upon that Confideration, that Tomorrow, or in a very short Time, they must die; and in other Parts of India, where the Writer of these Sheets has been, he has feen People taking Leave of their Friends at the Approach of Death, with as little Concern as if they

were setting out of a Journey. An Officer, who was sent from Fort St. George with a Company of eighty Men to Bencoolen, in the Prime of their Age, assured me, at his Return between two or three Years after, that there was not one of the Men he carried over lest alive; and these frequent Scenes of Mortality, I presume, induced the East-India Company to erect another Fort in a more healthful Place, which was named Fort Marlbro, being built about the Time of that General's Successes in Flanders, in the Reign of Queen Anne.

FORT Marlbro stands on a dry elevated Situation, about three Miles South-East of Bencoolen, and is so much more healthful, that one of their Governors assured me, that for the Space of a Year they did not bury one Man.

THERE are several other Port-Towns on the West Coast of Samatra, North of Bencoolen, particularly Bantall, another English Settlement; Indrapour and Padang, Dutch Settlements; Tecon and Passaman, almost under the Equinoctial. The King of Achen seems to have the Dominion of all the Towns North of the Equinoctial, particu-

larly of Bataban, Barros and Daga.

THE Natives are of a moderate Stature, fwarthy Complexions, feldom corpulent, and have black Hair and black Eyes, flat Faces, and high Cheek Bones, and take a great deal of Pains to dve their Teeth black, and rub themselves all over with Oil that smells very strong, and, like their Neighbours, let some of the Nails of their Left Hand grow as long as their Fingers, scraping them till they are transparent, and dying them with Vermillion. About their Heads they usually tie a Piece of blue or white Linen, or wear a Cap not much unlike the Crown of a Hat. The better Sort wear Drawers or Breeches, and a Piece of Calico or Silk wrapped about their Loins, and thrown over the Left Shoulder: They wear Sandals on their Feet in Towns, but usually travel bare-foot.

THE Genius of this People is not much admired; they are said to be a proud, heavy and indolent Generation, who neither endeavour to improve themselves in Arts and Sciences, or in Husbandry, letting great Part of the Country lie uncultivated, and their Manusactures neglected.

THE Produce of Sumatra is Pepper, Rice, Sugar, Camphire, Gold-Dust, Bezoar, Canes and Cotton. The Soil is a deep fruitful Mould, well watered with Rivulets; but near the Sea are Abundance of Bogs and Marshes,

which produce only Reeds and Bamboo Canes.

THEIR Fruits are Cocoa Nuts, Limes, Cranges, Mangoes, Plantains, Guava's, Jacks, Durions, Pine-apples, Mangosteens, and other tropical Fruits; they have also Melons, Peas, Beans, Potatoes, Yams, Radishes, Potherbs, Sallads, and Plenty of all Manner of Garden-Stuff. Bang also grows here, which is a Plant much like Hemp, and being infused in Liquor, makes People very merry, and often mad. Their Military Men take it often, when they are about to engage an Enemy, and throw away their Lives very foolishly, when they have intoxicated themselves with it. Opium has sometimes the like Effects on them.

Gold is very plentiful in this Island; but it is brought down from the hilly inland Country; there is none found near the Sea Coasts. The Natives of the mountainous Part of the Country bring it down in Dust, and sometimes little Pieces like the Seeds of an Orange, weighing from half a Grain to two or three Penny-weights; and Mr. Lockyer relates, he once saw an entire Lump of an Ounce Weight; and it is sometimes sound in the hardest Stones: He had seen a Stone of a Pound and a half Weight, which seemed to have been beaten off another Stone, to which it grew, and that there were Crannies in it, coloured and veined like white Marble: That it was very weighty, and there were several Branches of Gold shooting out of the Chinks and craggy Parts of it; the Rock Gold of Achen, known by its Brightness, is very fine.

As to Gold Mines there are none wrought in this Island, and I question if there are such Mines any where else. Gold seems to lie near the Surface, since nine Parts in ten of what we have is washed down from the Hills, and found in the Beds of Rivulets in the dry Season, when the Water is gone. That there are some Stones which contain Gold is not to be denied, but it is sound in Pieces of Rock, that lie on or near the Surface; and there are Gold Veins in the Tapis Lezuli, but this Stone is so scarce, that it is as dear, if not dearer than Gold; and therefore it would not be worth while to break the Stone for the small Quan-

tity of Gold it contains: But wherever their Gold is found, it is in Possession of the Mountaineers, who live towards the North; for if there had been any Gold in the South, the Dutch, who possess that Part of the Country, would have monopolized that precious Mineral long before now. The Mountaineers who bring it down to Acken to fell don't make that Advantage of it they might. They exchange it for Rice, Cloathing, Tobacco, and other Provision, at a very moderate Price; but the Natives of Achen and the Malays, who understand the Value of it, ask an extravagant Price for what they dispose of to Foreigners; and that other Nations may be deterred from penetrating further into the Country, and trafficking with the Mountaineers directly, they are represented as Savages and Canibals, Monsters of the human Species; and possibly the Natives of Achen represent Foreigners to those poor People in a Light no less shocking than they are described to us, that the Acheneers themselves may enjoy the sole Profit of this rich Trade.

The Pepper Plant is of as great Advantage to this Island as their Gold: No Country has it in so great Plenty. These Plantations lie on the West Side of the Mountains, but scarce any of them within twenty Miles of the English Settlements; the Pepper is brought down in Boats to their Factories. The Time of gathering the Pepper upon the West Coast is about Michaelmas, and they have another small Crop in March. In a dry Season they are forced to water the Pepper Grounds perpetually.

They have a small Breed of Horles in Sumatra, Buffaloes, Deer, Goats, Hogs, Tygers, Monkies, Squirrels, Guanoes, Porcupines, Alligators, Serpents, Scorpions, Musketoes and other Insects. Here are also Hens, Ducks, and other Poultry; Pigeons, Doves, Parrots, Parakeets, Maccaws and small Birds; Sea and River Fish also are very plentiful, and Turtle or Sea-Tortoise. They have Elephants, but I think they are not Natives.

As to Food, Rice is much the greatest Part in all their Meals, strong Soup, made of Flesh or Fish, and a very little Meat high seasoned, serves to eat with their Rice. As to the Mahometans that inhabit the Coast, they abstain from Swine's Flesh, and from strong Liquors, as in

all Countries of the same Faith. As to the Mountaineers. they will eat any Kind of Flesh, but Beef, the Bull being one of the Objects of their Worship, and if we could give any Credit to their Neighbours, the People of Achen, they eat human Flesh; but the World is pretty well satisfied by this Time that there are no Nations of Canibals.

LEARNING is not to be expected here. The common Language is the Melayan Tongue, and the Alcoran and religious Books of the Mahometans are written in Arabick,

which is now a dead Language.

THEY have the Use of Letters here, as they have in almost every other Eastern Nation except Ckina; those Gentlemen were fo felf-fufficient, so much above being taught by People they look upon as their Inferiors, that they have now the least Pretence to Learning of any Nation on the Face of the Earth.

THE Mahometans of Sumatra speak and write the Malayan Language. The Pagan Mountaineers have a Language peculiar to themselves. As the Malayans write from the Right Hand to the Left, the Mountaineers write as we do, from the Left to the Right; and instead of Pen, Ink and Paper, they write, or rather engrave, with a Stile on the Outside of a Bamboo Cane; the Malays, indeed, use Ink and a coarse brown Paper. Both Nations are poor Accomptants, and are forced to make use of the Banians that reside amongst them as their Clerks, when they have any confiderable Accounts to make up, the Banians being some of the sharpest Traders in the World.

THEIR Mechanicks and Artificers are very indifferent Workmen, except it be their Carpenters, who make their fwift-failing Praws, and their Cane Houses, which they build very dextroufly: The Goldsmiths and Blacksmiths are bad Workmen as well as their Bricklayers. The Chinese who are settled here are good Mechanicks. Ten or twelve Sail of Chinese Junks arrive here every Year in June, bringing with them Rice and other Produce of their Country, and in this Fleet come over all Manner of Artificers, who go to work as foon as they arrive, making Tables, Cabinets, Chefts of Drawers, and all Manner of Houshould Furniture, Utenfils and Toys, and these they expose to Sale in a Street next the Sea, which is called the Chinese Camp; for three or four Months this Street is crouded like a Fair, and if they can meet with good Chapmen, they will sell their very Ships, reserving only as many as will carry them Home. The Fair being over, the Chinese begin to game; if they are not at work, you will always find them with Cards or Dice in their Hands. The Europeans resort to their Camp to drink Hockshew, with which they are frequently very merry. It is a Sort of strong Beer, made of Wheat, and preferred by our People to any Liquor the Country affords.

As to the foreign Traffick of this Country, I have already observed, that the Europeans bring from thence chiefly Gold-Dust, Pepper, and Canes; that they meet with more Pepper here than in any Country in the World.

THE Pepper brought to the English Factory at Bencoolen grows in the Territories of two Rajas, or Indian Princes, one of them called Pangaran Munco Raja, whose Capital is at Singledemond, situate on a large Bay, ten Miles North of Bencoolen. The other of them has the Title of Pangaran Songe Etam, or Lord of the Black River, whose Capital is called Busar, situate ten Miles East of Bencoolen; both these have Houses at Bencoolen, in that Quarter called the Malay Town, and refide there when they have any Affairs to transact with the English, who pay these Princes two Sooca's, or half a Dollar Custom for every Bahar, containing five hundred and fixty Pound Weight of Pepper. And the Pangarans, in Confideration thereof, promise to promote the Planting of Pepper among their Tenants and Subjects, and bring their Fruit to the English Factories; and as soon as the Pepper is weighed and delivered by the Owners, the Factors immediately pay for it, after the Rate of ten Molocos or Spanifs Dollars for every Bahar.

THE Coins of the Country are first Cash, or Pieces of Lead, one thousand five hundred of which make one Mas, valued at fifteen Pence, which is a gold Coin. A Pollum or Copang is a Quarter of a Mas, sixteen Mas is one Tael, which is an imaginary Coin, and equivalent to twenty Shillings Sterling; Dollars and other Spanish

Coins also are current here.

As to their Weights, five Tael make a Buncal, twenty Buncal one Catty, and one hundred Catty one Pecul, one Pecul being one hundred and thirty-two Pounds English, three Peculs are a China Bahar of three hundred and ninety-fix Pound China Weight; and of Malay Weight, at Achen four hundred and twenty-two Pound fifteen Ounces, and at Bencaolen and the rest of the West Coast a Bahar is five hundred Pound great Weight, or five hundred and fixty Pound English.

They make their Payments oftener in Pieces of Gold at Achen than in Coin; and therefore the Rate you intend to receive and pay Gold at, and the Catty you buy and fell by must be expressed in the Contract. It would be very tedious receiving one thousand Pound in Gold Mas; for Brass, mixed Metals, and Silver gilt are frequently mixed with them: Nor can the Money-Changers, who are employed to examine them, avoid being deceived sometimes; but if they do receive any that are bad, they are obliged to make them good to the Person that employs them.

I HAVE already observed, that there are several States and Principalities in this Island, differently constituted, of which that of Achen is the chief, comprehending the

North Part of the Island.

THIS Kingdom, some Writers assure us, has been ever governed by Queens, others affirm, that there never was a Queen Regent here; I believe we may take the middle Way, and allow that it has been subject both to Kings and Queens: Certain it is, a King was upon the Throne when we first visited this Island, because we have his Letter which he wrote to Queen Elizabeth, and Kings have of late Years filled that Throne: There is another Difference among Writers in relation to the Constitution, fome relating it is an absolute, and others a limited Monarchy: It is generally agreed, that there are feveral Orancayas or great Lords in this Part of the Island, that exercise sovereign Authority in their respective Territories, as the German Princes do; but these acknowledge the King of Achen their Superior, and accept of the great Offices in his Court; and as he fometimes displaces and deposes these, so there are Instances of their deposing one King and advancing another to the Throne. There have been. been great Struggles between the King of Achen and these Princes for fovereign Power; and if the King has been absolute in some Reigns, he has had a very limited Authority in others. As to a third Dispute, whether the Throne be hereditary or elective, it feems the King takes the Liberty to dispose of it to which of his Children he pleases, whether he be born of a Wife or a Concubine; and if the Prince does not dispose of it in his Life-Time, there are fometimes feveral Competitors for the Crown, and that Prince who is most favoured by the Orancayas, or Vaffal Princes, usually carries his Point; and from thence the Crown is faid to have been elective. Mr. Lockyer, the Indian Supercargo, who was at Achen about forty Years ago, relates that one of the Orancayas being charged with sodomitical Practices, and summoned to appear at Achen to answer the Charge, upon his refusing to appear the Sabander, or Governor of that City, fent a Detachment of the Guards to cut him in Pieces, which was executed before the House of an English Merchant, in the Streets of Achen; from whence he concludes, that the Orancayas are vested with an uncontroulable Power; but this Instance seems to me to infer the direct contrary; for Achen being the Seat of the Government, this Sabander was probably the King's Vice-Roy, and acted in this Case by his Authority, especially as it does appear that one Orancaya has not any Authority to censure or punish another.

As to the South Part of the Island, this is divided into Abundance of small Territories, each of them governed by their respective Pangarans or Rajas, with the Advice of the chief Men of the State, called Proatens; and every Town has a Governor appointed by the Pangaran, or chosen by the Inhabitants, and confirmed by the Pangaran; there are also some Towns upon the Coast vested with sovereign Power, and governed by their own Magistrates, called Dato's, of which Bencoolen has twelve, and Sillebar four, which do not seem to be subject to any of the Panfour,

garans or Rajas.

THE Inhabitants of the Mountains are governed by the Chiefs of their respective Tribes, who are under a Necessity of maintaining a good Correspondence among themselves, in order to defend their Country against their powerful

powerful Neighbours; for as they are possessed of all the Gold the Island produces, there is no doubt but the Mahometan Princes that lie round them, would make an Effort to subdue those golden Mountains, if their Princes were at Variance: Or if they did not, the Dutch would find a Way to their Gold, if they should find their Chiefs divided; for the Dutch are possessed of several strong Places and Countries in the Mand, which would be supported in fuch an Enterprise by Fleets and Forces from Batavia and Malacca, that lie but a very little Distance from them. The Dutch have subdued innumerable Kingdoms and Islands in the East. It is amazing that so inconsiderable a People have been able to grasp and keep so much. They don't want Avarice to put them upon subduing this Country as well as the rest; but they have acquired more already than they will be able to keep long, now fo many European Powers are entered upon the Indian Trade: should they attempt more, it would infallibly hasten their Ruin; though we have been fo very passive and indolent to let the ungrateful Hollanders enjoy our Spices so many Years, which they robbed us of, they will foon find other Nations putting in for a Share of them, which will be a general Benefit to this Part of the World; for if that Trade was laid open, we should purchase the fine Spices at a much more reasonable Rate than we do, from a People who destroy the Gists of Heaven, lest other Nations should enjoy a Share of them, and would destroy all the Earth produces to enrich themselves.

The Mahometans of Sumatra have no written Law but the Alcoran, and their Comments by their Priests, who are also the only Judges and Interpreters of those Laws. They are governed in their Decisions very much by Custom and ancient Precedents, as we are here. Death is the Punishment of Murder and Adultery, and every Man is an Executioner; the Criminal is stabbed by every one of the Assembly that can get near him, with their Crices or Daggers. Women are strangled with the Bow-String for capital Crimes; for Thest the Offender has some Joints of his Fingers and Toes cut off, and sometimes a Limb, according to the Heinousness of the Crime; and for the third Offence he is put to Death by

Behead.

Beheading, Impaling, or the like. Some of the Kings of Achen are said to have inflicted the cruelest Tortures on their greatest Subjects on mere Suspicion. The French Admiral Beaulieu relates, that while he resided at Achen, the King fent for him to be Witness of an Execution of some of his own Women. They were tortured in the King's Presence for three Hours, which the Admiral could not avoid being an Eye-Witness of, and the King's Rage encreafing with the Torture, he at length ordered their Hands and Legs to be cut off, and their Bodies to be thrown into the River; and this Barbarity was pretended to be exercised on a supposed Conspiracy against the King's Life, of which he had no other Proof but this; one of these Women, who lay in a Room adjoining to his Majesty's, shrieked out, and the King enquiring the Reason, they all agreed to tell him it was occasioned by a Mistake; but being threatened to be put to the Torture, if they concealed the true Reason, the Woman that shrieked out faid fomebody pushed a Dagger through the Reeds or Partition of the Room, and wounded her in the Thigh, which occasioned her crying out, and alarming the rest. The other Women did not agree with this, or with one another in their Answers; some said they heard a Noise, and others faid they heard nothing; however the Dagger was found, and no Body could discover whose it was; and the King being able to get no fatisfactory Account of the Matter, suspected there was a Design carrying on against his Life by his Mother, imagining she had alarmed the Women, and upon their crying out she supposed his Majesty would have come out to their Assistance, and given the Affaffins she employed an Opportunity of murdering him; and in order to make a further Discovery, commanded five of the Women to be tortured by the Rack; but their Constancy was not to be moved, though the King made them repeated Offers of Pardon, if they would confess. One old Woman swooning from Time to Time, the King was fo merciful as to order her to be put to Death for which she thanked him, and wished him a long and happy Reign. Some of the rest, after their Legs and Arms were cut off, declared, that they had long wished

wished for this happy Hour, which delivered them from

the Drudgeries of the Palace.

The King demanding of Mr. Beaulieu what he thought of this Execution, the Admiral was so terrified with the Cruelty of the Action, that he seemed to approve it by answering, That without the Execution of Justice no Government could subsist.

The King has no other standing Forces than his Guards, but depends on his Militia, which are as numerous as the People in his Kingdom, able to bear Arms, who are all obliged to appear under Arms whenever they are summoned. As to fortisted Towns and Castles, there are scarce any but what are natural; and the Country seems to be so inaccessible, that the Natives boast it has never been conquered by any foreign Power; but this must be a Mistake, for the present Generation, who are Masters of the North Part of the Island and the Sea-Coast, are not the original Inhabitants, but came from Egypt and Arabia, and having driven the Pagans up into the Mountains, succeeded them on the Sea-Coasts.

The Mahometan Religion is professed at Achen, and upon all the Coast of Sumatra; but they are not such bigotted Zealors as they are in some other Mahometan Countries. Their Temples or Mosques are but meanly built, some of them no better than Cottages. The chief Priest resides at Achen, and has a great Instuence on Affairs of State. Their Marriage Contracts are made before some Priest, and they are Judges in Cases of Divorce, as well as in all civil Causes. The Priest also assists at the Celebration of their Funeral Rites, as in other Mahometan States.

This, as well as the rest of the Indian Islands, was, no doubt, first peopled from the neighbouring Continent. The Phanicians, Egyptians, and Arabians afterwards trafficked with them; and we find Solomon desiring Hiram, King of Tyre, to send him skilful Mariners to pilot his Fleet into these Seas; and the Ophir mentioned in Scripture, is supposed to be this very Island, from whence he setched his Gold. The Arabians and other Nations bordering on the Red-Sea, afterwards planted Colonies here, and became so potent, that they drove the former Inhabitants

of the EASI-INDIES. III

up into the Mountains, and possessed the Coast. The Portuguese found the Descendants of those Nations fixed on the Shores of the Indian Continent as well as the Islands when they arrived there.

The Portuguese enjoyed the sole Trasfick with this and the adjacent Islands for near one hundred Years, viz. from the Year 1500 almost to the Year of our Lord 1600, when other Nations followed them round the Cape of Good Hope,

and put in for a Share of the Indian Trade.

THE English East-India Company having obtained a Charter, impowering them to trade to India, in the Year 1600, fent Captain Lancaster, stiled the General, Captain Middleton, and two Ships more, to traffick with the Natives of this Island, who arrived at Achen on the 5th of June, 1602, bringing with him a Letter from Queen Elizabeth to the King of Achen; Captain Middleton being deputed by the General to give the King Notice of his Arrival with the Queen's Letter, his Majesty invited the General to come on Shore, which he did, and the King ordered one of his Ministers, with fix Elephants, and a large Retinue, to attend his Excellence, and bring him to Court. largest Elephant being fourteen Foot high, had a large Room upon his Back, fomething refembling the Body of a Coach, covered with Crimfon Velvet, in the Middle whereof was a Gold Bason, in which the Queen's Letter was laid, and covered with a Piece of rich Silk. The General being mounted on another Elephant, and his Retinue upon the rest, moved forward to the Palace Gate, where they were defired to wait till the King was acquainted with their Arrival; foon after which they difmounted, and were admitted to an Audience, wherein the General declared that he was come from the Most Mighty Queen of England to propole an Alliance with his Majesty, and being about to continue his Speech, the King defired him to fit down and rest himself after his tedious Voyage, told him he was welcome to his Country, and he might depend on his granting whatever he could reasonably demand in behalf of that noble Princess from whom he came, whose Fame had already reached to India. Then the Queen's Letter was presented to his Majesty, and the Present was fet before the Throne, being a filver Bason with a Fountain in the Middle of it, weighing two hundred Ounces, a filver Cup, a fine Looking-Glais, a Head-piece with a Plume of Feathers, a Sword with an embroidered Belt and Scabbard, a fine Pair of Piftols, and a Fan; the laft seemed most acceptable, for he immediately ordered one of his Women to fan him with it.

The Ambassador and the Gentlemen who attended him being afterwards desired to sit down on the Carpets, after the Manner of the East, a grand Dinner was introduced in Dishes of Gold or Tamback, being a Mixture of Gold and Brass, the King being seated on a Floor raised about six Foot above the Hall, in a Kind of Gallery; he frequently drank to the General a Glass of Arrack, and having pledged his Majesty once, he was left at Liberty to drink what Liquor he chose afterwards. The King's Women and the Musick being called, the Ladies danced, and the General being presented with a Vest of the Country Fashion, put it

on immediately, and the Company retired.

THE Queen, in her Letter to the King of Achen, obferves, that God had given different Fruits to different Countries, to promote an Intercourse between the several Inhabitants of the Earth, and the Fame of his Majesty's Humanity and Goodness to foreign Merchants had induced her to licence these her Subjects to visit his Kingdom (notwithstanding the Dangers that must attend so long a Voyage) and to offer to begin a Trade with his Subjects, which, if his Majesty approved of, he should have no Cause to repent; he might depend on their Truth and fair Dealing, and they should carry over such Goods as were most wanted in that Part of the World, and be better ferved than he had been by the Portuguese and Spaniards, her Enemies, who endeavoured to exclude all other Nations from this Traffick, pretending to have obtained the Sovereignty of these Kingdoms by Conquest. Whereas her Majesty was well apprised that the King had not only defended his Country against them, but carried the War into Malacca, where he had been victorious over those Powers: And if the King pleased to take into his Protection these Subjects of hers, they should establish an English Factory in his Kingdom: That the General should settle Articles of Trade with his Majesty in her Name, which of the EASI-INDIES.

which she engaged on her Part should be performed, and desired he would let her Majesty know how he approved of

this Commerce, in a Letter by the Bearer.

THE King thereupon ordered his Ministers to conclude Treaties of Alliance and Commerce, with the General, the principal whereof were, that the English should enjoy a free Trade, and pay no Customs, either upon Importations or Exportations; and that all Bargains should be punctually performed by his Subjects; that he would take the Factors into his Protection, and they should enjoy the Freedom of their Religion.

THE Portuguese at Achen doing all that lay in their Power to hinder the Traffick of the Engils; the General, to make himself some Satisfaction for the Mischief they intended him, cruized off the Port of Malacca, where he took a Ship of nine hundred Ton, going from the Coast of Coromandel to Malacca, with six hundred People on board, and found in her nine hundred and sifty Bales of Chints and Calicoes, plain and painted, and Abundance of other rich Merchandize (sufficient to frieght his Ships) Part of which he made a Present of to the King of Achen; and having taken in some Pepper and settled the Factory, the General sailed to Bantam, carrying with him a Letter from the King, in Answer to the Queen's.

This Letter the King begins with glorifying God for his Works, who is not, he observed, to be uttered by Words, or conceived by Imagination, that no Bounds can

contain him, or any Similitude express him.

HE declares himself highly pleased with the Offer of Trassick between the two Nations, and tells the Queen she may safely send her Subjects to trade in his Ports: That the Spaniards are his as well as her Enemies, and that he will fall upon them wherever he meets them: That he had formed her Factors into a Society, granted them Privileges, and instructed them in the best Methods of Trade, and to testify his Affection for her Majesty, had sent her a Ring adorned with a Ruby, and two Habits or Vests of Gold Stuff enclosed in a red China Box.

THE King also made the General a Present of a Ring at parting, but before he went on board, the King desired his People would sing him some of *David*'s Psalms, which a Dozen of the Company performed to his Satisfaction.

H

THE General set Sail soon after for Bautam, where he compleated his Cargo of Pepper, and then returned to England; where he arrived, after a very stormy Passage,

on the 11th of December, 1603.

THE English having erected several Forts in Sumatra. especially to the South of the Equinoctial, continued to traffick with the People of that Island, without any Interruption, all the feventeenth Century; but in the Beginning of this, some imprudent Chiefs being sent thither. gave the Natives feveral needless Provocations, which occasioned great Part of the Island to enter into a Confederacy, to extripate the English. Dampier relates, that an English Governor of Bencoolen, when he was there, put in the Stocks two Roja's, or fovereign Princes in that Neighbourhood, because their People did not bring down Pepper to the Fort so fast as he expected; and in the Year 1719 there was a general Infurrection of the Natives to drive the English from their Coast, which was begun by letting the Company's Sugar Plantations on Fire on the 25th of March, 1720, when the Bugasses or Macassar Soldiers in the Company's Service deferted the English. and most of them went over to the Enemy, and there being but one hundred and twenty-five English in the Fort. most of them unexperienced or disabled Men, it was thought most for the Company's Service, to put their Treasure on board the Ship Mechlapatan, that then lay in the Road, which was done on the 27th of March, 1720; and the Town of Bencoolen being fet on Fire by their own Bugasses, with most of the Houses in the adjacent Country, together with the Fort itself, most of the English with their Slaves went on board the Ship Mechlepatan; all that were fo unfurtunate as to be left behind being cut to Pieces by the Enemy.

FROM Benecolen they fet Sail for Batavia, where they arrived the 16th of April, and the Enemy in the mean Time took Possession of the Company's Fort at Bencoolen; however, within the Compass of a Year the Natives invited the English to return to their Plantation on the West Coast again, suffering them to compleat the Fortifications they had begun at Fort Marlbro; for though there had been some Governors sent to Bencoolen that behaved very imprudently, and often insulted the Natives, this

they

they thought a much less Grievance than a Dutch Government, which they began to be apprehensive of on the Expulsion of the English. They expected the Dutch would have laid hold of this Opportunity of seizing the English Settlements, and enslave them as they had done other Indian Nations. Laying aside therefore their Resentment against the English, they thought their wisest Way to give them all Manner of Encouragement to come and settle among them again, if it were but to keep out the Dutch.

THE English East-India Company were so discouraged by the Losses they had sustained at Bencoolen, and an Apprehension that the Natives would remain perpetual Enemies, and confequently it would be no Advantage to keep up their Forts and Settlements in that Country, that, 'tis faid, they left it to the Option of some of the Commanders, they fent to India, to abandon or reinforce their Settlements on the West Coast of Sumatra, as they judged proper; but fure, when these Orders are given, they did not reflect, that the giving up these Settlements must be the Loss of the Pepper Trade in a great Measure, which would immediately be monopolized by the Dutch, as the fine Spices had been. The English must in that Case buy their Pepper at fuch a Price as the Hollanders are pleafed to set upon it; for the Pepper Trade of Borneo is so precarious, that the Company fend but few Ships thither; and the little Factories on the Coast of Malabar cannot fupply fo much Pepper as this Nation wants.

JAVA, one of the Sunda Islands, is situate in the Indian Ocean, between one hundred and two and one hundred and thirteen Degrees of Eastern Longitude, and between five and eight Degrees of South Latitude, being seven hundred Miles long and upwards of one hundred broad, having the Island of Borneo on the North, the Straits of Bally on the East, the Ocean on the South, and

the Straits of Sunda on the North-West.

THE Air of Java, near the Sea, is generally unhealthful, unless where the Bogs have been drained, and the Lands cultivated, there it is much better, and in the Middle much more so. The worst Weather upon the North Coast of Java is during the westerly Monson, which begins the first Week in November, when they have some Hamber.

Rain. In December the Rains increase, and it blows frests. and in January it blows still harder, and the Rains continue very heavy till the Middle of February, when both the Wind and Rains become more moderate and decrease. till the End of Merch. Their fair Season commences in April, the Winds are then variable, and it is sometimes calm, only at the Change of the Moon there are sudden Gusts of Wind from the West. In the Beginning of May the Eastern Monson becomes constant. and in June and July there is a little Rain; but in this Monson they have generally clear, wholesome Weather, until the End of September. In October the eafterly Wind blows faintly, and in November the westerly Monson sets in again: When the westerly Wind and Currents are strongest here, namely, in December, January and February, there is no failing against them. easterly Winds and Currents are more moderate; Ships may fail against this Monson, and a Ship may come from the Westward through the Straits of Sunda to Batavia ala most at any Time. There is good Anchorage on the Java Side, in twenty or thirty Fathom Water: Near the Coast of Fava and Borneo, from April to November, they have Land and Sea Breezes from different Points; the Wind blows from the Land between One and Four in the Morning, and continues till Noon; at One or Two in the Afternoon it blows fresh from the Sea for five or fix Hours.

A CHAIN of Mountains runs through the Middle of the Island from East to West, which are covered with fine Woods. The low Lands are flooded in the Time of the Rains. Along the North Coast of Java are fine Groves of Cocoa-Nut Trees, and wherever we see one of these Groves, we do not fail to meet with a Village of the Natives.

THE Island was anciently divided into Abundance of petty Kingdoms and States, and when Admiral Drake visited this Island in his Voyage round the Globe, in the Year 1579, he relates, there were five Kingdoms in it. We may now divide it into two Parts, 1. The North Coast, which is under the Dominion of the Dutch; and, 2. The South Coast, subject to the Kings of Palambang and Maieran. Bantam was, till lately, the most considerable Kingdom in Java, but this King is now a Vassal to the Dutch.

BANTAM,

BANTAM, heretofore the chief Town, is situate in a fine Plain, at the Foot of a Mountain, from whence run three Rivers, two of which surround the Town, and the other passes through the Middle of it; and when this City was in its Prosperity, is was twelve Miles in Compass, and exceeding populous, being one of the chief Ports in the Indian Seas, to which the European as well as Assatick Merchants resorted; but the Dutch have removed the Trade to Batavia, and most of the Inhabitants have deferted it; the English Factory was expelled by the Dutch in the Reign of King James II. since when neither the English, nor any other European Nation, have been suffered to trade thither.

BATAVIA, or Jacatra, is fituate in a level Country, on a fine Bay of the Sea, forty Miles East of Bantam; several Islands lying before the Bay, cover it from the Winds and Waves, so that one thousand Sail may ride here securely; two large Moles run out half a Mile into the Sea, and Vessels may lie close to the Keys. In one of these Islands, before the Harbour, the Dutch are perpetually building or careening of Ships, from whence it has obtain-

ed the Name of On-rost, or No-rest.

THE Form of the Town is almost square, built with white Stone, and laid out in spacious Streets, Canals lined with Stone, and planted with Evergreens, running thro' the principal Streets; the River which passes through the Middle of the Town supplying them with Water; and it is defended by a Fort which commands the Harbour, and the Town is furrounded by a Wall and twenty-two Baltions. What adds to the Beauty of the Place is their Bridges, near fixty of which built with Stone are laid over the Canals. Within the Fort stands the General's House, and the Apartments of the principal Officers. In the Middle of the City is a fine Square, on one Side of which is the great Church, and on another the Stadthouse. The Suburbs reach a Mile and half beyond the City, in which are large Gardens and Orchards. Here the Chinese live, or rather did live, and had their Temples and Tombs refembling those in their Mother-Country, and the free Exercise of their Religion, which is denied to the Lutheran Protestants. Here also reside the Javanese, Malays, Bandanese, and a Multitude H 3

Multitude of other People, which the Dutch have brought hither from Countries they have enflaved. There are little Forts erected on every Side, fix or feven Miles from the Town, to defend the Avenues, and for the Security

of their Country Seats and Gardens.

Most of the great Towns in this Island, especially those that are under the Dominion of the Dutch, are situate on the North Coast; those East of Batavia are Charabon, Samarang, Japara, Roombong, Tuban, Sidaya, Jortan and Suralaija, and at the East End of the Island are the Towns of Pallarvan and Panarucan, and on the South Coast

Palambang and Materan.

THE native Favanese wear a Kind of Skull-Cap, but their Bodies are naked to the Middle, wrapping a Piece of Silk or Calico about their Loins, which reaches below the Middle of their Legs, which are bare. The Women cover their Bodies with a Piece of Silk or Calico, and have another Piece wrapped about their Loins, and dress in their The Men are employed in Husbandry and Fish-Hair.

ing, or in building Country Boats.

THERE is a mixed Breed, called Topasses or Mardikers, confifting of feveral Nations, incorporated with the Dutch, andhave greater Privileges than the rest. Many of these are Merchants, and differ but little in their Habits, or Way of Life from the Dutch, only the Men wear large Breeches or Trowfers, which reach down to their Ancles. The Women tie up their Hair in a Roll on their Heads, wear a Waistcoat, and a Piece of Silk or Calico wrapped about their Loins. These live both in the City and Suburbs.

THE Macassars, whose Ancestors possessed the Island of Celebes, and were enflaved by the Dutch, though they went almost naked in their Mother-Country, wear Cloathing here.

SEVERAL of the Timoreans, Inhabitants of an Island East of China, having been brought hither by the Dutch, now constitute Part of the People of Batavia. The Habits of these and of the Macassars I have not met with any Account of; but as many of them profess Christianity, and are conformable to the Dutch in their Religion and Customs, it is to be prefumed they cloath themselves as the Hallanders do.

THESE and many more Nations the Dutch have subdued, and out of them have formed a body of twelve or fifteen thousand thousand regular Troops, one thousand of them mounting

Guard at Batavia every Day.

THE Dutch, by introducing such Numbers of the Indian Nations, have made Batavia one of the most populous Cities in Asia; and the chief People of the several Nations being thus in their Power, they have not much to sear from the meaner Sort, who have been left behind to cultivate the Ground.

THE Hollanders have done whatever Force or Policy could do to establish their Empire in the East, if Justice and Clemency had had some small Share in their Councils. The Want of these may probably one Day incline the Natives to join some other Powers against them. I have long been of Opinion their Reign would not be lasting, as they have never endeavoured to gain the Affections of the conquered Nations; but now fo many Powers are endeavouring to rival them in the Indian Trade, the Time seems approaching when they must abandon what they so unjustly acquired: Other Nations will certainly join the Natives to drive the barbarous Hollanders from their Shores, as they, with the affiftance of the injured natives, did the Portuguese about one hundred Years ago. This can only be prevented by doubling their Forces on that Side; and if they should encrease their Garisons, and render their Governors more powerful in that Part of the World, some ambitious Chief possibly may set up for himself, and render their Colonies independent of their Mother-Country, as the Governor of Ceylon lately did. The obtaining the Sovereignty of that charming Cinnamon Island is so strong a Temptation to an ambitious Man, as it is not easy to resist, especially as the possessing of that must make great Part of the World dependent on him for the Spice it produces.

Rice is the principal Grain that grows here. They have also Plantations of Sugar, Tobacco and Coffee: Their Kitchen Gardens, are well replenished with Cabbages, Purslain, Lettice, Parsley, Fennel, Melons, Pompions, Potatoes, Cucumbers, and Radishes. Here are also all Manner of *Indian* Fruits, such as Plantains, Banano's, Coco's, Anano's, Mangoes, Mangosteens, Durions, Oranges of several forts, Limes, Lemons, the Betel and Arek Nut; Gums of several Kinds, particularly

114

Benjamin: In March they plant Rice, and their Harvest is in July. In October they have the greatest Plenty of

Fruit, and they have some all the Year.

THEY have good Timber, Cotton, and other Trees proper to the Climate, besides Oak, Cedar, and several Kinds of red Wood. The Coco Tree is very common, which is of universal Use, affording them Meat, Drink, Oil and Vinegar; and of the Fibres of the Bark they make them Cordage; the Branches cover their Houses, and the Leaves they write on with a Steel Stile, and with this and the great Bamboo Cane they build their Houses,

Boats, and other Veffels.

HERE are Buffaloes and fome Oxen, and a small Breed of Horses. The sew Sheep we find here have Hair, rather than Wool, and their Flesh is dry. Their Hogs, wild and tame, are the best Meat we eat here, or in any other Countries between the Tropicks; and their Venison is good: Here are also Tygers and other wild Beasts, Crocodiles, Porcupines, Serpents, Scorpions, Locusts, and a Multitude of Infects; Monkies also abound here: Mr. Leguat, who resided in Java some Years, relates, that he faw a Monkey that was kept in one of the Bastions at Batavia, that came very near the human Form; that it was a Female, went upright on its hinder Legs, was very tall, and concealed the Pudenda with one of its Hands; that she made her Bed neatly every Day in a little House her Master had built for her, and lying down at Night, covered herself with a Quilt, and sometimes would bind her Head with a Cloth, and feemed to grieve as if she had the Head-Ach. Mr. Leguat imagined great Pains had been taken to teach the Creature to perform fuch Actions, as feemed to be the Refult of Reason, while others were of Opinion it was the Issue of an Ape and a Female Slave; for when a Slave has committed a great Fault, or what the Dutch are pleased to call such, they frequently run up into the Mountains, and live perfectly wild, and supposes that this Creature was begot on her Mother by fome Male Ape.

The Food, Salutations, and Diversions of the Indians in this Island are the same as in Borneo and Sumatra, and therefore need not to be repeated here. The Dutch travel

in Coaches, and on Horseback, and sometimes in Palanquins, or covered Couches, carried on Mens Shoulders,

as the Indians do, with a grand Retinue.

None of the Nations of Europe are suffered to trade to Fava, but from China fourteen or fifteen Junks of two hundred or three hundred Tun, used to come every Year in November or December, and return home in June; which furnished the Dutch with the Merchandize of China upon easier Terms than they could purchase it in that Country: And this is the Reason the Dutch so seldom visit that Kingdom, and permit other Nations to trade thither, which they could prevent if they pleased, by fhutting up the Straits of Sunda and Malacca, which the Squadrons of Men of War they always keep in India, enable them to do. Besides the Goods imported to Batavia by the Chinese; the Dutch themselves import the Produce of Japan, the Spice-Islands, Persia, Surat, Bengal, the Coast of Coromandel and Malabar, and all the Merchandize of Europe and Africa. Never were fuch Magazines of Goods laid up in any City, as are to be found in Batavia, except in Amsterdam itself; and as they barter the Goods of one Country for another, the Indian Trade is fo far from diminishing their Treasure, that it brings them in more Gold and Silver than any other Trafick. They have fuch a Superfluity of Spices, that they employ People to root them up in the Molucca's, and, it is faid, burn Ship-Loads of Cinnamon in Ceylon; but I should think the last Article unnecessary, because if they did hot burn the Cinnamon, they have so fortified the Coasts of that Island, that no other Nation can come at it. The Dutch. with great Propriety, affume the Title of Sovereigns of all the Seas, from the Cape of Good Hope, Eastward, to Cape Horn in America. I don't know any Power, that can refift the Fleets they are able to fit out at Batevia, within these Limits.

LEARNING is not to be expected among the Natives of Java; most of the modern Indian Languages indeed are spoken here, but none are more generally understood than the Malayan and Portuguese, and the Dutch have sounded Schools in Batavia for teaching the learned Languages which are studied in Europe, and all Kinds of Mechanick

Arts

Arts are brought to great Perfection here. A Printing House, Paper Mills, and Gunpowder Mills, are erected here; there are also Sugar-Bakers, Cotton-Weavers, Carpenters, Ropemakers, Bricklayers, Shipwrights, Smiths,

Braziers, Cutlers, &c.

THE Island of Java was not known to the Europeans. until the Portuguese passed the Cape of Good Hope, about the Year 1500, where they found the Arabians planted upon these Shores, as they were upon the adjacent Islands; whose Ancestors, very probably, came hither so long ago, as the Phanicians, Egyptians and Jews, ventured into these Seas, in Search of Spices, Gold, and other rich Merchandize, the neighbouring Islands afford: About an hundred Years after the Portuguese arrived here, the English and Dutch began to trade with the Javanese; Bantam being the chief Port to which the Chinese and most of the Indian People reforted, which made Bantam one of the greatest Marts in India: But there being a Missunderstanding between the King of Bantam and the Hollanders, the latter removed to Jacatra, now Batavia; where they erected Forts, and introduced fo many Troops, that they foon found themselves in a Condition to give Law to most of the Sovereigns in that Island; the King of Bantam only hindered them being Masters of it. The Hollanders therefore understanding there was a Difference between that King and the Prince his Son, they joined the Prince against his Father, and affisted him to usurp his Throne; they afterwards introduced fuch a Number of Forces into that Capital as enabled them to command both Father and Son, fuffering the young King, however, to retain the Name of King, but took the Administration of the Government entirely into their own Hands, expelled all European Factors and Merchants from the Coasts, and particularly the English, who had a very great Trade here, so lately as the Reign of King James II. And the Dutch may now be looked upon as the only Power in that Island, except the Kings of Materan and Palamboan, whose Territories are situate beyond the Mountains on the South-East Part of the Island, from whom they do not apprehend any Disturbance.

THE Princes that are their Vassals, are permitted to live in as great State as ever they did when they were really Monarchs, and the Orders of the Hollanders are executed in the Name of fuch Kings. An Instance of the State they appear in, has been given us by a late Traveller; he relates, that when the King of Bantam goes in or out of his Palace, the Great Guns are fired, and four of the Natives of Amboyna, Men of prodigious Stature and terribl Countenances, with their Shields and Broad Swords, begin the Procession, who are followed by a Company of Favanese Soldiers, and another Company that are Natives of Bally, or Little Fava, follow them; after these come fix fine Perfian Horses richly accoutred, and then the King's Son on Horseback, but very young, attended by a great Number of Women, carrying golden Veffels, with Fruits and Flowers; after whom marched a Body of Dutch Soldiers, and then the King mounted on a Persian Horse. covered almost with gold Trappings, attended also with great Numbers of Women on Foot; and two Companies of Soldiers, the one Dutch, and the other Favanese, closed the Procession.

THE Dutch Governor of Batavia also takes great State upon him, and has in Reality the Power of a Sovereign Prince. A Troop of Horse Guards precede his Coach when he goes out, Halberdiers surround his Coach, and a Company of Foot-Guards march after it, cloathed in yellow Sattin, enriched with Silver Lace and Fringe; and the Governor's Lady has her Guards, and is attended in all Respects, both within and without Doors, like a Queen.

THE Dutch have upwards of twenty thousand standing Forces in Java, one Part Hollanders, and the other Indians; but except the Guards, their Soldiers make no great Figure, their Cloathing being very mean, and not uniform; and they mortify the Subaltern Officers pretty much, not suffering them to have an Umbrella carried over their Heads, though they allow the meanest Dutch Tradesman this Privilege.

As Batavia is a Place of the greatest Trade in India, the Customs must be very considerable: They lay a Poll-Tax also on the Chinese, who pay a certain Sum for the Privilege

Privilege of wearing their Hair, and as much more for every Silver and Gold Bodkin in it; which must amount to a good Sum, if every *Chinese* in the Island pays this Tax; for there are not less than one hundred thousand *Chinese* there; but I question, whether one Half of them live in and about *Batavia*.

Beside the Land Forces, the *Dutch* have not less than thirty or forty Men of War in *India*, which are a Force sufficient to engage any *European* or *Indian* Fleet they may meet with in those Seas. As for the *Javanese*, they never had any Ships of above fifty Tun, but some swift-sailing Praws, which are almost equal to those of the *Ladrone Islands*.

THE Nations the Dutch have enflaved, and the Cruelties they exercised both on Europeans and Indians in the last Century, have been taking Notice of already, and were almost forgot, till the Massacre of the Chinese in Batavia, in the Year 1740, revived the Memory of them: To justify which, the Dutch pretended to have discovered a Conspiracy of the Chinese, to make themselves Masters of Batavia, and extirpate the Hollanders: But as this was the Pretence for murdering our innocent, defenceless Factors, at Amboyna, as well as for massacring the Natives of the Spice Islands, and for the numberless Cruelties they have exercised in India, this will be but little regarded; especially, when it appears, that the Chinese, who inhabited the Suburbs of Batavia, peaceably delivered up all their Arms, as foon as required. What Danger could then be apprehended from them? None of them lived within the Walls of the City, which was well fortified and defended by a Castle and several other Forts, and a Fleet of Men of War in the Harbour. If it be confidered further, that the Chinese without had no Cannon, or any Preparations made towards forming a Siege, in this defenceless Condition, could the Dutch be so terrified, as not to admit one of them to a fair Trial, or find any other Evidence against them, but what they extorted by the Rack? and yet destroyed upwards of twenty thousand of these People in cold Blood, having first disarmed them. The Governor, to excuse his barbarous Cruelty, affirmed, that the Order for the Massacre was signed by every one of his Council, except Baron Imboff, whom he fent to Europe in Irons, because he would not consent to the Order: And, I have fo favourable an Opinion of the Dutch, that I can't think, all the rest of the Council would have figned the cruel Order, if they had not been induced to do it by the Governor's Threats, who hoped to screen himself from Justice, by procuring the Hands of most of the Council. So much he depended upon this, that he ventured to fend his most valuable Effects to Europe. declaring, that he would go thither himself, not doubting but he had amassed Treasure enough by the Plunder of the Chinese or otherwise, to have bribed any Tribunal in Europe, in his Favour; but the States of Holland being apprifed of his Intention, fent Orders to the Governor of the Cape of Good Hope, if he came that Way, to stop him, and fend him back to Batavia to take his Trial. The Packet which included these Orders arriving at the Cape when the Governor of Batavia was there, who having a fuperior Authority to the Governor of the Cape, and all other Governors between that Place and Japan, the Packet was first carried to him, and delivered into his own Hands: but he never dreaming what it contained, fent it, unopened, to the Governor of the Cape, who no fooner faw. the Contents, but he fent a Guard to seize on his Batavian. Excellency, and put him on board a Ship bound for India; and he was probably thrown overboard, to prevent any further Enquiries: And to shew the Resentment of the States at this barbarous Execution, they also dispatched Baron Imboff, to take upon him the Government of Batavia, whom the former Governor had fent over in Irons, for expressing his Abhorrence of the Massacre. And now, when the Dutch themselves have thus shewn their Detestation of the Fact, is it not strange to see some of our own Writers justifying the cruel Order, and relating false Facts, in order to excuse the Persons that perpetrated this monftrous Villany; and even excusing and justifying the Dutch, in torturing and mudering the English Factors at Amboyna, and not only plundering their Effects, and taking their Ships, but invading and subduing the English Spice Islands, and keeping Possession of them to this Day, notwithstanding we had the best Title to them that could

be made, namely, the Cession of the Princes and States of those Countries?

WHETHER the Dutch really approved the Massacre of the Chinese, or not, may be a Doubt; but seeing the rest of Mankind expressing their Abhorrence of it, they certainly hoped to throw the Odium off themselves upon their Governor, by fending him back to be tried at Batavia, where the Crime was committed, affording more Mercy to him, than he had shewn to so many thousand Men, Women, and Children murdered in cold Blood; but whether the late Governor ever reached Batavia, or was put to Death without a Trial, as the Chinese were, is yet doubtful: All that can be affirmed of Certainty is, that he has disappeared ever since, and we hear of no Profecution begun against him, or any of the Council that figned the Order with him. Baron Imboff, who fucceeded the cruel Governor, is fince dead; whether he died fairly or not, or was taking off for not complying with the late Governor's Orders, will be difficult to know; for Mysteries of State, or rather Mysteries of Iniquity, are sometimes impenetrable, and may remain Secrets till the last great Day of Account. To return to the Description of the Favanese.

As the Women of Java are remarkable for their amorous Disposition and Constancy to the Man they espouse, and expect that the Man should be equally constant, if her Lover goes aftray, she makes no Scruple in preparing a Dose for him. An old Traveller, who seems much enamoured with the Javanese Ladies, gives this Description of them; he observes that they are much fairer than the Men, have good Features, little swelling Breasts, a soft Air, sprightly Eyes, a most agreeable Laugh, and a bewitching Mien, especially in Dancing: that they express the greatest Submission to their Husband, prostrating themselves before him when he enters the House. Polygamy prevails here; the Javanese have several Wives besides Female Slaves, of whom they make Concubines

when they fee fit.

THERE being a Scarcity of European Women, the Dutch are allowed to marry a Native, provided the will profess Christianity, which she is seldom averse to, as it gratises

her

her Pride; a Christian and the Wife of a Dutchman taking Place of a Native Javanese, and being allowed a great many Privileges, which the Natives can't enjoy; and her Husband is obliged to confine himself to her Bed, and bring no Rivals into the Family.

INSTEAD of hired fervants at Batavia, every body almost is ferved by Slaves of all Complexions and all Nations; the Buyer asks no Questions from whence they came, or how the Seller came by them, which induces the Rovers or Free Booters in these Seas to land upon any Coast, and carry off the Inhabitants, Men, Women, and Children, and fell them at Batavia, or any other Town

where there is a Demand for Slaves.

I PROCEED to the Description of some other Favan Princes, who are still independent of the Dutch. The two Kingdoms of Materan and Palambang are fituate on the South Side of the Island. Materan, the Capital of the first Kingdom, is situate in one hundred and ten Degrees of Eastern Longitude, and in seven Degrees forty-five Minutes South Latitude. Palambang, the Capital of the Kingdom of that Name, is fituate in one hundred and fourteen Degrees of Eastern Longitude, and in seven Degrees thirty Minutes South Latitude, on the Straits of Bally, through which the East-India Ships fometimes pass, when they are homeward-bound from Borneo; fuch Ships touch at the Town of Palambang for fresh Water and Provisions; but the Surf often beats with such Violence on the Shore, that makes it difficult Watering there. Captain Beckman passed this Strait in January, 1724, and relates that he was fifteen Days between the East End of the Island of Madura and the Straits, though it was not above thirty Leagues, and should have been longer, if he had not observed that once in twenty-four Hours the South Wind broke through the Straits with fuch Violence, that it fet him back as much as he had gained the whole Day before: That this Wind is always attended with heavy Rains, and lasts about an Hour, but gives timely Notice of its Approach. He advises Ships therefore that pass to the Southward to keep the Coast of Java on board, steering along Shore within a Mile or two with the northerly Breeze, which lasts till the other comes from the Southward,

ward, in which Time the Ship will have run four or five Leagues to the Southward of the North-East End of Java, when you will open a black fandy Bay; and when the Tormado is feen beating up the Straits, which may be discerned an Hour before it comes, it is adviseable to get near enough into the Bay to anchor before the foutherly Wind reaches you; but there is no fafe Anchoring till the Ship gets into the Bay, the Strait between Java and Bally not being half a Mile over in the narrowest Part, and the Mountains on each Side of a prodigious Height hanging almost over the Ship, and affording a dismal Prospect, while Gusts of Wind frequently come down from the Hills, veering round the Compass. To prevent being whirled round, therefore, by the circling Eddies, he advifes to keep the Boat a-head; but when the Ship is got to the narrowest Part of the Strait, the Rapidity of the Current to the Southward foon forces the Ship through. The Danger of the Passage is not so great as is generally believed, and after the Strait is passed, the Ship may anchor in the Bay of Palambang, where it may be supplied with Wood, Water, and other Provisions.

The Natives here are under terrible Apprehensions that the Dutch design to send a Colony hither, and thought his Ship had belonged to the Hollanders; but as soon as they understood the Captain was an Englishman, the King invited him on Shore, and the next Day came on board his Ship. The Captain and his Officers were afterwards well entertained on Shore, and the King made them a Present of Rice, Oxen, Deer, and Poultry; and the Captain was informed that the Country produced Gold, Pepper and Cotton in Plenty. They had a small Breed of Horses, Bussaloes, Goats, and very large Oxen; all Manner of Land and Water Fowls, and Fish. The King and his Subjects are most of them Pagans, though there are some

Mahometans, and the Chinese trade to this Place.

THE Island of Bally, or the Lesser Java, is only divided from the larger Island by the last mentioned Strait; and Eastward of this are the Islands Lomboy, Combava, Flores, Solor, Timor, and several more, upon which the Dutch have Forts, and look upon the Natives as their Subjects, many of whom have been transported to Batavia, and serve

ferve in the Dutch Troops. Timor is the largest of these Islands, being about two hundred Miles in Length, and fifty in Breadth, and divided into feveral petty States, which the Dutch play against one another, and by that Means govern the whole. The Portuguese had formerly Colonies here, whose Descendants are now so intermixed with the original Natives, that they are scarce to be diflinguished from them, especially as they profess the same Religion. There are also some Pagans and Mahometans still remaining here, and the Chinese come hither to trade once a Year: The Inhabitants are so very swarthy, that they are fometimes taken for Blacks, and those that are not under the Government of the Portuguese or the Dutch are represented as Savages; they wear no Cloathing but a little Piece of Cloth about their Loins, and the better Sort wear a Kind of Coronet about their Temples, adorned with little thin Plates of Gold or Silver; the rest have Caps made with Palmetto Leaves. Their Arms are Swords, Darts, and Lances or Spears, and with these they run down and kill their Game. Their Animals are the fame as in the Island of Java, as well as their Forest and Fruit Trees. The Dutch don't feem to make any great Profit of these Islands; the principal Design of their building Forts here is to defend the Avenues to the Spice Islands. which lie in their Neighbourhood.

THERE are Countries which lie South-East of these Islands, to which the Dutch have given the Names of New Guinea and New Holland, in which they relate there are fome few favage Inhabitants, and that they are not worth the planting; and I can't learn that the Dutch themselves, to whom they must be of more Value than to any other People, as they lie not far from Batavia, have made any Settlements there; for which there may be this Reafon, that the Hollanders have possessed themselves of more Countries in the Fast already than they can possibly maintain and defend; but 'tis strange that no other Power visits those Coasts, when they lie so near the Spice Islands, and possibly may produce the like Fruits. As every Nation almost now puts in for a Share of the East-India Trade; furely, some of them will make the Experiment, and not fit down with the Account the Dutch have given us of them,

them, whose Interest it is to prevent other Nations settling so near the Spice Islands. The English did make some Essay towards this Discovery about the Year 1700, being at the Charge of sitting out Captain Dampier, and sent him into these Seas, where he met with a People not so barbarous as the Dutch represented them, and treated with them about entering into an Alliance with the English; and is I remember right, he brought home a Crown and Sceptre, made of Wood, or some very mean Materials, which one of their Princes presented him with. Dampier happened to be cast away upon the Island of Ascension, and though the Ship was broke to Pieces, he and his Crew got safe to Shore, and were taken up by Commodore Warren, on his Return from India, where he had been to suppress the Pirates in those Seas.

What Report Dampier made to the Council, or the Board of Trade, on his Return to England, I never heard; but it feems, the Government never made any further Attempts to inform themselves of the State of those Countries, or whether it might be worth while to plant them. I am apt to think the Reason nothing further was done towards the Discovery, was, because we were entering into that long War in the Beginning of the Reign of Queen Anne, which engrossed the whole Attention of the Court.

I RETURN now to the Description of the Indian Islands, of which the Chief of those that remain to be treated of are the Nicobar and Andoman Islands, and those of the

Maldiva's.

The Nicobar Islands are situate in the Indian Sea, between ninety-two and ninety-sour Degrees of Eastern Longitude, and between seven and ten Degrees of North Latitude, near the Entrance of the Bay of Bengal, a little North of the Island of Sumatra. The largest of these Islands, which lies most to the South, is forty Miles long, and fifteen broad; the South End is mountainous, and there are some steep Rocks near the Sea; the rest of the Island is covered with Woods, but not high Land. It is a rich Soil, that would produce almost any Grain, if it was cultivated. The Groves of Coco-Nut Trees, that stand in the stat Country near the Sea, are exceeding pleafant; but I don't find there are any Towns, only as we

fail by, we see Clusters of five or six little Houses in every Creek and Bay, which are built on Bamboo Pillars, eight or nine Feet above the Surface of the Ground, the Roof neatly arched with bended Cane and covered with Plam Branches.

THESE Islanders are moderately tall, the Complexion a deep Olive, and have long black Hair, and black Eyes; their Women might be efteemed handsome, if it was not the Custom to pull the Hair off the Eye-brows by the Roots.

THE Men wear no Cloaths, but a little linen Cloth about their Loins; that of the Women is deeper, reaching below their Knees. The Country is fill over-run with Wood; they neglect to clear it, and cultivate the Ground, but live chiefly on Fish and such Fruits as the Country produces spontaneously; they have little Trade or Commerce with any other People; but as Ships sail by in their Way to and from the Straits of Malacca, they bring off Hogs, Poultry and such Fruits as the Country affords, taking Tobacco, Linen, and other Necessaries in Return.

THE Andowan Islands lie in the Bay of Bengal, North of the Nicobar Islands, in ninety-two Degrees of Eastern Longitude, and between ten and fifteen Degrees of North Latitude. These Islands do not seem to differ much from those of Nicobar, except in producing Rice, which is cultivated here and eaten by the Natives as well as Fish and Fruit; and both these People, when the Europeans first visited them, were charged with devouring their own Species, though it appears, that for the most Part they live upon the Fruits of the Earth, and are so far from eating human Flesh, that they hardly eat any Flesh at all. I have examined the Custom of most Countries, which had the Reputation of being Canibals, and have not been able to find Evidence, or even a Probability, that there was ever a Nation of Canibals. What particular People might be induced to do, driven to it by Necessity, is a different Thing; but I can't readily give Credit to the Stories we meet with of whole Nations of Canibals. I have myfelf experienced what Hunger is, lived two whole Days without taking any Nourithment whatever, and was fo far from finding my Appetite encrease, that I grew indifferent whether I eat or not. The Rage of Hunger, as some People call it, will be as violent after twelve Hours fasting, as ever it will be. Thirst is much more intolerable than Hunger, especially when the Sun is continually shining upon us with perpendicular Rays, of which I remember the following Instance. Seven or eight English. men (with one of whom I failed in the fame Ship to India) being taken Prisoners by the Arabs, escaped into the fandy Defarts, where they met with no Water for feveral Days, and the Sun all the Day-Time beating over their Heads; whereupon they agreed that one of them should bleed, and the rest drink his Blood; and having catt Lots who should be the Sacrifice, it fell to my Friend's Turn; but such was their Thirst, that it was almost indifferent to them on whom the Lot fell: My Friend very readily let himself Blood, and bled to Death, and the rest by drinking of it faved their Lives till they came to some Water, and all of them returned alive to India, and gave this Relation of the Matter.

ANOTHER Instance of the intolerable Rage of Thirst I knew in India, was this. Our Ship, the Martha, lying at an Anchor before Fort St. George, four of the Seamen agreed to run away with one of the Boats in the Night-Time. Accordingly they got into the Boat, while the Man who kept it was afleep, and rowed to Sea after something they took to be a Ship, but happened to be a Cloud. and were so far from Land the next Morning, that they could fee neither Land or Ship, and had neither Provision or Compass with them. It happened to be bright Weather at that Time, and the Sun directly over their Heads, which had that Effect, that one of them on the third Day fell mad, and so died, and was thrown overboard; two more of them died in the fame Manner, the succeeding Days, and were thrown into the Sea; and now two only remaining, on the ninth Night they heard the Surff beating against the Shore, and had just Strength enough to turn the Head of the Boat towards the Land, and came fafely to it, having received no other Nourishment in the nine Days than the Blood of a Tortoise or Turtle they found afleep upon the Water, and hauled into their Boat; and of this, I think, they drank but one Coco-Nut Shell a-

piece,

piece, mixed with the Sea-Water. When the Boat came ashore, they found they were two hundred Miles North of Fort St. George, from whence they set out. The Boat-Keeper came back afterwards to the Fort, from whose Mouth I had this Relation. The other Man that was left alive went into the Mogul's Service, not daring to return, for Fear of being punished for running away with the Boat; but the Boat-Keeper pretending he was asleep when the Boat put off, and innocent of the Conspiracy, thought he had nothing to apprehend from his Masters.

THE Reader, I presume, will pardon this Digression, as I had so fair an Opportunity to speak of the Effects of

Hunger and Thirst of my own Knowledge.

I COME now to conclude the Description of the Indian Islands, of which only the Maldiva's remain to be treated of.

MALDIVA Islands are situate in the Indian Ocean, between fixty-eight and feventy-fix Degrees of Eastern Longitude, and between the Equator and feven Degrees of North Latitude, about five hundred Miles South-West of the Continent of the Hither India, being about one thousand little Islands, and a Multitude of Rocks just above Water, stretching generally North-West and South-East, generally slat low Land, difficult to be approached, but at three or four Inlets. The People descended from the Arabs, and retain the same Religion (Mahometanism) and Customs with those of their Mother-Country. One King commands them all. The Islands produce the tropical Fruits, especially the Coco-Nut, which is both Meat and Drink; and the little Sea-Shells, or Cowries, called Blackamoors Teeth, are the Produce of these Islands, and serve in India instead of small Money, to purchase Herbs and Fruits. They abound in Fish, but I don't find they have Rice or any other Corn, but import Rice from the neighbouring Continent of India.

CHAP. V.

Describes the Kingdoms of Tonquin, and Cochin-China.

NDIA is usually divided into two Parts, viz. India beyond Ganges, and India on this Side Ganges: I shall first enter upon the Description of that Division which lies beyond the River Ganges (because it adjoins to China) which comprehends, 1. The Kingdom of Tonquin. 2. Cochin-China, and Chiempa. 3. Siam, including Malacca, Cambodia and Laos. 4. Pegu and Martaban. 5. Ava, including Arracan, Tipra and Acham: The whole lying between ninety-two and one hundred and nine Degrees of Eastern Longitude, and between one and twenty-eight Degrees of North Latitude.

TONQUIN, the first of these Divisions, is bounded by China on the North and East, by the Bay of Cochin-China on the South, and by Laos on the West, and is situate between one hundred and one and one hundred and nine Degrees of Eastern Longitude, and between twenty-one and twenty-seven Degrees of North Latitude, being about sive hundred Miles long, and sour hundred broad.

As we fail up the River Domea, we view a fine, level, fruitful Country; in which are no Trees, unless about the Villages, but a pretty Mixture of Rice Ground and Pastures: Further within Land on the North, it rises into Hills, the Air generally healthful, especially in the dry

Seasons.

The South Division of this Country lies in the Form of a Crescent, about a spacious Bay of the Sea, near one hundred Miles wide; the Dept in the Middle about forty-fix Fathom, and good Anchorage in every Part of it. Into this Bay, run the Rivers Rockbo and Domea, which rising in the Mountains on the North-West, take their Course to the South-East, and running almost parallel, discharge themselves into the Bottom of the Bay, at about twenty Leagues Distance from each other. The Europeans trade with the Natives, up the River Domea, which is near two Miles over at the Mouth; but there are so many

many Sands on each Side, that it is necessary to wait for

a Pilot to carry a Ship over the Bar.

THE Year is here divided into the wet and dry Season, as in other Countries, which lie between the Tropicks. The wet Scason begins in April or May, and lasts till the Beginning of September, in which Time, however, there are confiderable Intervals of fair Weather, especially in the Mornings. In September the Rain and Wind are moderate generally, and yet in that Month and Officier, happen the Tuffoons (Typhones) which are fuch violent Storms, that no Ships venture out of the Harbour, during that Time. The Tuffoons happen usually about the New or Full Moon; it is fine, fair Weather, and little Wind, twelve Hours before the Storm begins. The Wind having blown very fiercely for twelve Hours from the North-East, and attended with Thunder and Lightning, and heavy Rains, it grows calm on a sudden, but in the Space of an Hour turns about to the South-West, and blows with equal Violence from that Quarter: When the Sun is at the greatest Distance from them, is their fairest Weather, as it is in most Countries between the Tropicks. The Rains are heaviest when the Sun is vertical, but the Seasons are not always alike: Sometimes they have not Rain enough for their Rice, which most commonly grows in Water.

In Tonquin are eight Provinces. Cachao or Keccio, the Capital City, is fituate about one hundred Miles up the River Domea, in one hundred and five Degrees of East Longitude, and twenty two Degrees thirty Minutes North Latitude, on an elevated Situation, having neither Wall or Moat about it. There are about twenty thousand Houses in it, most of them low thatch'd Cottages, and fome few built of Brick; their Streets wide, but ill paved, and several muddy Ponds, which, in the dry Season, are

very offensive.

THE King's Palace is in the Middle of the City, and with the Parks and Gardens which furround it, eight or nine Miles in Circuit. There is another Palace meanly built, in which the Choua or General resides; before it is a grand Parade, for exercifing the Soldiers, and a House where the Train of Artillery, confisting of fifty or fixty Iron Guns are lodged, and fome Mortars: Near the Parade also is a Stable of War-Elephants, and another of

the King's Horses.

DOMEA is a Town situate about sixteen or eighteen Miles up the same River, where the Dutch Ships which trade to this Country usually lie; but the English ride three Miles higher. The Dutch have a Factory at Domea, where they employ their temporary Wives to buy up Goods during their Absence.

HEAN stands upon the same River, about eighty Miles from the Sea; it consists of about two thousand Houses, and has a Garrison of Soldiers in it. Here the Chinese have Factors, who trade between this Place and

Japan.

THERE are Abundance of Villages in the flat Country, furrounded with Walls or Banks of Earth, to defend

them against the annual Floods.

THE Natives are of a Middle Stature, tawny Complexion, black long Hair, which falls down on their Shoulders, and black Eyes, and their Teeth dy'd black; they wear the Nail on the little Finger of the Left Hand as long as the Finger, as the Chinese do: They are fairer Dealers than the Chinese, submissive to their Superiors,

and very faithful and diligent,

THEIR Habit is a Gown girt about with a Sash: The Sexes are scarce distinguishable by their Dress. People of Condition wear English Cloth, red, blue, or green, or else Silk of their own Manufacture; their Caps made like the Crown of a Hat, of the same Materials as the Gown; the Common People wear Cotton or Calicoe; the Soldiers the same, but shorter; and all of them wear Cotton Breeches, or Drawers, which reach down below their Knees.

The People of Tonquin are good Mechanicks, but their Lords, who are Owners of the Lands, keep them so miferably poor, that they are frequently forced to remain idle, for Want of Materials to work upon. The Dutch, who marry temporary Wives in this Country, employ them as their Factors to buy Materials, and set the poor People to work, and have their Goods ready against the Shipping arrives.

THRIR Manufactures are chiefly Silk and Lacquered Ware; the Country produces also Turpentine, Lignum Aloes, fine Perfumes, and Wood for Dying, much like Logwood.

RICE is almost the only Grain that grows here; but they have Coco Nuts, Guava's, Mangoes, Plantains, Oranges, and all other tropical Fruits; and their beloved Betel and

Arek Nut are the Produce of the Soil.

In this Kingdom and the rest of the Peninsula, are great Numbers of Elephants, some Horses, Oxen, Buffaloes, and the same Kind of Hogs we meet with in *China*, and Plenty of Fish and Poultry, but scarce any Sheep or wild Beasts.

As to Snakes, Scorpions, and other Reptiles and Infects, they are as troublesome here as in other hot Countries, but none more so than the Ants, which march in large Bodies, and devour every Thing they can penetrate; they will eat through a Bale of Silk in a few Hours.

As this was once a Province of China, their Language is a Dialect of that Nation, and their Characters the fame; their Learning confifting chiefly in understanding these Characters, they are examined what Progress they have made in this Study, when they stand Candidates for any Place, as in China. In the Mathematicks, Astronomy, and other Sciences, they equal the Chimese, and have been improved like them, in these Sciences, by the Popish

Missionaries, who visited this Country.

THE King or Boua, has barely the Title of King: He has no Share in the Government. The General is vested with the Regal Power; he makes the King a Kind of Prisoner in his own Palace, but allows him to appear at certain Times, and receive the Homage of his Subjects, and the General himself seems to adore him before the People, declaring, he takes upon him the Administration of the Government, only to ease his Sovereign of the Trouble of it, and that he may enjoy his Pleasures without Interruption. His Majesty's Servants are all appointed by the General, and have Orders not to suffer any of the rest of his Subjects to come near him. The General disposes of all Offices, civil and military; has a Guard of two hundred Elephants, besides his Horse and Foot Guards,

Guards, and usually has a standing Army of thirty thousand Men in and about the Capital City, and fixty or seventy thousand Men in other Parts of the Kingdom, particularly on the Frontiers of China, the Power they stand most in Fear of. When the Army marches, the Generals and great Officers are mounted upon Elephants; a Castle or rather a great Room being fixed upon the Back of this monstrous Beast, in which a dozen Men may be accommodated, and discharge their Musquets, or shoot their Arrows. They have no Naval Force, only some little coasting Vessels, with which they don't pretend to make

long Voyages.

THE chief Magistrates and Officers of State are generally Eunuchs, an imperious Set of People, difficult of Access, and exceeding covetous, though they have none but themselves to make Provision for. And indeed, it is a common Observation, that those who have least Occasion for Money, covet most; and whatever an Eunuch has fcraped together, at last falls to the Government, when he dies: He has not so much as the Power of disposing of any Part of it by Will; and this is the Reason their Extortions and Oppressions are generally connived at a but to this is imputed, the extreme Poverty and Want of Trade in the lower Class of People, who have no Encouragement to work; possessing nothing they can call their own. There is still formehing more unaccountable in these Eunuchs than their Covetousness, and that is, their keeping a Parcel of young Wenches to play with (the Eunuchs in Turkey do the fame) and though they can't oblige the Ladies themselves, in the Manner they may expect, their Masters grow so fond of them frequently, that they suffer them to make Choice of a Gallant, especially among the Europeans that arrive here.

THEIR Religion differs but little from that of China, and Confucius is adored with equal Veneration; but they have some Images we don't meet with there, particularly the Elephant and the Horse. The Temples or Pagoda's are very small, some of them but just big enough to contain the Image. Their Priests have their Cells about the Temple, where they attend to offer up the Prayers of the Devout, who bring them their Petitions in Writing,

which

which the Priest reads aloud hefore the Image, while his Disciple lies prostrate on the Ground in a supplicating Posture.

PEOPLE of Figure feldom come to the Pagoda, but perform their Devotions before an Image placed upon an Altar in one of the Courts of their own Houses; some Dependant reading the Petition instead of a Priest, while his Master prostrates himself on the Earth. In the Paper, are enumerated the feveral Instances of the Petitioner's good Fortune, for which he returns his Thanks to Heaven, as for Riches, Honours, Prefervation, &c. concluding with a Prayer for the Continuance of them: After which the Paper is burnt in a Pan of Incense, and then their Poor Neighbours and Dependants are called in, and made to partake of an Entertainment the Master has provided for them. Whenever they make their Addresses to Heaven, the Poor are fure to be relieved; the devout Supplicants looking upon this, as the readiest Way to obtain a favourable Answer.

This People are much addicted to Superstition as well as their Neighbours: They consult the Astrologer or pretended Fortune-Teller, whenever they are about to undertake any Thing of Moment, and have their lucky and unlucky Days: And as every Hour of the Day has the Name of some Animal, viz. the Horse, the Lion, and the like, the Beast that marks the Hour a Man is born

upon, is ever avoided.

The Jesuits pretend, they have made great Numbers of Proselytes to Christianity, and caused several Churches to be erected: But Dampier relates, that when he was at the Bishop's Palace at Hean, the Jesuits informed him, that the Court of Tonquin shewed no Inclination to embrace Christianity, but many of the poor People had been induced to profess it, he supposed chiefly on Account of the Rice the Missionaries distributed among them: That the Fathers lived as Merchants at Hean, and thought proper to conceal their Mission; apprehending, probably, they were not acceptable to the Court, who made no other Use of them, than to learn some Branch of the Mathematicks of them: And whether the poor People made a Profession of their Religion openly, seems doubtful to me: For if

the Missionaries apprehended themselves in Danger, one would think, their Disciples, who were Natives, must be

at least in equal Danger.

A PLURALITY of Women is allowed here, as in most other Pagan Countries, and very little Difference made between a Wise taken upon Contract, and a Concubine. Their Children are equally entitled to inherit, and the Natives are so far from being disturbed by Jealousy, that it is said, they will offer their Women to the European Merchants, or rather let them out, for they expect some Consideration for the Favour. Here Men are allowed to take temporary Wives, as the Dutch do, to transact their Affairs in their Absence. And by this Commerce the Women sometimes raise Fortunes, and afterwards become Matches for the

most considerable Men in the Country.

THE Men are at Liberty to divorce their Wives for any Trifle almost, but then they must restore the Effects she was possessed of at the Time of the Marriage, and keep the Children; but the Wife cannot obtain a Divorce unless the Husband is charged with some very notorious Crime. The Punishment of a Woman convicted of Adultery, is to be thrown to an Elephant bred up for fuch Executions; who taking her up with his Trunk, toffes her up into the Air, and when she falls, tramples her under his Feet, crushing her to Pieces with as much ease as one might kill a Moth. A Man may fell both Wife and Children here, which makes a Divorce very unnecessary on the Man's Part; for this amounts to fomething more than a Divorce. In a Scarcity, the poor People fell their Children with very little Reluctance; for by this Means, they frequently fave their Childrens Lives, as well as their own. And in this Part of the World, we see People very ready to part with their Children, to any one that will maintain them, without demanding any Confideration for them: And why is this more unnatural than the Tonquinese felling their Children to preserve themselves?

In their Funerals, they differ very little from the Chinese: We see the like Processions and the like Mourning, only they burn the Corps, and put the Ashes in an Urn: They carry Provisions to the Tomb where the Urn is deposited, which are distributed among the Priests and poor

People,

People, after they have been offered to the Deceas'd, and the Idol placed on an Altar before the Corpfe: Over the Tombs of People of Condition, they erect a wooden Tower four or five and twenty Feet high, and the Priest ascending to the Top of it, makes a Funeral Oration, enumerating the Virtues and good Qualities of the Deceas'd: After which, he comes down and sets Fire to the Tower which is soon consumed to Ashes, being built of very slight Materials; and then the People sit down to an Entertainment, which is provided for them. Dampier relates, that he saw sifty Hogs dressed and distributed at a Funeral, with the greatest Quantity of Fruit that ever he saw together.

THE King lies in State fixty-five Days after his Decease, and his Table continues to be served every Day as if he was alive; the Meat being distributed every Evening, among the Priests and poor People. After which a very splendid Procession is begun towards the Royal Burying-Place, which is about two Days Journey from Cachao But they seldom reach the Tombs under seventeen Days. The Mandarins, Great Officers, and Magistrates, are obliged to mourn three Years for the Prince, the Gentry six Months, and the common People three, and no Diversions are allowed for three Years after the Funeral.

COCHIN-CHINA including Chiampa, is situate between one hundred-sour and hundred-ten Degrees of Eastern Longitude, and between ten and seventeen Degrees of North Latitude, bounded by Tonquin on the North, by the Indian Ocean on the East and South, and by Cambodia on the West, being about sour-hundred

Miles long, and one-hundred and fifty broad.

THE Mountains of Kemois run the whole Length of it from North to South, dividing it from Cambodia; but towards the Sea the Country is generally level. The Air of this Country is not so hot as that of Tonquin, though it lies nearer the Equator, for which several Reasons may be assigned, as the Advantages of the Sea Breezes, of which Tonquin has not so great a Share; Tonquin lying upon a Bay where the Winds have not so free a Course, while this Country lies open to the Ocean. It is also observed, that the Countries which lie near the Tropicks, as Tonquin does,

are much hotter than those that lie near the Equator; for the Countries which lie under either Tropick have the Sun over their Heads near three Months, whereas the Sun passes swiftly over the Countries near the Equator, and does not return thither again for near six Months; and it may add to the Heat near the Tropicks, that the Days are an Hour and half longer at the Tropick than they are at the Equinoctial, and the Rains and cloudy Weather continues

longer there also than it does at the Tropick.

TRAVELLERS do not mention any considerable Towns in this Country, but relate that the King resides in the most northern Provinces, which has the Name of Sinuva, in which we find a Town called Touran-Faiso, situate in sixteen Degrees of North Latitude, and one hundred and six Degrees of Eastern Longitude. Chiampa is situate in the Province of Chiampa, the most southerly Province of Cochin-China, in one hundred and eight Degrees of Eastern Longitude, and eleven Degrees of North Latitude: They build their Houses chiefly with the Bamboo Cane, one Story high; but the lower Room is of no Use in the Time of the Flood, which lasts near half a Year, when they are forced to live in their upper Rooms, and have no Communication with one another but by Boats.

THE Persons and Habits of the Natives differ very little from those of Tonquin, but their Complexions are something darker. They take a great deal of Pains also to get a Set of black Teeth: As the Negroes are remarkable for good white Teeth, these are as much taken Notice of for having very bad ones; for they do not only spoil them by that Ingredient which make them black, but the Betel and Arek, which they chew perpetually, contributes to rot them; however, it colours their Lips red, which is

esteemed a considerable Addition to their Beauty.

THE Natives have been represented as a friendly hospitable People; but the *English* Factory at *Pulo Condore* had no great Reason to applaud their Humanity, if their

Case is rightly represented.

PULO CONDORE is an Island of the Indian Ocean, fituate in one hundred and fix Degrees thirty Minutes Eastern Longitude, and in nine Degrees thirty Minutes North Latitude, fixty Miles South of Cochin-China, but subject

subject to it; in which is a commodious Harbour and two or three small Villages. Here the new East-India Company fettled a Factory, and built a Fort for the Protection of it in the Year 1702, without asking Leave of the Inhabitants, who foon began to shew their Discontent at this Invasion of their Country, and sent to their Prince. the King of Cochin-China, to apprize him of it; however, he did not think fit to express his Resentment of the Procedure at that Time: And the Factory lived in tolerable Quiet till the Year 1705, when the Macassar Soldiers, whom the Company had taken into their Service, being threatened for letting some of their Slaves escape, set Fire to the Port, killed the Deputy-Governor, and nineteen of the Factors, but several of the Factors got on board a Sloop, and failed to Malacca; the rest were massacred by the Cochin-Chinese, except Mr. Cunningham, who was loaded with Irons, and fent over to the Continent. He was charged by the Governor of the Province with invading the Island of Condore, and defying the King's Authority, when he was required to quit it again: To which he answered, that when the English possessed themselves of that Island, they did not know there were any Inhabitants upon it; and that they had fent an Embaffy to Cochin-China, and received a Licence to remain there; and the Governor appeared for well fatisfied with his Answer, that he gave him his Liberty, but made himself Matter of all the Treasure and Effects which belonged to the East-India Company, and demolished the Fort. Cunningham was afterwards made Governor of Banjar Masseen in Borneo, which Factory was also destroyed before he had been there ten Days, and he himself was cast away in his Voyage towards Europe, as has been related in treating of Borneo.

Ir must be acknowledged, that neither the English or any Power can be justified, in taking Possession of a Country already inhabited, by Violence, as it is evident the East-India Company did of the Island of Pulo Condore; for though Mr. Cunningham pretends the Factory had the Leave of the King of Cochin-China to remain there, which is very much doubted, he certainly never gave them Leave to erect a Fort, and disarm his Subjects, as they did by their own Confession. I hope we shall never imitate the

Portu-

Portuguese or Dutch in usurping the Dominions of Countries we have no Right to. It has been their constant Practice indeed to get Leave to trade, and to build or purchase Warehouses to lay their Effects in, and then build Forts and introduce Forces, till in the End they have actually subdued and enslaved the Inhabitants: But how unjust and ungrateful is this Procedure! The English have seldom attempted any Thing of this Nature, and when they have, it has not answered their Expectations: Witness this Affair of Condore, and that of Banjar Massen, which happened soon after.

CHAP. VI.

Contains a Description of Siam, and of the Kingdoms of Pegu, Ava and Arracan.

SIAM, in which I comprehend Malacca, Cambodia and Laos, is fituate between ninery-feven and one hundred and feven Degrees of Eastern Longitude, and between one and twenty-five Degrees of North Latitude, being bounded by Acham and the Provinces of Yunam in China on the North; by Tonquin, Cochin-China, and the Bay of Siam on the East; by the Straits of Malacca and Sincapora on the South; and by the Bay of Bengal, Pegu and Ava on the West, being one thousand five hundred Miles long, the Breadth very unequal, but no where three hundred Miles broad.

THE Vallies in this Country, which lie at a Distance from the Sea, are excessive hot, the Mountains cool, and that Part of the Country which lies near the Coast is refreshed great Part of the Day by the Sea-Breezes. The annual Rains also contribute to cool the Air, or this Part

of the World would scarcely be habitable.

THERE are two Ridges of Mountains that run through the Country from North to South; the Air which comes from them renders that Part of the Country tolerably cool. There are not many Parts of this Country, which have not either the Benefit of cool Breezes from the Mountains, or from the Sea. THE two chief Rivers are the Menan and the Mecon. The Menan rifes in Tartary, and running from North to South, passes by the City of Siam, falling into the Bay of the same Name, in thirteen Degrees of North Latitude. The Mecon also rises in Tartary, and running from North to South, through Laos and Cambodia, discharges itself into the Indian Ocean, in nine Degrees of North Latitude.

THE Monfons, or periodical Winds and Rains prevail here as well as in the Hither India, and the Rains are heaviest about Midsummer: The fairest Season is in December, when the Sun is at the greatest Distance from them; the most stormy Weather is at the Shifting of the Monsons, which usually happens about the Equinoxes, or within a Month sooner or later, when the Shipping gets into Harbour, or must run the Hazard of being broke to Pieces.

THE chief Towns ars, 1. Siam, the Capital, by the Natives called Siyothya, fituate on the River Menan, in one hundred one Degrees of Eastern Longitude, and in fourteen Degrees North Latitude, being encompassed almost on every Side by the Branches of the River Menan. It is furrounded by a Wall and other antique Fortifications, being about nine or ten Miles in Circumference; but not a fixth Part of the Ground within the Walls is built upon. On the vacant Spaces are near three hundred Temples, by the Indians called Pagoda's, from worshiping their Pagods, or Images in them; and about every Temple are the Convents of the Priests, stiled Talapains by the Siamese; here also are their Burying-Places with Pyramids erected over them. The Streets are spacious, and some of them have Canals running through them, over which are a great Number of Bridges. The Houses are built with Cane, and stand upon Pillars of Bamboo (a thick knotted Cane) twelve or thirteen Feet above the Surface of the Ground, to secure them against the annual Flood, when they have no Communication with one another but by Boats. Where a Family is large, they live in distinct Tenements, but all within their Pale, every Man's Ground being separated from his Neighbour's by a Palifado, and the Cattle are housed in Barns, which stand upon Pillars during the Rains, or they would be carried away by the Inundation. THE K

THE royal Palace at Siam is encompassed by three Walls, with large Courts or Spaces between the feveral Walls. The King resides in the innermost Court, which is called the Vang, and contains spacious Gardens, Groves, and Pieces of Water; whosoever passes in or out of the Vang falls down on his Face before the Gate. The Siamefe never build above one Story high; but then as you pals from one Room to another in the King's Palace, both the Floor and Roof of every Room is raised; the first Room is the lowest, from whence you ascend by several Steps to the second, and so on to the third, &c. There are feven fuch Rooms in the Royal Palace, and in the Houses of Persons of Distinction there are three Floors, in passing to every one of which we ascend by Steps. The Grand Room where Ambassadors are entertained, is open on all Sides, for the Benefit of the Air, and the Roof is fupported by stender Pillars; it is surrounded also by Water and shady Groves. There are several such Rooms in the Gardens of the Palace, where the Mandarins, or great Officers attend, while they are in waiting.

THE Hall of Audience, beyond which Foreigners are feldom admitted, is wainscotted, varnished, and painted red, with Pannels of Looking-Glass in it, and the Floor covered with rich Carpets. The Guards have Orders to admit no Man into the Palace who is armed, or has drank any Arrack or Spirits: The Officer therefore smells every Man's Breath before he suffers him to pass the Gate. Stables for the King's Elephants and Horses are within the first Enclosure of the Palace. In a Gallery at the upper End of the Hall of Audience the King usually snews him-

felf to the People.

THE King chuses to be attended only by Women in his Palace; they dress him, prepare his Food, and attend him in his Bed-Chamber, and at Table; but his Cap he puts on himfelf. This is not to be touched by the greatest of his Subjects. The King's favourite Wife is called Queen, who is generally one of his nearest Relations. One of these Queens was the King's own Daughter by his Sifter; they feem to be of the same Opinion in this Article, as the Egyptians were, that none but those of the royal Family are fit to match with a King: The famous

Cleopatra

of the EAST-INDIES. 147

Cleopatra married two of her Brothers, and poisoned them, that she might reign sole Monarch of Egypt; but though these Kings don't marry out of the royal Family, they maintain Abundance of other Women; they will take the fair Daughter of any Subject to their Bed, and sometimes send for a Nobleman's Daughter only to extort Money from the Father for her Ransom.

As to the Furniture of the Siamese Houses, they have neither Beds, Chairs, or Tables; they lie upon Mattrasses, on Cotts or Couches, having one Sheet under them, and a Quilt, or Piece of Calico, which they draw over them in the rainy Season; for it is much cooler during the Flood, though the Sun be then vertical, than it is in the dry Season, when the Sun shines more obliquely upon them. As to Servants and poor People, their Lodging is no better than a Mat upon the Floor, and the Cloth

they wear in the Day-Time covers them at Night.

THE Siamese are neither tall nor corpulent, but well proportioned, and very swarthy; their Faces are broad, they have high Cheek Bones, and both their Foreheads and Chins are contracted, and terminate in a Point. They have fmall black Eyes, large Mouths, and thick pale Lips; and like the rest of the Indians in their Neighbourhood, take Abundance of Pains to make their Teeth black, and nourish and polish the Nails of some of the Fingers of their Left Hands, till they are of the Length of their Fingers; and this distinguishes a Gentleman from the Vulgar. The Fashions never alter as they do with us; both Sexes have black Hair, without a Curl in it, and they cut it short, that it does not come below their Ears; the Women make it stand upright on their Foreheads. The Men have very thin Beards, which may proceed from their pulling them up by the Roots, not leaving so much as a Whisker on the upper Lip: They generally bathe before they go out, or have Water poured upon their Heads for an Hour. The latter is more eligable in this hot Country, for the Water they have in Ponds and Refervoirs is luke-warm, but what is drawn out of their Wells is exceeding cold, and feems the more fo as our Bodies are much hotter than they are in colder Countries.

THE

THE better Sort of People wear a Calico or Muslim Shirt, wrapping a Piece of Cotton Linen, called a Pagne, about their Loins, and in the cool or rainy Season they wear a Mantle of Chint, or painted Calico. The King is cloathed in a Vest of brocaded Sattin, and has a Cap of a piramidal Form, with a Coronet of precious Stones about his Temples; the great Officers and Nobility also have Coronets, but not so rich as his Majesty's; all their Cloaths are red in Time of War, and in their hunting Expeditions.

THE King frequently prefents his Officers with a Vest and Cap; none are suffered to wear Vests, except such as are appointed by the King, and the Caps are never worn except in his Majesty's Presence, or when they preside in Courts of Justice; Slippers are worn sometimes, but always put off when they enter their Temples or Houses.

THE Women wear a Linen Cloth about their Loins, which reaches down lower than the Mens, and ferves inflead of a Petticoat; they also throw a Piece of Linen about their Necks, which covers their Breasts, leaving the rest of their Bodies bare, as well as their Legs, and have no Cap or Covering for their Heads, except their Hair, which is cropped as short as the Mens. The inferior People cover no more of their Bodies than Modesty requires; the Women wear Bracelets on their Arms and Legs, and as many Rings on three Fingers of each Hand

as they can put on,

The Siamese are esteemed a very ingenious People, they will imitate readily any Thing they see, but are too lazy to use much Application, for which Reason they scarce bring any Thing to Persection. Chymistry and Astronomy are the Studies they most delight in; but in these they have made no great Proficiency. They are admired for their Chastity and Temperance; Drunkenness is detested by them. In their Quarrels they very seldom proceed to Blows, and must be thoroughly provoked before they express any Resentment; but if they are grossly injured they will revenge it, not openly by a Duel, but by some secret Attempt, in which they run as little Hazard as possible themselves, not being remarkable for their Courage. They carry themselves with too much

Infolence towards their Inferiors, but cringe like Frenchmen to those above them. They have a great Command of their Passions, serene as their Heaven, says Loubiere, which changes but twice a Year, and that infenfibly. They are remarkable for living well with their Families. All is Peace at Home, their Children are such sweet, tractable Tempers, that they are the Delight of their Parents, and the King takes Pleasure in nothing more than the Company of Children under seven Years of Age. But then it is observed they grow cunning, and lose their childish Innocence; therefore at that Age, he changes them for others,

that still retain their native Simplicity.

As Children grow up, they are taught Modesty and Submission to their Superiors in the first Place, not to be noify or talkative. In the Houses of great Men, a profound Silence is observed: They are advised rather to liften to their Seniors, than rudely to give their Opinions without being asked: Nothing is esteemed more unpolite, than to pretend to be wifer than the Company, or to relate any Thing, whether true or false, which may create any Uneasiness to those they converse with; and like the Chinese, they always avoid speaking in the first Person: They never fay, I did this, or You are in the Wrong; never afferting any Thing politively, but by Way of Question; enquiring, if the Person they speak to, is not of this or that Opinion. When they speak to Ladies, it is always with some respectful Epithet; they infinuate that she is young or fair, whatever her Age or Complexion may be. It is not to be supposed that any Woman can ever suspect Old Age is approaching.

THE Way of Salutation here, as in most Indian Nations, is the Salam, that is, the lifting one or both Hands to their Heads and bowing their Bodies. If any one addresses another who is much his Superior, he falls down upon his Face before him; to stand upright when we attend a great Man, is the highest Piece of Infolence: The usual Posture is fitting on their Heels, with their Heads a little reclined. The Ceremonies used at Visits to much resemble those of the Chinese, that they need not be again enumerated here. I shall only take Notice of the uncommon Respect they have for their Heads, and even for their

Caps, when they have been authorized by the Sovereign to were them. The Cap, as has been observed, is a Badge of Authority, and seldom worn but on publick Occasions, or when a Magistrate sits in a Court of Justice; and as it is esteemed the rudest Thing in the World, to stroke or touch a Man's Head, so his Cap is treated with uncommon Respect: The Servant who carries it, puts it on a Cane made for that Purpose, and carries it above his Head.

THE usual Food in this Country, is Rice and Fish, fometimes fresh, but most commonly dried or pickled, and neither of them very fweet. They follow the Fashion in their eating stinking Fish, which are as much admired there, as stinking Rabbits used to be with us; but they eat also the Flesh of all Manner of Animals as the Chine se do, not refusing Rats, Mice, Locusts, or any Infects whatever, feafoning every Thing fo very high with Spice, that it is not easy to distinguish one Kind of Flesh from another. Their Liquor is River Water, which must Stand a great while before it is settled and fit to drink, especially in the Time of the Rains, when all their Rivers are Torrents, and carry down so much of the Soil along with them, that they occasion the Flux, especially among Foreigners. The Rain-Water which is preferved in capacious Reservoirs, is the wholesomest. They drink Tea in these Countries universally, and in private, it is said, they drink Arrack and Spirits, though these are prohibited.

Among their Diversions are the Mock-Fights of Elephants: What they were fondest of, was Cock-Fighting, till their Priests procured an Order against it, esteeming the killing those Animals almost as wicked as the killing a Man. Comedies also are another Part of their Diversion, and a Kind of martial Dances in which they act a Battle, being armed and masked, and in their Songs repeat Part of the History of their Country. Their grand annual Festival is when the Waters retire; then they sail down the River several Evenings successively, their Barges being illuminated with Painted Paper-Lanthorns. They have another Festival or Thanksgiving for the Fruits of the Earth after Harvest, when their Streets as well as their Boats are illuminated, and a grand Fire-Work is play'd

off on the Occasion. Here are Races also, not of Horses but Oxen; and they row Races also upon their Rivers, and are so bewitched by the Games of Chance, that they will not only play away their Wives and Children, but set their own Persons and Liberties on the Cast of a Die, and become Slaves if they lose. The New and Full Moon are so far from being Festivals, that they keep a strict Fast, and will admit no Manner of Diversions on these Days; at this Time it is they make their Offerings to the Priests in their Convents, and give Alms to the Poor. The Offerings are presented by the Priest to the Idol, and some Time after the Priests apply them to their own Use.

In this Country, no Man learns any particular Trade; but every one has fome Knowledge of all, and they work half a Year by Turns for the King; when, if any of them should be found perfectly ignorant of the Business he is set about, he would undergo the Bastinado: Nor does any Man endeavour to excel, lest the King should keep him in his Service as long as he lives. The tyrannical Government they live under, is another great Discouragement to Industry, the King seizing on any Man's Money and

Effects, when he pleases.

THEIR Carpenters Work is fastened together with wooden Pins instead of Nails: They know how to cast Metals, and cover the Hilts of Swords, and other Things with Gold, Silver, or Copper: They have not the Art of tanning Leather, or of making any Stuffs of Silk or Wool, and weave only Cotton-Cloth. Their Painting is rather worse than that of China; being such indifferent Workmen, therefore, they give great Wages to the European Artists.

THE Siamsse not affecting Finery in their Dress, and despising superfluous Ornaments, neglect a great many mechanick Arts, which the Europeans are employed in. They appear to be the honestest and fairest Dealers in the World: Their Weights and Measures may be depended on: They are the very Reverse of the Chinese. The King is the Chief Merchant in this Country; no Man may trassick with a Foreigner, till the King's Factors have had the Resulal of the Goods; and these Factors descend so low, as to sell them by Retail again. The Sub-

jects are obliged to buy all their Cloathing of them, which is chiefly Cotton-Cloth. He obliges his Subjects to fell him all their Ivor7 and Arrack at a certain Price, which

he fells again to Foreigners.

In the King's Magazines are Salt-Petre, Lead, Sapan-Wood, Gunpowder, Sulphur, and Arms, which his Majesty monopolizes, not suffering his Subjects to deal in these Articles. Skins and Furs also he purchases at his own Price of the People, and disposes of them to Foreigners; but by these Practices he has ruined the Trade of the Country, which was formerly very great. Foreigners as well as his own Subjects are so ill used by the King's Fac-

tors, that very few care to refort thither.

MALACCA contains the Southern Provinces of Siam: its chief Town, is now in Possession of the Dutch, is of the fame Name, being fituate in one hundred Degrees of Eastern Longitude, and two Degrees thirty Minutes North Latitude, on a flat level Shore, close to the Sea, and defended by a strong Castle; the Walls of the Castle are founded on a Rock, and carried up to a great Height. The Town contains about three hundred Families of Dutch, Chinese, Portuguese, and Moors, and some confiderable Armenian Merchants. The Natives inhabit the Suburbs living in poor Cottages, and tyrannized over by the Dutch, which they are not yet reconciled to, appearing greatly discontented in their Looks. The Chinese have the best Shops in the Town, of whom may be had any Thing their Country or the neighbouring Islands produce. Malacca is esteemed as healthful a Port-Town as is to be met with in so warm'a Climate: They have no hot Winds there, as in the Hither India, nor the chilling Winds, that are so destructive in the neighbouring Island of Sumatra; however, it is not a Place of any great Trade at prefent. The Dutch drive away all other European Nations from this Coast, and endeavour to monopolize the Trade: By a Squadron of Men of War or Cruifers they have here. they are Masters of the Straits of Malacca, and can prevent other Nations passing them, or trafficking with the Natives. But to return to the upper Part of Siam, which is still subject to that King.

THE Soil of the low Lands is enriched by the annual Floods.

Floods, and is exceeding proper for Rice, which grows in Water for the most Part. It is sometimes sown also in the high Grounds, and the Rice which grows there is esteemed the best; but then they have poor Crops. They sow Wheat also sometimes; but unless they can turn the Water into their Grounds, it comes to nothing, for all the high Grounds are burnt up as soon as the Rains are over.

THEY begin to plant the Rice in the flat Country, when the Flood has moistened the Earth, and as the Water encreases the Rice grows, and keeps its Head above Water till the dry Season approaches, and the Sun has exhaled all the Water, and then is the Time of Harvest. Sometimes it is ripe before the Waters retire, and then they go in Boats to reap it. Their Kitchen Gardens afford them Herbs for Salads, Pulse and Roots, and the Cucumbers and Melons which the poor People eat in the dry Season, are esteemed very innocent Food. The only European Fruits almost they have, are Limes, Oranges, and Lemons; but they abound in Plantains, Banana's, Mangoes, Guava's, Jaques, Durion, Tamarinds, Ananas, Coco Nuts, and Sugar-Canes: Here are some European Flowers, as the Tuberofe, Gillistower and some few Roses, Jassamine, and Amaranthus, and other Natives of the Country valuable for their Colours and Scent: But it is observed, that in the Heat of the Day, they do not fmell near fo ftrong, as they do in the Morning and Evening; and the European Flowers transplanted thither, do not afford near fo sweet a Smell there, as they do here.

THEIR Hills are covered with good Timber, of which the Bamboo is of great Use in Building; it is a hollow knotted Cane, of an enormous Size, very strong and hard to cut. The Coco Nut, which grows on the low Lands by the Sea-Side, affords them Meat, Drink, and Oil; the Body of the Tree is useful in building Boats and other Vessels, and of the Fibres of the Bark and Nut, they make Cordage; the Leaves serve to write on, and the Branches for Covering for their Houses. The Cotton-Tree is very common here; it bears a Fruit of the Bigness of a Walnut, which opens when it is ripe; within it they find the Cotton; from other Trees they draw Lacque and other Gums:

They

They have also the Sapan, and other Woods proper for

dying, and some Lignum Aloes or Aquila.

OF their Animals, Elephants are the chief; there is no Country where they abound more; the King's Elephants have a great Number of Servants to attend them: They are covered with rich Cloths, and adorned with Colours and Streamers, when they appear abroad: No Animals are so tractable and quick of Apprehension: As their Strength and Bulk are fuch, that there is no bridling nor governing them by Force, they are managed altogether by Signs. These are the longest-lived Animals we meet with any where, it is an hundred Years, probably, before they are full grown. The Siamese are of Opinion, they are animated by some illustrious Souls. The white Elephant, which the King of Siam imagines is the only one of that Colour, and has the Soul of some great Prince lodged in him, he never rides upon; orders him to be ferved in Gold Plate, and treated as Sovereign of the Species; nor has he much less Esteem for his white Horse than he has for his Elephant; that Beast is honoured in the East, as much as the Hanoverian white Pad is in the West. Next to the white Elephant, the black are most esteemed on Account of their Scarcity.

THERE are very few Horses, Sheep, or Goats in this this Country; nor is their Mutton or Goat's Flesh to be admired; their Hogs, which resemble those of China, are much the best Food: the Oxen and Bussaloes draw their Ploughs and Carriages. They have almost all Manner of Poultry, Wild-Fowl and Game, which are exceeding cheap: But the Flesh of their Fowls as well as their Mutton is poor dry Meat. Venison is so little admired, that they kill the Deer only for their Skins, which the Dutch usually purchase of them and carry to Japan.

HERE are some beautiful Birds, such as Maccaws, Parrots, &c. but no singing Birds. The Natives will not kill a Bird, but on the contrary, feed them out of Charity, which makes them so tame, that they will come into their Houses, and seed on any Thing they find there.

THE King of Siam is not only Sovereign, but Proprietor of all the Lands of the Country, and chief Merchant also.

also, monopolizing most of the Trassick. The Crown is said to be hereditary, but their Tyranny occasions frequent Revolutions. When one Prince is deposed, another is immediately advanced to the Throne, either by Force or the Election of the People: And it is a little strange, that when they have so often suffered by bad Princes, they have never thought of limiting their Power, when they have advanced a new Family to the Throne. As to their Laws and Customs, these are hardly worth mentioning, where the Will and Pleasure of the Prince is the supreme Law.

THE King shews himself to the People but twice a Year, when he distributes his Alms to the Talapoins or Priests. He is always seen on an elevated Situation, or an Elephant: The King's Seat on his Elephant is not covered with a Top, and is open before; the Man who has the Direction of the Beast, fits upon his Neck, and governs him by Signs, or pricking him with an Iron he holds in his Hand. Tho' the King does but seldom appear in the City, he frequently goes to the Louvo to hunt, when his Women attend him on Foot, a Guard of two hundred Men marching before them to drive all People from the Roads and Towns through which they are to pass; and whenever the King stops, all the People about him fall upon their Faces on the Ground.

HERE are no hereditary Nobility, or any Distinctions made between one Man and another, unless what every Man's Office or Post in the Government occasions. The Word Mandarin is a Portuguese Term, which Writers apply to every great Officer and Magistrate in the East. The King gives a Name to every Officer on his Advancement, which is some Honourable Epithet. The Portuguese, 'tis observed, finding several Governments hereditary here, gave the Governors the Title of Kings, representing the King of Siam as an Emperor, who had a great Number of vassal Princes dependent on him. This appears to have been the Case also in the neighbouring Kingdoms.

INSTEAD of an Oath of Allegiance every Person who has a Place under the Government, comes before one of the principal *Talapoins* or Priests, from whom he receives a

Glass of Water, which the Priests orders him to drink, repeating at the same Time certain Curses and Imprecations, wishing he may perish, if he does not serve his

Prince faithfully.

Such is the Tyranny of this Government, that if any of the Prince's Council happens to give him any Advice that does not succeed, he is frequently punished for it; and the great Officers are not only prohibited coming into the King's Presence without Leave, but are forbid to visit one another; and every one is obliged, if he hears any Thing spoken to the Prejudice of the Government, to declare it on Pain of Death: The great Men are absolute Slaves here as they are in Turkey. People that live at a Diftance from Court, and have no Business with the State are much the happiest. Danger and Servitude are the Fruits of Ambition in all Arbitrary Governments: Nor is the Sovereign much happier, who cannot depend on the Fidelity of his Subjects, who having no Security in their Properties, don't much concern themselves about their Prince's Right or Title.

THE Governors of Provinces, Judges, and Magistrates having no Salaries, or very mean ones, are guilty of great Extortion and Oppression; some Governors having revolted, whose Governments were hereditary, the rest are now made temporary, and continue only for three Years. The Province of Patan, however, elect their own Governor, and generally make Choice of an old Woman of some particular Family, who is called Queen; but her Authority is limited, she is obliged to have the Concurrence of the chief Men in every Transaction of Moment: She fends two small Trees of Gold and Silver annually to the King of Siam, by way of Tribute, and as an Acknow-

ledgment that she holds that Country of him.

SUBMISSION to Parents and Governors is as strictly required by the Laws of Siam, as by those of China, and the Aged are much reverenced here. Lying is punished, and deemed as great a Crime in Siam as Perjury is in this Part of the World; and Theft is so much detested, that one who is guilty of it, is at once abandoned by all his Friends, none will intercede for him, or give him any Affistance:

of the EAST-INDIES.

Affistance; and an unjust Possessor of Lands is punished

as a Robber.

No Man is suffered to prosecute another, either in a civil or criminal Cause, without giving Security to make the Charge good; every Man is allowed to plead his own Caufe, or any of his Relations may speak for him; but the Law is not a Profession of a particular Set of

THE Justice of a Prosecution is tried by various Methods, where the Truth of the Charge is doubtful. Both the Profecutor and the Defendant are fometimes commanded to walk over burning Coals, and he that escapes is held to have the Right on his Side. Another Method is by diving into deep Water; the Man that continues

longest under Water is adjudged innocent.

A THIRD Trial is by Vomits. The Priest gives each of the Parties a Pill, and the Testimony of the Person who keeps the Pill in his Stomach without vomiting, is believed. They throw both the Plaintiff, and Defendant fometimes to a Tyger, and he that comes off unhurt is held to be in the Right; and they will frequently offer themselves to undergo this last Trial, though they appear to be extreamly timorous when they are to engage an

Enemy.

CRIMINALS are fometimes thrown to an Elephant and trampled to Death, but Punishments are usually adapted to the Nature of the Crime. A Person convicted of Robbing the Publick has melted Metals poured down his Throat; they few up the Liar's Mouth, and for little Crimes they fasten a square Pillory Board about the Offender's Neck; some are set in the Ground up to the Shoulders, and every one authorised to buffet him, which is the greatest Indignity a Siamese can suffer, especially to have his Head buffeted by Women; but though their greatest Men are sometimes punished in this Manner, this is faid to be done for their Reformation, they are afterwards restored to their Posts; Officers are frequently punished for the Faults of their inferior Officers, and Parents and Masters of Families for the Faults of their Children and Dependents. THE

THE Forces of this Kingdom, and the Men able to bear Arms are the same Number, for the whole Nation is regimented, and ferve the King by Turns, either in his Wars or in the publick Buildings, and furnishing the Court with Provisions, Cloathing and Utensils, building Barges, Boats, &c. the Talapoins, or Priests, Women and Children, only being excused from these Services. As the Afiaticks magnify every Thing they speak of, either as to Numbers, Strength, or Beauty; they call an Officer who has the Command of five hundred, a Commander of ten thousand. Figurative and allegorical Expressions also are much in use; Princes and Men of Eminence are frequently called Stars of the first Magnitude; Ladies are called beautiful Flowers, and the like, which should always be remembered when we read the History of any Eastern Country, or we shall form very odd Ideas of them. We are shocked also at the numerous Armies we read of in that Part of the World; but if we consider that half a Nation, and perhaps feveral Nations in some extensive Empires, take up Arms at a Time, their Numbers will not appear incredible; but it must surely be in a Figure Writers speak, when they tell us that the King of Siam maintains ten thousand Elephants: Neither his Kingdom, nor any other of ten Times the Extent, would be able to feed fuch an Army of Monsters; nor do I believe that any People ever had one thousand in their Armies, they would not only be unnecessary, but an Incumbrance. They are faid indeed to be the Strength of their Armies in the Farther India; but they were much more ferviceable formerly than they can be now, fince Gunpowder and Cannon have been in Uie. It would be a very easy Matter to put them in Disorder by Fireworks, and drive them upon their Masters, which would infallibly prove the Loss of a Battle.

BESIDES the ordinary Militia, the King has a Battalion of Guards at his Palace of Louve, confisting of eight hundred Men, and four hundred more at Bancock. These. have been instructed in Military Discipline by some Europeans the late King retained in his Service. They have some small Artillery, which are carried in Waggons, but how they fire them does not appear, for they have no

proper

proper Carriages to lay them on; however, we are told they begin the Battle with these, and it is very seldom they advance within Musket-Shot of an Enemy. One Side or other retires before they come to a close Fight, and fecure themselves by Intrenchments and Barricadoes in the Woods and Mountains; for this Country is very well fecured against Invasions by their Mountains on one Side, and by the Sea on the other. The Floods also are a good Defence in the rainy Season; the Siamese very artfully drew the People of Pegu into their Country a little before the Rains began, in one of their Incursions, and kept them in Play till the Waters rose to such a Height that they could not retreat; and thus the Pegu Army was entirely ruined without fighting. There are scarce any fortified Towns in Siam, or any of the adjacent Countries, and very little. Occasion for any; the Mountains and Waters are a better Defence: It is no Wonder, therefore, we hear of no Sieges in the Farther India; this Part of the Art of War they are perfectly Strangers to.

As the King is Proprietor of all the Lands in the Country, he reserves a Rent on every Acre he lets out; a Duty is laid also on every Ship, Boat and Vessel, and on every Fruit-Tree: And he has fix Months Service of his Subjects, who are employed in all Manner of Manufactures for the King's Use. Presents are made by the Governors and Officers he advances, and he monopolizes almost every Branch of Trade. The Kingdom to him is one great Farm, of which the Sovereign alone receives the Profit. It is impossible therefore his Subjects can be rich. They are all Slaves, and work only for him; and yet the Tyranny of the Government, and the Restraint he lays upon Trade are such that few Foreigners care to traffick with him, and with all the Advantages already enumerated, he himself is neither rich or powerful. The Dutch do what they please with him, build Forts, and possess themselves of what Part of his Dominions they see fit, and by their Fleets drive all other Foreigners from his Coast, whenever they please. His whole Revenue in Money, 'tis computed, does not amount annually to three hundred thousand Pounds Sterling.

Two Languages are spoken by the Siamese, namely, the Baly and the Siamese: In the Baly they have thirtythree Letters, and in the Siamese thirty-seven, all Confonants, and there are a great Number of Vowels in both Languages, for which they have particular Characters, some placed before the Consonant and others after, some above, and others under the Confonant. In these Languages much depends upon the Accent and Tone of the Voice; they rather fing than speak. The Baly is a dead Language, and spoke only by the Learned: I take what Writers call the Siamese, to be indeed the Malayan Language, which is spoken commonly upon the Coasts of the Farther India, and the adjacent Mands. It is strange, that when Siam and all the Countries almost near China, have long had the Use of Letters, that the Chinese should still neglect to introduce them, but make use only of a Kind of Hieroglyphicks, which, in a few Generations, are rendered unintelligible. Not only the Astronomy of the Siamese is very imperfect, but they were very lately ignorant of the Figure of the Earth, as well as its Motion, and I believe remain still so: But they are great Pretenders to Aftrology as well as the Chinese. They would make us believe they can charm away Diseases, calculate Nativities, and foretel future Events; but are very cautious when they are consulted by the Prince, who fometimes rewards them with a good Bastinado if they deceive him. To procure or establish Health, the Siamele, and other Indian Nations, after bathing, have their Slaves to rub and chafe them, stretch their Limbs, mould and squeeze their Flesh from Head to Foot, which is a pleafant, as well as a wholesome Operation. Their Phyficians seldom let Blood or Vomit, they have a great Opinion of Sweats, and fometimes purge their Patients; but their best Receipt seems to be Conge, a Water-gruel made of Rice, to which Diet they usually confine the Patient tilk he recovers. If a Medicine prescribed fails of producing the expected Effect, the Physicians impute it to the Malice of some evil Spirit, and are very dextrous in deceiving their Patients; and, as one observes, there will never want Pretenders as long as there are Fools to be imposed upon.

THE

THE Siamese Court has a very mean Opinion of Ambaffadors, looking upon them rather as Factors than Representatives of their Princes: They pay more Respect to the Letter he brings from his Master, than to his Perfon, and feldom fend Ambaffadors to other Courts, but upon Business relating to Trade. When he is admitted to an Audience, he is directed not to address himself to the King, till his Majesty speaks to him first; nor are they pleased with a long Speech, the less Time it takes up, the greater is the Respect paid him; they esteem a tedious Harangue a Kind of Infult. When the Ambasfador has concluded his Speech, he is prefented with a Vest, which he immediately puts on in the King's Prefence, and is ordered afterwards to confer with the Prime Minister, or Barcalon. This People, 'tis observed, are not hafty in their Resolutions, and will never omit Matters of Form. The Women only feem to have the Liberty of addressing this Prince with Freedom, and they know very well how to adapt their Flattery to his Humour: As he has a great Passion to be thought a wise and politick Prince, they dwell chiefly on his Wisdom, which they declare surpasses that of all other Princes, and touch but lightly on his Courage, Wealth and Grandeur, which he affects to despise. It is not out of Inclination that he governs his People with a strict Hand, he declares, but because he apprehends it necessary: For his Subjects, he observes, are like his Monkies, who are very obedient, while he holds their Chain, but difregard him as foon as they are at Liberty.

THE Portuguese, who first visited this Country, called their Temples Pagoda's, from the Persian Poutgheda, which in that Language signifies a Temple; but the Siamese Name is Pihan: Some call the Idol, as well as the Temple, a Pagoda; but I apprehend the Idol is the Pagod, and the Temple it is worshipped in the Pagoda. These Temples, and the Area about them, are surrounded by a Wall, and beyond the Wall are Convents of Talapoins and Talapoinesses (or the Cells of their Priests and Priestesses) who live in separate Houses. The Females, or Nuns, are not forced into these Convents, neither are they obliged to remain there any longer than they see sit;

but none are admitted till the Decline of Life. The Education of Youth is committed to the *Talapeins*, and they are ferved by their Scholars. These *Talapeins* are a Sort of begging Friars, which live upon the Alms of the People, and every one eats what he begs, or is given him, by himself, and not in a common Room. They are very hospitable to all Strangers, Christians as well as others, and have Lodgings for them on each Side their Gate.

THESE Priests vow Celibacy, and lead very austere Lives; the Penalty of deviating from their Rules is no less than Burning, which the King takes care shall be rigorously executed, to prevent too many of his Subjects turning Talapoins, since they pay no Duties, and contribute nothing to the Desence or Support of the State.

THEY preach every New and Full Moon, and during the Inundation, every Day, from Morning till Evening, the Preacher fitting cross-legged on a raised Floor, and is relieved when he is weary by one of his Brethren; the People expressing their Assent to the Reasonableness of the Doctrine, and bringing their Alms to the Preacher, by which many of them grow rich. The Time of the Rains is their annual Fast, when they eat nothing but a little Fruit in the Evening. The Talapoins are obliged to watch as well as pray, especially after Harvest, when they go out into the Fields in the Night-Time, and return into the Towns in the Morning; and though others are apt to think themselves in Danger of wild Beasts when they are abroad in the Night-Time, the People are made to believe, that a Tyger will not touch a Talapoin, they are fo fanctified a Generation; and if any one happens to be killed by a wild Beast, they either deny it, or say he did not live up to the Rules of his Order. These Priests shave their Heads, Beards, and Eyebrows, and carry a Talapot, or broad Leaf, in their Hands, which ferves them for an Umbrella. The Superior shaves himself, because no Man is worthy to touch his Head, and the Elder always shave the Younger; but when he is grown too old, a young Talapoin is permitted to shave him, who asks Parden first, and declares himself unworthy of that Honour.

of the EAST-INDIES.

Honour. They wear a yellow Cloth about their Loins,

and another about their Shoulders.

THEY wash in the Morning as soon as they can see, and not fooner, for fear they should destroy some Insect. After washing, they perform their Devotions in the Temple, which they fing as in Choirs, their Books are Coco-Nut Leaves, on which they write, or rather engrave; for they have not yet the Art of Printing: They fing their Devotions sitting upon their Heels; but both Priests and People, at their going in and out of the Temple, prostrate themselves three Times before their Idols. After the Morning Devotion, they go into the City, and standing at the Doors of the Houses they expect any Thing from, their Food is brought them, but they never ask for it, though there does not feem to be much Occasion for these Alms; for they have Lands and Gardens appropriated to their Convents, and Slaves to cultivate them, and they are exempt from Taxes. The Talapoins have Servants as well as Slaves, who wear a white Habit, and receive the Money given their Masters, it being a Sin for the Talapoin to touch Money himself: The Talapoinesses wear White, and if they are taken with a Man, are delivered to their Relations to chastise; for it is against their Rules for a Talapoin to strike any one. Most of the Indians believe a preexistent State, and that they are punished here for Osfences they have committed in another; and they believe, that if they are not reformed in this Life, they shall pass into other Bodies, till they are fufficiently purified to be received into Paradife; fome of the Talapoins will take upon them to relate what has happened to them in a former State. They believe the Soul to be material, and yet not subject to the Touch; that it retains the human Figure after Death, and appears to its Acquaintance; and the Wounds of one that has been murdered, will then be visible.

THE Things chiefly required of the Talapoins are, that . they neither kill or steal, or commit Uncleanness, drink strong Liquor, or tell Lies: By the first they understand they are not only forbidden to kill Animals but Vegetables, and therefore do not destroy any Plant or the Seed of it, but eat, however, of the Fruit, which does not

effect the Life. They have various Ways of evading these Precepts, for though they do not boil Rice, which is a Seed, themselves, because that would kill it, yet if others boil and kill it, they esteem the eating of it innocent: And though they think the making Water upon the Earth to be a Sin, because it corrupts it; yet if they make use of a Vessel, and their servant pours it on the Earth, they do not think themselves answerable for the Consequences.

Musick, Plays, and Dancing, or the being present at fuch Entertainments is held finful in a Priest, or Talapoin; also the using Persumes, and even the Touch of Gold or Silver: The intermeddling in Trade, or any Thing else, which does not relate to Religion, is held finful in them; they may not judge or cenfure any Man, or look upon a Woman, so as to take any Delight in the Object. The Meat they beg they must not lay up any Part of it till the next Day, but give it to some Animal: It is with them a Sin to ride upon any Beast, or be carried in any Kind of Vehicle; to wear Shoes or fine Cloaths; to eat out of Plate; to boast of their Parts, Learning, or Pedigree, laugh aloud, or visit any but their own Relations; to look impudently in any Man's Face; to be angry, wrangle, or threaten any one: All these are esteemed Sins in a Talapoin, but are not required of Laymen; nor do they imagine that a Layman can arrive at those Degrees of Perfecton as the Priests may, who, by their great Piety, in their own Opinion, make Satisfaction for the Sins of the People: They are, however, esteemed very proud, from their taking Place of the Laity, and refusing to falute any Man, except a Brother Talapoin. They never mourn for the Death of the nearest Relation: In their Confession to their Superiors, as it is called, they never acknowledge themselves guilty of any Sin, only declare they have obeved all God's Commands: That they neither steal, or lye, or drink strong Liquor, proceeding to justify themselves like the Pharifee in every Article, though there is very little Truth in all this; they have only been busying themselves in finding out Stratagems to evade their Laws. They hold that no Man will be eternally punished; that the Good after several Transmigrations, will enjoy eternal Felicity, and those that are not to be reformed, will be doomed to a perpetual Transmigration.

The chief Object of their Adoration is a departed Saint, whom they have named Sommona Codom: Sommona is a Talapoin of the Woods, whom they effect the holiest of their Sect, and Codom was the proper Name of the Saint who was removed to Heaven, as a Reward of his inimitable Piety; and what is very odd, they relate, that the Mother of this Saint was Maba Maria, or the Great Mary, from whence the Missionaries infer, that by Sommona Codom is meant Jesus Christ, St. Thomas the Apostle having preached in India; but I am afraid we cannot rely entirely on Missionaries in relation to this Matter. They relate surther, that the Father of Sommona Codom was King of the Island of Ceylon; that he distributed his Estate and Essects among the Poor, killed his Wife and Children, and gave their Flesh for Food to the Talapoins.

THEIR Legends add, that Sommona Codom, before he left t'reWorld, worked many Miracles, and among others altered the Dimensions of his own Body, sometimes appeared a Giant, and at others less than a Dwarf, and sometimes was invisible: That he had two favourite Disciples, whose Images they place on the same Alia; one of them called Pra Mogla, they relate, overturned the Earth, and took Hell-Fire into the Hollow of his Hand, with an Intent to extinguish it, but was prevented by Sommona Codom, who observed that Men would be still more wicked, if the Terror of that Punishment was withdrawn. The Siamese imagine this Sommona Codom is the Protector or Guardian-Angel of their Nation only, and that every People have their particular Protector or Demon that presides over them; nor do they look upon Sommona Codom as the Author of their Religion, but that he restored it, after Men were become abandoned to Vice, and no longer influenced by its Precepts.

They have no Prejudices to Men of other Religions; every Nation may worthip God as they are taught: There is no Reason to hate and make War upon any People, because they have been differently educated: All Men seem to agree in the Worship of the Supreme God. The Saints and great Men, to whose Honour they erect Temples and Images, they look upon as Mediators and Intercessor forthem; and these can no more be esteemed Gods in the

first Sense of the Word, than the Popish Saints.

THE

THE Indians not being prejudiced against any Religion, the Reasonableness of the Christian Doctrines would certainly have induced them to have embraced them, in the Opinion of Loubiere, if the Ambition, Avarice, Injustice, and Tyranny of the European Nations, who have had Settlements there, had not contradicted the Doctrines they taught, and raised in the Indians an Abhorrence of their Persons and Practices.

THERE are a great many Preliminaries to be adjusted in Siam, before a Contract of Marriage is made: An Aftrologer is to be confulted and the Nativities of the young Couple are to be calculated. From this cunning Man alfo, they are to learn, whether it is likely to prove a happy Match, and whether the Family they are about to marry into be rich; it not being easy for any Man, who is not a Conjurer, to know this; all People that have Wealth endeavouring to conceal it, lest the Government should borrow it. When the Parties have gained the best Information they can in these Particulars, and are satisfied with them, the Lover is permitted to visit his Mistress three Times, and the Relations being present at the Third, the Portion is paid, and then the Marriage is esteemed compleat, without any religious Ceremony perform'd, and it is foon after confummated. The Talapoin is prohibited to be present on those Occasions; however, he visits the married Couple in a few Days, sprinkles them with Water, and repeats a Prayer for their Prosperity. The Siamese are allowed more Wives than one, but feldom make use of this Privilege, except their great Men, who take these Liberties in most Countries. whether their Religion or Laws prohibit it or not.

THERE is but one Wife however in Reality, who is so by Contract; the rest are Concubines purchased with their Money, and may be sold again; nor can their Children inherit. The Fidelity of the Siamese Wives is much applauded, they seldom give their Husbands Occasion to be jealous, and are exceeding diligent. They work and maintain the Family, when the Husband is in the King's Service, as he is obliged to be one Half of the Year. Divorces are allowed, but those happen very seldom, and when

they do, the Man returns the Wife's Fortune, and the Children are divided between them. As the Women carry on all the Trade, there is a Necessity of allowing them greater Liberties than they do in other hot Countries, and they are so far from abusing their Liberty, that they avoid every Thing that may give any Occasion for Scandal. There have been Instances of Transgressions, however, among the Royal Concubines: One of these Offenders, the King ordered to be covered by a Horse, and then put to Death. And Loubiere relates, that another Offender being thrown to the Tygers which refused to seize her, the King offered her a Pardon, but she would not accept it, chusing rather to be torn in Pieces, than return to the Drudgeries of the Palace, the King being present at this terrible Execution.

THE Siamese both burn and bury their Dead; they lay the Corple upon the Funeral-Pile, and let it burn, till good Part of it is confumed: Then they take up the Remainder, and interrit in a Burying-Place which furrounds fome Temple. The Reason they do not burn it entirely to Ashes, 'tis said, is because they suppose the Deceased is happy, where any confiderable Part of his Remains escape the Fire: Instead of a Tomb-Stone, they erect a Pyramid over the Grave; and though they used formerly to bury Treasure with the Corpse, these Places being deemed fo facred, that none durft attempt to rob their Graves; yet Thieves are not deterred from making free with fuch Treasures at present, and therefore they now bury only painted Papers, and other Trifles, instead of real Treasure: And here, as in China, great Men erect Temples near the Place where they design to be buried: And those who cannot build a Temple, present an Idol to some Temple already erected.

I PROCEED, in the next Place, to describe the Situation of such other great Towns as are comprehended in Siam, and its Dependencies. As Menangsang, situate on the River Menan, in twenty-two Degrees of North Latitude. Lacontai, situate on the same River, in twenty-one Degrees North Latitude. Porseluc, on the same River, in twenty Degrees four Minutes North Latitude. Campengpet, in eighteen Degrees North Latitude. Prabat, in six-

L4

teen Degrees. Louvo, in fifteen Degrees thirty Minutes North Latitude, which is the King's Hunting-Seat. Bancock, fifty Miles South of Siam. This may properly be called the Port-Town to Siam; for here Ships receive their Licence to trade, and their Discharges. Martaban, situate in sixteen Degrees North Latitude, on the Bay of Bengal. Tenassarim, in thirteen Degrees North Latitude, at the Mouth of a River of the same Name, near the Bay of Bengal. Ligor, in eight Degrees North Latitude. Liam or Chantebon, in twelve Degrees North Latitude. Patan, in six Degrees North Latitude. Queda, in seven Degrees North Latitude, being the most Southerly Promontory of this Country. Johr, in one Degree thirty Minutes North Latitude, which, with the adjacent Territory, have rendered them

felves independent of the King of Siam.

THERE is no History of Siam, that can be depended on, before the Year 1500. It is only supposed to be the Golden Chersenese of the Antients: And this there seems to be but little Foundation for, because Gold is not the Produce of this Country. It is faid also, this and the neighbouring Countries of the Farther India were formerly tributary to China: And this is pure Conjecture; for the Siamese have no fuch Tradition, much less History. They have had the Use of Letters some Time, but they don't so much as pretend to have any antient Records. When the Portuguese took the City of Malacca in the Year 1511, Mahomet an Arabian was Sovereign of that City, and the Territory about it independent of the King of Siam. For the Arabians, and Egyptians had certainly driven the original Inhabitants, the Malays, from this Coast, as they had the Natives of Sumatra, Java, Borneo, Macessar, the Molucca's, Banda, &c. from the Coast of the Indian Islands, and possessed themselves of the rich Produce of those Countries, viz. of the Cloves of the Molucca's, the Nutmegs and Mace of Banda, the Camphire of Borneo, the Gold of Luconia and Sumatra, and the Gums, Perfumes and sweet Woods that were to be found in most of these Countries; and the City of Malacca was the great Mart, where this Merchandize was to be met with, when the Portuguese made themselves Masters of it. We cannot doubt of the

Egyptians

Egyptians and Arabians being possessed of this Trade. till the Portuguese found the Way to India by the Cape of Good Hope; for we find the Grand Seignior, who was then Sovereign of Egypt, the Coast of Arabia, and the Red Sea, fitting out Fleets, and engaging the Portuguese in several Battles in the Indian Seas, to prevent their fettling themfeves in India, which, he was fenfible, would deprive his Subjects of the rich Trade they had enjoyed for many Years: And very probably, the Arabians traded in these Spices, before the Israelites went down into Egypt; inafmuch as we find them carried through Arabia into Egypt, when Foseph who was fold to the Ishmaelite Merchants. who were trading thither with their Camels in a Caravan: And though the People of Siam and the adjacent Countries, have no Histories or Records, that give any Account of this antient Traffick, yet, 'tis strange, that the Phanicians and Arabians have no Histories relating to their Indian Expeditions; or, if such Histories have been destroyed, that there are no Copies or Extracts from them now remaining, unless what we meet with in the Scrip-I have often wondered how Siam and the Indian Islands came to have the Use of Letters, when the Chinese have no Letters to this Day. But the Wonder ceases, if we consider, how soon the Indians might learn the Use of Letters from the *Phanicians* and *Arabs*: Whereas there does not feem to have been any Correspondence between the Arabs and the Chinese. I shall conclude with an Obfervation or two on their modern History: And I find. that the Kingdom of Siam and that of Pegu, have frequently been engaged in Wars, and at fome Times, Siam has been tributary to Pegu; and at others, Pegu have been conquered by Siam: But at present, they are independent of each other. The Portuguese were, in a Manner, Sovereigns of Malacca and the Coasts of Siam both North and South, from the Year 1511, to the Year 1640, when the Dutch took that City, and now remain Sovereigns of it and of the Sea-Coast, and particularly of the Straits of Malacca; and by their Men of War stationed here, and at Batavia, can prevent all other Nations trading to China through the Straits of Malacca and Sunda.

THESE Kingdoms are situate between ninety-two and one hundred Degrees of East Longitude, and between fixteen and twenty-two Degrees of North Latitude, bounded by Tipra and Acham on the North, by Laos on the East, by Siam on the South, and by the Bay of Bengal on the West. A Ridge of Mountains runs through the Middle of this Country from North to South, and another Chain of Mountains divides it from Laos. That Part of the Country which lies on the Bay of Bengal, is low Land, and flooded annually, like the Sea Coast of Siam. The chief Rivers are, 1. The Menan, which runs from North to South, and falls into the Bay of Siam. 2. The Pegu and Ava, whose Streams being united, fall into the Bay of Bengal. And, 3. The Arracan, which falls into the same Bay. These Countries lying between the Tropicks, the Air in the Vallies are excessive hot; but the Wind blowing from the Sea great Part of the Day, refreshes the parched Inhabitants in the dry Season, and their Mountains, as in other Countries, are always cool.

Or the three Divisions, I have thrown this Country into, that of Ava lies towards the North, the chief Town whereof is Lactora, fituate in ninety-fix Degrees of East Longitude, and twenty one Degrees twenty Minutes North Latitude. The fecond Division, Arracan, lies West of Ava, on the Bay of Bengal, the Capital of the same Name, situate near the Mouth of the River Arracan. The third Division is Pegu, situate South of Ava and Arracan, the Capital City whereof is Pegu, situate on a Ri-

ver of the same Name.

THE Produce of these Countries is Rice, Sugar-Canes, Furs, Skins, Salt-Petre, Rubies, Sapphires, Plantains, Mangoes, Tamarinds, Coco-Nut, and other Tropical Fruits; and they have the same Animals as in Siam, es-

pecially Elephants.

HERE, if we may credit the concurrent Testimony of our Seamen that visit this Coast, the Ladies are very free of their Favours, and their Parents and Husbands are so far from being jealous of them, that they will offer their Wives and Daughters to the Europeans. As to the Perfons, Habits, Religion and Customs of the Natives in other Respects, I can't learn that they are different from

from those of Siam. There are a great many monstrous and ridiculous Stories, indeed, related of these People, as, that they worship the Devil, and their Priests run about with a Torch in one Hand, and Rice in the other, every Morning, to give the Devil his Breakfast; that they quit their Houses three Months every Year, and leave the Devils to inhabit them; that the Kings of Pegu and Ava, have each of them above five thousand Elephants brought up for War; that they are fed in filver Vessels, and cloathed in gold and filver Stuffs, and Canopies of the same held over their Heads; that they are washed in the River every Day, and the Musick played before them when they march'd. But I shall not trespass upon the Reader's Patience, to relate any more of this idle Stuff, with which Books of Travels are frequently filled.

THESE three Kingdoms of Pegu, Ava and Arracan. have fometimes been under the Dominions of one Sovereign, and at others, each of them have had their King. And if we might credit some of our Voyage-Writers, one of these Kings had a Million and half of Men in his Army. besides five thousand Elephants, which is impossible to be true; but that they are all absolute Princes, is probable enough, because most of the Eastern Monarchs are such. As for the Inland Countries of Brama, Tipra, Acham, and Boutan, which lie between the Hither India and China. and adjoin to the Tartarian Thibet; I take them to confift of Tartarian Hords or Tribes, and that their Customs do not differ much from those of Thibet, and therefore refer the Reader to the Description of that Country already treated of; only observe here, that this Country is so mountainous, that it is almost inaccessible, which is the Reason it has no Correspondence either with the Hither India or China.

CHAP. VII.

Gives a short Description of the Islands in the Ethiopian Seas, with some remarkable Passages historical and accidental.

ADAGASCAR, is one of the largest Islands in the known World, and affords most Part of the Requisites of human Life: It produces very large Cattle, whose Flesh is excellent. They have also Goats and Deer plenty enough, and when the Portuguese first sailed along the Coasts of this Island, they lest a Brood of Hogs, that has mightily encreased. The French made a Settlement on the East Side of it, and called it Port Dauphin; but sinding that the Commerce there would not bear the Ex-

pence of the Colony, they left it again.

The English formerly drove a Trade for Slaves on the West Side of the Island, particularly at St. Augustine's Bay, and at new and old Messalige, but now they are afraid of the Pirates, tho' some venture their Necks in going to trade with them. There have been several Squadrons of British Men of War sent to cruize on the Pirates, but have had very ill Success in finding them out, but one Scots Ship commanded by one Miller, did the Publick more Service in destroying them, than all the chargeable Squadrons that have been sent in Quest of them; for, with a Cargo of strong Ale and Brandy, which he carried to sell them, in the Year 1704. he killed above five hundred of them by carousing, tho' they took his Ship and Cargo as a Present from him, and his Men entered, most of them, into the Society of the Pirates.

Madagascar is invironed with Islands and dangerous Sholes, both of Rocks and Sand. St. Mary's, on the East Side, is the Place where the Pirates first chose for their Asylum, having a good Harbour to secure them from the Weather, tho' in going in there are some Difficulties, but hearing that Squadrons of English Ships were come in Quest of them, they removed to the main Island for more Security, and there they have made themselves free Denizons by Marriage: And I am of Opinion, that it will

be no easy Matter to disposses them. In the Year 1722, Mr. Matthews went in Quest of them, but found they had deserted the Island of St. Mary's, leaving behind them some Marks of their Robberies, for in some Places they found Pepper a Foot thick, lying on the Ground in the open Air. The Commodore aforesaid went with his Squadron over to the main Island, but the Pirates had carried their Ships into Rivers or Creeks, out of Danger of the Men of War, and to offer to burn them with their Boats, would have been impracticable, since they could have easily distressed the Boats Crews out of the Woods. The Commodore had some Discourse with some of them, but they stood on their Guard, ready to defend themselves, if any Violence had been offered them.

THERE are many Islands and Sholes lying to the Eastward of Madagascar. St. Apolloni is uninhabited; Domascarenhas is inhabited by the French, but formerly by the English, and is called by them, The English Forest. Maritius was four inhabited by the Dutch, but in the Year 1703. they had Orders to leave it, and repair to Batavia, and the Dutch Company sent Shipping for their Transportation. Diego Rais, which is the next Island to Maritius, was made a French Settlement, but finding it barren, they left it in three Years, all the rest were always uninhabited, as well to the Eastward as the Northward, and but three or four to the Westward, who lie in the

Channel between Quiloa and Madagascar.

Comora is the Westmost of the inhabited Islands, and affords nothing but a scrimp Maintenance for a parcel of poor miserable Creatures. Johanna is within Sight of Comora, and is a plentiful Island, in Cattle, Goats, Fowls and Fish, with good Lemons and Oranges, so that most Part of the English Shipping bound to Mocha, Persia and Surat, usually called there for Refreshments, till the Pirates began to frequent it. There are two memorable Accidents fell out at that Island, to the English East-India Company's Shipping. One was in the Year 1690 or 91. to Captain Burton in the Herbert, a Ship of eighty Tons, amounted sifty-six Guns. He was attacked by three French Ships, each gunn'd and mann'd as well as he. On their Approach, he cut his Cables, and put to Sea, about two

in the Afternoon they began an hot Engagement, which lasted till eight in the Night, that the Herbert blew up, and all her Men lost, but fix or seven that were in the Pinnace, some whereof I saw afterwards at Muskat. The other was lately, in the Year 1720, when two of our East-India Ships were watering there, with an Oftend Ship in their Company; they agreed to stand by one another in case of Assaults, or engaging with the common Enemy, but when two Pirates drew near, the Greenwich and Oftender weighed, and stood to Sea, and left the Cassandra to shift for herself, who was obliged to engage the smallest Pirate (being a Ship of twenty-four Guns, Dutch-built) in the Bay, and foon after they began, the Cassandra went aground on some Rocks, and the Pirate striving to board her, was also taken up by some Rocks, not above twenty Yards from the Cassandra. The Pirate's Head lay towards the Cassandra's Broadside, and they pelted one another furioully, many falling on both Sides, but the Pirates, finding too hot Work on their Decks, were forced to quit them, and run down into the Hold for Shelter. Captain Mackraw, who commanded the Cassandra, feeing the other Pirate approach near him, and manning all his Boats to reinforce his Comrade, thought it a good Time for him, and who else could get ashore, to embrace the Opportunity, and accordingly they got into their Boats, and faved their Lives. The Inhabitants shewed much Humanity to the Distressed, and carried them above a Dozen of Miles up in the Country, for Fear the Pirates, in their mad Fury, should have murthered the poor Men that escaped from their Ship. The Pirates, soon after they had Possession of the Cassandra, got her assoat again, she having received little or no Damage; they also got their own Ship off, but she was very much shattered, and disabled in her Masts.

CAPTAIN Mackraw, being a Gentleman that was well versed in Conversation with Men of any Temper, ventured on board the Pirates, and they were so much taken with his Address, that they made him a Present of that Ship which he had so bravely battered, to carry him and his Crew to India; in the mean while, the Greenwich came to Bambay in September, who brought the Account of the

Loss

Loss of the Cassandra, and in November, Captain Mackraw arrived himself with his new Ship, and his Ship's Company all in Rags, but were soon equipp'd by the Benevolence and Generosity of the Govenor Mr. Boone, who was a Gentleman of as much Honour and good Sense, as any that ever sat in that Chair.

Mobilla is but a little diftant from Jobanna, pretty well inhabited, but the People not so well civilized as Jobanna; and the Kings of these neighbouring Islands have continual War. The Jobanna Men, by the Assistance of Commodore Littleton, landed on Mobilla, and made great Slaughter and Devastations; but what his Policy was in breaking the Neutrality that the English held among those Islanders, I know not. Mayotta lies about thirty-sive Leagues from Johanna, and is the largest of the inhabited Islands, but being surrounded with dangerous Rocks under Water, it is not much frequented, and so the Manners of the Inhabitants not so well known. The Religion of those Islands is Mahometan, but there are very sew Zealots among them; and so I leave them, and return to Cape Guardasoy, and travel up the Red-Sea.

The Navigation of the *Ethiopian* Seas is very dangerous, and their Maps very deficient; for I saw a *Dutch* Skipper at *Mocha*, who had Orders to sail from *Batavia* towards *Mocha*, in the Month of *January*, and to navigate to the North End of *Madagascar*, and from thence to the *Red-Sea*, he affirmed to me, that he saw several large Islands, and many Rocks and Sands in those Seas that were not placed in his Maps, for which Reason he was obliged to anchor in the Nights, when he could have Anchor Ground; and that the Currents run very strong

to the Southward, among those Banks and Rocks.

CHAP. VIII.

Gives a Description of Zeyla's Sea-coast, and of a Part of Ethiopia, Zuakin and Upper Egypt.

UT to return again to Cape Guardafoy, from thence up to Zeyla is about one hundred and twenty Leagues. The Coast is inhospitable as well as the People. There are only two Places in all that Tract that affords fresh Water. one is a little to the Fastward of Mount Felix, but in Arabick it is called Baba-fileck, or, The Mountain of Camels, where there is a small fresh Water River; the other is called Khagi ten Leagues more Westerly; it may be easily known by the Side of a Hill close to the Sea, whose North Aspect is of white Sand, that shews at a Distance like a Sail, but may be seen in that Figure ten Leagues off. veral Ships from India, that have been necessitated to call at those Places for Water, have been cut off; and one poor Man they furprized with his own Boat that he fent for Water. The Boat's Crew were furprized whilft filling Water, them they killed, except two Boys whom they faved; they then came off in the Night, and those in the Ship not examining them in Time, they boarded the Ship, and took them all unarmed, and killed every Man, and carrying the Ship close to the Shore, they unladed her, and then funk her. The two Youths who gave the Account of that tragical Accident, were brought to Aden, which lies opposite to that Place, and were fold for Slaves. A Surat Ship being there, bought the Youths, and brought them to Surat.

THERE is no anchoring on that Coast above a Mile off Shore the Sea is so deep; and about Zeyla, is a deep Bay opposite to Babelmandel, which makes the Entry into the Red Sea, there is a large River that disimbogues into the Sea, but tho' the Mouth be large, yet it is so deep, and full of Banks and Rocks, with such Whirl-pools, that no Ship dare go near it. At that River begins the Ethiopian Shore, shewing many high Mountains, which are easily seen from the Arabian Shore: And all the Coast from this

River,

River, as far North as Zuakin, which is near two hundred Leagues, is called the Ethiopian Coast.

AND tho' I never was on that South-west Coast of the Red Sea, and know but few that traffick there, except Romillo Priests, yet I'll venture to relate what I learned from them. There are two or three finall Forts between Zevia and Mossava, but an inconsiderable Trade, being most in Slaves of both Sexes, which the Ethiopians bring to Mocha for a Market, where I have seen a Drove of those unfortunate Creatures carried like a Flock of Sheep, most Part of them insensible of their own Misery, and the highest Bidder carries the Bargain. They also bring some Elephants Teeth, the best that ever I saw, and some Ostriches Feathers.

Mosava is figuated on the North-west End of a large Island, and affords a very good Harbour for Shipping of any Size; it has a Garrison of about two hundred and fifty Turks in a Castle built formerly by the Portuguese, who. according to their impolite Custom, oppress Strangers as

well as Natives, that come there to trade.

THE Country produceth low Gold, Elephants Teeth. Slaves, and some Cosiee, but of a larger Grain than what grows on the Land opposite to it in Arabia, at Betlefackee. The current small Money of Ethiopia is Salt, which is due out of the Mountains as we do Stones from our Quarries. which they break in Pieces of several Sizes, the largest weighing about eighty Pounds, the others in ferty, twenty, ten, or five Pounds, and are so expert in dividing it, that they err not above five per Cent. more or less in their Calculation of Weight; twenty Pounds is in Value about one Shilling Sterl. and those Pieces of Salt is the current Money in their Markets for Provisions, and likewise for Cloth, when they buy a Yard or two at a Time; and when a Merchant has got any confiderable Quantity by him, there are Bankers to give Gold for it.

THE Religion on the Sea-coast is Mahometan, but within Land Cophties, who are circumcifed Christians. The Males they circumcife fometimes at eight Days old, but that Ceremony is often delayed till forty Days, and sometimes not till the seventh or eighth Year of their Age. They circumcife Females as well as Males. The Circum-

cision, they think, is necessary in Memory of Jesus Christ, and on a certain Day yearly, they immerse themselves in Rivers or Lakes, in Remembrance of Christ's Immersion or Baptism. They forbear eating some Beasts Flesh, according to the Mosaical Law. They hold from Saturday's Noon to Sunday's Noon their Sabbath. They receive the Sacrament standing, and only in the Church, and the Wine only from the Deacon's Hand in a Spoon. Their Priests eat no idle Bread, but maintain themselves by Labour. They have many Bishops, but one they call Abunah above the rest, he is held in great Veneration, and when he goes abroad, he has great Attendance, and rides on a Mule, with a Cross in his right Hand.

THEY enter their Churches bare-footed, because God commanded Moses to put off bis Shoes, for the Ground be stood on was boly. They allow but one Wisc, but as many Concubines as they please. They allow of Repudiation, but neither Party can marry again, till the Term of three Years be expired, and if the Parties are not reconciled in that Term, they think the Breach too big ever to be closed

up again.

They have all the canonical Books of our Scriptures, and feveral more. They reckon the Prophet Iddo one of the greater Prophets, and put him in the Class with Isaich, Ezekiel, Elischa, Elisch and Daniel, and that he wrote fourteen thousand Prophecies, many of which they have at this Day; that his Prophecies of Jesus Christ, were clearer, or more distinct than any the other Prophets lest behind them; but the Substance of their practical Religion consists in their Fasts and Feasts, for they do not much trouble themselves about the Doctrine of Faith, Repentance and good Works, which makes them very dissolute in their Lives.

Wr Europeans generally call the King of Ethiopia, Prefter John, but his Subjects know no fuch Appellation; 'tis true, he is Supreme in ecclefiaftick as well as civil Affairs. His Dominions are very large, and he has many Tributaries, who stile themselves Kings, and act despotically. The Royal Family are all kept at Amara, which is a pleafant round Hill, situated in twelve Degrees North from the Equator, tho' I saw an old Portuguese geographical Description

fcription of Ethiopia, place it under the Equino Eticl. Hill is walled round with a high Wall, at least twelve Leagues in Circumference, which cuts off all Communication with Strangers or Mal-contents. Within the Walls are Palaces, Gardens, Orchards, Woods for wild Game, Rivulets and Ponds for Fish, and all that the Clime can afford to make it pleasant; there the Youths of the Royal Family study what Arts and Sciences are proper to their Quality, or according to the Knowledge of their Teachers.

THEIR Empire is hereditary, but not in a direct Line, the Succession being kept in the ancient Family, which they reckon up as high as Solomon, but on the Demise of one Emperor, they make Choice of a Royal Youth out of the Paradise of Amara, so he that behaves best in that State of Probation, or has the best Friends to recommend him, fucceeds without Contention, which political Custom makes their Youths very tractable and frudious. There are none reckoned Princes of the Blood after fecond Coufin-germans, and it feems they have fomething like the Salick Law in Force amongst them, for their Histories mention no Female Reign fince Candace's Time, if Ethi-

opia, as it now is, was her Country.

THEY are very nafty in their Apparel and Diet, for tho' their Country is well stored with Fire-wood, yet they do not take Pains to dress their Meat by Fire, but having killed their animal Food, before it be well cold, they mince it, and mix Salt and a sharp hot Bark of a Tree well powdered, and make the Morfel up in small Balls about the Bigness of a Wall-nut, and greedily eat it: But the Princes eat in State, for they being feated on a Mat spread on the Ground, his favourite female Slave or Concubine makes up those Balls of Flesh or Fish seafoned with the aforelaid Sauce of Salt and Bark, and squeezes them into fashionable Morsels, his Highness gapes like a young Crow, and she throws it cleverly in, which he presently devours. The Commons eat of the same Sort of Viands with the Grandees, but many of both Sexes die by Excoriations of the Guts and the right Intestine; but whether their Diet be the Cause of their Distemper, I leave to Phyficians to determine, who generally are the best Judges. They have a good pleasant Liquor made of Honey M 2

Honey and Potatoes, which they caroufe in plentifully, and often get drunk by it, and then they are rather mad than inebriated, which renders them very quarrelforn and furious; their Honey, as it is very plentiful in their Country, so it is the whitest, hardest and best tasted that ever I met with.

I had the above Relation of Abasina from four Romillo Priests, who had their Mission there for eight Years together, but made but few Proselytes: They had been meddling in State Affairs, and, for Fear of losing their Heads, they fled, and left two of their Brethern, being old, and not fit for Travel; what became of them they know not; but those four transgressed their Superior's Orders, and left their Stations, and travelled three or four hundred Miles to the Sea-Coast, and got a Passage over the Red Sea to Mocha, where I entertained them about tour Months: They also told me, that seven tributary Kwas had lost their Heads in fix Months Time, for Maladministration or Treason, and if my Guests had not removed their Quarters when they did, they had been honoured with the Name of Roman Martyrs, in the Year 1714. The Country abounds plentifully in Wheat, Rice, Barley, Legumens or Pulse of several Sorts, notwithfranding they eat their raw Meat without Bread. Their Woods abound in Elephants (reckoned the largest in the World) also some Lions and Tygers, and innumerable Troops of Wolves, Monkies and Offriches, all much larger than in other Countries. The aforesaid Priests also told me, that the Head of Nilus, which the Ancients so much fought for, is in this Country, about the Latitude of fix Degrees North, and about four hundred Miles from the lower End of the Red Sca. How far the Ethiopian Coast stretches to the North-ward, I know not, but it has no Seaports to the North-ward of Mossava, and the next Country to it is the barbarous Zuakin, whose Inhabitants are very different both in Complexion and Customs from the Abafines, whose Colour is only as black as Soot, but the Zuakins are as black as Jet, and their Skins as foft as Velvet.

THERE are no Sea-ports from Zuakin on the Southwest Side of the Red-Sea, till we come to Seues, which

lie

lies near the Head of the Bay of that Sea, which fends his opposite Shores down to the South-eastward, as far as Babelmandel.

Sues, or Seues feems to be the Ezion-geber, or Eloth, from whence Solomon fent his Ships to Ophir, for I have converfed with feveral Pilots of that Navigation, who affured me, there is no clean Bottom for Anchoring, but Seues, on that Part of the Coast, for most Part of the Red-Sea is incumbered with Coral Rocks under Water, and pestered with Banks, which make the Navigation very dangerous. At present, Seues is the only Sea-port for Grand Cairo, from whence it is three Days Journey by Land, with a Cassilla or Caravan, but on Horse-back but two short Days. In Cairo the English and French keep their Consuls, for the Support of the Trade of their respective Countries.

In the Year 1714. Mr. Ferrington was Conful for the English, he had a very fair Character from all People as well Merchants as the Religious that came from Cairo to Mocha, which made me prefume to trouble him with a Letter, giving him the best Account I could of the State of Merchandize in India, and to have his Advice, whether it might be practicable to cultivate a Trade from India to Seues, which Letter he very civilly answered, and next Year it came to my Hand, but he dissuaded me from any Attempt that Way; because of the intolerable Avarice and Insults of the Turkish Bashaws, and other Officers of Note, with the Contempt they have for Merchants, especially Christians, he assured me, that it is impossible to be a Gainer by such Commerce.

CHAP. IX.

Gives a little Description of the Coast of Arabia the Happy, from Mount Sinai to Mocha, with some Observations on the Religion, Customs and Lows, as they are now established.

VER against Seues, on the Arabian Shore, stands Mount Sinai, about five or fix Leagues from the M 3 Sea;

Sea; and on its South-west Side, near the Bottom, is the Monastery of St. Katharina. The Mount is much revered by the Jews, and the Monastery by the Christians; it is very antient, and held in some Veneration by the Mahometans, whose Pilgrims to Mecca, from Egypt, Turkey and Palestine, pass close by, both in their going and returning, as do likewise their Cassillas, and other Passengers, that go on Trassek to Judda, a City sour Days Journey from Macca, where Mahomet lies interred: And the great Concourse of Pilgrims (from all Parts where his Religion is spread) brings a great Trade thither.

THERE is a Tradition, that, as Mahomet was going on an Expedition to Palestine, he called at that Monastery for Refreshments, and the Monks generously affisted him; and in Acknowledgement of their Civility, he gave them a Charter, which they still keep, wherein he gave them many Immunities, and laid his heavy Curse on all, who should, after that Time, dare to molest that Monastery.

THE Building is strong and high, and no Gate or Door to enter in to it, but one, which stands about ten Yards (in the Wall) from the Ground. It has a large Inclosure adjoining to it, with an high Wall, to keep the wild Arabs from robbing them of their animal Provisions; for they are such vile Thieves, that they had rather venture to lie under the Anathema of their Prophet, than to keep their Hands from Robbery.

Irs present Possessors are Nestorian and Jacobin Monks, who are maintained by the Charity of Passengers, and a little Revenue that belongs to the Monastery. The Christians, in that Part of Arabia, are Nestorians and Jacobins, whose Priests may marry, and they allow of no Images but the Cross, and many other Things repugnant to the

Romis Tenets.

Judda is the next Place of Note below St. Katherina. It is a finall, but well fortified City, belonging to the Turk. It stands close to the Sea, and is governed by a Bashaw, who keeps a Garrison in it, with sour or five Gallies to cruize on the Red-Sea, to hinder the Passing of all Ships or Vessels up the Sea, without first calling at Judda.

THE inland Country about it, belongs to a Sheek, who pretends to be a Descendant of *Mahomet*. He has the Title of *Xeriff* given him, to distinguish his Eminency from other Sheeks. And, altho' he be so near akin to the Prophet, yet he squeezes above one hundred thousand Pounds *Sterl*. yearly out of the Pilgrims, who go to worship at his Ancestor's Tomb. And so much Gain he can make of their Folly.

It is between this Country and Sinai, that the famous Balm of Gilead grows. It is reported to proceed from a Shrub, the Bark of which is flit, and Veffels fet under the Wound to receive it, as it drains from that Wound. The wild Archs about Sinai, have a Tradition, that Abrabam was their Countryman, and are not a little proud of that Honour; but if it was fo, that he was their Sheek, as they alledge, they neither follow him in Morals

or Religion.

THE Sea-coasts of Arabia Felix, from Judda to the Southward, as far as the Latitude of fifteen Degrees, are governed by feveral Sheeks, who are so avaritious, that no Pilgrims can pass through their Dominions but Beggars; for if Strangers carry any Thing of Value about them, or if they have good Clothes, they are stript of all, and about a Yard of coarse Cloth given them to cover their Nakedness; and Lectures of Humility and Devotion are preached to them, that whoever goes on so solemn an Errand, ought to shew, by their outward Appearance, that the inward Man is humble, and that those who love Riches, ought to fequester themselves from the World, before they approach that holy Place, where, after the Muftee (or his Deputy, the Fackee) had bestowed a Benediction on them. if they had any Grace, they would never covet Riches again.

Betlefackee is the first Town of Note (near the Sea-coast) of the Immaum's Dominions. It stands about twenty-five English Miles from the Sea, and it is the greatest Market for Cossee in the World. It supplies India, Persia, Turkey in Asia, Africa and Europe, besides England, France and Holland, with Cossee-beans. Other Goods and Merchandize may be bought and fold on Credit, for a certain Time; but Cossee is always bought for ready Money. The

M 4

Europe Shipping lades yearly at Macha, (from whence Betlefackee is about one hundred English Miles) about two thousand Tuns, rather more than less, and the other Nations above twenty thousand Tuns more. The whole Province of Betlefackee is planted with Cossee Trees, which are never suffered to grow above four or sive Yards high; and the Bean or Berry grows on the Branches and Twigs, first green, then red, and at last a dark brown Colour. The Berries cling to the Branches like so many Insects, and when they are ripe they shake off.

Zibet is the next Town, and ferves for a Sea-port for Beilefackee. It was large and famous in ancient Times for Trade, but in the fourteenth Century, the Turks over-ran all the Coasts of the Red-Sea, and made them Tributaries to them. They ruined all the Trade from India to Zibet, and settled their Emporium at Aden, about thirty-five Leagues without Babelmandel, to the Eastward: And the Immaum holds his Kingdom in Feosf from the Turk at this Time; and when the Turks come to Betlefackee, none dare break the Price of the Market, nor buy before they

are first served.

THE Immaum or King keeps his Court generally at a Town called Mohaib, about two hundred English Miles to the East, North-eastward of Mocho. He has little Splendor about it, and he that reigned in the Year 1714. was about eighty Years of Age. His Government has been of a long Time very ill managed. His Lust having the Ascendant over his Reason, he had seldom less than three hundred Wives married to him, of the most beautiful young Women in his Dominions. He often marries one, at one New-moon, and, on the next New-moon, remarries her to one of his Minions, and bestows a good Patrimony on her to help her off; so that with his own frequent Marriages, and those of his Minions, he exhausts all his Revenues, and is always necessitous, which forces him on many unjust and mean Ways to exact Money from his miserable Subjects. And in the Year 1720, their heavy Burdens made them rebel, and involved the whole Country in a civil War. One Part was for deposing him, and another for keeping him on the Throne; but what the Event was I never heard.

The Turks being baffled in several Projects and Expeditions from Aden, and that they could not well maintain their Ground in that Part of Arabia, (being so very far from their own Dominions) without much Charge and distant Trouble, they, in the latter End of the sixteenth Century, withdrew their Garison from Aden, and left it, with all its Fortistications and Buildings, to the Immaum; who finding Aden to lie inconvenient for the Trade of the Red-Sea, because of the fresh Winds usually blowing at its Mouth, in both Easterly and Westerly Monsoons, made him remove the Trade about sisteen Leagues within its Mouth, in a Bay, not very commodious for Shipping, to a Fishing Town called Mocha.

Mocha is a Place of good Trade, notwithstanding its bad Situation; for, befides the Commerce with Sues and Judda, the English and Dutch Companies have their Factories there, besides a Trade from India, carried on by English free Merchants, Portuguese, Banyans and Moors, and by Vessels from Bossorah, Persia and Muskat in Arabia Petrea. The Country, of itself, affords or produces very few valuable Commodities, besides Cossee, and some Drugs, fuch as Myrrh, Olibanum or Frankincense from Cassin, and Aloes Soccatrina from Soccotra, liquid Storax, white and yellow Arsenick, some Gum Arabick and Mummy; with fome Balm of Gilead, that comes down the Red Sea. The Coffee Trade brings in a continual Supply of Silver and Gold from Europe, Spanish Money, German Crowns, and other European Coins of Silver; also Zequins, German and Hungarian Ducats of European Gold; and from Turkey, Ebramies and Mograbies, Gold of low Mart.

The Town is large, but meanly fortified; and, from the Sea, it has a fine Aspect. The Buildings are lofty, and make a much better Appearance without than within. The Steeples of five or fix Mosques raise their Heads pretty high above the rest of the Buildings. Their Markets are well stored with animal Provisions, such as Beef, Mutton of Sheep and Goats, Lamb and Kid, Camel and Antelopes Flesh, Dung-hill Fowls, Guinea Hens, Partridge and Pigeon. The Sea affords Variety of Fish, but not savoury. I believe their Unsavouriness proceeds from the

extreme Salthess of the Sea-water, and the Nature of their Aliment. The Town is well furnished, all the Year round, with good Fruits, such as Grapes, Peach, Apricocks and Quinces, of which they make Store of Marmalade, both for their present Use and Exportation, tho near the Town, there is not a Tree or Shrub to be seen, but a few Date Trees. And they seldom have more than two or three Showers of Rain in a Year, and often no Rain in two or three Years; but amongst the Mountains, about twenty Miles off, seldom a Morning passes without a moderate Shower, which makes the Vallies very prolifick in Fruit and Corn, such as the Soil will bear; but they have

no Rice, tho' Plenty of Barley and Wheat.

THE Governor of Mocha, and the Officers of the Town, are Merchants, when they think to get good Bargains, and are very ready to break their Contracts, both in Payment of their Debts, and in the Time of Payment. Some Instances whereof I saw. And, in the Year 1716, I had an experimental one; for the Deputy-governor having bought a Part of my Cargo, agreed to pay me the first Day of June, according to our Era and Computation. At the appointed Time I demanded my Money; but he told me, that notwithstanding he had agreed at that Time to pay me, yet the Custom was not to pay before the middle of July, and Custom must be observed before Contract; besides, the King having much Need of Money, sent pressing Demands on the Town for Money, as fast as it came in by Customs and other Subsidies; therefore he could not, nor would not pay me before the customary Time, nor would he clear my Account Customs (which is a Part of his Office) before that Time. I often folicited him to clear my Account, and pay the Balance; but to no Purpose. I then fell on a Project to frighten him into Compliance. I went very calmly to him, and told him, that I had some Goods left, which would be proper for the inland Markets, and that I would let him have a Penyworth of them. He knew the Goods were proper enough, as I had told him, and so came to my House, which was four Stories high. I carried him up to the highest, and, feated him in a small Balcony, and I shewed him the Musters of my Goods, and ask'd Prices which he thought too

high; and, because we could not agree, he was for going abruptly away, and so got on his Feet : But I being much too strong for him, took him by the Shoulders, and forced him to fit down again, and ordered my Linguist to tell him, that, before we parted, he must clear my Account Cuftoms, and give me Bills, on the King's Banker, for the Balance, otherwise I would teach him to fly from the Balcony to the Ground, be the Confequence what it would. He had never been so treated before, and Fear seized him fo, that he could not speak for a little Time, but, recovering a little, ordered his Clerk, who was in the Room with us, to make up my Account, and draw Bills immediately, who readily obeyed Orders; and in Half an Hour we became good Friends again. The Noise of this Action run like a Squib thro' the Town, and, before I came to the Banker with the Bill, (which was for about one thousand two hundred Pound Sterl.) he was apprised how I had ferved the Deputy-governor, and, upon prefenting it, accepted it to be paid in feven Days; but withal defired, that I would confrantly keep two European Seamen at his Door, with Arms, and, as Money came in, they were to receive one Bag, and the King's People another, till the Sum should be completed: And accordingly in feven Days I got every Penny, and fent the Governor word, that I wanted to wait on him, in order to take my Leave. He returned me Answer, that I should be very welcome; and accordingly I went, and he received me very civilly; and, all the while I staid, he passed Jokes on his Deputy about the Fright I had put him into.

THE King's Customs are very easy, being but three per Cent. from Europeans, and five on Gentiles; and the Custom-house as easy, for they only desire to see the Musters of Goods, and the Quantity of Goods in each Parcel or Bale, and so cause some, that they choose, to be opened; and if they find the Quantity and Quality agree with the Invoice given in, the Remainder of the Cargo is carried directly from the Landing-place, to the Warehouses, without more Trouble; and, after Sale, they receive an Account from the Seller, and rate the Customs accordingly.

THEY are very ignorant in History and natural Philofophy; for they tell, that Alexander the Great was Makemet's General, tho' they lived about nine hundred Years distant from one another; and that, having a Mind to transport his Army over the Mouth of the Red-Sea, from Babelmandel to Zeyla, in order to conquer Ethiopia, he went about building a Bridge there; and, there being feven Islands in these Streights, called the Seven Stones, he placed them there for a Foundation to build on: And they are of Opinion, that the World is supported on the Horns of a great Bull, who fometimes shakes his Head, which they affign to be the Cause of Earthquakes, which frequently are felt there.

THERE are Abundance of Beggars in Mocha, and in most Towns in Arabia, who brag of the Sanctity and Verity of their Religion; and, when they pass in the Streets, they are always bawling out, that there is but one God, and Mahomet his Prophet and best beloved Servant; and, carrying a Piece of Iron like the Tooth of an Arrow, in their right hand, they strike it with great Force into the Cavity of the Eye, and yet the Eye is not blemished, nor the Eyelids, or Skin about the Eye, feem to be hurt; and they often let the Iron hang down, as if the Point was fastened to the Corner of the Eye next the Nose. As for mad People of either Sex, they venerate them, believing them to be inspired, or actuated by a prophetick Spirit.

THEIR Religion is Mahometism, and are superstitiously rigid in their Way, but abominable Hypocrites; for, in their Promises, which they seldom keep, with lifted up Eyes, they call on God to be Witness to their Sincerity: But in no Part of the World is Justice bought and fold more publickly than here; and the Judge, who generally is the Governor of the Place, whilst he is passing unjust Sentences, looks as grave as an old Cat, declaiming against

Partiality.

In the Year 1716, I faw Justice executed on a notorious Criminal, guilty of no less than Robbery and Murder. A poor Peasant had raised a Stock of five hundred Dollars, amongst his Friends and Neighbours, and was on his Way to Mocha, to lay it out in Merchandize proper for the Parts he lived in. A Villain, who knew of his Journey, and the Stock he carried, way-laid him, and cut his Throat from Ear to Ear, and then stabbed him

In the Breast with his Dagger, and so possessed the Money, and went off with it. Some Passengers, coming that Way soon after, found the mangled Corpse, not quite cold, went and informed the Neighbourhood of the Tragedy. On Information, they went and viewed the Carcase, and knew it. They gave the Account to the murdered Person's Relations, who lived but a little Way off,

and they buried the Corpfe. Some Months after, one of the Relations being at Mocha, chanced to fee his dead Kinfman's Ring on the Murderer's Finger, and challenged it; for it is the Custom of all the eastern Countries, both the Mahometens and Gentiles, to wear Rings. They wear no Gold Rings, but Silver among the Mahometans, and the Gentiles commonly wear Gold. The Person who knew the Ring, informed the Cadjee or Judge what had past, and the Cadjee ordered the Murderer to be apprehended, and brought before him; and ordering him to be fearched, to fee if farther Proof could be found about him, the very Purse that the Money was in, was found in his Bosom. However the Murderer denied all, but was fent to Prison, and settered, till other Persons were sent for that were particularly well acquainted with the Defunct. Five or fix Evidences who were fent for, appeared, and the Ring and Purse being produced, they fwore, that they knew them to be with the unfortunate Defunct when he fet out on his Journey for Mocha; and he at length confest the Fact himself. The Judge, and the rest of his Court, desired him to return the Money, and they would folicit the murder'd Persons Relations to spare his Life, it being in their Power to take away or fave his Life; but he absolutely denied the returning back any Part of it, and impudently asked the Judge, how he thought his Wife and Children should be supported, if he should return the Money.

THREE Months had passed in unfruitful Persuasions, but finding him obstinate, they bid him prepare to die next Day about Noon. And accordingly, with a Guard of about five hundred Horse and Foot Soldiers, he was carried without the City, with his Hands tied behind him; and, he was delivered to the Desunct's Relations, who sait gave him a deep Stab under the left Pap, and one of

the Relations standing behind; pulled back his Head, while another cut his Throat from Ear to Ear, and so left him with all their Speed. For as soon as the Mob saw him killed, they assaulted the Executioners with Stones and Brickbats so furiously, that the Guards had much ado to save them from being murdered; for there is a Passage in the Alcoran, importing, that whoever spilt a Believer's Blood, is accursed, and ought to be stoned to Death.

THE Soldiery of Mocha are very insolent and licentious: for, in the Months of May, June and July, the Air being fired with Heat, and the greatest Concourse of Strangers come to Town, either about Traffick, or getting Passage by Sea to foreign Countries, and about that Time Cash is plentiest in Town, then those undisciplined Cowards seldom fail to fet Fire to some Huts that the labouring People live in, and they being built of a few Spars, covered with the Branches and Leaves of Date Trees, which are very combustible Materials, the Flame soon grows fierce and violent, and very often penetrates thro' the Doors and Windows of Merchants Houses, the' built of Brick. And, in the Consternation, when People are intent on faving what they can, by removing their Goods from their burning Houses to the Streets, those Varlets plunder publickly there with Impunity; and, altho' those Villains are detected in letting Fire to Houses and plundering, and Complaints made of them to the Governor, those Grievances are so far from being redressed, that I have known a Complainer well bastonaded for detecting the Rogues.

The largest City in these Dominions, is Sounan. It is sisteen Days Journey North-east from Mocha. It drives a great inland Trade, and is the Mart for many of the Indian Goods that are brought to Mocha. The Mechanicks of different Trades have each their peculiar different Street; so that whatever Commodities Strangers may want, they readily know where to find them. And in all the Streets there are Brokers for Wives, so that a Stranger, who has not the Conveniency of an House in the City to lodge in, may marry, and be made a free Burgher for a small Sum. When the Man sees his Spouse, and likes her, they agree on the Price and Term of Weeks, Months

or Years, and then appear before the Cadjee or Judge of the Place, and enter their Names and Terms in his Book, which costs but a Shilling, or thereabout: And joining Hands before him, the Marriage is valid, for better or for worse, till the Expiration of the Term agreed on. And if they have a mind to part, or renew the Contract, they are at Liberty to choose for themselves what they judge most proper; but if either want to be separated during the Term limited, there must be a Commutation of Money paid by the separating Party to the other, according as they can agree; and so they become free to make a new Marriage elsewhere.

CHAP. X.

Contains a Description of Aden, with some historical Remarks about the Turkish Expedition from thence into India: Also an Account of the Sea-coast of Arabia Petrca, as far as Muskat and Bassora; with a particular Account of an English Ship lost on the Island of Maceira.

the Turks, on the East Side of a barren Island, and has no fresh Water but what the Rains assord them, which they keep in Cisterns. The Turks had great Designs when they built it, for they thought of driving the Portuguese out of their Settlements in India, and to have possest them themfelves. Accordingly about the Middle of the sixteenth Century, they made an Expedition into India, against the Portuguese, but were unsuccessful, and so have never attempted since to settle in India. It continued many Years after the Stapple Port for the Red Sea Commerce, but the Charges of keeping it, so far from the Turkish Dominions, made them leave it to the Immaun, as was already observed, and he removed the Trade to Mocha.

It has a good Road for Shipping in the Westerly Monsoons, and a pretty good Mould, or Bason, for the Easterly, Eafterly, close to the Town, and the Road is not Half Gun-shot from it. It has been well fortified, being naturally strong in its Situation; but the Badows, or wild Arabs. who inhabit about the Sea-Coast of Arabia Petrea, have feveral Times taken, and plundered it, fince it fell into the Immaum's Hands. The Country adjacent produces Barley. Wheat and Legumen, and Store of Fruits and Roots. Camels, Affes, Mules and Horses, all very finely shaped and mettlesom; but Money being pretty Plenty in that Part of the Country, their Horses are very dear, for 50 or 60 l. Sterl. is reckoned but a small Price for one. They have also Plenty of Sheep, with large broad Tails, that reach almost to the Ground, and their Goats are the finest, both for Beauty and Taste. And they have Poultry and Guinea Hens in Abundance. And the Sea affords Variety of good Fish. The Immaum's Dominions reach about twenty Leagues to the Eastward of Aden, along the Sea-Coast; but there are no Places of Trade till we come to

Cassim, that lies almost under the Meridian of Cape Gaurdasoy, and under the prodigious high Mountains of

Megiddo, on the Coast of Arabia.

THE Religion of Cassin is Mahometan, and the civil Government Democracy. Death is capital, and is punished with Death, but not by the civil Magistrate; for the Tribe or Clan of the Defunct pursues the Murderer or Homicide, and when they have found him, he is immediately beheaded, and his Head put upon the Point of a Lance, and brought to his Relations in Triumph, with Musick

and Dancing.

The Product of the Country (besides the common Roots, and Fruits and Animals) is Myrrh and Olibanum or Frankincense, which they barter for coarse Calicoes from India; but they have no great Commerce with Strangers. Nor has Dessar any better Trade, but is more noted for Barbarity to those they can circumvene. I knew an English Ship in the Year 1705, that called there for fresh Water, and the Natives came flocking on board with animal Provisions to sell or barter. They found the English superior negligent, and, being but six or seven in Number, they mixt with them, and suddenly stabbed them all; but did no Harm to the Indian Seamen and Merchants.

chants, who were about forty in Number. They took every Thing out of the Ship, and then burnt her.

Curia Muria is another Port on that Shore, but of small Account. It is in the Middle of seven Islands, each having a very high Mountain, which makes them conspicuous from the Sea. There are none that frequent it but Trankies, that navigate from the Gulf of Persia to the Red Sea, who call there for fresh Water and Recruits of Provision. The Inhabitants, along all that Coast, are Badows, who wear no Clothes above the Navel. Their Hair grows long, which they plat, and wreathe about their Heads. The next remarkable Place is Maceira, a barren uninhabited Mand, lying about five Leagues from the Continent, and within twenty Leagues of Cape Reffelgat. It has dangerous Sholes lying on its West End, which reach above thirty Leagues along the Shore to the Westward, and so far in the Sea, that the Land (tho' pretty high) cannot be feen, before the unskilful or unwary Pilot feels the Rocks with his Ship's Keel. habitants on the main Continent, feem to be Sorcerers; for about the Year 1684, a Ship from London, called the Merchants Delight, Captain Edward Say Supercargo, this Ship unfortunately run ashore on the Island in the Night, being very dark, notwithstanding they kept their deep Sea Lead going every Half Hour; yet they were so luckly as to run her fast a-ground between two Rocks very close to the Shore. In a few Minutes the Ship was full of Water, but, being dry on the upper Decks, the People kept on them till Day-light, and then they discovered about four or five hundred wild Arabs, with some Tents pitched at a little Distance from them.

The Arabs, by Signs, shewed themselves ready to assist the distressed English, and being excellent Swimmers, swam to the Ship, and brought the End of a Rope ashore. There was one on board, whom I was afterwards well acquainted with, who, before that, had sailed some Years in India, and had learned the Industan Language, and some Arabick; he served for an Interpreter. They bid the English hoist their Boats out, and come ashore without Fear, which they accordingly did, with their Arms. They told the English, that they were not come there to rob

them, but to affift them for reasonable Rewards, and that they would take no Advantage of the ill Circumstances they were in, but would make a fair Contract with them, and perform their Part, as should be stipulated in their Agreement. The English, tho' very dissident of the treacherous Arabs, were obliged to covenant, and agree, that whatever was saved of the Treasure, Cargo, or the Ship's Furniture, should be equally divided, and the English to have the Choice which Part they might have a Mind to; and that the Arabs should transport the English's Part to Muskat, about fixty Leagues off, Freight tree.

As foon as the Contract was made, the Arabs went couragiously to work, and, in a Week or ten Days, got every Thing ashore that was portable, and they, according to Agreement, divided the whole into two equal Parts, and gave the Engilfo their Choice, and then got Trankies, (or Barks without Decks) and shipt what belonged to the English for Muskat. All the while they were getting the Goods ashore, they treated the English with excellent Mutton, both of Sheep and Goat, and laid in Provision for their Passage to Muskat, free of Charge to the Super-

cargo.

After the Interpreter aforesaid was grown familiar with those Arabs, that were so kind and benevolent, he ask'd them why so many of them had assembled on that barren Island. They answered, that about eight Days before the Ship was lost, a Fakee, who is an ecclesiastick Officer in their Church, prophesied, that near such a Time, a Ship would be lost there, and pressed them to go to the Assistance of the ship-wreck'd People, who would be glad to come under Contract with them, to have one Half of what was gotten out of the Wreck; and conjured his Auditory to perform their Part saithfully, which accordingly they did; tho' at other Times the Badows are persidious, treacherous and cruel.

CAPE Rasselgat lies about sixteen Leagues to the Eastward of Maceira, and the Sea-shore is clear of Danger; and just within the Cape, to the Northward, is a Village called Teywee, which stands on the Side of a small River, near the Sea; but is best known by a little Mountain

(close

(close by it) shaped like an high-crown'd Hat. And about sixteen Leagues farther to the Northwestward, is Curiat, a large Village in a Valley close to the Sea. To the Northward of it is a very high large Mountain, whose Foot is washt by the Sea, and there are forty Fathoms within two Hundred Paces of it. It may be seen above forty Leagues from the Sea. There are neither Trees nor Grass to be seen along the Sea-coast, but at Curiat; and yet the Country has Plenty of Cattle, great and small, with Variety of Fruits and Roots from the Vallies, and Fish from the Sea. Their Wells are dug in the Vallies very deep

CHAP. XI.

before they come to Springs, but the Water is very good.

Treats of the Kingdom and City of Muskat, and of their religious and civil Customs; with some kissorical Account of their Wars and Oeconomy. And a little Account of the Sea-coast of Arabia Deserta, also of Bassora, with the famous River of Euphrates.

JUSKAT lies about twenty-two Leagues to the North-westward of Curiat, and is the Mart Town of Arabia Petrea. It is built on the Bottom of a small Bay, that almost has the Shape of an Horse-shoe. It was built and fortified by the Portuguese, in the fifteenth Century, but taken from them about the Year 1650. The King of that Province (for tho' there be many Kings in Arabia, yet none affumes the Title of King of Arabia) having War at that Time with the Perfiam, had raifed an Army of forty thousand Men to insult the Sea-coast of Persia; and had provided a sufficient Number of small Vessels, called Trankies, for their Transports. His Army lay at a Distance from Muskat, and his Fleet at Muttera, a fmall Bay about a Mile from the Entrance of Mufkat Harbour. The King fent a civil Message to the Pertuguese Governor, defiring the Liberty of his Markets to buy Provisions.

THE infolent Governor, thinking himself safe within a walled Town, with many small Forts to annoy any Ene-

my that could come to attack the Walls of the Town. instead of returning a civil Answer to the King's Request, fent a Piece of Pork wrapt up in Paper, as a Present to the King, and bid the Messenger tell him, that if he wanted fuch Provisions, he could furnish him. The Messenger, not knowing what was in the Paper, carried it to his Master, with the rude Answer. Now Pork being forbiden the Mahometans as well as Fews, they hold it in Abomination, and confequently it aggravated the defigned Affront. The King was much furprized at the Governor's ill Manners, but dissembled his Resentment, in Expectation to find a proper Time at his Return from his Persian Expedition, to correct the Governor's Insolence, or revenge the Affront put on him: But the whole Army being enraged at the Affront, breathed nothing but prefent Revenge. And the Queen, who was of the Seid Extraction, who are a Tribe or Family descended from Mahomet, by Fatima his Daughter, and Alli his Apostle, being of a masculine siery Temper, reproached the King for not refenting fo gross an Affront, swore by her Ancestor the Prophet, that she would never stir out of the Tent the than fat in, till Muskat was taken from the Portuguese. All the Army applauded the Queen, and threatened to mutiny, if they were not forthwith led by their Officers to the Scalade of the City Walls. And at last the King finding that no Persuasions could cool their Fury, tho' the Day was far spent, ordered them to be led on. The Portuguese flanked them, from their Forts on the Mountains, with Plenty of great and small Shot; but the Arabs never looked back, nor minded the great Numbers of their dead Companions, but mounted the Walls over the Carcafes of their Slain. About Sun-fet they drove the Portuguese from two of their City Gates, and pursued their Enemy so hard, that not one escaped, tho' they fled in great Haste towards the great Fort, where the Governor staid. That Fort is built on a Rock almost surrounded by the Sea, and has no Way to get up to it, but by a Stair-case hewn out of the Rock, above fifty Yards high, and not above two or three Persons can ascend a-breast. The Arabs thought it impracticable to attack it, fo made a Blockade of it. In the Attack of the Town, the Arabs loft

Lost between four and five thousand of the best of their Forces; and the Portuguese, in their Forts, were reduced to sixty or seventy. Those in the small Forts were obliged soon to surrender for Want of Ammunition and Provisions, and all were put to the Sword, except those, who, to save their Lives, promised to be circumcised, and abjure the Christian Religion. Those in the great Fort held out about six Months, under great Want and Fatigues; and all Hopes of Relief being cut off, they resolved on a Surrender; on which Motion, the imprudent Governor, who was the sole Cause of their Calamity, leapt down a Precipice into the Sea, where the Water being very shallow, he was dash'd to Pieces on the Rocks.

THE little Garison would fain have come to a Capitulation, but the Arabs would grant them no Terms, but that they must yield, or be starved; and tho' the Terms were hard, yet they thought best to surrender, and all were put to the Sword, except a few who embraced Mahometism, which in all were eighteen Persons. And this Relation I had from a very old Renagado, who was at the Tragedy, being then a Soldier, who reckoned himself then about one hundred Years old, and, by his Aspect,

could not be much less.

The City of Muskat is very strong, both by Nature and Art; but the Buildings very mean, as most Fabricks are under the Oeconomy of a People who abominate Luxury and Pride, as the Muskat Arabs do. The Cathedral built by the Portuguese, still retains some Marks of its Grandeur, and is now converted into a Palace for the King, when he resides there, which is generally a Month or two yearly. The Wall of the Town that faces the Harbour, has a Battery of large Cannon, about sixty in Number, and there are eight or ten small Forts built on the adjacent Rocks or Mountains, which guard all the Avenues to the Town, both by Sea and Land; and there are none permitted to come in or go out of the Harbour between Sun-set and Rising.

THE Pirates that infested the *Indian* Seas, at the latter End of the fixteenth Century, made a Breach between the *English* and them. The Pirates having made Prize of one of their Ships, they retaliated on the *English* private Ship-

N 3

ping: They seized Captain Morrice's little Ship, and detain him and all his Crew as Slaves, and would never ransom them: In the Year 1705, they took Captain Murvel in a rich Ship from Bengal, bound to Persia; but that might be attributed to Pusillanimity, in not offering to make a Defence.

THEY put their Slaves to no Manner of Labour, and allow them a Soldier's Pay for Subfiftence; and what they can earn otherwise by Industry, is wholly their own.

THER E are neither Trees, Shrubs nor Grass to be seen on the Sea-coast from Curiat to Muskat, and but a few Date Trees in a Valley at the Back of the Town, and yet there is not the least Want of them selt in the City; and it has as good Markets for Wheat, Barley and Legumen, and for excellent Fruits, Roots and Herbage, and good Cattle, both great and small, as any where in India, where the Soil is most luxurious. And the Sea furnishes them with Plenty and Variety of excellent Fish. Their Cattle look to be very lean, but when killed, they are very fat and good, assording a great Deal of Tallow. They are not well stocked with Fowl, but those they have, are very good.

FROM May to September the Heats are excessive in the Town, so that none appear on the Streets, from ten in the Morning till three or four in the Afternoon. Their Bazaers or Markets are all covered with Date Tree Leaves, spread on Beams of the same Tree, that reach from House to House-top; and the Houses being all slat on their Tops, terrassed with Clay and Straw mixt, in the aforesaid Months every Body lodges on them in the Nights; for below Stairs they cannot sleep for Heat, and the Nights afford plentiful Dews, that sometimes wet them through their thick Cotton Quilts; and these Dews are reckoned

very falubrious.

THE Reason of so intense Heats proceeds from the Nearness of the Sun in those Months, who sends his Beams almost perpendicularly down on the Sides of the Mountains, which being all naked, and nothing but an hard black Rock appearing, the Sun heats them to such a Degree, that between ten and eleven in the Forenoon, I have seen the Slaves roast Fish on them. And the Horses

and.

and Cattle, who are accustomed to that Food, come daily, of their own Accord, to be served their Allowance, and when they have breakfasted, retire again to Shades built for them; and yet their Beef and Mutton that are partly nourished by that Sort of Food, have not the least Savour of Fish. And the Reason why Fishes are so plentiful and cheap in the Markets, is by the eafy and odd Way they have in catching them, or rather conjuring of them; for I have seen a Man and two Boys catch a Tun Weight in an Hour or two. The Man stands on a Rock, where the Sea is pretty deep near it, and calls Tall, tall, for a Minute or two, and the Fish come swarming about the Rock. The two Boys, in a little Boat, shut them in with a Net about twenty or thirty Yards long, and three or four deep, and, drawing the Net near the Rock, keep all in; and, when People come for Fish, he asks them what Sorts they want, and puts in an Hoop-net, fixed to the End of a Pool, into the Water, and serves every Body with what Kind they ask for; and when he has done, he hawls out his Net, and gives the rest their Liberty.

THEIR established Religion is Mahometan, of the Sect of Alli. They hinder no Body, of what Persuasion soever, to go into their Mosques, even in Time of divine Service. And their Mosahs or Priests often preach themselves into violent Passions, especially if the Subject of their Sermon be about the Verity of their Religion; and then they'll challenge the Priests of any other Religion whatever, to confirm theirs with as good Evidences as they can; for, being well versed in Legerdemain Tricks, they'll take live Coals out of the Fire, and seem to eat them, which Trick the poor deluded Auditory takes for a Mi-

racle, to confirm the Sanctity of their Religion.

THE King keeps his Court generally at Nazawa or Reyflock, two Towns four or five Days Journey from Mufkat within Land. He has no splendid Equipage, and his Garb very plain, and no finer than an ordinary Soldier's is. He has about one hundred of his own Slaves armed with Matchlocks and short broad Swords, for his Guard, who always attend on him. He, nor his Subjects use no Tables, but plain Mats spread on the Ground, serve for N 4 Table and Chairs. Their Viands are a Dish of Rice, either plain, or made in Pillaw, and a Dish or two more of stew'd or fried Flesh, Fish or Fowl, placed near the Dish of Rice: And he, with his Table Companions, sit on the same Mat, with their Buttocks on their Heels, and, in that Posture they feed very plentifully. Their right Hand serves them for Spoon, Knife and Fork, except when they eat Broth or Milk, and then they have large wooden Spoons. Their usual Drink is Water, or sour Milk, and in hot Wheather Sherbets.

THEY make no great Difference about Table Guefts; for the King and a common Soldier, the Master and Slave, fit promiscuously, and dip in the same Dish: But Women never eat in Company with Men. The Mens Apparel is a Pair of Breeches down to their Ancles, with a loose Vest on their Backs, with very large Sleeves, and the Body of the Vest girded about their Bodies with a Sash, and a large Turband carelesty wreathed about their Heads, and a Poniard, or a short broad Sword stuck into their Girdle perpendicularly; their Shoes clumfily made, and very low and stiff at the Quarter-heels; and thus a Gentleman is equipped; but in cold Weather they use Camelins, a fort of loofe Coat, without Sleeves, made of Camels Wooll. Their Women wear Breeches to their Heels, of finer Stuffs, and better Colours than the Men. The Body of the Vest made for their Use, is strait, but short waisted, and gathered above the Navel in Plats, which makes the lower Part look like a Petticoat. Their Shoes are shap'd like the Mens, flat and broad.

The Reason why their Shoes are made so, is for their easier slipping off or on, when they enter, or come out of a Room, that they may not dirty the Carpets or Mats wherewith the Rooms are spread, which serve them for Beds in cold Weather. And, except some large round Pillows of broad Cloth or Velvet, stuft with Cotton, for the Lase of those who sit on the Carpets or Mats, to lean upon as they sit cross-legg'd, there is no other Furniture in a Room.

Over all the three Arabias, their Custom in treating Strangers or Friends, is the same; for as soon as every one is seated, a Servant brings a Pot of Cossee, and serves it about in small Cups, that contain not a Quarter of a Gill;

hur

but as soon as one Cup is out, they fill again, and perhaps a third Time: Then a Pipe of Tobacco is presented, their Pipes differing much from ours in Europe, in Shape and Magnitude; which Service lasts till near the Time of breaking up Company, when comes in a little Pot of hot burning Coals, on which they throw some Chips of Agalawood, or some Powder of Benjoin, Myrrh or Frankincense, which produce a thick Smoke, that incenses or perfumes the whole Room. And, as I observed before, it is the Custom of wearing very great Sleeves to their Garments. They open their Sleeves as wide as they can, and hold them over the Smoke, which persumes their Arms, Shoulders, Neck and Beard. And the last Course is some Rose-water to be sprinkle the Company, which is the Signal to be gone every one about their Business; so, without

any Forms of Ceremony, every one walks off.

THE Products of Arabia Petrea for Exportation, are but few, as Horses, Dates, fine Brimstone, some Coffee, but not fo good as at Mocha; fome Ruinofs, which is the Root of a finall Shrub, that dies Crimson, and some Pearl. Their Manufacture is some coarse Cotton, Linen and Camelins, which they confume most in their own Country; but the Badows need none, fince they wear none. The Arabs wear no Pearl or Gold; but the Women of Distinction wear Pearl of a small Price, tho' I saw one there as big as a large Hazel-nut, exactly round, and of a fine Water. It was valued at one thousand Tomans, which is above three thousand Pounds Sterl. I have sometimes gone in a Boat to see them dive for Pearl, and have bought some Pearl Oysters of them; but the Divers are Cheats, putting the Oysters in the Sun, which makes them gape, and then the Rogues rummage them, and shake out the Pearl; and, after they are robbed of their Treasure, they put them into Water again, and they close. I bought at Times above one hundred Oysters, and got nothing; they cost me but seven Pence half Penny a Piece. At last I found one that had an Excrescence growing to the Shell on the Infide, which I carefully took off; and, at Carwar in India, I fold it for nine Pounds Sterl.

THE Women in this Country have some peculiar Privileges beyond the Men; for if one complain that a Man has offered Violence to her Person, without further Proof.

than her Word of Honour, he is punished with one hundred Bastinadoes on the Soles of the Feet, or put into a Dungeon under Ground, which has only an Hole at the Top, big enough to receive a Man; and when he is in, there is a Stone put over the Hole, too big to be removed by a single Person, and there he must stay three Days, and as many Nights, without Meat or Water, or Room to lie at his Length. And if a Wife complain of her Husband for Unkindness in any Kind, particularly of due Benevolence, as by Law established in the Jewish and Mahometan Churches, the Husband must undergo the Punishment of the Dungeon. But if a Lady trespasses, and her Spouse detect her Crime, he has the Law in his own Hand, and may chastise her with the Whip severely; but must not

touch her Life, on Pain of Death.

THE Muskat Arabs are remarkable for their Humility and Urbanity. I had one Instance of their Civility. As I was one Morning walking the Streets, I met accidentally the Governor of the City, by them called the Waaly, and, according to my Duty, I went into the Door of a Shop, to let him and his Guards have the Street, which generally are narrow; but he observing, by my Complexion and Garb, that I was a Stranger, made his Guard go on one Side, and beckoned me to come forward, and stood till I past by him. And for an Instance of their cool Temper, in hearing Debates and rectifying Mistakes between Parties disagreeing about Commerce: The before mentioned Interpreter at Maceira, was Commander of a Ship from India, and had freighted her to Muskat. The Freighter, who was a Mahometan, delayed paying the Freight, long after it was due by the Tenor of the Charter-party; upon which he being in a Passion with the Freighter for his continued Delays, went to the Waaly to complain. He observing by the Gentleman's Countenance, that his Mind was discomposed, answered him, that being at that Time very bufy about some of the King's Affairs, he had not Time to fend for his Freighter, but defired that he would come some other Time, and he would hear him, and order the Payment. The Delays still continuing, the Captain went again in an angry Mood to make his Complaint, but was still put off with gentle Excuses: But at last addressing the Waaly

Waaly with Coolness, he was desired to sit down, and he would send for the Freighter, which, accordingly he did; and, on his Appearance, the Waaly ask'd him why he did not comply with his Contract, as was stipulated by Charter-party; and his Excuses being thought insufficient, he was ordered to make Payment forthwith, or go to Prison; but the Freighter chose rather to bring the Money, and end the Dispute. The Captain ask'd the Waaly why he did not do him Justice sooner, who received for Answer, that it was his own Fault, for coming drunk to make Complaint. The Captain protested that he had not been drunk in many Years; but the Waaly replied, that he saw him drunk with Passion, which was the most dangerous Sort of Drunkenness.

The Countries to the Southward of Muskat, as far as Curia Maria, are under the Dominions of Muskat, and the Sheeks or Princes are their Tributaries. The Land is mountainous; but the Plains and Vallies very fertil and well watered, and consequently well peopled. And, to the Northward of Muskat, the same Chain of rocky Mountains continue as high as Zoar, above Cape Musenden, which Cape and Cape Jaques begin the Gulf of Persia on the Arabian Side. About Zoar begins the Desart, that runs as far northerly as Aleppo. The Mountains near the Sea, are sandy, and the Vallies and Plains steril, and ill

inhabited, and as ill watered.

About the Year 1620, Persia was in a flourishing Condition, and was a Terror to all its Neighbours. Shaw Tamas, Son to the famous Shaw Abass, was then King, and being of a martial Disposition, had a Design to annex all the Arabian Coast opposite to Persia, to his own Dominions, and accordingly transported from Cong, a City of his own that lies on the Sea-shore, an Army of thirty sive or forty thousand Men to conquer it. The Army met with no Opposition in landing, and they soon over-ran the Country wherever they went; but they had not been long in Pursuit of their Conquest, till Provisions began to be scarce in the Army, which, with the Scarcity of fresh Water, and the intolerable Heats, both of Sun and Winds, brought a Contagion on the Persians, that killed the better

Half of them, and obliged what was left to return back

to Persia by Shipping, as they had come from it.

Those barren Coasts are needlesy secured by sandy Banks, that run ten or twelve Leagues off from the Shore, which would make Navigation impracticable, if it should meet with Encouragement; but the two Islands of Bareen, lying in the Latitude of twenty nine Degrees thirty Minutes, almost in the Bottom of the Gulf, and belonging to the Crown of Persia, have the best Pearl Fishing in the World.

About the Beginning of this Century, the Muskat Arabs took Possession of Bareen Islands; but the honest Pearl Fishers deserted it whilst the Arabs kept Possession, who sinding that their new Settlement could not desray the Charge of keeping, without the Pearl Fishers, they lest it; and the Fishers who are mostly Arabs, returned to

their Industry, and continue the Fishery.

The great Turk gives Laws to all the Countries that lie between the River Euphrates and Ethiopia; but there are many Sheeks who inhabit those Desarts, that make but small Account of him or his Orders, because the Sterility of their Country makes them secure from great Armies coming amongst them, and a small one dares not venture amongst them as Enemies. They being naturally Thieves, rob Friend or Foe, or one another; to that sew People of Substance have any Commerce with them.

THERE are no Towns of Note between Muskat and Bassera, but Zoar, and but very sew inconsiderable Villages; but there are two or three convenient Harbours for Shipping. The southermost is about six Leagues to the Southward of Cape Mosenden, called Courforcaun. It is almost like Muskat Harbour, but somewhat bigger, and has excellent fresh Water in deep Wells, about a Quarter of a Mile from the Landing-Place. The Village contains about twenty little Houses; yet there are pretty good Refreshments to be had there. Cape Mosenden is of itself but a good Number of small high Islands lying near one another, but they appear like a Promontory on Terra firma: And up to the Westward of the Cape there is another Harbour, whose Name I have forgot; but there

of the EAST-INDIES. 205 are good fresh Water and animal Provisions to be had there.

BASSORA is the eastmost City or Town in the Turkish Dominions, standing, about two Miles from the famous Euphrates and has a small Rivulet that washes its Walls on the West Side, and discharges its Waters into the Euphrates. This City stands about thirty Leagues from the Sea, and it is alledged, was built by the Emperor Trajan, and had the Honour to be the Birth-Place of another Roman Emperor, Philip firnamed the Arabian: But at first it was built along the Side of the River, and the Vestigia of its ancient Walls are still to be seen from the aforesaid Rivulet, a League down the Banks of Euphrates, which disembogues her Waters, by four or five Mouths, into the Gulf of Perfia; but none navigable for for Ships of Burden, but that Chanel that leads to Baffora. At the City it is a short Mile over at high Water, and is keeps about the same Breadth to the very Mouth of it. Bassora exports yearly for foreign Countries, above ten thousand Tuns of Dates, which employ Abundance of Seamen for their Exportation, besides many more Poor in gathering and packing them in Mats made of the Leaves of the Date Tree, and likewife in drying them.

The Ruins of the famous Babylon lie about two hundred English Miles up the River from Bassora; and at Bagdat, which is twelve Miles below it, the Ruins appear to be a Mountain, and are the Habitation of wild Beasts and Serpents. Whether Bagdat was built out of its Ruins, or no, I know not; but 'tis reported, and generally believed that it was. It is now a prodigious large City, and the Seat of a Beglerbeg, who governs a very great Province. The Bashaws of Bassora, Comera and Musol (the ancient Nineveb) are subordinate to him, and are able to bring one hundred and fifty thousand Men into the Field.

COMERA stands on the Banks of Eupbrates, about eighty Miles above Bassora, and, by common Tradition, is the Place where holy Job dwelt. There is a Garison of ten thousand Janisaries continually kept there, and eight or ten River Gallies, well furnished, to awe the circumjacent Countries, who are apt to rebel. And Bassora has three thousand Janisaries and five Gallies for the same Account.

The Bashaws of the Gallies are not subordinate to the Bashaws of the Cities; but he of the Gallies has the Command of the circumjacent Countries, laying on of Taxes, and raifing Subfidies at his Pleasure, as he of the Cities has Power to oppress the Citizens: And their Avarice and Severity often cause Mutinies and Blood-shed. One of those Mutinies happened at Bassora, in the Year 1721, for the Bashaw of the City having married a Lady out of the Grand Seignior's Seraglio, and that Monarch having some Deference for her on Account of Confanguinity, her Hulband was put into the Bashaw's Ship to get Money to support his Lady's Extravagancy; and finding that fair honest Ways would be a long while in raising such Sums as he thought would be fufficient for that End, opprest both City and Country to fill his Coffers. The poor opprest Merchants, Mechanicks and Peasants plied him with Complaints on his Soldiery, who, they thought, robbed them, fince the Exactions were new. They gave in Remonstrances of their Grievances, and petitioned for Redress; but the Persons sent with those Addresses, had the Bastinado for their Impertinence. Upon this the distressed City and Country made their Address to the Bashaw of the Gallies, who knew they had just Cause of Complaint. He wrote to the Beglerbeg, and informed him of their Case and Condition, and obtained a severe Reprimand; for he of the City, instead of Amendment, added Cruelties to Oppression, and murdered many who would not, or could not pay what they were fessed at, which unheard-of Barbarities made above fifty thousand of the City and Country betake themselves to Arms, and march out, with the Mufti or high Priest at their Head; and he had a green Flag, which is Mahomet's Banner, before him, carried by a Priest; and he and his Army encamped near the Bashaw of the Gallies his House, which stands about two Miles below the City, by the River Side; and the Bashaw of the Gallies joined them with one thousand Janisaries. The Musti, according to Custom, plied his spiritual Artillery, and excommunicated the Bashaw of the City, and all that adhered to him. This Mutiny continued some Days; but I heard of no Bloodshed, and only opprobrious Language past. But the Town began to feel Want.

Want, for the Peasants would bring no Eatables to the City: but the Mufti's Host were plentifully supplied. All Shops being thut up, and all the Markets unprovided. made the Bashaw of the City begin to think what the End would be, if the Mutiny continued any longer; so he got fome Country Gentlemen, who were of neither Faction, to go to the Mufti and the Bashaw of the Gallies, as Mediators; and accordingly they went, and were handfomly received, and, in their Oration on the present Posture of Affairs, made the Mufti and his Party incline to Peace, providing that about a Dozen of Incendiaries might be delivered to them, to receive condign Punishment for their Faults. All the proscribed, but one, by the Intercession of Friends, were pardoned; but they would hear of no Peace till the other was made a Sacrifice to their just Resentment; for this Villain would accost a Merchant in the Street, and, after common Compliments ended, he would ask them what became of the Diamonds, or other Jewels, that they had shewn him such a Time. The innocent Merchant, who perhaps never had any Jewels, being surprised at his Question, would deny that ever they had any fuch as he spake of. Then the impudent Fellow would tell them plainly, that without they would bribe him with a round Sum, he would inform the Bashaw, that he had seen such Quantities of rough Diamonds, or other valuable Stones, in their Poffession, and if they could not be found entred in the Custom-house Books, they must expect to suffer what Punishment the Bashaw would please to inflict for defrauding the King of his Customs. Some out of Fear would comply, and give a Sum, others again stood on their Innocence, and would not give him Money; and they were fure to be informed against, and brought before the Bashaw, and, upon that Villain's Evidence, were generally fined about double of what he ask'd of them; fo that besides the great Sums that came into the Bashaw's Coffers by that Rascal's Ingenuity, he had accumulated twenty five Bags to himself, each Bag containing five hundred Crowns, and all this in the Space of three Years that he had been in Baffora; for he came from Constantinople one of the Bashaw's Retinue, hardly worth an Afper, and at his Death so much ready Cash was found in his House, which fell into his Master the Bashaw's Hands:

Hands: For after this Villain was culled out to be factificed to the just Resentment of the People, and found that they would not be appealed without having his Life, he fell at his Master's Feet for Protection. The cunning covetous Bashaw bid him convey what Money he had to his House, and he would take Care of it for the Use of his Wife and Children, and would fend him fecretly out of the Town, and get him fafely conducted to Comera. He swallowed that Bait, and delivered his ill-gotten Money to his Master, who protected him but one fingle Day, and then fold him, that the People's Clamours were so great, that he could protect him no longer; and accordingly he was delivered to the enraged Mob, who forthwith strangled him, and threw his Body on a Dung-hill by the Side of an High-way, where I faw it two Days after. And the Mufti and Bashaw made Matters up for the Ease and Satisfaction of the People, who grew quite tired of their Divisions.

BASSORA was many Years in the Hands of the Persians, who gave great Encouragement to Trade, which drew many Merchants from foreign Parts to settle there, and particularly from Surat in India. But in the Year 1691, a Pestilence raged so violently, that above eighty thousand People were carried off by it, and those that remained sled from it, so that for three Years following, it was a Desart, inhabited only by wild Beasts, who were at last driven out of the Town by the circumjacent wild Arabs, who possest it about twelve Months, and were in their Turn driven out by the Turk, who keeps it till this Day.

THERE are many Jews in Bassora who live by Brokerage and exchanging Money; but the Turks keep that Set of People very low, for Reasons of State. There are also about two hundred Christians of the Greek Church, but no Priests of that Communion, wherefore some Roman Missionaries officiate there. The Greek Clergy are very indifferent about gaining Proselytes, and, to nourish their Flocks, will not run the Risque of Martyrdom, so they keep none of their Priesthood at Bassora. But when I was there, three Romish Priests of the Carmelite Order had the Superintendency of that Church. These sanctified Rascals

were a Scandal to Christianity, by making a Tavern of their Church; for having more Indulgence from the Government than the Mahometans, in moral Matters, they abuse it to the vilest Uses, in selling Arrack, which they diftil from Dates, and procuring Birds of Paradife for the Use of their Customers. The Mahometans again are forbidden strictly the Drinking of Wine or distilled Liquors. both by their ecclefiaftick and civil Laws; for the Heat of the Sun, and the dry fandy Soil create much adust Choler in their Brains, that when they are heated by drinking strong Liquors, they become furious and mischievous to one another, and, in those mad Fits, wound and kill their Fellows. Those scandalous Priests had been often reprimanded by the Government, for abusing the Indulgence they had, but to little Purpose, for their Trade was very gainful.

THE Horses in this Part of Arabia are very well shap'd, and mettlesom, and the Men the most dextrous in managing them that ever I saw. They shoot with Bow and Arrow, and throw their Lance at sull Speed, and very seldom miss the Mark. They will stoop at sull Speed, and take up an Hare as she runs, with their Hands, or throw a Lance in the Air, and catch it before it comes to the Ground: And indeed the most of their Exercise, whilst

young, is in managing their Horses.

THEY have many Boats on the River, of feveral Shapes and Dimensions; some are made of Wood, with high broad Boughs, and very long, others very short: Their Rudders are in Breadth a Quarter Part of their Keel's Length, but not intire of one Piece as ours are, and they daub them over Outfide and Infide with Bitumen, without caulking them; others are Baskets made of Reeds, perfeetly round with two Sticks laid athwart crofs-ways their Bottoms to keep them open. They are also daub'd on the Outfide and Bottom with Bitumen. And this Sort they make use of to transport Goods from Place to Place. Bitumen is a thick fulphurous and unctious Matter, generated in the Earth there, and boils up of its own Accord to the Surface; and sometimes it is so hot, that it scalds. the Hands or Feet of them that go to gather it. there are some hot Pits in the Ground, that putting a Pot

over them, they'll boil Meat. There is also Oyl of Peter in those Grounds, which is very good in healing rheumatick Pains.

CHAP. XII.

Observations on the Empire of Persia, giving an Account of its Magnitude, the Reduction of Ormuse to the Obedience of Persia ty the Assistance of the English: Also of the late Revolution by Meriweys.

HE Empire of Persia is of a large Extent, being limited by Euphrates and the Persian Gulf to the Westward, the India Ocean, from Cape Guaddel, to the Southward, on the East Side by the River Indus, that runs one thousand two hundred Miles to the Northward from its Mouth, and on the North by Usbeck, Tartaria, Colchis, Mangrelia, the Caspian Sea and Georgia. Erivan in Armenia is a Province in the North-west of it, as Cabul and Candoba are on the North-east Side. Towards Turkey they fometimes lose and get whole Provinces in a Year. About the Beginning of the seventeenth Century, Shaw Abass was King of Persia, a King worthy of Empire, and made himself famous by his Valour and Justice; but having no Fleet at Sea, the Poringuese insulted his Sea-Coasts, and fettled themselves on the Island of Ormuse, and built a good strong Fort, as is already observed, with a pretty large Town, and magnificent Churches. Some Porches and broken Pillars I have feen, that fpeak their ancient Grandeur; and the Castle is still good, and well kept. The Portuguese, with their light Frigats and Gallies, insulted the Sea-Coafts of Persia, and all the Shipping that had Commerce in the Gulf, for above a whole Century. Shaw Abass being tired with the Complaints of his Subjects, and others that had been robbed and infulted by the imperious Portuguese, made him very uneasy, and found no Remedy but by encouraging the English, who then had a small Factory on the Sea-shore, about seven Leagues from the Mouth of the Gulf, to the East-ward, called Jasques, but

but were continually diffurbed in their Commerce by the

domineering Portuguese from Ormuse.

Sir Thomas Row being then Ambassador at the Court of Persia for King James the First of England, to cultivate a Correspondence between the two Kingdoms, Shaw Abass broke his Mind to Sir Thomas, and proferred any reasonable Indulgence to the English that traded into Persia, providing they would joyn his Land Forces with theirs at Sea, in India, to drive the troublesom Portuguess out of the Persian Gulf. Sir Thomas agreed, that, if Shaw Abass would defray the Charges of the Ships that should come to his Assistance, give the English a free Trade all over the Persian Dominions, Custom free, and grant them one Moiety of the Customs raised by Merchandize in the Gulf, they would not only help to drive the Portuguese out of Ormuse, but keep two Ships in the Gulf, to protect Trade. All which was agreed to by both Parties, and

fealed and figned by the King of Persia.

THE English Forces confisted of five Ships, about forty Guns one with another, and were well mann'd. The King of Persia sent an Army of forty or fifty thousand, with Trankies for Transports, to land them on Ormuse. The English foon destroyed the Portuguese Armado of light Frigats and Gallies, which were hawl'd dry on the Land near the Castle. The Castle firing briskly on them, sunk one of the English Ships, whose Artillery was carried ashore, and put in Batteries to annoy the Castle, which the Shipping and Butteries did fo effectually, that, in less than two Months, the Portuguese capitulated to leave Ormuse, with all the Fortifications intire, and to carry nothing away but their noble felves. The Plunder, which was very great, was equally divided between the English and Perfians; and Tradition reports, that there was so much ready Bullion found in the Castle, that it was measured by Long-boats-full; and one Boat being pretty deep, and an Officer still throwing in more, put the Boarswain of the Ship, who was in the Boat, into a Passion, and made him fwear, that for every Shovel-full that they threw more in, he would throw two out into the Sea; for he's could not tell what would fatisfy them, if a Long-boat Load of Money would not. On the Reduction of the Ifland

Island and Fort of Ormuse, the Portuguese withdrew their Men from the Forts of Laracka, another Island sour or five Leagues from Ormuse, and from Kismish Fort, that lies on the East End of that Island, and retired to Muskat. Shaw Abass was punctual in observing the Agreement with the English; and it was punctually kept by the succeeding Kings, till about the Year 1680. the English Company failed on their Part of keeping the Gulf clear of Insults; and the Persians, finding the English Company's Forces were now too small for the increasing Power of the Arabs their Neighbours, took away the half Customs, and allow them one thousand one hundred Tomaans, which is about three thousand three hundred Pounds Sterling a Year; but I am afraid that is also lost by the late Revolution in Persia.

WHEN Shaw Abass demised, his Son Shaw Temas succeeded him, who was a Son worthy of such a Father. He died about the Year 1630. He was a very valiant and fortunate Prince in his Wars with Turk and Mogul, and a great Lover of Justice; for whoever broke the established Laws, were sure to suffer the Penalty annext to them. One Instance of that he shewed on a Baker; for, being once detected in making his Bread lighter than the Standard, he was severely fined; but, on his being detected and convicted a second Time, he was condemned to be bak'd in his own Oven, for a Terror to others, who might flatter themselves with breaking the Laws with Im-

punity.

AFTER Shaw Tomas, the succeeding Kings have been debauch'd with Ignorance of their own Affairs, Voluptuousness and Indolence, leaving the Reins of Government in the Hands of Parasites, or Eunuchs and Concubines, who never fail to bring their Master into Contempt, and the People into Murmurings and Rebellions. A very stagrant Instance is to be seen in Meriweys's Revolution.

THE whole Reign of the last Sophi, or King, was managed by such Vermin, that the Ballowches and Mackrans, who inhabit the Sea-coast from Cape Jasques to Indus, observing the Weakness of the Government threw off the Yoke of Obedience first, and, in full Bodies, sell in upon their Neighbours in Carmania, who were thristier and richer

richer than the maritime Freebooters, and plundered their Fellow Subjects of what they had got by their painful Industry. There was no Want of Remonstrances and Petitions put into the Court to put a Stop to those Enormities, but no Redress could be had. The Usbecks came also on their neighbouring Province of Muschet, and committed many Depredations; and when Letters came from the Governor of that Province, to acquaint the King of the Usbecks Incursions, he happened then to be at Play with a young Cat, that hunted a Feather that he kept in Motion with a Thread. One of the Pages acquainted him, that a Messenger was come in great Haste from Muschet, with Letters to the Vizier, who was at the Chamber Door, to know what his Majesty would please to order in that Juncture. He answered, that as soon as he had done playing with his Cat, he would fend for the Vizier, and confult of that Matter; but he never thought more of it. This Indolence made many Thefts, Robberies and Murders to be committed throughout the Country: Nay, his own Guards went out in Troops, and way-laid Merchants going or coming to or from Ispaham, robbed them, and often murdered them; and when Complaints were made, and Proof offered, yet no Redress could be had, which made most People believe, that some Court Favourites were Encouragers of the publick Calamities. In the Year 1716, I carried some Armenian Merchants from Persia to Surat, who affured me, that there was a Defign to depose the King, and fet up his Son, or invite the Muscovite into the Province of Casbin, whose Shores are on the Caspian Sea, and where a foreign Army may easily be brought into their Ports by Sea: And certainly there was fuch a Defign; for in the Year 1719, the Plot of deposing the King was found out, and the Attamadoulet or Vizier was deeply concerned in it. He was Meriweys's or Meir Mahoumud Shaw's Father, the Son being then Chawn, or Prince of Candahaar. The King was folacing himself in a Garden near the City of Ispahan, when he was apprifed of the Plot, which was to be executed the fame Night it was discovered. He immediately sent for the Attamadoulet, pretending Business of Importance about fome Frontier Provinces; and the old Gentleman

not dreaming of the Discovery made, came to the King, who taking him with the Plot, made no Difficulty to confess that it was of his own Contrivance, to save the Country from Ruin, which was inevitable, if he continued in Supineness, which had affected him near forty Years, and there was no Sign of Amendment, notwithftanding his Remonstrances and Admonitions all that while, and now that he was detected, he knew the worst that could befal him, was to be facrificed for the Good of his Country, which he took to be rather glorious than dishonourable. The King ordered some Bars of Iron to be heated, and his Eyes kept open till the Irons were gently moved near the Eyes to dry up the Moisture, which is the royal Punishment in Persia, for disobedient or rebellious Princes; so the old Man being made blind, his Treasure was seized, but his Palace and Gardens allowed him, and an Allowance fuitable to his Dignity. He had in Gold Diamonds, to the Value of eight hundred thousand Tomaans, or two millions four hundred thousand Pounds Sterling; and some faid he had more in his Son's Custody: But how true these Reports are, I am no proper Judge, either to believe or reject; but some Bars of his Gold I faw at Gombroon.

BEFORE this Conspiracy of the Attamadoulet happened, the Muskat Arabs came with a Fleet, and landed five or fix thousand Men on Ormuse, and besieged the Castle; but could not take it in three Months, and being tired with Fatigue, they left it. But in the Year 1720, Meriweys hearing how the King had used his Father, made the whole Province of Candahaar rebel, and wrote Letters to the Chawn of Samachie to come into Alliance with him and his Confederates the Ballowches and Usbecks, who readily embraced his Propositions in Hope of Plunder. In 1721 Meriweys began his March towards I/pahan, with an Army of forty five thousand, and paid honestly for what his Army had Occasion for in his March, declaring, that he did not take Arms for their Hurt or Destruction, but to free Persia from the Folly and Tyranny of a doting Fool, who was incorrigible by fair Means. The Usbecks entered the Provinces of Muschet and Yesd, with forty thousand, and acted like Robbers. Another Army of forty

forty thousand went out of Samachie, and ravaged Erivan; and the Ballowebes entered the Province of Carmania and plundered the Country, and at last took the City. Then they marched towards Lacr, and took the Town, but not the Fort: And there twelve Hollanders, who were fent from Gombroon, to convey down some Treasure belonging to their Company, behaved themselves to Admiration. They were lodged in a Caravanseray, where the Ballowches came with about three hundred to attack them; but they had a brave warm Reception, and left about four Score of their Number dead on the Spot, without the Loss of one Dutch Man: But not thinking themselves and their Treasure safe where they were, they defired Admittance into the Fort, which was readily granted, and there they also behaved themselves so well, that the Ballowches marched away without the Booty they came so far for. The Dutch staid there above a Month, and in that Time came a Detachment of four thouland Horse to plunder Gombroon. We heard of their Design about ten Days before they came, and fo we and the Datch fortified our Factories as well as possibly we could, planting little Falconets on the Top of our Walls in Swivels, and beating out Ports in our Walls, to ply great Guns, to fcour the Avenues to our Factories. Mean while the Persian Governor fired Guns every Night, to let the Enemy know he was a brave Fellow: However they had a Mind to fee, and, on the 15th of December, they appeared near the Town, on a swift March towards it, which scared the Governor fo much, that, tho' there was an high Mud Wall between him and them, he got on Horse-back, and fled to a Fort on the Sea-shore, leaving a few Guns, loaded as they were, to the Enemy.

The Ballowebes came first on the West Quarter of the Town, where our Pactory stands, and soon made Passages through the Mud Walls. They hewed down all that came in their Way, particularly old People and Children, and came in a confused Haste to attack our Factory, down some Lanes; but we gave them a warm Welcome with our great Guns and small Shot. They soon found their Mistake; and retired in as great Haste as they came. Some of their Musketeers got into some ruined Houses,

0 4

and fired on us; but we being barricadoed, they did us little Damage, and had our Men observed their Orders better, we had come off with less. Our Firing lasted about three Hours, in which Time we lost three or four, killed by their own Rashness in standing open to the Enemy, when they might have done better Service under Cover of our Barricadoes. We had also seven wounded. but none mortally, but one who was a Factor, who received a Shot in his right Hand, which threw him into a Fever, of which he died in feven or eight Days. The Agent being gone to Ispahan some Weeks before we had any Advice of the Ballowches coming, had carried twenty Soldiers along with him for a Guard, and left but fix in the Factory, besides Cooks, and a few Servants. I saw the Factory in Danger if they should be attacked, so I reinforced it with thirty fix of my best Men, and another fmall English Ship from Bombay, affisted with eight or nine of his, so that when the Enemy came, we were about fifty strong. The Season being very cold, made our Duty hard, for we lay in our Arms every Night, for ten or twelve Nights that the Enemy lay in the Town. They had a Confultation next Day after their Repulse, how they might make another Attack; but none would undertake to lead their Men on, and fo the Day after Consultation, they went to attack the Dutch, who were three Times stronger than we, and they met with the fame kind Reception we gave them; but they had a Warehouse within Pistol-shot of their Factory, with Goods to the Value of twenty thousand Pounds Sterling in it, which the Ballowches broke into, and plundered. The Dutch lost twelve Men, and had eight or ten wounded: So finding our Factories were not to be taken without the Danger of much Blood-shed, they went a plundering the Town for eight or nine Days, and carried away, in Money and Goods, above two hundred thousand Pounds, besides fourteen thousand Captives, and as many Beasts of Carriage, and so went off about five or fix Miles from the Town which they laid in Ashes before they left it. They continued in our Neighbourhood, with their Plunder, about a Month, I suppose till they received new Orders how to dispose of themselves,

NOTWITHSTANDING fuch numerous rebellious Armies were a Foot, threatening Destruction to the State, the indolent King being lulled asseep in Security, did not offer to raise any Forces for the Desence of himself and Country, but said to his Cabinet Counsellors, that he was sure his Enemies would leave him Ispahan, and that one City would be enough to maintain him and them his Counsellors: But when Meriweys came within three Days Journey of the City, he raised about fifty thousand of the Citizens, and sent to the English and Dutch Agents, to join their little Forces to his, to manage the Artillery, and to lend him some Money to support and pay his new raised Army. The latter defired to be excused in both; but the English complied, and were very active in defending the City, when Meriweys came to besiege it: And when he approached within a Mile or two of the City, the King fent his raw Army out to fight Meriweys; but in their March Meriweys's Men having made a long Trench a pretty Way from their Front, and hid a large Quantity of Gun-powder in it, and then filled it up again, which Ambuscade the King's Army fell into, and, after a a good Number of them had past it, Fire was set to it, and blew up and scorched many of the King's Men, which so frightened the rest, that they turned Tail, and fled without striking one Stroke, so Meriweys made an easy Conquest of the City, and found the King weeping, and deferted by his bale and treacherous Courtiers. But Meriweys foon put an End to his Melancholy, by ordering his Head to be struck off, which was forthwith executed, and put on the Point of a Lance, and carried thro' the City three Days successively, as a Spectacle. The Prince royal, or the young Sophi, feeing his Father's Affairs in fo wretched a Condition, had left the City, and went to Taurus or Teverize before Meriweys came. Meriweys carried himself mighty civily to the Citizens, but made the English Prisoners, and seized what Money and Goods could be found of theirs, and also the Dutch Company's Effects, but not their Servants Persons. It was reported, that the English lost about fixty thousand Pounds, and the Dutch two hundred and ten thousand. But the Truth of these Reports are best known to themselves.

When the old King had a Mind to honour the English Factory with a Visit, as I saw in a Letter from Mr. Bruce the Company's Agent, that he sometimes did, and one particularly in his Agency, he magnifies the Honour done to his Masters, above what the Dutch could ever obtain. He relates how he and all the Factory, great and small, were ordered to leave their House, and Chamber Doors and Ware-houses all open, for his Majesty and his Seraglio Companions to ramble thro', and take such Things as best pleased him and his Minions; and there was a Table lest in the Dining-room, spread and surnished with the richest Sweet-meats and Fruits.

I believe the Company was not very ambitious of having many such Honours conferred on them, since they were obliged to pay for them. And when the King has a Mind for some new Concubines, he issues out Orders for all Men and Youths to depart out from their Houses in the Street, that he is pleased to visit, and to leave all the Ladies in Possession till his Majesty surveys them; and the Penalty of Disobedience is Death. He generally makes his Progress thro' the Armenian Quarters, because the fairest and most beautiful are amongst their Children.

The Religion, by Law established for near eleven Ages, is Mahometan, of the Sect of Alli; but the ancient Religion was Parsi, or Worshippers of the Sun and Fire. The Founder of it was Zoroaster, whom they still venerate. About the ninth Century of the Christian Era, the Mahometan Zealots, according to the laudable Way of some Christians, raised a Persecution against the Parsis, whose wholesom Severities made many Proselytes; but some obstinate Rogues, who would not change for a worse, were lawfully murdered, or obliged to run their Country, so that at present there are but sew left in Persia, and those that are left, are protected by their Poverty and Habitations, which are in Deserts or Hills little frequented.

There are vast Numbers of Armenian Christians in Perfia, whose Religion is tolerated. Their former Country of Armenia is now the Province of Erivan. There are many substantial Merchants of Armenians, who inhabit Julsar, a Town near Ispahan, and they send Factors all over India of the EAST-INDIES. 210

to carry on Trade; and fome come to Europe on that fame Account.

THE Mahometans in Persia, to encourage Proselytes to their Religion, have a Law, that if a Son of an Armenian turns Mahometan, all the Fathers's Estate becomes his, and all who continue Christians are excluded, which sometimes makes great Divisions and Alterations in a Family.

In Baptism they immerse, but do not sprinkle. The Priest must officiate in his sacerdotal Garb, with a Crown on his Head, and must have two Assistants in holy Vestments also, but without Crowns. Their titulary Saint is St. Gregory, of whom they tell many strange Stories; but whether true or false I know not: But I am sure he has plagued them with Fast-days, for they fast one Half of the Year at least.

Having made what Observations I could of the Empire of Persia, I'll travel along the Sea-coast towards Industan, or the Great Mogul's Empire. All that Shore, from Jasques to Sindy, is inhabited by uncivilized People, who admit of no Commerce with Strangers, tho' Guaddel and Diul, two Sea-ports, did, about a Century ago, afford a good Trade.

CHAP: XIII.

Treats of the Mogul's Dominions on the River Indus, particularly of the ancient Kingdom of Sindy; its Product and Commerce, Religion and Customs of the Inhabitants; with a Description of the River Indus.

minions, on the Sea-coast, and has Larribundar to its Sea Mart, which stands about five or six Leagues from the Sea, on a Branch of the River Indus, capable to receive Ships of two hundred Tuns. It is but a Village of about one hundred Houses, built of crooked Sticks and Mud; but it has a large Stone Fort, with sour or sive great Guns mounted in it, to protect the Merchandize brought thither, from the Robberies of the Ballowches

and Mackrans that lie near them, to the Westward, and the Jams to the Eastward, who being Borderers, are much given to Thieving, and they rob all whom they are able to mafter. The former are revolted Subjects of Perfia, and the other are Subjects of the Mogul; but being fecured from the Awe of an Army's coming to chastife their Infolency, by the moorish Grounds they live in, and the rapid Tides of Indus, they make but little Account of their Sovereign's Power or Orders, and so they commit Depredations on the Caffillas that pass to and fro between Tatta and Larribundar, notwithstanding a Guard of one or two hundred Horse are sent along with them, by the Nabob or Vice-roy of Tatta, for Protection; but often those Protectors suffer the Castillas to be robbed, pretending the Robbers are too numerous to be restrained by their fmall Forces, and afterwards come in Sharers with the Robbers.

Tatta is the Emporium of the Province, a very large and rich City. It is about three Miles long, and one and an half broad, and is about forty Miles Distance from Larribundar, and has a large Citadel on its West End, capable to lodge five thousand Men and Horse, and has Barracks and Stables convenient for them, with a Palace built in it for the Nabob. All Goods and Merchandize imported or exported between Tatta and Larribundar, are transported on Carriage Beasts, such as Camels, Oxen and Horses. The Country is almost level, and overgrown with Shrubs and Bushes, very fit to cover an Ambuscade, which the aforefaid Robbers often make use of, and suddenly rush out on a Cassilla, and whilst the Guards and Carriers are fighting in one Place, either of Front, Flank or Rear, the Robbers drive away the Beasts with their Packs.

It was my Fortune, about four Months after, to come to Larribundar, with a Cargo from Mallabar, worth above ten thousand Pounds. I could find no Tatta Merchants that would meddle with my Cargo before it was carried to Tatta; but agreed on the Prices of most of the Species of my Goods: And finding no other Remedy but travelling by Land, in a Cassilla of one thousand five hundred Beasts, and as many, or more Men and Women, be-

fides two hundred Horse for our Guard, about the Middle of January we fet out; and after we had marched about fixteen Miles, our Scouts brought in News of the Ballowches and Mackrans being just before us, in great Numbers. I had thirteen of my best Firemen with me in the Front. where my Beafts were. We being all mounted on little Horses, alighted, and set our Beasts on our Flanks and Front, to serve us for a Barricadoe, to defend us from Sword and Target-men, which were the principal Strength of the Robbers, and we, at the same Time, had Room enough to fire over our Barricadoe. We were not long in that Posture, till the Enemy sent an Herald on Horseback, with his Sword brandishing, and when he came within Call of us, he threatened, that if we did not instantly furrender at Difcretion, we should have no Quarters. I had two of my Seamen that shot as well with a Fuzee as any ever I faw, for I have feen them at Sea, for Diversion, knock down a fingle Sea-fowl with a fingle Bullet, as they were flying near our Ship. I ordered one to knock down the Herald, which he instantly did, by a Bullet through his Head. Another came presently after, with the same Threatenings, and met with the same Treatment. The next that came, I ordered his Horse to be shot in the Head. to try if we could take his Rider, that we might learn fomewhat of the Enemy's Strength. The Horse was killed as foon as he appeared, and some of our Horse got the Rider, and hewed him down, instead of bringing him to Our Guard of Horse continually kept in the Rear, but feeing what we had done in the Front, took Courage, and getting in amongst the Bushes, met with some that had a Defign to attack our Flank, and foon defeated them. which put the Robbers in fuch Fear, that they betook themselves to Flight, and our Horse pursuing, put many to the Sword; fo when they returned from the Pursuit, we went on in our Journey, and travelling four Miles, came to a Mud-wall Fort, called Dungham, a proper English Name for such a Fortification. It is built mid-way between Tatta and Larribundar, to secure the Cassilla from being fet upon in the Night, who all lodge within it, Men and Beasts promiscuously, which makes it so nasty, that the English Appellation is rightly bestowed on it.

are about twenty little Cottages built close to it, who breed Fowls, Goats and Sheep, to fell to Passengers. And these are all the Houses to be seen in the Way between

Tatta and Larribundar.

THE News of a Victory that I had over three Sanganian Pirates at Sea, on my Voyage from Malabar to Larribundar, had reached Tatta, before the fecond Skirmish by Land, so that when I came to Tatta, we were received with Acclamations from the Populace, and the better Sort visited us with Presents of Sweet-meats and Fruits, ascribing the safe Arrival of the Cassilla wholly to our Cou-

rage and Conduct.

WE were lodged in a large convenient House of fifteen Rooms, and had good Warehouses. The Stairs from the Street, were intire Porphyry, of ten Foot long, of a bright yellow Colour, and as smooth as Glass. They were about ten in Number, and led up to a Square of fifteen Yards long, and about ten broad. Next Day we had a Compliment from the Nabob, of an Ox, five Sheep, as many Goats, twenty Fowls and fifty Pigeons, with Sweetmeats and Fruit in Abundance. He, at that Time, lay encamped about fix Miles from the Town, with an Army of eight or ten thousand Men, with a Design to punish the Ballowches and Mackrans for robbing the Caffilla, and killing his Men, as is before mentioned. He defired me to let him know when we defigned to drink a Dish of Coffee with him, and he would fend Horles to bring us to the Camp. I returned Thanks for his Civility, and fent him Word, that I defigned to kis his Hand the very next Day; and he accordingly fent twenty fine Persian Fiorfes, well equipp'd, for my Use, ten of which I accepted for myself and Guard to mount, and the other ten were mounted, with some of the most considerable Merchants in Tatta, who went to accompany me out of Respect; and, to make our Cavalcade appear with the greater Grace, as foon as we came to the Camp Gate, we would have alighted, but an Officer on Horse-back told us, that it was the Nabob's Pleasure, that we should be brought to his Tent on Horse back, and he riding before us, conducted us to the Tent Door, and, as foon as we got from our Horses, I was conducted into his own Pavilion Chamber, where

he was fitting alone. The rest that came with me, were not admitted for an Hour after. It would take a great Deal of Time and Room to relate the Compliments and other Discourses that past; but I knew the Custom, not to appear before great Men with an empty Hand. I defired Leave to lay a little Present at his Feet, which he permitted. It consisted of a Looking-glass of about five Pounds in Value, a Gun, and a pair of Fistols well gilded, a Sabre Blade and Dagger-blade gilded, and a Glass Pipe for his Tobacco, and an embroider'd Standish for it to stand in. He then fent for all who had accompanied me into the Room, and shewed the Present I had made him. magnifying every Piece of it; and after some Encomiums on my Valour and Generofity, told me, that I was a free Denison of Tatta, with the Addition of an Indulgence of being free of all Custom and Tax on all Goods that I had brought or should export, and that whoever bought any Part of my Cargo, and did not pay according to the Agreement made for Payment, I should not be liable to feek Justice at the Gadjee's Court, but to imprison my Debtors, and if that would not perfuade them to give Satisfaction, he would fell their Wives, Children or nearest Relations to make good their Debt. This Privilege did me fingular Service when the Term of Payments came, and was obliged to try the Experiment of imprisoning. After three Hours Conversation, we took Leave to go, and he dismissed us with much Civility, and told me, that when he returned from that Expedition, he would repay my Vifit at my Ledgings; but in three Months that I flaid, he did not return, but often sent to enquire after my Welfare, and how my Affairs stood.

In travelling from Dungham towards Tatta, about four Miles short of the City, on smooth rising Ground, there are forty two fine large Tombs, which, from the Plain, appeared to be a small Town. They are the Burying-places of some of the Kings of Sindy, when that Country was governed by its own Kings. I went into the largest, which is built in the Form of a Cupola, and in the Middle of it, stood a Cossin-tomb, about three Foot high, and seven Foot long, with some others of a lesser Size. The Materials of the Cupola were yellow, green and red Por-

phyry

phyry, finely polished, and the Stones set in regular Order, Chequer-ways, which Variegation strikes the Eve with wonderful Pleasure. The Tomb is about ten Yards high, and seven in Diameter. I was told, that it was the Burying-place of the last King of that Country, who was robbed of his Sovereignty by Jehan Guire, Gand-father to the famous Aurenzeb, in the Beginning of the seventeenth Century, who, after he had him Prisoner, bid him ask what Favours he would desire for himself and Children. and they should be granted. He nobly replied, That all the Favour he begg'd, was, that himself, his Queen, and their Children, might be buried in that Tomb, which, in Times of Prosperity, he had built for that Purpose, and had cost him two Lack of Rupees, or twenty-five thoufand Pound Sterl. which Request his Conqueror could not well refuse.

TATTA City stands about two Miles from the River Indus, in a spacious Plain, and they have Canals cut from the River, that bring Water to the City, and some for the Use of their Gardens. The King's Gardens were in pretty good Condition in the Year 1699, and were well stored with excellent Fruits and Flowers, particularly the

most delicious Pomegranates that ever I tasted.

For three Years before I came there, no Rain had fallen, which caused a severe Plague to affect the Town and circumjacent Country, to fuch a Degree, that, in the City only, above eighty thousand died of it, that manufactured Cotton and Silk, and above one Half of the City was deferted and left empty. And that was one Reason why the Nabob had placed his Camp in that Place that I went to visit him at. The Figure of the Camp was a regular Tetragon, and ditched about with a Trench about three Yards broad, and two deep. The Ground taken out of the Ditch, was thrown upon the Infide, about four Foot high, and regularly built like a Parapet. It had four Gates, one in the Middle of each Curtain, and a freight Street from the opposite Gates, which made an exact cross in Figure, and the Nabob's Tent was pitch'd in the Middle of the Cross. Each Side of the Tetragon was about fix or feven hundred Paces in Length, and the Dirches could be filled with Water from the Indus, and

let out at Pleasure, into a large Marish about two Miles

off the Camp.

THE River Indus is navigable for their Vessels, as high as Cajmire, and one Branch runs up to Cabul to the Westward, and others to Penjeb, Labore, Multan, Bucker, and other large Provinces and Cities to the Eastward, and all

thare the Benefits of the inland Navigation.

THIS Country abounds richly in Wheat, Rice and Legumen, and Provender for Horses and Cattle; and they never know the Misery of Famine, for the Indus overflows all the low Grounds in the Months of April, May and June, and when the Floods go off, they leave a fat Slime on the Face of the Ground, which they till eafily before it dries, and being fown and harrow'd, never fails of bringing forth a plentiful Crop.

THE other Productions of this and the inland Country, are Saltpeter, Sal-armoniack, Borax, Opoponax, Affafœtida, Goat Bezoar, Lapis tutiæ and Lapis lasuli, and

raw Silk, but not fine.

THEY manufacture in wrought Silks, which they call Temawaars, in Cotton and Silk, called Cuttenees, and in Silk mixt with Carmania Wooll, called Culbuleys, in Calicoes coarse and fine, sheer and close wrought. Their Cloth called Jurries, is very fine and foft, and lasts beyond any other Cotton Cloth that I have used. They make Chints very fine and cheap, and Coverlets for Beds very beautiful. They make fine Cabinets, both lack'd and inlaid with Ivory. And the best Bows and Arrows in the World, are made at Multan, of Buffalos Horns. They lack wooden Dishes and Tables, but not so well as in China. The Lack is clear enough, but always clammy, they export great Quantities of Butter, which they gently melt, and put up in Jars, called Duppas, made of the Hides of Cattle, almost in the Figure of a Globe, with a Neck and Mouth on one Side. They are made of all Sizes, from those that contain three hundred and twenty Pounds, to those of Five; and that Butter keeps, without Salt, the whole Year round, but, as it grows old, it becomes rank.

THE Wood Ligna dulcis grows only in this Country. It is rather a Weed than a Wood, and nothing of it is useful but the Root, called Putchock, or, Radix dulcis. I never heard it is used in Physick, but is a good Ingredient in the Composition of Perfumes. There are great Quantities exported for Surat, and from thence to China, where it generally bears a good Price; for being all Idolaters, and burning Incense before their Images, this Root beaten into fine Powder, and an Incense, this over smoothly with Ashes, and a Furrow made in the Ashes, about a Quarter of an Inch broad, and as much in Depth, done very artificially into a great Length, the Powder is put into that Furrow, and fired and it will Powder is put into the a Match, fending and it will burn a long Time like a Match, fending forth a fine Smoke, whose Smell is very grateful, the Powder having Smoke, whole shift is the good Qualities of maintaining and delaying the Fire.

THE Religion, by Law established, is Mahometan; but there are ten Gentows or Pagans for one Mussulman. But the City of Tatta is famous for Learning in Theology, Philology and Politicks, and they have above four hun-Philology and I officer, dred Colleges for training up Youth in those Parts of

Learning.

THE Gentows have full Toleration for their Religion, and keep their Fasts and Feasts as in former Times, when the Sovereignty was in Pagan Princes Hands. They burn their dead, but the Wives are restrained from burning with the Corpse of their Husbands. There is a very great Consumption of Elephants Teeth, for tis the Fashion for Ladies to wear Rings of Ivory from their Arm-pits to their Elbows, and from their Elbows to their Wrifts, of both Arms; and when they die, all those Ornaments are burnt along with them.

THE River of Sindy would be hard to be found, were it not for the Tomb of a Mahometan Saint, who has an high Tower built over him, called Sindy Tower. It is always kept white to ferve as a Land-mark. The Bar, going into the River, is narrow, and has not above two Fathoms and an Half, on Spring-tides: But this is only Fathoms and an indus, which Appellation this is only a small Branch of Indus, which Appellation is now lost in this Country that it fo plentifully waters, and is called Divellee, or feven Mouths; but it disembogues itself into

CHAP. XIV.

Gives an Account of the ancient Kingdom of Guzeration now a Province annext to the Mogul's Dominions, its Situations, Product, Manners and Religion; with some Account of the Pirates that inhabit Part of it, and some Observations on Diu, a Portuguese City on an Island appertaining to Guzerat.

The Indus makes it an Island, by a Branch that runs into the Sea at the City of Cambaya. This Province, tho' Vassals to the Mogul, yet continue in their old Religion of Paganism, and, for the most Part, drive the old Trade of thieving and pirating, for they plunder all whom they can overcome, on both Elements: Nor can the Mogul restrain them, for their Country is secure from the Marches of Armies into it, by reason of the many Inlets of the Sea that overslow the low Grounds, and make it so soft and muddy, that there is no travelling but by

little Boats, in many Places.

The first Town on the South Side of Indus, is Cutchnaggen. It admits of some Trade, and produces Cotton, Corn, coarse Cloth and Chonk, a Shell-sish in Shape of a Perriwinkle, but as large about as a Man's Arm above the Elbow. In Bengal they are saw'd into Rings for Ornaments to Womens Arms, as those of Sindy wear Ivory Rings. They are in Fashion in many Countries in India. The Province and Town of Cutchnaggen are governed by a Queen, who is very formidable to her neighbouring States. The Reasons they give for choosing Governesses, are, that they'll be better advised by their Council than Men, who, by too large a Share of Power and Honour placed on them, become obstinate in their Opinions, and insolent in their Behaviour: But Ladies are esteemed complaisant and gentle.

THE next Province in Cutchnaggen, is Sangania, which is also governed by a Princess, for the above Reasons. Their Sea-port is called Baet, very commodious and secure. They admit of no Trade, but practise Piracy.

P 2

They give Protection to all Criminals, who deserve Panishment from the Hand of Justice. All Villains in the Countries about flock thither, and become honest Robbers, fo that they are a Medley of Criminals, who flee their Country for Fear of condign Punishment due to their Crimes. This Province produces Cotton and Corn, as all the Kingdom of Guzerat does; but they admit of no Trade in their Country, as I observed before, for Fear of being civilized by Example. I had feveral Skirmishes

with them.

In the Year 1686, a fmall Ship of theirs, that mounted eight Guns, and well mann'd, was cruizing on the Coast of India, between Surat and Bombay, and the Phenix, an English Man of War of forty-two Guns, was bound for Surat. The Sanganian made towards her, and engaged her, but would fain have been gone again when they found their Mistake; but that was impossible. The Phenix fent her Boats, well mann'd, to try if they could make them yield, in order to fave their Lives; but they feorned Quarter, and killed and wounded many of the English; fo that Captain Tyrrel, who commanded the Phenia, was forced to run his lower Teer out, and fink them: And, after their Ship was funk, and the Miscreants set a swimming, yet most of them refused Quarter, and only about feventy were taken alive.

In the Year 1717, they attackt a Ship called the Morning Star in her Passage between Gombroon and Surat. She was richly laden, which they were apprifed of, and two Squadrons were fitted out from two different Ports, to way-lay her, and accordingly she fell in with eight Sail of those Pirates. One was a large Ship of near five hundred Tuns, and three others were Ships between two and three hundred Tuns, and the other four were Grabs, or Gallies, and Sheybars, or half Gallies. They reckoned in all there were above two thousand Men in their Fleet, and the Morning Star but seventeen fighting Men, who were resolved to trust Providence, and fight for their Lives, Liberty and Estate. The first Attack was by the greatest Ship alone, but was foon obliged to sheer off again, with the Lois of some Men, and the Captain of the Morning Star was wounded in the Thigh, by a Lance darted at him, that

that pierced his Thigh through and through. The Pirates were not discouraged by this first Repulse, but joined their Forces and Counsels together, and, after a Day's Respite and Consultation, they attack'd the Morning Star a fecond Time, the two largest Ships boarding, one on her Bow, and another on her Quarter, and three more boarded them two, and entred their Men over them. The Combat was warm for above four Hours, and the Morning Star had feven killed, and as many wounded; but kind Providence affifted her. Whilft she was on Fire in three Places, and had burnt through her Poop and half Deck, she was disengaged of them, and left five of the largest so entangled with one another, that they could not pursue her. So she pursued her Voyage to Surat, but having no Surgeon on board, she called at Bombay, to get her wounded Men dreft and cured. In the Time of the Combat, while the Pirates were on board of the Morning Star, twenty one Indian Seamen went on board of them, and twenty fix Merchants had gone to them, to try if they could persuade them to take a Sum, and not put it on the Hazard of a Battle. All those they detained, and carried along with them, and made them pay above fix thousand Pounds for their Ransom, who gave an Account afterwards of great Slaughter done on the Pirates. And the Commodore lost his Head as foon as he landed, for letting so rich a Prize go out of his Hands.

In the Year 1698, one Captain Lavender, in the Ship Thomas, bound from Surat to Mocha, encountered four Sail of those Freebooters, and fought them bravely; but they burnt the Ship and all her Crew, because he would not yield. They are very cruel to those they can master, if they make Resistance; but to those that yield without

fighting, they are pretty civil.

THE next Sea-port Town to Batt, is Jigat. It stands on a Point of low Land, called Cape Jigat. The City makes a good Figure from the Sea, shewing four or five high Steeples. It is the Seat of a Fouzdaar or Governor, for the Mogul. It is a Place of no Trade, and consequently little known to Strangers.

THE next maritime Town is Mangaroul. It admits of Trade, and affords coarse Calicoes white and died, Wheat,

 P_3

Pulse

Pulse and Butter for Export, and has a Market for Pepper, Sugar and Betlenut. It is inhabited by Banyans; and wild Deer, Antelopes, and Peacocks are so familiar, that they come into the very Houses without Fear.

THE next Place is *Poremain*, a pretty large Town on the Sea-shore, and admits of Trade, producing the same Commodities as *Mangaroul*, and its Inhab tants are of the same Religion; but both Towns are obliged to keep Rasspouts to protect them from the Insults of the Sanga-

mians.

THOSE Rasspouts are Natives of Guzerat, and are all Gentlemen of the Sword, and are well trained in the Art of killing. They, like the Switz, employ their Swords in the Service of those who give them best Pay. They feldom give or take Quarter, and when they go on an Expedition, they carry their Wives and Children in Carts and Wagons along with them, and if they meet with a Repulse, their Wives will never suffer Cohabitation till they can regain their lost Honour by some noble Exploit.

Diu is the next Port, and is the southermost Land on It is a small Island of three Miles long, and two broad, belonging to the Crown of Portugal. The City is pretty large, and fortified by an high Stone Wall, with Bastions at convenient Distances, well furnished with Cannon to flank it, and a deep Mote hewn out of an hard Rock, to defend it on the Land Side, which is about one third Part of the City. The other Parts are fortified by Nature, having the Ocean thick fet with dangerous Rocks and high Cliffs, who forbid any Approaches on that Side, and a rapid deep River, that affords a good Harbour, on the North-east Side. The Harbour, is secured by two Castles, one large, that can bring above one hundred large Cannon to bear on the Mouth of the Harbour, to forbid Shipping Entrance without Leave. The other is but small, and is built irregularly on a Rock in the Middle of the River, and Chanels for Shipping to pass by it, within ten Yards of its Wall. It is made use of for a Magazine for Powder and other warlike Stores.

It is one of the best built Cities, and best fortified by Nature and Art, that ever I saw in *India*, and its stately Buildings of free Stone and Marble, are sufficient Wit-

neffes

neffes of its ancient Grandeur and Opulency; but at prefent not above one fourth of the City is inhabited. It contains five or fix fine Churches, which are great Ornaments to the City, which stands on a rising Ground of an easy Ascent from the great Castle; and the Churches, being built wide from one another, and standing gradually higher than one another, make the Visto from the Sea admirably pleasant, by shewing all their beautiful Fronts that Way. And within they are well decorated with Images and Paintings.

THERE is a Tradition, that the *Portuguse* circumvented the King of *Guzerat*, as *Dido* did the *Africans*, when they gave her Leave to build *Carthage*, by desiring no more Ground to build their Cities than could be circumfcribed in an Ox's Hide, which having obtained, they cut it into a fine Thong of a great Length, and over-reach'd

their Donors in the Measure of the Ground.

AFTER the City was built and fortified, it drew all the Trade from the King's Towns of Commerce thither, which made him heartily repent his Generofity; and he made Proposals to the *Portaguese* to reimburse all the Charge and Expence they had been at, if they would restore that Island again, but he could never persuade them to that Bargain, and since fair Means would not do, he designed to try what might be obtained by Force, wherefore he raised a great Army, and besieged it, but was soon forced to draw off again with Loss, for the *Portuguese* large Cannon from their Walls disturbed and distress'd his Camp so, that he sound but little Sasety for himself, and much less for his Host.

This City came to such an Height of Trade and Riches in the sixteenth Century, that it drew a very potent Enemy from the Red Sea; for, about the Year 1540, the Turks, designing to have a Footing in India, cast their Eyes on Diu, as being conveniently situated, and well fortished for their Purpose, so they came in a Fleet of Gallies and Transports twenty five thousand strong, from Aden, and landed on the West End of the Island, and laid Siege to the City; but the Portuguese sent a Reinsforcement from Goa, of twenty Sail, some of which were large Ships or Galleons, who carried heavy Metal, with which they battered

battered the Turkish Fleet, being small Vessels, that many Turks were sunk, and the Bashaw was forced to make off with great Loss and Shame, and leave their battering Artillery to the Portuguese, for which Missortune and Disgrace, he lost his Head when he returned to Aden.

But about the Year 1670, the Muskat Arabs had better Fortune, for they came with a Fleet of Trankies, and took an Opportunity to land in the Night, on the West End of the Island, without being discovered, and march'd filently close up to the Town, and, at Break of Day, when the Gates were opened, they entered without Resistance. The Alarm was soon spread over the Town, and happy was he who got first to the Castle Gates, but those who had heavy Heels were facrificed to the Enemies Fury, who spared none, so in a Moment that fair rich City and Churches were left to the Mercy of the Arabs, who, for three Days, loaded their Vessels with rich Plunder.

But the Arabs, like a Parcel of unfanctified Rogues, made fad Havock on the Churches Trumpery, for, befides robbing them of all the fanctified Plate and Cash, they did not leave one Gold or Silver Image behind them, but carried all into Captivity, from whence they never returned.

However, before the Arabs had done plundering, they became secure and negligent, which the Governor having Notice of, proclaimed Freedom to all Slaves who would venture to fally out on the Enemy. Accordingly about four thousand Soldiers and Slaves made a Sally with Succefs, killing above one thousand Arabs, and made the rest flee from the Town, the Affailants losing but very few; and by that one Sally the Town was regained. The City still feels the dismal Effects of the Lois it then received. At present there are not above two hundred Portuguese both in the Castle and City. The rest of its Inhabitants are Banyans of all Sorts. There may be about forty thousand, but few of them of Fortune or Figure, because the Insolence of the Portuguese makes it unsafe for money'd Strangers to dwell among them. The King of Portugal has about twelve thousand Pounds per Annum, of Poll Money paid into his Treasury, and the Customs and Land-tax may come to about fix thousand Pounds more:

But if that Island were in the Hands of some industrious European Nation, it would be the best Mart Town on the Coast of India, for the River Indus being near Neighbours, both by Sindy and Cambay, those Commodities might be imported and exported to Advantage. And that Commerce has raised Surat.

ALL the Country between Diu and Dand Point, which is about thirty Leagues along Shore, admits of no Traffick, being inhabited by Freebooters, called Warrels, and often affociate with the Sanganians, in exercifing Piracies and Depredations. They have no Cities, and their Villages are small. The best of them stands about fixty Miles to the Eastward of Diu, and is called Chance. It is built about a League within the Mouth of a River, which has a imall Island lying athwart it, about two Miles into the Sea. The Island has good Springs of fresh Water, but no Inhabitants. In the Year 1716, the English went to burn that Village, and their pirating Vessels, but were unfuccessful in their Undertaking. The Warrels occupy all the Sea-coast as high as Goga, which lies about twelve Leagues within the Gulf of Cambay. And the Coast. from Dand Point to Goga, is very dangerous, being thick fet with Rocks and Sand Banks; and a rapid Tide runs amongst them of fix or eight Miles in an Hour, in a Chanel that is twenty Fathoms Deep in some Places, which causes Anchoring to be dangerous also.

Goga is a pretty large Town, and has had some Mud Wall Fortifications, which still defend them from the Infults of their Neighbours the Coulies, who inhabit the North-east Side of Guzerat, and are as great Thieves by Land as their Brethren the Warrels and Sanganians are by Sea: Nor is there any Land Army that can come into their Country to chastise them, for there are so many Rivulets made by Indus and the Sea, that are so soft and muddy at the Bottom, that there is neither Passage for Men nor Horse to penetrate their Country, and their Towns are invironed with such thick Hedges of green Bamboes, which are not to be burned in a short Time, and the People so numerous and valiant, that it would be an

hard Task to civilize them.

Goga has some Trade, admitting Strangers to a free Commerce in such Merchandize as are fit to be imported or exported to or from Guzerat. It has the Conveniency of an Harbour for the largest Ships, tho' they lie dry on foft Mud, at low Water; but the Tides rising four or five Fathoms perpendicular, afford Water enough at high Water. The Town is governed by an Officer from the Mogul, who commands about two hundred Men, who are kept there for a Guard to it.

CHAP. XV.

Gives an Account of the Cities of Cambay, Baroach and Surat; with several Occurrences that happened to them; and of the Sea-coast from Damaan to Bombay.

AMBAY, or, as the Natives call it, Cambaut, about twelve Leagues from Goga, in the Bottom of the Gulf of Cambay, on a small River, that is sent by the Overflowing of the Indus into that Gulf or Bay, is a large City, with high Walls, and was formerly the Metropolis of a Kingdom that bore the City's Name; but Eckbar, great Grandfather to Aurengzeb, sent his Son, Jeban Guire, with a great Army in the fixteenth Century, and conquered it, and annex'd it to the Empire of the Great Mogul.

IT is still a Place of good Trade, tho' not half inhabited, and it contributes very much to the Wealth and Grandeur of Surat, to which it is subordinate; and its Vicinity to Amadabant, from whence it is about one hundred and fifty Miles diftant, makes it share the Advantages of that great City, which, in Magnitude and Wealth, is little inferior to the best Towns in Europe. What it exports by Sea, comes most to Cambay, and carried by the Surat Shipping all over India, except what European Ships car-

ry for Europa. THE Product and Manufactories of Cambay are inferior to few Towns in India. It abounds in Grain and Cattle, Cotton and Silk. The Cornelian and Agate Stones are found found in its Rivers, and no where else in the World. Of Cornelian they make Rings, and Stones for Signets, and of the Agate, Cabinets, intire Stone except the Lids. I have seen some of sourteen or sisteen Inches long, and eight or nine deep, valued at thirty or forty Pounds Sterl. They also make Bowls of several Sizes of Agate, and Spoons, and Handles of Swords, Daggers and Knives, and Buttons, and Stones to set in Snuff-boxes, of great Value.

They embroider the best of any People in India, and perhaps in the World. Their fine Quilts were formerly carried to Europe. I have seen some worth forty Pound Sterl. and some Cornelian Rings, above double their Weight in Gold. The Patanners are their near Neighbours. They are mostly Horsemen, and bold Fellows, who borrow round Sums from the City, by Way of Compulsion, and the Rasspouts and Coulies make Inroads into this Province, and plunder even to the Gates of the City, and sometimes have surprised, and plundered the City itself, for which Neglect the Governors Heads answered.

In the Year 1716, they were very bold and prefumptuous, so that there was a Stop put to all the Commerce of Amadabant and Cambay. The Governor of Surat got an Army of twenty thousand to chastise and restrain them; but they laid so many Ambuscades, that, in two Months, the Army was reduced to less than half of the Number, and the rest were obliged to get Home, with sorrowful Hearts, to Surat.

The next Town of Note for Commerce, is Baroach, a walled Town, standing on a rising Ground, on the Banks of the River Nerdaba. Formerly it was a Place of great Trade, but in Aurengzeb's Wars with his Brothers, about the Year 1660, this Town held out a great while against his Army. That Season proving a dry one, Aurengzeb's Folks suffered much for Want of fresh Water and Provisions, but at last he took it, and put all to the Sword that had borne Arms against him, and raised Part of the Walls, and pronounced a Curse on them that should repair them again. But the Sevajees Incursions made him order the Rebuilding them himself, and he christened it Suckabant, or the dry City; but that new Name could not

efface

efface the old one, which it yet retains. It is now inhabited by Weavers, and such Mechanicks as manufacture Cotton Cloth. And the Baroach Bastas are famous throughout all India, the Country producing the best Cotton in the World. This Town is also subordinate to Surat; and formerly the English and Dutch had Factories settled there, but of late have withdrawn them.

Surat is the next Sea-port. It was built about the Year 1660, on the Banks of the River Tapta or Tappee, which being discommoded with Banks of Sand at Rannier, the then Mart Town on this River, the English removed about two Miles farther down the River, on the opposite Side near a Castle which had been built many Years before, to fecure the Trade from the Infults of the Malabar Pirates, who used to lord it over all the Sea-coast between Cape Comerin and Cambay. In a little Time after the English had fertled there, others followed their Example, so that in a few Years it became a large Town, but without Walls, and so it continued till about the aforesaid Year, that Rajab Sevajee, who had never submitted to the Mogul's Domination, came with an Army, and plundered it, except the European Factories, who flood on their Guard. Them he complimented with the Proffer of his Friendship, because perhaps he apprehended, that he could not plunder them without Bloodshed and Loss of Time. However he carried away a very great Booty, which made the Inhabitants petition Aurengzeb to secure them for the suture, by a Wall round their Town, which Favour he granted, enclosing about four Miles to build their City in; but Trade increasing, the Town was too small within the Walls to contain the People that came about Commerce, wherefore feveral large Suburbs were added to the City for the Conveniency of Mechanicks. The Wall was built of Brick, about eight Yards high, with round Bastions, two hundred Paces distant from one another, and each had five or fix Cannon mounted on them. And the rich Men of the Town built many Summer-houses in the Fields, and planted Gardens about them, to solace themselves and Families in the Heats, which are pretty violent in April, May and June.

THE City flourished in Trade till the Year 1689, that the English Company disturbed its Tranquillity by an unjust War they made on Surat, but pretended it was not with the Mogul, who had given them many Indulgences, which War I'll remark when I treat of Bombay, but that War was ended in the Year 1689, neither to the Profit nor Honour of that East-India Company. In the Year 1605. Captain Every a Pirate disturbed the Trade and Tranquillity of the Town with four small Ships, taking one of the Mogul's Ships, with a great Booty in Silver and Gold, and a Mahometan Lady, as I observed before on the Commerce of the Red-Sea and the Island of Madagascar. And fince that Time this City has felt many Convulsions in its Trade.

In the Year 1705, when Aurengzeb began to be crazy with old Age, the circumjacent Rajahs, with an united Force of fourfcore Thousand Horse, came and besieged Surat, and plundered all the Villages in the plain Country; but having no Artillery, they could do but little Harm to the City itself, besides straitning it a little for Provisions. but the City having their River and Sea open, that Difficulty was removed by plentiful Supplies brought them from

Guzerat.

THESE Freebooters go under the general Appellation of Gennims, but they are composed of the aforementioned Warrels, Coulies, Raffpouts, Patanners and Gracias. Thefe Gracias were formerly the landed Men of this Country. and upon their Submission to Ecbar, the then Emperor of Mogul, articled to have the Ground Rents paid to them and their Posterity; but the Nabobs often defraud them, and they, to put the Governors of Towns and Villages in Mind of the Contract, come in great Numbers, and plunder, or lay them under Contribution.

But whilft this rabble Army lay before the Town, the Citizens built Sconces in convenient Places, about half a Mile without the Wall, to protect the Suburbs, and all those Sconces had Cannon mounted on them, which kept the Gennims at a Distance; and, after the Sconces were finished, they built a good high Wall between each Sconce that encompassed the whole Suburbs, which Wall is about five Miles in Length from the Bank of the River above lege the Receipt of it, by putting a Scroll of Paper into the dead Person's Hand, containing an Account of the Legacy, with a Bill at the Bottom, to receive ten Times the Value in the other World, from some eminent Saint that deals in such Bills of Exchange in Paradise. They have Patriarchs and Bishops to superintend the inferior Clergy, who, by Virtue of a divine Right, live splendidly and luxuriously on the Oblations of the People.

THE other Sects are taught by the Talapoins, who declaim against that papifical Polity, and preach up Morality to be the best Guide to human Life, and affirm, that a good Life in this World, can only recommend us in the next, to have our Souls transmigrated into the Body of

some innocent Beast, or to rest in Paradise.

THEIR Priests indeed shew much Self-denial, for they live on Alms, and their Pontificalia is a white Sheet that covers their Bodies, from the Shoulders downwards, a black Staff about five Foot long in their Hand, and a small earthen Pot, with some powdered Saffron and Oil, to mark those on the Forehead that have received their Benediction that Day. When they go abroad, the old carries a Novice in his Company, to teach him Divinity and Morality by Example. They seldom speak in the Streets, but look gravely and demurely, and they extend their Charity even to Beasts and Birds. They suffer their Hair to grow as low as their Shoulders, and have no other Covering on their Heads, and keep their Beards shaved.

ANOTHER Sort of them are Doctors of Physick, who pretend to do great Cures by Amulets, Philtres and Prayers. They have some Skill in Simples and Minerals, which make them in great Esteem; but when their Skill in Physick produces not the promised Estects, then they persuade the Patient, that they lie under the Displeasure of some angry Deity, who must be appeased by Oblations and Penances, which they turn to good Account, by ordering the Offerings and Penance to be light; and when that Trick sails, they leave their Patients to work out their own Salvation the best Way they can.

THERE is another Sort called Jougies, who practife great Austerities and Mortifications. They contemn worldly Riches

Riches, and go naked, except a Bit of Cloth about their Loins; and some deny themselves even that, delighting in Nastiness and an holy Obscenity, with a great Shew of Sanctity. They never cut nor comb their Hair, and befmear their Bodies and Faces with Ashes, which makes them look more like Devils than Men. I have feen a fanctified Rascal of seven Foot high, and his Limbs well proportioned, with a large Turband of his own Hair wreathed about his Head, and his Body bedawb'd with Ashes and Water, sitting quite naked under the Shade of a Tree, with a Pudenda like an Ass, and an Hole bored through his Prepuce, with a large Gold Ring fixed in the This Fellow was much revered by Numbers of young married Women, who, proftrating themselves before the living Priapus, and taking him devoutly in their Hands, kiss'd him, whilst his bawdy Owner stroak'd their filly Heads, muttering fome filthy Prayers for their Prolification.

THE Austerities of the Jougies are beyond Belief to those who have not been Eye-witnesses of them. Some stand on one Foot some Years, with their Arms tied to some Beam of an House, or Branch of a Tree over their Heads. and continue in that Posture, except when Nature calls for -Exoneration, for others feed them whilst they stand. Their Arms in Time fettle in that Posture, that ever after they become ufeless, and are not to be brought again into their natural Polition. Some fit in the Sun-shine, with their Faces looking upwards, till they are incapable of altering the Posture of their Necks, their Gullet swelling almost as thick as their Heads; and they also take no Sustenance with their own Hands. Others clinch their Fifts, and tie them in that Posture, till their Finger Nails come through the Back of their Hands. And their Fastings are as incredible. I saw a Woman of about thirty Years of Age, who made a Vow of fasting three Months, to avert fome impending Calamity threatened by Heaven, that she pretended to foresee. The Governor of Surat being a zealous Mahometan, (who generally discourage Gentilism, and strive to detect their Leger de main Miracles) ordered the faid Woman to be put into a Prifon without Windows, without any other Sustenance than fair Water, and to be well guarded by Mahometans, to avoid Imposture. About eighty Days after she was imprisoned, I and several other Europeans paid her a Visit, and got the Door opened to observe her Aspect. We found her in Health, but very weak, and her Pulse beat very low. Her Keepers declared, that she had taken no Sustenance, but a very small Quantity of Water, all the while they had the Overfeeing of her, nor did she ever defire any Food. She told us, that three or four Year before she had fasted fixty Days on the same Account.

YET in the Year 1721, the Governor detected a great Piece of Imposture of the Jougies, who paid pretty dear for their Impudence. One of those filly Zealots, who pretended to more Sanctity than his Neighbours, gave out, that he would be buried (in a Grave ten Foot deep) alive, and that he would appear at Amadabant, which is distant from Surat about two hundred Miles, within the Space of fifteen Days. The Grave was dug, and he went in, and had some Reeds placed about a Foot or two over his Head, to keep the Mould off that was to be thrown over him. There was a large Jar of Water standing under the Shade of a great Tree, about ten or twelve Yards from the Grave, where a good Number of Jougies had for some Time taken up their Quarters, they were Accomplices in the Imposture, and, by their pretended Sanctity, and great Interest with Heaven, had gull'd many poor People into a Belief of their Story, and many brought Presents to them. But the Governor of Surat ordered a Party of Soldiers to fee the Jougy interred, and to fee that no Imposture should be used about his pretended Resurrection, and to search well, that there should be no subterraneous Communication between the Grave and any Place that might be fuspected above Ground, and accordingly searching narrowly, they suspected some Place about the Root of the Tree might afford a Passage, ordered the Jougies to remove a little out of their Way, which they did willingly, and, finding no Visto that might be suspected, they ordered the Jougies to remove their great Water Jar, which was near full of Water; but the Jougies clamoured loud against that Breach of their Privilege, in touching their Water: But their Noise made the Mabometans Suspicion grow grow stronger, and the Tar was either removed or broken; and behold, where the Jar stood, they discovered a Mine that reach'd within two Foot of the Grave, which Cheat being thus detected, the angry Soldiers fell to Work with their broad Swords, to try if their Sanctity was Proof against sharp Steel, but found, by an Experiment of laying a Dozen or more dead on the Ground, and twice as many maim'd with Wounds, that they were as eafily killed or wounded as other honest Folks. The poor Miraclemonger loft his Head in the Fray. That spoiled his Journey to Amadabant, and, which was worse, brought

great Scandal on the whole Order.

I was one Day walking by the Side of a great Tank or Pond near Surat, in Company with an English Lady, and feeing a young Jougy sitting by the Tomb of a celebrated Cutteree, who are a Sect that bury their Dead, the Youth feemed to be very devout in Prayers; but, by the Lady's Order, I interrupted him, and, asking him why he prayed there, and to whom did he direct his Prayer, he answered that he prayed to God to make him as good a Man as he was who lay interred there. I ask'd him where God was, at which he feemed to fmile, and ask'd me, where is he not? and so continued a little Space in Prayer, and, when he had done, he took some Flowers and Grain, with a little Water, and besprinkled the Tomb, and, making fome decent Cringings towards the Tomb, took a formal Leave to go this Way.

THE great God, whom all adore, they call Quedaa; but they have many inferior Deities, and of them Mahadow, or, as they express it, Maadow, is the second in Place and Dignity. Ramm is the third, and Brahma the And Parvette is a Goddess much venerated, and is supposed to be the Wife of Maadow. The interior Deities or Saints are very numerous; but the Images of Gunies, Jagarenat, Rustum, and Gopalsami are most worshipped in their Temples, as reckoned to have most Interest

with the superior Deities.

THE Marriages of the Gentiles in India are celebrated with much Pomp. They begin in the Forenoon to fend a long Train of People with covered Dishes or Baskets on their Heads, with Presents from the Bridegroom to the Bride,

and, before the Present march Hautboys, Drums and Trumpets. After the Presents march some semale Slaves for the Bride and Bridegroom's Use. After the Slaves comes an empty Pallankeen to transport the Bride from her House to her Husband's. At Night the Bride and Bridegroom are carried in State thro' the Town, with Torchlight and Musick before them, and Fireworks played off as they pass in the Streets, and the Parents of the married Couple fend Presents to their Friends. They have no Choice in their Marriages, for that is left to the Parents or nearest Relations; and they are married before they can be capable either to choose or refuse, being often married at fix or feven Years of Age; but they do not cohabit before the Bride be about twelve, and the Bridegroom fixteen. As to their Burials, some burn and some interr; but Children under four Years of Age are buried. And the Wives are not permitted to burn with their Husbands; but, when once she is a Widow, she never can marry again, but lives to bewail her Widowhood, and perhaps her Virginity, all her Days.

They marry but one Wife, except in Cases of Barrenness or Adultery, tho' there are no Laws against Polygamy. They abhor Buggery and Sodomy, and the *Mahometans* for that Account, because they use them. They eat twice a Day, but the Husband and Wife eat separate; and they wash before and after Meat. And the Europeans

there follow that cleanly Cuftom.

The Parfees are numerous about Surat and the adjacent Countries. They are a Remnant of the ancient Persians, who rather choose to be banish'd their Country than change their Religion; for in the seventh Century of the Christian Era, when Mahometism over-ran Persia, the Spirit of Persecution came there, and some four or sive hundred Families were put on board of Shipping, and sent to Sea, without Compass or Pilot; and they, steering their Course Eastward (in the Southwest Monsoons) from Jasques, in about twenty Days, fell in with the Coast of India in the Night, and the first Thing they saw was a Fire ashore, which the Exiles steered towards, and accidentally steered into the River of Nunsaree, about seven Leagues to the Southward of Surat, and were welcomed to Land

by the Crowing of a Cock. Zoroaster was their Founder, and taught them to adore the Sun and Fire, that produced and maintained all sublunary Beings. Their seeing the Fire on their approaching the Land, confirmed their Belief, in the Opinion that Adoration was due to it, for which Reason they never extinguish Fire by its opposite Element Water; and even if their Houses are a burning, they'll use no Water to quench the Flames, but throw Earth or Dust to put it out. And because the Cock saluted them first, after they had past through a dangerous Sea, and were secure in a River, they will neither kill, nor eat the Flesh of Cock.

WHEN they came ashore, the charitable Indians slock'd about them, and there being some among them that could speak some Indian Languages, related what hard Usage they had met with in their own Country, and that Providence having directed them to the Indian Country, they begged Leave to fettle among them, and by their Behaviour they would shew their Gratitude for relieving distrest Strangers, who were then become their Supplicants. The generous Indians granted their Request, and allowed them Land to manure, and Seed to fow the Ground, upon the fame Conditions and Tenure they enjoyed their own Farms: And there they fettled first, and remain in and about that Country to this Day. They never marry into foreign Families, which makes them retain their native fair Complexion, little inferior to us Europeans, only their often Washing and Anointing, which is a Part of the Exercises of Religion, takes away the beautiful fresh Ruddiness that Their Rites of Marriage are performed like adorns ours. the other Gentiles, in Oftentation and Expence; but their Burials are quite different, for they enclose a finall Piece of Ground with a Wall about four Yards high, and place feveral Benches for the Corps to fit on, that the four Elements may each have a Share of the Matter their Bodies are composed of. The Sun or Fire exhales the putrid Effluvias. The Water or Rain carries the putrified Flesh and the Bones to the Earth, that gives Burial to them, and the voracious Fowls carry what they can pick into the Air in their Maws. They watch the Corps all Day, till one of the Eyes is pick'd out. If the Bird begins with the right

right Eye, they rejoice and feast, but if with the left Eye, they mourn and lament for the ill Fortune of the Defunct's Soul, for they attribute future Happiness to the right Eye, and Misery to the left. They build these Charnel Places far from any Town or Village, left the

Stink should annoy them.

They are very industrious and diligent in their Vocation, and are bred to Trades and manuring Ground. They are good Carpenters or Ship-builders, exquisite in the Weaver's Trade and Embroidery, which may be seen in the rich Atlasses, Bottadaars and Jemewaars made by them, as well as fine Baroach and Nunsaree Bastas that come from their Manusactories. They work well in Ivory and Agate, and are excellent Cabinet-makers. They distill strong Waters, but that they do clandestinely, because that Trade is prohibited by the Government they live under; yet some of them get a good Livelihood by it.

THE Fields about Surat are all plain, and the Ground very fertil towards the Country, but, towards the Sea, it is fandy and steril. They have excellent Beef, Mutton and Fowl daily exposed to Sale in the City, reasonably cheap. Beef is about three Farthings a Pound, when the Bones are kept with the Flesh, and about a Penny with the Bones out. Mutton is about three half Pence, and good large Fowls at seven Pence half Penny apiece. They have some good Fish, not dear, and Pigeons at a Penny apiece, and live Hares at sour Pence apiece.

They have Plenty of Wheat, as good as any in Europe, and some Pease, and French Beans; but neither Oats nor Barley. They have several Species of Legumen; but those of Doll are most in Use, for some Doll and Rice being mingled together and boiled, make Kitcheree, the common Food of the Country. They eat it with Butter and Atchar or Salt-fish. 'Tis a pleasant nourishing Food, and that which the samous Aurengueh most delighted to eat. They have also Store of wild Fowl; but who have a Mind to cat of them, must shoot them. Flamingoes are large, and good Meat. The Paddy-bird is also good in their Season, and the Corn-bird is excellent in theirs. They have good Partridge, but bad Pheasants. Their wild

wild Geese, Duck and Teal are plenty and good; and feveral Sorts of Turtledoves, both beautiful and well tasted. They have few Deer, but great Plenty of Antelopes in their Forests. There are no fine Buildings in the City, but many large Houses, and some Caravanserays and Mulcheits, and some fine Tanks, or large Cisterns to keep Rain Water, near the Town, particularly one a little without Brampore Gate. The French have a little Church near the old English Factory, which maintains a few Capuchins, who practife Surgery gratis to the poor Natives, of what Persuasion soever. They make some Converts; but they are generally of the loofest Morals of any Set in the Town. There are above an hundred different Sects in this City; but they never have any hot Disputes about their Doctrine or Way of Worship. Every one is free to ferve and worship God their own Way. And Perfecutions for Religion's Sake are not known among them. The Mahometans have the Law in their Hands, and destribute Justice best to those that pay best for it. The Judge's Fees are twenty-five per Cent. on all Sums that he pronounces due to the Party whose Plea is best supported with Bribes or Interest, for the Justice of a Cause seldom prevails. Many Examples I have seen between honest Men of low Fortunes and Villains clothed with publick Characters and good Fortunes; yet in some Cases I have seen Justice take Place. The English and Dutch Directors or Agents there make good Figures, because the Officers of State and Justice get yearly Presents or Pensions from them. The Governor of the Castle is not subordinate to him of the Town, and he dares not come out of his Nest but once in a Year, that he is permitted to go to Church, and then he must return before Sun-let. None are suffered to pass the River whilst the Sun is down below the Horizon, nor dares any one that comes in Boats put their Foot ashore without a special Permission; and all Boats or Vessels must land at the Customhouse, and the Boat and Men are narrowly search'd. The Cuitoms on Mahometans Goods are two in the hundred, on Christians three and three Quarters; but the Christians are exempt from paying Poll-money, but the Mahometans are not, nor Gentows, who pay five per Cent. Cuftoms

Customs on their Goods. The Banyans are Brokers even to Mahometans, who cannot well make Bargains without their Brokers.

THE Mahometan Women go always veil'd when they Their Garments differ but little from appear abroad. Their Coats, which also serve both Sexes the Man's. for Shirts, are close-bodied. The Mens are gathered in Plates below the Navel, to make them feem long waifted, and the Womens are gathered a pretty Way above, to make their Waist seem short. They both wear Breeches to the Ancle. The Men wear only Silver Rings on their Fingers, and generally but one for a Signet. The Women wear Gold Rings on their Fingers, and sometimes one on their Thumbs, with a small Looking-glass set in it, and often they wear Gold Rings in their Noses and Ears. The Gentiles again permit their Women to appear bare-faced, and their Legs bare to the Knee. They wear Gold or Silver Rings, according to their Ability, one in their Nose, and several small ones in Holes bored round the Rim of the Ear, with one large and heavy in each Lappet. They wear also Rings on their Toes, and Shekels on their Legs, of the aforefaid Metals, made hollow, and fome Glais Beads loofe in them, that when they move the Leg they make a Noise like a Rattle-Snake. The Men wear Gold Rings in their Ears, and often three or four in a Cluster, hanging at the Lappet. Some have a Pearl set in them. The Makemetan Men are known by their Garb, tho' the Gentews and theirs are of one Make, fave only as they all overlap on the Breast. The Mahometans are tied on the Side, which, among them, is the Side of Honour, and the Gentiles tie theirs on the right Side. The Mahometan Turbands are likewise of another Dress or Make than the Heathers; and the different Sects of the Heathers are known by the Figure of their Tur-

WHEN the English first settled a Commerce in this Country, which was about the Beginning of the sixteenth Century, they were held in great I steem; but the Portuguese pretending a Right to that Trade solely, disturbed the English in theirs, murdering their People, and making Prize of all Ships and Vessels they could overcome. One

Seafon

Season the English had eight good large Ships riding at Swally, which is about ten Miles from Ranier, where the Prefident and his Council then refided; and Swally was the Place where all Goods were unladed from the Shipping, and all Goods for Exportation were there shipp'd off. The Portuguese, thinking it a fit Time to give a deadly Blow to the English Commerce, came with a Fleet of fix large Ships, ten small, and ten or twelve half Gallies, and anchored to the Northward of the English, in a narrow Chanel, not Musket-shot wide, and a Tide generally of fix or feven Miles an Hour. The Portuguese landed near three thousand Men, and seized some Carts laden with the Company's Goods. The English, who could not bear the Infults they daily received, held a Council, wherein it was refolved to land eight hundred Men out of the Ships, and attack the Portuguese, while they were lulled in Security of their own Strength and Numbers. and if they were overpowered, that those left on board the English should try if they could cut a Portuguese Ship's Cables that lay near them, and her driving on board of another, might, with the Force of the Tide, put them all a-ground on the Shore, or a Sand Bank that they lay very near to. Accordingly, by Break of Day, the English were all landed, and every Ship's Crew led by their own Commander. As they had conjectured, so it fell out, the English were among the Portuguese before they could get in a Posture of Defence, and put them in Confusion. Those on board had done as they were ordered, one being cut loofe, foon made all the rest run a-ground, and most of them lost, especially the great Ships. The little English Army pursued the Portuguese, and killed many in their Flight; but at a Point of Land, about three Miles from the Ships, the Portuguese made a Stand, and rallied; but the little victorious Army foon made them take a second Time to their Heels, and so the English got an intire Victory, with small Loss, for there were not twenty killed on the English Side, but above one thoufand five hundred of the Portugueje. In the Year 1690, I was on the Field of Battle, and faw many human Sculls and Bones lying above Ground. And the Story of the Battle I had from an old Parfee, who was born at a Village called called Tamkin, within two Miles of the Field, and could

perfectly remember the Action.

DAMAAN was, in former Times, a Place of good Trade, but at present reduced to Poverty. It stands at the Mouth of a River on the Sea-shore, and is naturally very strong, by a deep Marsh that almost surrounds it. The Town is about half a Mile long, and near as broad, walled with a good Stone Wall, as the rest of the Buildings of the City are built of; and it has a large Cathedral to adorn it, that is conspicuous a long Way at Sea. There are two or three other Churches, and a Convent, a Monastery, a Nunnery, and an Hospital, and there is a Castle stands on the opposite Side of the River, christened by the Name of St. Salvadore, and it is well fecured by the Morafs, as well as the Town. It has been for a long Time a great Eye-fore to the Governors of Surat, who have often pick'd Quarrels with the Portuguese, and laid Siege to Damaan, but without Success.

From Damaen to Bassam is about eighteen Leagues along the Sea-shore. There are several Rivers and Villages by the Way, viz. Danaw, Tarrapore, Mabim, Kellem, and the Island Vaccas, but they are all of small Account in

the Table of Trade.

BASS AIM is a fortified City belonging to the Crown of Portugal. It stands on a little Island, separated from the Continent by a small Rivulet. Its Walls are pretty high, and about two Miles in Circumference around the City, which has a little Citadel in the Middle of it. It contains three or four Churches, and some Convents and Mo-

nafteries, with a College and Hospital.

Ir is a Place of small Trade, because most of its Riches lie dead and buried in their Churches, or in the Hands of indolent lazy Country Gentlemen, who loiter away their Days in Ease, Luxury and Pride, without having the least Sense of the Poverty and Calamity of their Country. The Town is about half a League distant from the Island of Salset, which Inlet serves it for an Harbour for small Shipping, but there is not Water enough to accommodate great Ships. The Governor is stilled, by the Portuguese, General of the North, having Diu, Damaan and Chaul, with all their Territories, subordinate to him, but the Church

Church superintends, which makes his Government both

uneafy and precarious.

SALSET is an Island about twenty five Miles long, and, in some Places, ten Miles broad. It is fruitful in Roots and Fruits, but not in Corn. It is stock'd with Villages and Churches, but has no City on it, but an old one, called Canra, hewn out of the Side of a Rock, but by whom I never could learn. It is near a Mile in Length, and many antique Figures and Columns curiously carved in the Rock, and has feveral good Springs of Water to accommodate it. At prefent it is inhabited only with wild Beafts, and Birds of Prey. The Mand is almost cut in two by a narrow River that bifects it at a Town called Versua, which lies on the Sea-shore, and has a little narrow Harbour, deep enough to receive Ships of the greatest Burden, and is fecured by a small Fort standing on the North Side, but the Town is on the South Side of the River. It drives a small Trade in dry Fish, made here, and transported to the inland Countries and Villages, that want the Benefit of Fishing. The Fishers here catch their Fish in long Nets, fastened to Stakes placed in the Sea. the outwardmost of which are driven in the Bottom on nine Fathoms Water; and they appear to Strangers like a Wood in the Sea. There are feveral Villages standing between Versua and Bombay, on the Sea-shore, but Bandara is the most conspicuous, which fronts Mahim on Bombay, about a Mile distant. The Portuguese have some great Guns planted at Bandara, but they have no Trade, because the River belongs to the English; and all Customs of Goods, either imported or exported, are paid to the Custom-house of Mahim. The Mouth of the River is pefter'd with Rocks, that forbid Entrance to any Veffels of Burden.

In the Year 1694, the Muskat Arabs made a Descent on Salset, and committed great Depredations in plundering and burning Villages and Churches, killing the Priests, and carried about one thousand sour hundred Captives into irredeemable Slavery. And about the Year 1720, the Priests of Salset disturbed the English at Mahim, animating the People to Arms; but a Bomb or two thrown into the Church at Bandara, had no Respect to the Priesthood,

but facrilegiously killed one or two, besides some Lay Brothers, which made them know that War was not their Trade. They were also troublesome to the English in the Year 1722, but the English surprised a Parcel that were about repairing an old Fort, contrary to Articles of Agreement, and killed a Score or two, which made the rest take to their Heels, and be quiet.

CHAP. XVI.

Gives a Description of Bombay, with some historical Remarks on its Wars, Government and Trade, till the Year 1687, when the Foundation of a War was laid, which proved the Ruin of the then English East-India Company.

OMBAY comes next in Course, an Island belonging to the Crown of England. It was a Part of Katharine of Portugal's Portion, when she was married to Charles II. of Great Britain, in the Year 1662. Its Ground is steril, and not to improved. It has but little good Water on it, and the Air is somewhat unhealthful, which is chiefly imputed to their dunging their Cocoa-nut Trees with Buckshee, a Sort of small Fishes which their Sea abounds in. They being laid to the Roots of the Trees, putrify, and cause a most unsavoury Smell; and in the Mornings there is generally seen a thick Fog among those Trees, that affects both the Brains and Lungs of Europeans, and breed Consumptions, Fevers, and Fluxes.

After the Marriage, King Charles fent my Lord Malberry, with four or five Ships of War, to take Possession of it, and the King of Portugal sent a Vice-roy to deliver it, and all its Royalties, to the said Lord, and Sir Abraham Shipman was ordered to be Governor for King Charles. They arrived at Bombay in September, 1663, but the Church withstood the Crown, and disobeyed the Order: Nor would they acknowledge the Vice-roy, unless he would come into their Measures, which, rather than lose his new Dignity, he did. And the English Fleet was forced to go to Swally to land their Men, and get Refreshments:

freshments; but the Governor of Surat, in whose Districts Swally is, grew jealous of the Numbers and Bravery of the English, and threatened the Factory established in Surat, if they did not speedily re-imbark, which, to avoid Suspicion, they did, and the Governor allowed them the free Use of the Markets, fo that they had no Want of Provisions and Merchandize whilft they stayed there. In January 1664, my Lord went back to England, carrying two Ships with him, and left Sir Abraham with the rest, to pass the westerly Monsoons, in some Port on the Coast, but being unacquainted, choie a desolate Island, called Aujadiva, to winter at. It is so far from an Harbour, that it is even but a bad Road for Shipping in those boisterous Southwest Winds and turbulent Sea; however he landed all the Land-forces, and built Huts to defend them from the Weather. The Island is barren, but has some Springs of good Water. It is about a Mile long, and three hundred Paces broad. Here they stayed from April to October, in which Time they buried above two hundred of their Men.

WHEN the Monsoons were over, the Squadron put to Sea, and put in to Bombay, to try if the Church had confidered on the Obedience due to the King of Portugal's Orders, or if they had a Mind to draw the Arms of England, as well as their Sovereign's, upon them. Some of them having not forgot what Damages Spain and Portugal had fustained by the English Fleet in Cromwell's Time, advised the Church to obey the King, setting forth the Miseries they should be brought into in case of Noncompliance. At length their holy Zeal abated, and they were content to admit of a Treaty; but, before the Treaty was concluded, Sir Abraham died, and one Mr. Humpbrey Cook, who was next in Commission, continued the Treaty. and articled, that the Inhabitants should enjoy their Lands and Religion under the King of England, but forgot to infert the Royalties appending on Bembay, which reach'd as far as Versua on Salset, which Omission has been a Bone of Contention for both Parties ever fince.

MR. Cook, according to the Treaty, took Possession of the Island, in the King's Name, and forthwith began to fortify regularly, and, to save Charges of building an House House for the Governor, built a Fort round an old square House, which served the *Portuguese* for a Place of Retreat, when they were disturbed by their Enemies, till Forces could be sent from other Places to relieve them.

After the Fort was lined out, and the Foundations laid, Sir Gervas Lucas arrived from England with two Ships, but Affairs being fettled before he came, did not ftay at Bombay longer than January 1666, and left the Government of the Island in the Hands of Mr. Cook and his Council, the Presidency for the then Company, residing at Surat. Their Trade slourished, and increased wonderfully; but, after the Fort was sinished, the King sinding, that the Charge of keeping Bombay in his own Hands would not turn to Account, the Revenues being so very inconsiderable, he made it over to the East-India Company in Fee Tail, which continues so till this Time.

In building the Fort where it is, Mr. Cook shewed his Want of Skill in Architecture, where a proper and convenient Situation ought to be well confidered, for it is built on a Point of Rocks that jets into the Sea, where there are no Springs of fresh Water, and it stands within eight hundred Paces of an Hill, called Dungeree, that overlooks it, and an Enemy might much incommode it from that Hill, as we found by Experience in the Year 1689, when the Mogul fent an Army on Bombay. As for the Magnitude, Figure and Materials of the Fort, there is no Fault to be found in them, for it is a regular Tetragon, whose outward Polygon is about five hundred Paces, and it is built of a good hard Stone, and it can mount above one hundred Pieces of Cannon; and that is all that is commendable in it: But had it been built about five hundred Paces more to the Southward, on a more acute Point of Rocks, called Mendham's Point, it had been much better on feveral Accounts. First, it had been much nearer the Road for protecting the Shipping there, it had been farther off Dungeree Hill, it would have had a Spring of pretty good Water, which served the Hospital that was afterwards built there, and the Shipping had been better secured that lay in the little Bay between the Point where the Fort now stands, and Mendham's Point.

THEY

They went about building several other little Forts and Sconces in convenient Places, to hinder an Invasion, if any of their Neighbours should have attempted one. At Mazagun there was one, at Source one, at Sian one, at Mabim one, and Worlee had one, and some great Guns mounted on each of them. Notwithstanding the Company was at so much Charge in building of Forts, they had no Thoughts of building a Church, for many Years after Sir George Oxendon began to build one, and charitable Collections were gathered for that Use; but when Sir George died, Piety grew sick, and the Building of Churches was grown unsashionable. Indeed it was a long while before the Island had People enough to fill a Chapel that was in the Fort, for as sast as Recruits came from Britain, they died in Bombay, which got the Island a bad Name.

THERE were reckoned above five thousand Pound had been gathered towards building the Church, but Sir John Child, when he came to reign in Bombay, converted the Money to his own Use, and never more was heard of it. The Walls were built by his Predecessors to five Yards high, and so it continued till the Year 1715, that Mr. Boone came to the Chair, who set about building it, and, in five Years Time, finished it by his own Benevolence, and other Gentlemen, who, by his Persuasions, were brought in to contribute. The Company also contributed

fomething towards that pious End.

ABOUT the Year 1674, Prefident Aungier, a Gentleman well qualified for Governing, came to the Chair, and, leaving Surat to the Management of Deputies, came to Bombay, and rectified many Things that were amifs, and brought the Face of Justice to be unveiled, which before lay hid in a fingle Person's Breast, who distributed her Favours according to the Governor's Direction. He erected a formal Court, where Pleas were brought in and debated; but that Method lasted but a few Years, when Sir John Child came to the Chair the Court was done. Mr. Aungier advised the Company to enclose the Town from Dungeree to Mendham's Point, for securing the trading People from the Insults of their troublesome beggarly Neighbours on the Continent; but his Proposals were rejected, and that necessary Piece of Work was reserved

for Mr. Boone also. And happy it was for the Inhabia tants, that the Town was secured by a Wall, otherwise Connajee Augarie would have haraffed them with continual

Infults fince his War with the English began.

THE Name of Mr. Aungier is much revered by the antient People of Surat and Bombay to this Day. His Justice and Dexterity in managing Affairs, got him such Esteem, that the Natives of those Places made him the common Arbitrator of their Differences in Point of Traffick: Nor was it ever known that any Party receded ever from his Award.

THERE are no Dangers in going into Bombay Road, but one funk Rock that lies about half a League from the Castle. It is dry at low Water, and has a Chanel within it deep enough for the greatest Ships to pass. I never heard of any Damage done by that Rock, but to a small Ship called the Baden, which, by Carelessness, run on it

at Noon-day, aud was loft.

In the Year 1673, the Dutch East-India Company having an Eye on Bombay, fent a Squadron of Ships, with a little Army, to try if they could take it in amongst their other Conquests of India, but, on their landing, met with fo warm a Reception, that they were glad to get off with the Loss of two or three hundred of their Men, and so

left the English to the quiet Possession of it.

THE Governors proved tolerable good, till 1682, that Sir John Child spoilt it. The India Company knowing how to make use of King Charles's Necessities, made him fome Presents of Money, and he, in grateful Acknowledgments granted them Power to rob their fellow Subjects in India; but they used that Power to their own Destruction, for Mr. Child's Pride and Oppressions grew so intolerable, that even the Gentlemen in the Company's Service had not the free Exercise of Trade, and much less private Merchants. And he, trampling on the established Laws of England, by Advice of his Name-sake who governed the Company in Europe, by imprisoning and murdering their fellow Subjects, grew hateful to all.

In the Year 1684, he made his Brother-in-Law Mr. Ward his Deputy of Bombay, who defigned to fish in troubled Waters. Mr. Child being honoured with the Title

Thorburn

of Baronet, by the powerful Motive of the Company's Money to the King, he, at the same Time, got the Commission of General, which puft him up so, that he contemned all Laws human and divine. The military Gentlemen, who had made Contracts in England for their Salaries, tho' paid at twenty per Cent. Loss, yet to shew himself a good Oeconomist for his Master's Interests. Sent his Deputy Orders to reduce their Pay to thirty per Cent. less than it was before, tho' it was so small, that they could hardly bring both Ends to bear at the Month's End. That hard Pill the Sons of Mars could not fwallow. and fo bent their Minds on a Revolution: And having come to some Knowledge of Mr. Ward's tampering with the Sevajee to land on the Island, they detected some Letters of his to that Purpose, which gave them a Ground for a Revolt. The Sevajee indeed fent a Fleet of eighty Sail of small Vessels to land on the back Bay which faces the Ocean; but, on their trying to land fome Forces, they were warmly repulsed, and lost many of their Men, which made them draw off again in Confusion, and Mr. Ward, being confronted with his own Letters, and having little to fay in his own Defence, was made a Prisoner i and General Child's Faction was fent to Surat to him. The Islanders, taking the Government of the Island into their own Hands, chose Captain Kegwine Major of the Military, to superintend military Affairs, and one Captain Thorburn to overfee the civil.

General Child soon dispatch'd Letters to England, and gave an Account of the Rebellion, and King Charles dispatched a Frigat called the Phenix, for India, to demand the Restitution of the Island, and put it again into the Company's Hands. They arrived at Bombay, in September 1685, and shewed the King's Orders, with a full Pardon to all who yielded Obedience, which unanimously the Islanders did, but, for their own Security, drew up some Articles to be signed by General Child and Captain Tyrrel, who commanded the Phenix, one of which Articles was, That any Person that had a Mind to go for England, should have free Liberty, and a Passage on board the Company's Shipping, which being agreed to and signed, Captain Kegwine took his Passage on board the first Ship; but

Thorburn being a married Man, and having a small Estate, as well as a Family on the Island, could not so easily remove, but trusted to the Act of Grace, and the

Treaty they had made.

AFTER General Child had gotten the Reins of Government again into his Hands, he became more insupportable than ever. He erected a Court of Inquisition, and made an old Greek, one Captain Garey, Judge, who had condemned a Man to be hanged on a Tuesday, and the Man suffered according to Sentence; but, on Friday after, the poor dead Fellow was ordered to be called before the Court, but he would not comply with the Orders.

CAPTAIN Thorburn was the first that felt the Weight of Mr. Child's Displeasure. He got some Fellows to swear him out of his little Estate, who brought in forged Bonds for Sums borrowed from one-King, whom he never had any Dealings with, and found Witnesses to attest them. All that Thorburn had, was too little to pay the Sums, for which his Estate was taken from him, and himself put in Prison, without the Permission of one Slave to attend or serve him in Prison. His own Wife was not permitted to visit him, which hard Usage brought him into a violent Fever, that foon put an End to his Life. About two Days before he died the Goaler acquainted his Lady of his Danger, and she, with two small Children, went to the General, and, on their Knees, begged that a Doctor might be permitted to visit her Husband, but he was inexorable, and would allow no fuch Favour, only granted her Leave to be in Prison with him till he died, and she stayed but one Day and a Part of a Night till he expired. When the Tragedy was over, she was going Home to her distrest Family, but found her Slaves and Children removed into a little Out-house of hers, and the Doors of her Dwelling-house shut against her. The Lady had two Sifters married on the Island, and she, hoping to find Rehet from them, went to visit the eldest, but she met her at the Door, and told her she could have no Admittance, her Husband being liable to Proscription, if he admitted her into his House; and she believed the other Sifter's Husband durst not entertain her in his House. The poor Lady, full of Sorrow and Grief, being abandoned of all her Friends and Relations, went back to her distressed Family, and, having no visible Way of Support, had once some Thoughts of putting an End to her Miseries; but her Sisters, unknown to their Husbands, sent her some Relief by a trusty semale Slave in the Night, and a Letter, (that they defired her to burn as soon as she had read) wherein they promised to be affishing in the Maintenance of her and her Children, till the Almighty should think porper to deliver her out of the Persecution.

THE poor Ludy had both Beauty and Discretion enough to recommend her to the virtuous Part of Mankind; but none of the Gentlemen that wish'd her well, durst make Addresses to her, only one, who had the Command of a Ship in the Indian Merchants Service, as he had no Dependence on the General, nor his Masters in England. thought he could not well come within the Reach of their Persecution, so he courted her, and married her, but that was thought a capital Crime, and the General acquainted his Indian Owners, that without they discharged him their Service, they should also find the Weight of his Displeafure; and accordingly, to avoid Contests with his Excellency, he was discharged: But Grief put an End to his Troubles, for he died within a Year after his Marriage, and left the poor Lady another Child to take Care of, but left her above one thousand Pounds Sterl: of Stock for her and her Family's Support.

As the Phenix was in her Way to India, she called at the Island of Johanna, and there found an English Ship, called the Bristol, stopping some Leaks in her Bottom. Captain Tyrrel, by a dispensing Power from the King of England, seized her, and designed to have carried her to Bombay, in Company of a small Vessel that he had seized on the Coast of Madagascar. The Bristol sunk the third Day after they put to Sea, but the other came sase. The Bristol's Men were looked on as Pirates, and one Mr. Mews a Supercargo was arraigned before the General's Tribunal, where he himself fat Lord Chief Justice, and, after his usual Manner of bestowing opprobrious Names, he condemned Mr. Mews to lose all that he had in the World, and one thousand Pounds beside, and to he in Prison, at his own Charges, till the Fine was paid; but

Mr. Vaux, who was Judge of the Island in petty Affairs, shewed him the Weakness of his Sentence, and persuaded him to set the poor Man at Liberty, and order him a Pas-

fage for England.

WHEN Mr. Child first got his Commission to plunder, there were two of his own Council at Surat that were great Eye-fores to him, viz. Messieurs Petit and Boucher. They were Gentlemen of good Interest in England, and had great Remittances of Monies on the Company's Shipping coming yearly to them, to buy up Diamonds and fend Home. General Child let them know, that he expected half of their Commissions as a Perquisite to his Post, but they could not be brought to think fo: However they condescended, that if he would join his Commissions to theirs, which are much greater than his, they would be content to make an equal Dividend in the Commissions; but that Proposition he rejected, and was resolved to carry his Point by Fraud, and wrote to the Company in England, of those two Gentlemens ill Services relating to the Company's Affairs, tho' none knew of any, but Mr. Child himself. Those Gentlemens Friends in the Committee of the Company in England, acquainted them, by Letters over Land, of the Danger they were in, and gave them Warning to be on their Guard; and they accordingly took an House contiguous to the Factory, and, by Degrees, conveyed what they thought fit into their new Lodgings, but retained their old ones in the Factory. When the Shipping arrived, and the Company's Packet was opened, and read at the Council Table, Mr. Petit fat in his Place as fecond, and Mr. Boucher in his as fourth. When some few Paragraphs were read, one was to dismiss those Gentlemen from the Company's Service, and were forthwith ordered to withdraw, which accordingly they did, and went to their new Lodgings without the Factory. As foon as the Council broke up, Mr. Child fent Orders to confine them in their Factory Rooms; but Word being brought that they were not in the Factory, but their Doors were lock'd, he gave Orders to break them open, and secure all that was found in them for him, especially their Papers and Books; but they found nothing but a Bed furnished, and some empty Trunks. When Mr. Child understood that their Effects and Papers were removed, he raved like a mad Man, but to no Purpose, fo he perpetrated their Destruction by Fraud; but the Proscribed being well beloved by the Brokers, who were. always of Mr. Child's Cabinet Council, were timely advertised of his Plots, and prepared to counterplot him. He was the first that bribed the Mogul's Governors to join in Villany with a Prefident; but 'tis now a very common Piece of Policy at Surat, and has been often made use of against the English Company, since Mr. Child's Time: However, for a Sum of about four thousand Pound Sterl. he got the Governor of the Town to stretch his Commiffion, in pretending to distribute Justice, which is only the Cadjee's Place to do. He got the Governor to command the two Victims to meet at a Garden near the Town, and to deliver them up to the General, who was there with a Dozen of Grenadeers to receive them, and carry them on board of a Ship that lay ready to transport them to Bombay, and there to feed on the Bread of Affliction as long as they lived. He had suborn'd a Gentleman to draw up an Account, wherein the Delinquents were brought in Debtors to the Company one hundred and fourteen thousand Rupees, or, fourteen thousand two hundred and fifty Pound Sterl. and that Gentleman swore to the Account. The two Defendants being forewarned of the Plot, had given Bonds to their Mahometan and Heathen Friends, for above double the Sum that the honest General demanded; and it is against their Law to force any Person out of the Mogul's Dominions, who is indebted to his Subjects; but when Mr. Harris had fworn to the Account, (for that was the Gentleman's Name) the Governor ordered the two Gentlemen Defendants to be put in Irons, and to be delivered to Mr. Child; but their Friends protested against their going, till they had fatisfied their Creditors, and declared the Governor liable to make good all the Sums contained in their Bonds, if by Violence they were fent away. That Protest startled the General and Governor both; so the Gentlemen were delivered to their Friends, and the Governor was no Lofer by the General's Honesty: However they could not live in Quiet; so Mr. Petit bought a Ship to go a trading; R 3 whilft

whilst Mr. Boucher went to the Mogul's Court, or rather his Camp, to try if he could procure a Phirmaund or Charter to be under the Mogul's Protection; but the Company's Money had crept into the Secretary of State's Purse, that retarded Mr. Boucher's Affair some Time: But the General, being afraid of his Success, sent a Banyan from Bombay to poison Mr. Boucher. This Banyan being often about his Tent, got acquainted with his Cook, thinking him to be the properest Person to make use of that Affair; and, after some Discourses about General Child and Mr. Boucher's Quarrel, he told the Cook, that he had a Commission from the General to settle a Salary on him during Life, and the Sum of 500 Rupees in Hand, if he would poison his Master. The Cook seemed to like the Proposals, and bid the Banyan bring him the Poison and the 500 Rupees, and accordingly the next Day he did, and, on the Delivery of the Money, he gave him a Paper with some Powder of white Arsenick to mix with his Master's Rice, which is a common Dish there. Cook gave him large Promises of performing what he would, and so left him, and went to his Master with the Bag of Money and the Paper of Arfenick, and told him, that he had made a Bargain with General Child's Vakeel, or Attorney, to poison him, and told him the Terms he had agreed on, and shewed the Money and Poison. Mr. Boucher commended the Cook's Fidelity, and told him, that he would give him 600 Rupees to be honest, and a Maintenance during Life. And Mr. Boucher being bred a Druggist in his Youth, presently knew the Poison, and carried it to the Cautwal or Sheriff, and shewed it. The Cautwal used his utmost Endeavours to catch the Banyan, but he could never be found there.

MR. Boucher had been fourteen Months foliciting to procure his Phirmaund; but his repeated Petitions to the Secretary had no Effect: But he had an English Man, one Swan, for his Interpreter, who often took a large Dose of Arrack. Aurengzeb one Day had ordered his Camp to remove to another Place, and had got on Horse-back. Swan took hold of that Opportunity, and got pretty near the King, holding his Petition or Roca above his Head, and cried with a loud Voice in the Persan Language,

that

that his Master wanted Justice done him. The Mogul seeing him in an European Garb, ordered him to be brought to him, and ask'd the Cause of his Complaint. He answered, that his Masters had been so long at Court about procuring a Phirmaund to become a Subject of his Majesty's, to be freed from the Oppressions of the English Company, who were grown intolerable by the Connivance of his Majesty's Governors of Surat, and therefore conjured his Majesty, as he should answer before God at the great Day, to do his Master Justice, and grant him a Phirmaund. The King was startled at the bold Expressions, ordered his Secretary to get one ready for the Seal against the next Day, which was accordingly done, and Mr. Boucher had it delivered to him as soon as it was sign-

WHILE Mr. Boucher was at Court, Mr. Petit made fome Voyages into the Gulf of Persia, and going thither once, met with some Sanganian Pirates, who attack'd him. He defended himself bravely, and beat them off; but his Gunner string a Blunderbuss out of one of the Gun-room Ports, blew the Ship up, and the Sanganians took up those that were saved by Swimming, among whom was Mr. Petit himself.

ed, and then took his Leave of the Court.

The Sanganians carried their Prisoners to Baet on Guzerat, and laid a Ransom on them, which Mr. Petit agreed on, and sent Letters to his Friends at Surat to pay the Money: But General Child hearing of Mr. Petit's Missortune, and where he was, dispatch'd a Banyan to Baet, to persuade the Pirates not to part with their Prisoner under twenty-five thousand Pounds, Sterl. and so they, hearkening to the Banyan, would not stand to the stipulated Ransom of sive thousand Pounds. Mr. Petit stayed about six Months their Prisoner, and then died through Grief, and the ill Treatment he had received by Mr. Child's Persuasion; but the Pirates getting no Ransom, curst the General for his Counsel.

In the Year 1683, the Dutch dispossessed the English Company of their Factory of Bantain, on the West End of Java; and the English having a Mind to regain it by Force of Arms, built several Ships between sixty and seventy Guns, so that in the Year 1685, they had a Fleet

ready victualled, and mann'd with seven or eight thoufand Men, to the Number of twenty three Sail of Line of
Battle Ships, which Expence, and the continual Craving
of the Court, brought their Stock very low; yet fince the
Maw of the Court was not enough crammed, the King
laid Embargoes on the Fleet from Time to Time, for nine
Months, and then the Dutch Ambassador had Orders to
present his Majesty with one hundred thousand Pounds,
if he would command the Company not to use Violence.
He snapp'd at the Bait, and deseated the Design to all In-

tents and Purposes.

THE Company having fuch a Number of great Ships on their Hands, were obliged to fend them abroad; but having no Stock to employ them, ordered the General and Chiefs of their Factories in India to borrow what Sums they could on the Company's Credit, from the Indian Merchants, to lade their Ships Home, which accordingly they did, and what they could not lade Home, they were to employ by Freights in India. And I saw a Letter from the Governor of the Company in England, intimating, that when they had got as much Credit of the Mogul's Subjects as they could, then they would pick Quarrels with the Creditors, and put a general Stop to their Trade, which was accordingly done; for, in 1686 and 87, the Surat Merchants traded briskly by Sea to Mocha Perfia and Bassora, to the Westward, and to Bengal, Atcheen, Malacca and Siam, to the Eastward. The General granting Paffes to all who required them, then, about the latter End of the Year 1687, he laid down a Complaint and Grievance before the Governor of Surat, and demanded Redress and Satisfaction. The Articles of his Grievances I faw in a printed Copy, and were as follows, in thirtyfive Articles.

I. "LAST Year a Ship of Molab Abdel Gafoar's coming from Juddah, in her Return met with two Danish Pirates, who made a Prize of her. The News coming to Surat, the said Molab Abdel Gafoar, by Persuasions of Meir Nazam, and other Merchants, made their Complaints to Salabat Caun (then Governor) and other Officers of Surat, saying, the English belonging to Surat, had taken his Ship, at the same Time sending his At-

torney to Court, to complain to the King, who or-" dered the Governor, &c. Officers of Surat, to enquire " into it, and do Justice accordingly. In this Affair, " by Bribery, and difgracing me to the King and his " Subjects, as also the Dutch, French, and other Nations, " making them believe it to be true, for which Difgrace I " am not able to trade in these Parts; but I hope the "Difgrace will light on him, that hereafter no fuch Scan-" dal may be put on me, or any other, we having traded " here these eighty or ninety Years, but never before ac-" cused as Robbers, but daily enriched the Port of Surat. II. "THE Complaints of Mulab Abdel Gafoar have been " much to my Prejudice, by reason I could not clear my " Money out of the Custom-house, nor ship my Goods " for Europe, which were feized and hindred, which " hath made me leave the Port and Trading, and retire " to Bombay. I have by me thirty or forty Lack of "Rupees in Money and Goods in a Readiness; if you " please to fend any Body, you may be certified of the "Truth. Confider the Loss I am at in the Use of my

"Money, Damage of my Goods, and detaining my Ships a Year. I desire your Answer.

III. "Mulab Abdel Gafoar's disgracing me, makes Peo"ple afraid to trust me, my Credit being lost by his
talse Reports, having twelve Ships laden with Goods,
which I designed to have sent to Surat, there to have
provided Goods, and relade for Europe; but his disgracing me is the Occasion of the great Charges I am
at, my Ships wintering in these Parts, and my Goods
lying on my Hands, we Merchants trading for Prosit,
which Hindrance hath not only been a great Loss to
the King in his Customs, but to me, which I must
answer to my Masters.

IV. "MR. Petit and Mr. Boucher being indebted to the "Company feveral Sums of Money, I would have called them to Account for the fame; but they, like Traitors, went to the Governor Cortalab Caun for Protection. As for Mr. Petit he is dead, and gone to the Devil. Mr. Boucher still remains at Surat. I demand him, his "Wife, Child, or Children, Family, and all English Men belonging to him, with their Effects, that they be "delivered"

delivered to me, and that he may not make his Escape 66 from Surat.

V. "FORMERLY fuch Goods as we brought from the " Malabar Coast, Mocha, and other Parts, which were of for Europe, and not to fell here, we had Liberty to " bring them ashore at Swally, to clean them, and ship " again, without paying Custom; but the Governor " Cirtalab Caun, in his Time, forced us to pay Custom " for those Goods. My Demand is, that what he took

" more than the former Customs, may be restored, and

" he do not the like again.

VI. Or late Years we bring more Money than for-" merly, which hath much enrich'd the Port, of which " the Governor did acquaint the King, who was pleafed " to take no more than two per Cent. we paying no more " for many Years. Of late the Governor of Surat did " write to the King, to make us pay three and one half " per Cent. for Money as well as Goods, which has been " a great Prejudice to our Trade. My Defire is, that we may pay no more than formerly, that the former "Overplus may be repaid. Which Exactings made Sala-" bat Caun over-rate our Goods in the Custom-house, to our great Damage.

VII. "FORMERLY we never paid Custom for Apparel "or Provisions, but of late Salabat Caun forced us to pay " Custom for them. My Desire is that may be repaid, and, for the future, no more Trouble on that Ac-

count.

VIII. " WHEN our Goods came out of the Country, if robbed by Thieves or otherwife on the Road, it is the King's Order, that the Governors and Officers make good all Damages, or else the King to satisfy us himself. " Few Years fince our Goods coming from Amadabant " and Durrimgum, were robbed in the Way to Surat. We have petitioned the Governor of Surat for Satisfac-"tion, but never obtained any. My Defire is, that the King order Satisfaction to be made for the Lofs we " fustained, being great and considerable.

IX. " SEVERAL of the Natives are indebted to us, of " whom we can get no Satisfaction, having feveral Times or made Complaints to the Governors, where they refide,

ee for

of the EAST-INDIES.

" for their Affistance, but, as yet, could have no Redress " from them. Our Defire is, that all Governors and " their Officers may be affiftant to us in recovering our 66 Dehrs.

X. " WE bring more Treasure into the Country than " any other Nation, which is carried to the Custom-house, " when cleared from thence, we fend it to the Mint to " be coined; but the Officers, for their own Interest, de-" lay the Coining, to the Hindrance of the Dispatching " our Business; for, if our Cash was coined in Time, we could have our Investments out of the Country, and " lade our Ships according to the Monsoons or Season of " the Year. Our Request is, that, for the future, the " Coiners may not delay the Coining, and that our Trea-" fure may be coined apart, for its more speedy Perfor-" mance.

XI. " AT the Arrival of our Ships, when unladen, we " carry our Goods to the Custom-house, where they are " thrown up and down very carelesly, where they are brok-" en, damaged and stolen. Our Request is, that we " may have a Ware house apart by that of the Dutch; to " put our Goods in, that we may be no further Sufferers, "that, when we dispose of our Goods, or send them to " our Factory, that the Customer take Account of the "King's Customs, clearing them without farther Mo-" lestation.

XII. " FORMERLY when we cleared our Treasure, " &c. Goods from the Custom-house, we used to make " up the Account of our Customs at the latter End of the "Year, and then paid it. Of late Years the Officers of " the Custom-house daily and monthly fend to our Bro-" ker, demanding the Custom, for which Reason we are " forced to fee the Officers not to affront our Broker, " which has been much to our Prejudice. Our Request " is, that they demand not the Customs till the End of " the Year, as formerly accustomary.

XIII. "WHEN Gaffadean Caun was Governor of Surat. " by Order of the King, the City was walled, at which "Time we had a Garden near Brampore Gate, about " which we built thirty-four Shops, Stables for Horfes, " a Summer-house, and several other convenient Places, " all firm Buildings, which coft to the Amount of twenty" five thousand Rupees; when the Wall came near our
" Garden, our Buildings were broke down, and our
" Garden spoiled. We petitioned the Governor for Satisfaction, he promised to allow us the Charges out of
" the King's Treasury; but we have not received any
" Satisfaction. We demand Satisfaction for the said

** Charges.

XIV. ** FORMERLY, when our Goods came from
** other Parts to Surat, we paid no more than due Custom,

and shipped them for Europe, or other Places, without any farther Trouble. Of late Years the Officers of those Places, from whence our Goods come, put us to

"much Trouble in demanding the Governor's and Officers of Surar's Receipts of us, and many times detain

our Goods on that Account, by which their Proceedings our Ships sometimes return empty, and sometimes are

forced to remain in the Country, which is a great Loss to the King in his Customs, as well as to us. Our

"Request is, that, for the future, such Receipts may not be demanded of us, but that we may have the same

" Liberty as formerly.

XV. "WHEN our Goods are in a Readiness, we send them to the accustomed Place to be shopp'd, with a true Invoice of the Contents of the Bales. Formerly they used to make Choice of one or two Bales, and if they found them according to Invoice, then to shop and clear the rest, without any farther Trouble. Of late the Customer, &c. Officers, for their Interest, and to delay Time, open most of our Goods, which is not only a great Charge to us in repacking our Goods, but

" also our Goods are damaged. Our Desire is, that they may be shopp'd and shipp'd according to Invoice, without any farther Trouble, as accustomary.

XVI. "Our Sloops and Boats coming from Swally to the Custom-house, the Meerbar used to search them, if

" empty, cleared them, without any farther Trouble. "Of late Years the Meerbar, &c. Officers will not clear

them in three or four Days, which is a great Hindrance to us in the Dispatch of our Business. Our Desire is,

" they

** they may be fearch'd and cleared as formerly, without es Delay.

XVII. " SOEMETIMES Merchants that buy our Goods. "break, plead Poverty, that they have not wherewithal " to pay us; applying ourselves to the Governor, &c.

" Officers for Justice, and their Assistance, we can have

" no Redress. Our Desire is, either that the Governor, " &c. Officers order Payment to be made, or to fatisfy

" us out of the King's Customs, that we may be no

" longer Sufferers by his Subjects.

XVIII. "Sometimes we fend our Brokers or Servants " to the Governor, &c. Officers, as our Affairs require,

" who cannot be admitted without bribing the Servants " of faid Governor, &c. Officers. We defire it may be

" remedied for the future.

XIX. " Our Horses that come from Persia, Bassora, &c. at their Arrival we used to send them to our Stables. " without farther Delay. Of late Years at their Land-

ing are carried to the Governor, his Seal put about their

" Necks, and ourselves not trusted to use or dispose of "them. Our Desire is, that we may either ride them,

" or dispose of them as formerly.

XX. " THE Governor, &c. Officers often fend to us " for broad Cloth, Sword-blades, &c. in Civility we

cannot deny them, but when we fend for the Money.

"they deny the Payment, and abuse our Servants, by which we are Sufferers. Our Desire is, that, for the

" future, if the Governor, &c. Officers defire any Goods,

"they may pay for them before they carry them away.

XXI. "Goods provided at Agra, Amadabant, &c. " coming to Baroach, the Governor forces us to pay

" eighteen per Mill. Custom, which is contrary to the "King's Order, for we ought to pay but in one Place,

" as the Moors and Banyans. Our Desire is, to be cleared

" of that Custom, that at the Arrival of our Goods at " Surat, they may be fent for out abroad, without farther

"Trouble, paying the King his due Custom. We defire

" the same Goods shipp'd at Baroach, Cambay, &c. that

our Ships may not lose their Passage to Europe.

XXII. " AT the Arrival of our European Ships, we fend our Goods to the Custom-house, when cleared, "carry them to the Factory; fometimes we have present "Vend, and sometimes we send them to other Places, as "we think convenient, and for our Interest; in case we send our Goods to any other Place, within the Term of fix Months, then to pay half Custom for the said Goods, but, if kept a full Year, then to pay full "Custom. Sometimes we send to Swally more Goods than will lade our Ships, the Remainder we dare not keep there, for Fear of Fire or Thieves. Our Request is, that for all such Goods as have paid Custom, we may freely bring them to Surat, keep them there for our next Shipping, and ship them off without farther

" Trouble or Demands.

XXIII. "Our Servants, English, Gentows, and others, many times we send up the Country, for the speedier dispatching of our Affairs. When we send to them for our Accounts, being at a Distance, and out of our Reach, like to Mr. Petit and Mr. Boucher, they go to the Governors for Protection, by which Means we cannot call them to an Account, to our great Loss, and farther Proceeding against them. Our Request is, that whatever English Man, employed in your Service, without our Leave and Discharge, that they, with their Effects and Estates, be delivered to us, that they may not be protected, but that we may proceed against them, as we think convenient.

**XXIV. "It is near ninety Years that we have traded here. At our first Coming, the King granted us a Piece of Ground for a Bunder to repair our Ships and Vessels. Of late Years Meer Nasjam hath forced it from us, and made it a Garden. We are destitute of a Place for repairing our Vessels, and other Conveniencies. Our Request is, that we may have the same Ground as formerly, or some other, near the Water Side, fitting our Occasions.

XXV. "FORMERLY we used to pay for each Bale of Indigo, two and an half Rupees per Bale, without opening it. Of late Years the Officers open it, valuing it at their Pleasure, damaging the Goods, which is a great Loss and Charge to us in repacking it. Our

of the EAST-INDIES. 271

Defire is, that, for the future, it may not be opened,

" paying the Custom as formerly.

XXVI. "THE Governor, &c. Officers buy of us, for the King's Account, Iron, Guns, Lead, giving us forme

"Money in Hand. When they are turned out, and others come, when we demand the Remainder, they de-

"thers come, when we demand the Remainder, they delay the Payment of the Money, faying the King did not

"want our Goods, that we may take them again, fometimes after they have kept them one or two Years.

" Our Request is, that whatever they buy of us for the

"King's Account, we may be paid before they take them from us, and whatever Goods we have that the King

" has no Occasion for, we may dispose of them at our

" Pleasure.

" Corn. The Mogul's Fleet often winters there, which

" makes Provisions scarce and dear. We are in Want of

"Supplies from Surat, and other the Mogul's Ports. When we fend to these Places, the said Governor and

" Officers will not let us have any without giving them

"one and one Fourth per Cent. Our Request is, to be free of this Tax, that we may have Liberty of sending

" what is necessary for Supply of the King's People and

" faid Island.

"XXVIII. "A Ship, with her Cargo, to the Amount of two hundred fifty-four thousand Rupees, came out

" of England without our King's Licence, which came

" to Surat. Our King's Orders came to us to feize Ship and Cargo, which accordingly we did; but Salabat Caun

"then being Governor, forced her from us, and deliver-

" ed her to Mr. Boucher. Our Desire is, the said Ship

"may be re-delivered us, that Mr. Boucher and his "Broker give us a just and true Account of the Re-

" mainder of the Cargo, and that the Governor take Care

" it be not squandred away by them.

" but one Custom for their Goods, without farther Mo" lestation, and, when they pay it, to take a Discharge.

"Of late Years, the Officers have forced us to pay double "Custom, besides their Perquisites which they have de-

"manded, which has been a great Hindrance to the

"timely Arrival of our Goods. We defire we may not

be forced to pay more then accustomary.

XXX. "We formerly rented a Piece of Ground for Stables, on which we were at confiderable Charges in building and Reparations. Meer Nassam, by buying it, deprived us of it. We desire he may satisfy us the

" faid Charges.

XXXI. "Some Years fince we lost an Anchor at the River's Mouth, which Mirza Moffum's People took up. We have often demanded it, offering to defray the Charges he was at, but cannot get it. Our Re-

" quest is, that his Son Mirza Mahomud Araff deliver

" the same, we paying the Charges they were at.

XXXII. "At the Arrival of our Ships, they fend the Boat up with News. At the Custom-house they foo her a whole Day before they will let our People come ashore with Letters, which is a great Impediment. Our Request is that they may not be

to our Affairs. Our Request is, that they may not be hindered for the future, but suffered to land as soon as

" they come to the Custom-house.

XXXIII. "As concerning my Bengal, we hear several Ships have been taken and burnt, in which Affair we

are not concerned, neither do we know whether Peace

" be concluded there or not, Our Request is, that the King iffue out his Orders, that no Person question us,

or make Demands on us on that Account.

XXXIV. "Some Years ago the Sedee, with the King's "Fleet, wintered at Bombay, in which Time fome of his

"People murdered two of our English Men, which made

" our Men resolutely resolve to revenge their Death, but, with great Persuasions were pacified, being promised

Satisfaction. We acquainted the Governor of it, who ordered the Murderers to be imprisoned; but, three

Days after, they were cleared by the Sedee. Our Re-

quest is, they may be delivered, that we may prosecute them, and that Justice may be done.

XXXV. "WHEN we are minded to take our Pleasure out of the City, altho' we return before the usual Time

of shutting the Gates, the Porters shut them against us, demanding Money before they will let us enter the

"City. Our Request is, that Order be given by the

Governor,

of the EAST-INDIES. 273

Governor, that we be no more affronted by those Peo-

" ple."

THESE Grievances were the Foundation on which General Child built a War with the Mogul, without ever fending them to Court to know the King's Pleasure, but, without declaring War, feized his Subjects Ships whereever they were found, altho' they had the Sanction of his own Passes. If the fourth Article be Christians, the Mahometans and Heathens abhor it. The seventeenth and twenty third are unjust, as well as the twenty eighth; and the thirty and thirty first were but weak Arguments to help to support his Complaints and raise a War, that cost his Masters above four hundred thousand Pounds before they could lay it, besides the Loss of their Credit with the Mogul and his Subjects, which, to this Time, is not quite recovered. Or by what Rule in Policy could Sir Josiah or Sir John Child think to rob, murder and destroy the Mogul's Subjects in one Part of his Dominions, and the Company to enjoy a free Trade in the other Parts? or how they could expect that he would stand neuter, let Politicians answer them, and I'll proceed.

THE General having such a Number of great Ships on his Hands, and little Employment for them, fent them to Mocha, Persia and Bengal, where the Suraters had sent theirs under the Protection of his Passes. Captain Andrews in the Charles II. went to Mocha, and fet up the King of England's Flag on his Factory, and there he seized two English Ships, one from England, called the Streights Merchant, commanded by Captain Bear, and another belonging to Mr. Samuel White at Siam. She was commanded by one Captain Wren, whom they killed in his Cabbin, because he would not deliver his Ship up voluntarily. There was but little of their Cargoes on board of the Ships, so they might as well have let them alone: However such Doings displeased the Governor and Merchants of Mocha. and they had a Design to force Captain Andrews to restore the Ships, but he suspecting as much, fled on board, and

left his Colours flying on his Factory.

HE foon after left Mocha, and carried his two Prizes with him, and Mr. Clive, Supercargo of the Streights Merchant, got Bills for his Stock, payable at Grand Caire.

except about fixty Bales of Coffee that he carried with him to England, where it fold very well, and the Company were obliged by the Law to make good all the Ship's Cargo pro rata, as those fixty Bales fold for, which amounted to thirty two thousand Pounds. The Brifiel's Cargo was also made good to her Owners, with the Ship that was taken at Johanna by the Phenix, which came to fixty thousand Pounds. And the Little Betty, that was also taken by the Phenix in her Way to India, cost them twelve thousand Pounds, tho' she and her Cargo were fold at Bombay for less than fix hundred Pounds. The Owner of that Vessel was one Mr. Hastewell a Quaker. and a fubstantial Merchant in London, who arrested Captain Tyrrel going off the Exchange. The Captain proferred King James for Bail, but the Quaker would not accept of him, but was content to accept of Sir Joseph Herne, who became Bail.

THE Charles, Cefar, and Royal James and Mary way-laid the Surat Shipping, and brought in fourteen Sail to Bombay, where I faw them lying in the Year 1688, and yet no War with the Mogul, only with the Inhabitants of

Surat, whom he threatened to humble.

In Ottober 1688, he went to Surat Road, in the Royal James and Mary, with three or four other Ships of Countenance, to try if he could bully the Governor, and frighten the Merchants into a Compliance of losing their Estates, but was disappointed in both. He staid there till the Beginning of January 1689, and then lest Surat in an Huff, and brought all the English Ships along with him, except the Ship Adventure, whom the Phenix had forced over the Bar, when she was lying at the River's Mouth, taking in a Cargo for England, under the Protection of Mr. Boucher's Phirmaund, which was the Grievance complained of in the 28th Article: However, her Supercargo dying, the Ship's Bottom was eaten up with Worms in the River, and Part of the Cargo remained many Years in Mr. Boucher's Possession.

On the General's Passage to Bombay, he met with a Fleet of Vessels that were carrying Corn to an Army of the Mogal's that lay at Dunder-rajab-pore, about sourceen Leagues to the Southward of Bombay. That Fleet he also seized,

feized, and carried to Bombay, tho' against the Opinion of most of his Council. Before this Seizure he ask'd the Opinion of some Sea-officers, and one Captain Hilder, being the eldest, advised him not to meddle with the Corn Fleet, because it would straiten the Army, and force them to look abroad for Provisions, where it might best be procured, and perhaps might affect Bombay, which was in a great Measure beholden to their Neighbours for Sustenance and Fire-wood. The General took him up with scurrilous Language, called him Coward and Fool, and bragg'd, that if Sedee Yacoup (which was the Mogul's General's Name) should dare to come with his Forces on Bombay, he would blow him off again with the Wind of his Burn.

COWARDS are generally flout when Dangers are at a Distance, and so was our General, who had never seen a Sword drawn in Anger, and consequently very ill acquainted with War; and when it came to his Door, none was ever so consounded and dejected as he was, as appeared by his Conduct in that War that he so soolishly brought

on himfelf and his Country.

When the News came to Sedee Yacoup, that his Fleet, with his Provisions of Corn and Cloth, were feized and carried to Bombay, he fent a civil Letter to our General to discharge his Fleet, protesting, that as he had not meddled in the Affairs between him and the Suraters, he would continue neuter, unless he was forced to do otherwise: But our General gave him an insolent Answer, and

the Fleet was unladed at Bombay.

SEDEE YACOUP fent again to desire the Delivery of his Fleet in fair Terms, otherwise he would be obliged to come with his Army, and quarter on Bombay, where his Provisions were detained, and that if his Fleet was not set at Liberty before the 11th of February, which was near at hand, he would certainly be on Bombay the 14th, but still received uncivil Answers, he performed his Promise to a Tittle, for that very Night he landed at a Place called Source (about four Miles distant from the main Fort) with twenty thousand Men at his Back.

Our General's Security had made him neglect providing for receiving such Guests, trusting to the Reputation of his Forces, who were greater then than ever they had been before, or ever were fince that Time, and he had small Ships enow, had they been placed in proper Places, that might certainly have hindred his Landing, and forced him Home again; but all those necessary Preparations were neglected, and the Sedee landed at Mid-night, and the Redoubt where he landed, fired a great Gun to give the Alarm, and so deserted their Post, and the Sedee took Possession of it. At One in the Morning the Castle fired three Guns to give the general Alarm, which brought such Fear on those that lived securely in their Houses without the Castle, that the poor Ladies, both white and black, ran half-naked to the Fort, and only carried their Children with them; but they were all obliged to wait without

the Wall, till Day-light relieved them.

NEXT Morning the Sedee marched to Mazagun, a small Fort of fourteen Guns, and about a random Shot distant from the Castle. On the Enemy's Approach, that Fort, tho' situated on a Point of Rocks, where the Sea defended three Quarters of it, was also deserted in such Precipitancy, that eight or ten Chests of Treasure, which generally contain one thousand Pounds each, and four Chests of new Arms, were left behind, tho' the Seamen that were fent in Boats to bring them off, proffered to carry them along with them; but the commanding Officer thought them not fit to be trusted with Money and Arms. and so they were left for a Present to Sedee Yacoup, with. fourteen Cannon, two Mortars, with some Powder, Shot and Shells: But why that Treasure, and those Arms and Ammunition were deposited in Mazagun, sew could account for, and the Reasons why they were left to the Enemy were as wonderful; but it was plain, that the old Way of Fishing in troubled Waters was known at Bombay, and the Officer was never called to account for his Overfight.

SEDEE YACOUP finding no Opposition, sent a Party of Men towards Mahim, to plunder the poor Peasants, and to take that Fort, which, he thought, might be deserted as the rest had been, and was not in the least out in his Conjecture, for the Garrison had embark'd in Boats, and came by Sea to Bombay, before they saw an Enemy.

The

of the EAST-INDIES. 277

The Sedee taking Possession of Mazagun, hoisted his Flag

there, and made it his head Quarters.

The following Day some of the Enemy appeared on Mazagun Hills, which grieved our General's righteous Soul to see Insidels come so near him in an hostile Manner. He called a Minion of his own, one Captain Pean, who was no better Soldier than himself, and ordered him to take, two Companies, each containing about seventy Men, and march to those Hills, and drive the Enemy out of his Sight. He ordered one Monro, who had been a Soldier at Tangier, to be his Lieutenant. In Tangier he had received a Wound in his Heel, that spoiled his Running, and accordingly they marched in good Order within Shot of the Enemy, who shewed their Heads above the Surface of the Hill, but did not offer to advance or expose their Bodies. Several Gentlemen Volunteers took their Arms,

and accompanied the little Army.

THE Lieutenant advised the Captain to march up the Hill in Platoons, to separate the Enemy's Forces. The Captain took it as an Affront to be advised, told his Lieutenant, that, when he had the Command in his own Hands, he might use it as he thought fit, but, as it was intrusted to him, he would use it according to his own Mind, and fo ordered his Men to spread as much as they could, and when they faw the Enemy open in the Plain, to discharge all at once amongst them, which, he said, would terrify them. Monro, opposed his Scheme, and told him of the Danger he would bring himself and them into, if the Enemy thould attack them whilst their Arms were reloading; but nothing could diffuade him from his Project, and so commanded his Men to fire as he had directed. The Sedee's being ten to one in Number, and better Runners than our Men, and better acquainted with close Fighting with Sword and Targer, took hold of the Opportunity, and advanced with all their Speed, which the Captain perceiving, betook himfelf to his Heels, and was the foremost Man to the Portuguese Church, where he took Courage to look behind him, to fee what was become of his Men. Poor Monro thinking to ftop the Enemy's Carreer by a Part of the Wing that he commanded, found himself deserted by all, but thirteen teen or fourteen frout Fellows, who were foon furrounded

by the Enemy, and cut to Pieces.

PEAN had not stopt at the Portuguese Church, had he not found a Party of one hundred Men that lay there ready to support or receive him, as his Case should require. He was a Fellow as well made for running as any I ever saw, and was so much in the General's Favour, that he had not so much as a Reprimand for his Cowardice and Misbehaviour. This Relation I had from a Gentleman Volunteer, who kept always near the Captain while he could keep Pace with him.

When the General left Surat, there were several Gentlemen in it, some in the Company's Service, and some private Persons, who were all imprisoned, and put in Irons, except Mr. Boucher and his Dependants, who were protested by his Phirmaund. Those imprisoned were scurvily used, being obliged to pass thro' the Streets with Irons about their Necks, for Spectacles to please the Mob. Captain Johnson and Captain Yeaman, tho' particular Merchants, were obliged to act their Parts in the Tragi-comedy, and continue Prisoners, where Captain Johnson died, but Captain Yeaman got his Liberty at the End of the War, which was about the Beginning of June 1690.

I WILL now return back to the Year 1686, when Sir Folin Weyburn was sent from England, with a Commission of Judge Admiral from the King, and he had likewife another Commission from the Governor of the Company (which they made him believe was also from the King) to condemn and hang thirteen of the Inhabitants of St. Helena, where, in a Tumult caused by the Oppressions of the Governor of that Mand, one Johnson the Second was killed. Sir John Weyburn took his Passage to India on board the Ship London, and, in his Way, called at St. Helena, and hanged up the thirteen profcribed Persons, without Form of Process, for which the Company paid dear afterwards, and so had Sir John, had he lived; but he finding the illegal Proceedings of Mr. Child to be insupportable, and meeting with many Affronts (from that Man without Manners) died at Rombay about two Months before the Sedee came on it. He was much lamented by all honest Men that knew him. He was Captain of the Happy Happy Return who accompanied the Gloucester when she was bringing the Duke of York to Scotland, and lost by the Way. It was Captain Weyburn that sent his Barge to wait on the Duke, and brought him safe on board of the Happy Return, who carried him forward to Scotland, for which good Service he was knighted. He was ever after a great Favourite of King James, who seeing he could not be brought into his Measures, put that Employ on him, to dismiss him with Honour.

AND now the Scales being Master of the whole Island. except the Castle and about half a Mile to the Southward of the Castle, he raised Batteries on Dungeree Hill, which overlook'd the Fort Wall, and disturbed the Garison very much; then he put four great Guns in the Custom-house, commonly called the India-bouse, and raised a Battery at the Moody's House, within two hundred Paces of the Fort, and another in the Lady's House that he had been fo unkind to, fo that it was dangerous to go out or in at the Castle Gate, till we got up an half Moon before it. All Men were then prest into the Company's Service, and I amongst the rest. We past the Months from April to September very ill, for Provisions grew scarce by the Addition of three thousand Sevajees that were employed as Auxiliaries in the military Service of the Company. When the Winter Months were over, at September we went to Sea with our small Ships, to cruize on the Mogul's Subjects, and had pretty good Success. I was employed in that Service, and had the Command of a small Privateer of feven or eight Tuns, with twenty fighting Men, and fixteen Rowers. In three or four Months I brought nine Prizes into Bombay, laden most with Provisions and Clothes for the Enemy's Army, which was now increased to forty thousand, but we were not allowed any Plunder, but were rather plundered ourselves, for when we brought our Prizes in, our Chests were severely fearch'd, and if we had faved any of our Pay, it was feized for the Company's Use, as Money we had found in the Prizes, which made us careless in pursuing the Enemy at Sea. Except when Hunger pinch'd we never look'd out for Prizes, by which Indifference of ours many of the Enemy escaped that we could have taken.

THE ill Success we had ashore with the Enemy, made our General fick, and, in December, he dispatch'd two Factors to the Mogul's Court, with a Surat Merchant. called Meer Mezamie. He was our Friend, and had fome Interest at Court. They went under the Name of the English Ainbassadors. Mr. George Weldon was first in Commission, and Abraham Navaar a Jew was second. In fifteen Days they arrived at Court, being then at Jehanabant. They were received but coldly; but, about the Middle of April, by the special Assistance of Presents to the Officers at Court, they were admitted to Audience. but were brought to Aurengzeb's Presence after a new Mode for Ambassadors, their Hands being tied by a Sash before them, and were obliged to proftrate. The King gave them a severe Reprimand, and then ask'd their Demands. They first made a Confession of their Faults, and defired Pardon, then that their Phirmaund which was forfeited, should be renewed, and that the Sedee and his Army should be ordered off Bombay. Their Submission he accepted of, and pardoned their Faults, on Condition that Mr. Child should leave India in nine Months, and never come back again, the Phirmaund to be renewed, on Condition that Satisfaction should be given his Subjects on account of Debts contracted, Robberies committed, and Losses and Damages made good, and, on Security given for the due Performances of these Premisses, the Sedee and his Army should be ordered off the Island. In Fanuary General Child died, which much facilitated their Affairs, but it was kept secret at Court, till they knew how the King would order the Affair about him. In March Meer Mezamie died also, and, it was supposed, was poisoned by some Enemies, contracted by his good Services to the English. When he was given over by Physicians, our Ambassadors, sent to know what he had done with fifty thousand Rupees, he had received for secret Services. He answered, that he was forry that ever he had meddled in their Affairs, for he had served them even with his Life, and yet they were not contented, for what Use that Sum was put to, he durst not divulge.

When our Affairs were in to bad Circumstances at the Mogue's Court, the Dutch Company had one Mr. Baroon

their

their Ambassador there, who designed to impose on Aurengzeb, who, he thought, was ignorant of European Affairs. The News of the Revolution in Britain being arrived in India, when he had an Audience of Aurengzeb, he began to magnify the Power and Grandeur of his Country, and villify the English. The Mogul seemed to be pleased with his Discourse, to encourage him to go on. He told, that the English were but contemptible in Comparison of his Sovereigns, for they were forced to fend the English a King to rule over them, and that if his Majesty would exclude the English from the Trade of his Dominions, the Hollanders would carry it to a much greater Height, and enrich his Treasury, and the English would not know where to get Bread. The Mogul gravely anfwered, That if his Masters were so much superior to the English in Power and Riches, they might easily drive them out of India, and engross all the Trade of his Countries to themselves, and commanded him to tell his Masters, that he expected it from them. Then the Ambaffador excused himself, and told, that he could act nothing in that Affair till he received Orders from Holland. Aurengzeb then reprimanded him, and shewed him wherein he had lied, for, fays he, about seventeen Years ago, the King of France conquered most of your Country in a few Days, and that it was the English, and not the Power of Holland, that repelled him, and that if England did not hold the Balance of Power, either the Emperor or the King of France could conquer it in one Campaign.

THE Ambaffador knew not how to answer to those Truths: But, being sent to solicit some Indulgence in their Trade, he could obtain none, and so lest the Court

distatisfied.

AFTER our Ambassadors had obtained Pardon, they began to be respected, and had Liberty to take their Diversion abroad, till a new *Phirmaund* was drawing up, which, according to the Method of the eastern Courts, took up some Time: However Orders were sent to the Sedee to forbear Hostilities, and the English had the same Orders, so that frequent Visits past between the Sedee's People and ours. And, during the War, about sixty Europeans of several Nations, had deserted from us, and

took Pay of the Sedee. The Reason they gave for their Defertion, was ill Usage they had received from some Irish Officers; yet most of them returned after the War, on Promise of Pardon.

The Phirmaund being ready, and the required Security given, Sedee Yaccup left Bombay the 8th of June, 1690, but he also left a Pestilence behind him, which, in four Months Time, destroyed more Men than the War had done, and, for Joy, made a malicious Bonsire of his head Quarters Mazagun Fort.

Now we may fee the Mogul's Stile in his new Phirmaund to be fent to Surat, as it stands translated by the Company's Interpreters, which runs thus in the printed Copy annext to Sir John Child's thirty-five Articles of Grievances.

THE Occasion of your writing to me, was your being in Fault of all these Troubles, that you have repented of what you have done, that you made several Complaints against former Governors, all which I have here from several of my Umbras, and the several Abuses received from them, and their Officers, all which you should have acquainted me with, before you proceeded so violently. Having acknowledged your Error, and desired Pardon, I do not only grant your Request, pardoning what is past, but granting you a Phirmaund according to your Desire, and have ordered Assit Caun to forward it to the Governor of Surat, with such Particulars as he will acquaint you with.

At the Arrival of my Phirmaund, receive it with great Respect, acknowledging the great Glory you have got in obtaining the same, that you may trade as formerly at your Pleafure, and as accustomary. That you deliver the Merchants, that have complained against you, their Ships with their Effects. That, for the future, you do not commit the like Error, in doing as you have done, and proceed according to my Will and Pleasure, and be not forgetful of the same.

If you receive any Affronts from my Governors, or their Officers, or any of my Subjects, be not negligent in acquainting me of the same I have ordered Assic Caus to write accordingly.

What you write concerning former Governors, protecting Mr. Boucher, that you have several Demands of him, that you cannot call him to an Account, desiring that he may be delivered

of the EAST-INDIES. 289

livered to you. My Order is, that you prove your Demands according to Law, that Justice may be done accordingly.

Dated the 31st Year of Aurengzeb's Reign.

IT feems the King was not ignorant of the hard Usage his Subjects had met with, nor was he desirous to use Severity in punishing Offences and Affronts; but, like an indulgent Prince, only told them of their Faults, and prudently admonished them not to be guilty of falling into such like Errors, and, in a majestick Stile, advised them to receive his Favours and Graces with great Respect, and that they ought to make the Law the Standard of Justice, and, in all his Words and Actions, used a

Christian Moderation.

GENERAL Child being dead, Mr. John Vaux succeeded him in the Government of Bombay; but Mr. Bartholomew Harris, who had been Prisoner at Surat (all the Time of the Rupture) had the Seigniority in the Company's Service; but it being not the Custom, for one that had been the Mogul's Prisoner (for any Crimes judged to be capital) to receive publick Marks of Esteem from the State, without a fingular Amnesty from the King, Mr. Vaux was obliged to go to Surat and receive the Phirmaund and the King's Serpaw or Present, which, on such Occasions, is generally a fine Horse, and a Suit of Cloaths from Head to Foot, made of rich Atlasses or Zeerbastas. Those are Sattins or Taffataes full of Gold or Silver Flowers wrought The Horse must never after be fold, on no Account whatfoever. They have also a fine Turband, embroidered Shoes, and a Dagger of Value, stuck into a fine Cummerband or Sash; and, being equipp'd in that Habit, the Phirmaund is presented (by the Goosberdaar or Hosbalbouckain, or, in English, the King's Messenger,) and the Governor of the Province or City makes a short Speech adapted to the Occasion, setting forth the great Honour conferred upon him by the greatest King in the World, with an Admonition to make future Actions deferve the Merit of fuch Favours.

AFTER the aforesaid Manner Mr. Vaux received the Phirmaund in a gilded Box, and, according to Custom,

put it on his Turband for a little while, and, by an Interpreter, returned the Governor's Compliment, acknowledging the King's Favours and the Governor's Civilities; and then the Governor conducted him from the Garden (where the Ceremony was performed) into the City, through a great Concourse of People, who welcomed him with Shouts of Joy as he past thro' the Streets to the En-

glish Factory.

AFTER Mr. Vaux had ftaid in the City about a Week, he fent to acquaint the Governor of the Necessity he lay under to return back to his Government of Bombay; but the Governor fent him Word, that none but he could be trusted by the King to see the Performance of the Contract accomplished, and begged, that he would not think of leaving the City, lest the King should take it amis, and repent him of the Favours he had shewed to the East-India Company; and so Mr. Vaux was detained an Hostage for his Master's future good Behaviour.

MR. Harris, according to that Company's ordinary Custom, demanded the Presidency from Mr. Vaux, who, to save Contention, gave it to him, tho' his Mind was so debilitated, that he was but sew Degrees wiser than an Ideot, and, in two Years Time, Mr. Vaux was suspended the Company's Service, and to remain their Hostage at his own Charges, and so he continued till the Year 1697, that he, by Accident, was drowned in Surat River, by a Pinnace's oversetting, in which he and his Lady had been

taking a Pleasure on the Water.

This Mr. Vaux had been Book-keeper to Sir Jesiah Child in England, and, for his good Services and Behaviour, was preferred by his Master to a Supercargo's Post in a Ship to China, which Trade, in those Times, was the most profitable of any within the Limits of the Company's Charter. In the Year 1684 he was sent thither on board a Ship called the Carolina, commanded by one Captain Harding; but, Mr Vaux and Harding disagreeing in their Passage to China, Mr. Vaux laded the Ship, and sent her back to England, while he himself went Passenger on board a Surat Ship for Bombay, where he was entertained in the Company's Service as a Factor, and wrote to Sir Josiah Child the Reasons he had for leaving the Carolina,

and his Refolution of staying in *India*. Sir *Josiah* continued his Esteem for Mr. *Vaux*, and procured him several profitable Posts at one and the same Time in the Company's Service, and, amongst the rest, constituted him Judge in civil Affairs, which brought him both a good Salary and Perquisites. After he was installed in that Office, Sir *Josiah* wrote him a Letter of Admonition and Reminiscence, wherein, after many Postulates, put him in Mind of the many Favours he had done him, and that now, having the Power of condemning the Company's Enemies, or such as should be deemed so, particularly those who should dare to question the Company's Power over all the *British* Subjects in *India*, and that he expected his Orders, from Time to Time, should be observed and obeyed as Statute Laws.

MR. Vaux gratefully acknowledged Sir Josiah's Favours in his Answer to that Letter, and promised, that, as he had put him into that Post of Honour and Prosit, he would strive to acquit himself with all the Integrity and Justice he was capable of, and that the Laws of his Country should be the Rule he designed to walk by.

In Answer to that Letter, Sir Josiah seemed to be angry, and wrote roundly to Mr. Vaux, that he expected his Orders were to be his Rules, and not the Laws of England, which were an Heap of Nonsense, compiled by a few ignorant Country Gentlemen, who hardly knew how to make Laws for the good Government of their own private Families, much less for the Regulating of Companies and foreign Commerce,

I Am the more particular in this Account, because I saw and copied both those Letters in the Year 1696, while Mr. Vaux and I were Prisoners at Surat, on Account of Captain Every's robbing the Mogul's great Ship, called the Gunsway.

HAVING given an Account of some Part of Sir John Child's Reign, I must also remark a few Slips in the Government of some of his Successors, and of the Ways that they took to get into the Chair of Bombay.

I REMARK'D before, that Mr. Harris was a very weak and indolent Person, very unfit to govern a Colony and the Factories subordinate to Bambay, and, by that Means, a cunning designing Fellow, one Mr. Samuel Annesley, had

the Reins of the Government wholly in his Management, who shewed, that he had malicious Wit and Avarice enough to embroil both his Masters and the private Merchants Affairs in Surat in Harris's Time, and, on Harris's Death, got into the Presidency, or rather Ty-

THE Mogul's Subjects have a good many fine large Ships that trade all over India. The Owners of those Ships had a very great Regard for the Courage, Conduct, and Art of Navigation of the English, above any other European Nation in India; and, for those Qualifications, the Indian Owners procured English Officers to go in their Ships, and allowed them very handsome Salaries and Indulgences. The Captains had from ten to sifteen Pounds per Month, Mates from six to nine Pounds, and the Gunners and Boatswains had also good Salaries, besides the Privilege of carrying some Goods and Merchandizes, Freight free.

MR. Annessey thought those Salaries and Indulgences were too great for Seamen, so he went about to reduce them to about one Half, and the other Moiety he look'd

on as his own Due by virtue of his Post.

Some through Fear or Necessity complied, others again. who despised both his Power and Tyranny, would, by no Means, come into his Measures, and those he look'd on as Rebels, and perfecuted them to the utmost of his Power, bribing the Mogul's Governor to plague us; fo fome were ruined by his Villainy, whilst others bade him open Defiance: And we were not wanting on our Side to expose him and his Masters to the Mogul's Subjects, which in the End was the Lofs of both their Esteem and Credit amongst the trading People of that Country. The poorer Sort, whose Maintenance depended on their Labour and Industry, losing their Employs in the Moorish Merchants Service, were obliged to fall on new Schemes to support themselves, not very well suited to the Company's Interest, for some went and joined themselves with the Pirates.

The Company in England received Accounts from every one that came from India, of Harris and Annefley's Malestonnia tration, fent out Sir John Gayer to take Care of their Affairs. He arrived in the Year 1694, with the lofty

lofty Title of General of all India. He continued Annefley in the Company's Service till the Year 1700, but divested him of all Power of doing more Mischief, but, in the End, he dismissed him the Company's Service.

SIR John Gayer was a Man not vicious in his Temper, yet he had some Slips in his Government that proved prejudicial to his Character, tho', in Matters of common Commerce, he acted pretty regularly, till a young Lass of three thousand Pounds Portion made him dispense with the common Methods of Matrimony. This young Gentlewoman was a Daughter of Mr. Ward's before mentioned She had no Relations alive, and unadvifedly married one Mr. Solomon Lloyd a Factor, and the Marriage was clandestine, which was positively against the Statute Law of Bombay, where no Marriage is binding but when the Governor's Consent is tack'd to it. This Law Sir John had got by Heart, and unmarried the poor Factor after Confummation, and married her to his own Son; but the fecond Marriage was attended with ill Confequence, for, whilft her Husband was at China one Coleman was ordered to teach her to write good English, but, neglecting those Orders, he taught her fomething elfe, and was discovered in the Practifing, by a watchful Mother-in-Law. The poor School-mafter was fent, in Irons, on board of a Ship for England. And the poor Husband's Head acked as long as he lived.

ANOTHER Piece of ill Conduct was in forcing the Mocha Frigate's Men on board, against their Wills, to proceed on a Voyage to China, notwithstanding their just Complaints against Edgecomb their Captain, whom the Mutineers that in his Cabbin, and then turned Pirates, and infested the Streights of Malacca, robbing and plundering all Ships that they could overcome. Captain Hide, in the Dorrel, met her there in her Passage to China, and had a sharp Engagement with her, but got clear with the Lofs of fixty Men killed, and fome wounded, which disabled the Dorrel so, that she proceeded no farther than

Malacca.

cl And another Fault of Sir John's was in fuffering himfelf and his Lady to be taken Prisoners at Swally, by the Governor of Surar's Order, when he might either have 心脏法 avoided

avoided that Difgrace by Force or Flight; but it was generally believed, that was only a Piece of Policy to get to Surat, in order to employ his Money, which he could

do much better there than at Bombay.

SIR Nicholas Waite supplanted Sir John in the Government of Bombay, and in the Presidency. He was a Man of very loose Morals; and his bare-fac'd Injustices and Prevarications irritated the Inhabitants and Soldiery of Bombay, that they seized him, and sent him Prisoner for England. Tho' his Reign was short, it was very pernicious to his Masters, as well as to particular Merchants under his Jurisdiction. But, to return from this Di-

greffion.

BOMBAY was governed by a Deputy, fince the Prefident was obliged to stay at Surat. And of seven or eight hundred English that inhabited before the War, there were not above fixty left by the Sword and Plague, and Bombay, that was one of the pleasantest Places in India, was brought to be one of the most dismal Deserts; but the Spirit of Injustice still resided in it, for those who had ventured thro' the War and Plague in Defence of the Ifland, had not the Liberty of returning Home to their own Country, nor to raise their Fortune by private Trade, but all were continued prest Men in the Right Honourable Company's Service, without the Hope of Preferment, which made some Discontents.

AND, even in the Time of War, when Strangers should have been encouraged to bring Provisions on the Island, the Company's Taxes of five per Cent. were exacted with great Severity, for I have feen the Portuguese Subjects bring twenty or thirty Poultry to the Market, and have had five of the best taken for the Custom of the rest.

Two Leagues from the Castle is a small Island belonging to the Company, called Butcher's Island, but of no Use, besides hauling Ships ashore to clean, and graze a few Cattle. And, a League from thence, is another larger, called Elephanto, belonging to the Portuguese, and ferves only to feed some Cattle.

THERE is a pretty high Mountain stands in the Middle of the Island, shaped like a blunt Pyramid, and, about the Half of the Way to the Top, is a large Cave, that has

289

two large Inlets, which ferve both for Passage into it and Lights. The Mountain above it rests on large Pillars, hewn out of a folid Rock, and the Pillars curioufly carved. Some have the Figures of Men, about eight Foot high, in feveral Postures, but exceedingly well proportioned and cut. There is one that has a Giant with four Heads joined, and their Faces looking from each other. He is in a fitting Posture, with his Legs and Feet under his Body. His right Hand is above twenty Inches long. There are several dark Rooms hewn out of the Rock, and a fine Spring of sweet Water comes out of one Room, and runs thro' the Cave out at one of the Inlets. I fired a Fuzee into one of the Rooms, but I never heard Cannon nor Thunder make fuch a dreadful Noife, which continued about half a Minute; and the Mountain seemed to shake. As soon as the Noise was over, a large Serpent appeared, which made us take to our Heels, and got out of the Cave at one Door, and he, in great Hafte, went out at the other. I judged him about fifteen Foot long, and two about. And these were all that I saw worth Obfervation on that Island. I ask'd the Inhabitants of the Island, who were all Gentows, or Gentiles, about twenty in Number, if they had any Account, by History or Tradition, who made the Cave, or the Quadrupeds carved in Stone; but they could give no Account. About a League from Elephanto, is an Island called Salvageo. It affords nothing but Fire-wood, with which it supplies Bombay. And, about half a League from it, is the Island of Carronjaa, belonging to the Portuguese. It affords no Trade. but Eatables for Bombay, from whence it lies East about two Leagues. Between it and the main Land, is the Mouth of Pen River. And four Leagues South of Bombay, are two small Islands, Undra and Cundra. The first has a Fortress belonging to the Sedee, and the other is fortified by the Sevajee, and is now in the Hands of Connajee Angarie. The English have made several Attempts to take it, but never could, tho' in the Year 1719, it had certainly been taken, had not a Portuguese Traitor, who lay on one Quarter of it with some Vessels of War to hinder Relief coming to it, betrayed his Trust, and let some Boats pals by in the Night with Provisions and Ammunition.

tion, which the Island was in great Want of. The English landed, and were obliged to retire by some Loss they received.

About four Miles to the South-east of Cundra, is Culabee, a Fort built on a Rock a little Way from the main Land; and, at high Water, it is an Island, belonging to the Sevajee. And, two Leagues to the South of Culabee, is Chaul, a Town belonging to the Portuguese, whose River affords an Harbour for small Vessels. The Town is fortified, and so is an Island on the South Side of the Harbour, called Chaul Moar, which may be known five or six Leagues off at Sea, by a white Church built on it. Chaul, in former Times, was a noted Place for Trade, particularly for sine embroidered Quilts; but now it is miserably poor.

DANDE RAJAPORE lies seven Leagues to the Southward of Chaul, a Town belonging to the Sedee, who generally lies there with a Fleet of the Mogul's Vessels and Ships of War, and an Army of thirty or forty thousand Men. There is a Rock fortified by the Sevajce, that lies within a League of the Mouth of Dande Rajapore River, to the Northward, and another as far to the Southward, ealled the Whale, that shews his Back at low Water.

Coasting to the Southward from Dande Rajapore, are feveral small Rivers and fishing Towns. Zeferdon is the best, and two little Islands called Horney Coat, forrished and kept by the Sevajee. It lies five Leagues to the Northward of Dabul, which stands at the Mouth of a large River, and, of old, was a Place of Trade, and

where the English once had a Factory.

There is an excellent Harbour for Shipping eight Leagues to the Southward of Dubal, called Sanguseer; but the Country about being inhabited by Raparees, it is not frequented; nor is Rajapore, about seven Leagues Southward of Sanguseer, tho' it has the Conveniency of one of the best Harbours in the World, and had formerly both an English and Prench Factory settled there; and the Place where General Child had his Education, from ten Years old to eighteen, under his Uncle Mr. Goodshaw, who was Chief there; and having betrayed some of his Uncle's Secrets, in making me of the Company's Cash in his own private Trade, his Uncle was cashier'd, and, before the Nephew was come to four and twenty, he had the Honour to fill his Chair.

WHEN

When the English had a Factory at Rajabpore, that Country produced the finest Betteellas and Muslins in India; but now all Arts and Sciences are discouraged, and the Port not frequented. There are fine artificial Cisterns for Water there, and a natural hot Bath, within three Yards of a very cold one; and both are reckoned very medicinal.

About twelve Leagues to the Southward of Gbiria, is an Island about two Miles in Circumference, and fortified with a Stone Wall round it, called Malwan. It lies about a Mile from the main Land, and is governed by an independent Rajab, who is also a Freebooter, and keeps three or four Grabs at Sea to rob all whom they can master.

VINGURLA lies about four Leagues to the Southward of Malwan, and was formerly a Place of Trade; and the Dutch Company had a Factory there for Cloth, both fine and coarse.

Two Leagues to the Northward of Vingurla River there is a Parcel of Rocks that stretches about two Leagues into the Sea. The outermost lies in seventeen Fathoms of Depth. They seem to have been Vulcances.

THE Religion of all the Countries, from Dande Rajapore, to the Dominions of Goa, is Paganism; but they are not tied up to divine or moral Rules.

CHAP. XVII.

Gives an Account of the Sundah Rajah's Dominions, the Product, Religion and Customs of his Country, with Observations on his War with the English East-India Company, in the Year 1718; with a short Description of Canara.

Cape Ramas, begins the Limits of the Sunda Rajab's Country, to the Northward, and has a Castle on the Cape to secure his Frontier; but there is no River or Harbour for Shipping, till we come to Sevaseer, and that is but a bad one, tho it has the Cover of a large Castle with few Guns in it. But,

T 2

CARWAR, which lies feven Leagues to the Southward of Cape Ramus, has the Advantages of a good Harbour, on the South Side of a Bay, and a River capable to receive Ships of three hundred Tuns. The English have a Factory here, fortified with two Bastions, and some small Cannon for its Defence. The Rajah is tributary to the Mogul at present, but formerly was a Part of Visapore's Dominions, before Aurengzeh conquered that Country. This Rajah's Dominions reach from Cape Ramus to Merzee, about sisteen Leagues along the Sea-coast, and sixty

or feventy Leagues within Land.

This Country is so famous for hunting, that two Gentlemen of Distinction, viz. Mr. Lembourg of the House of Lembourg in Germany, and Mr. Gering, a Son of my Lord Goring's in England, went incognito in one of the East-India Company's Ships, for India. They lest Letters directed for their Relations, in the Hands of a Friend of theirs, to be delivered two or three Months after their Departure, so that Letters of Credit followed them by the next Year's Shipping, with Orders from the East-India Company to the Chiefs of the Factories, where-ever they should happen to come, to treat them according to their Quality. They spent three Years at Carwar, then, being tired with that Sort of Pleasure, they both took Passage on board a Company's Ship for England.

THE Chief of the English Factory is held in very great Esteem in this Country, and when he goes a hunting, is generally accompanied with most Part of the People of Distinction in the Vicinage, who bring their Vassals and Servants with them, armed with fire Arms and other Weapons, both missive and defensive, with Trumpets,

Hautboys and Drums.

THE Woods produce great Quantities of good Teak Timber, useful in building both Ships and Houses. It is more durable than Oak. And there is good Poon Masts, stronger, but heavier than Fir. There is a Shrub grows in the Woods, that has a Leaf bigger than that of the Fig. tree; and the Dew that falls on that Leaf being carefully gathered, and set in the Sun a Day or two, becomes the pleasantest and strongest Acid that ever I tasked.

BEFORE

Before Aurengzeb conquered Visapore, this Country produced the finest Betteellas or Muslins in India. The English Company had a great Cloth Trade here, and employed about fifty thousand People in that Manusactory; but the Mogul's licentious Soldiers fell into this Province, and ruined all Manner of Trade, plundring the industrious Inhabitants of all they could lay Hands on, and cut the Company's Cloth from the Loom, and used the Weavers so rudely, that they left their own Country, to look for Protection in Countries farther to the Southward, where War had not set up her bloody Banners.

WHEN the Mogul's General had taken Possession of that Province in the Master's Name, he invited the Gentlemen of the English Factory to an Entertainment in his Tent, under Pretence of fettling the Company's Commerce, and, while they were at Dinner, he fent a Party of Men, who plundred and burnt their House, which made the Company build and fortify what they now have; but he who built it where it is, had no great Forelight in choosing his Ground, for it ought to have been built in a Place of free Communication with the Sea, but now it stands a League from it. And, in the Year 1718, the Rajab shewed them their Error, and built Batteries at the Mouth of the River, so that the Factory is nothing at present but a genteel Prison, which by dear bought Experience, we found in a War we had with him, by the Indifcretion of one Taylor, who was Chief, who pretended to be Lord of the Mannor, in appropriating a Wreck to his own Use, that was cast away above four Miles from the Factory. The Rajah could not bear to be for barefacedly affronted in his own Dominions, by Tenants that would hear no Reason. He besieged the Factory for two Months before the Season would admit of Forces coming to affift them by Sea; and when they arrived, the Seas run fo high on the Shore, that there was great Difficulty of landing in the Teeth of an Enemy, who had ten Times our Numbers, so that the first Attempt of landing was unfuccefsful, by our Mens Neglect and Difobedience to the Orders they had received, and about fourfcore of our bravest Fellows were cut off, and some taken Prisoners. But, about fix Weeks after we had some Revenge

on the Enemy in an Engagement on the Side of an Hilf among thick Bushes. The Enemy being above our Men, began their Fire at Break of Day, to beat our Men from a Spring of fresh Water close to the Sea; but our small Vessels lying near the Shore to cover about four hundred Men, that lay to guard the Water, fired with so good Success, that, in an Hour's Time, they were obliged to run, and leave near two hundred dead in the Woods; and our Men pursuing them in their Flight, did some Execution on them.

WE were in daily Expectation of more Forces, and did not offer the Enemy Battle, because of their Numbers and our Want of Experience; but we harraffed the Enemies in the Nights; in burning Villages, for there was little to plunder; and at Sea we took some Vessels laden with Salt going to the Enemy, and three Ships of the Rajab's coming from Arabia with Horses, to the Number of one hundred and forty, which created us much Trouble to find Provender and Water for them: However, when our Reinforcement came, we could muster, in our Fleet, of Seamen and Soldiers, twenty two hundred and fifty Men. The Enemy raised some Batteries on the Strand to hinder our landing; and we took two of the Prizes, and made them Shot-proof above Water, and laid them afhore at high Water to batter their Batteries, and keep the Enemy at a Distance with their great Shot, till our Men were landed and drawn up. Each of our floating Batteries were covered with a Frigat of twenty or twenty four Guns. When all was ready, we landed twelve hundred and fifty Men, without the least Hindrance from the Enemy, for they were preparing to flee to the Woods; but our fresh Water land Officers were so long a drawing up their Men in a confounded hollow Square, that the Enemy took Courage, and, with Horse and Foot, came running towards our Men, firing, and wounding some as they marched in their Ranks, which our Commandant seeing, pulled off his red Coat, and vanished. Some other as valiant Captains as he, took Example, and left their Posts, and then the Soldiers followed, and threw down their Arms. We lost in this Skirmish about two hundred and fifty, but our floating Batteries would not permit the Enemy to purfue far, nor durft they flay to gather up our feattered

tered Arms, so about eighty Sailers went on the Field of Battle, and brought on board of the Commodore about two hundred Stand of Arms, most of them loaded: However the Enemy had some Loss too, for we found eleven Horses dead, and saw many Fires along the Foot of the Hills to burn their dead Men in.

THE Rajab had, by this Time, seven thousand Men engaged in this War, which Expence he began to be tired of, and the Loss of his Ships and Horses was some Mortification to him, besides the Saw Rajab had made an Inroad into his Northern Borders, which made him incline very much towards a Peace, and accordingly he fent a Brahman on board the Commodore of the Fleet. to negotiate about a Peace. The Commodore heard him. and advised him to make his Overtures to Mr. Taylor: but he faid, that the Rajab would by no Means confent to treat with him, complaining, that he was not only the Occasion of that War, but even, before the War, had done fome Detriment to him and his Subjects, for receiving the Company's Pepper above one hundred Miles from the Factory. He made the Servants that went to receive the Pepper, take certain Quantites to fell out by Retail in his Villages, to the utter Ruin of many poor Inhabitants, that had no other Way to get their Livelihood, but by huckstering, and because the Company's Agreement with his Forefathers and himself, gave them a free Trade in all his Dominions, he past all over, but was forced to relieve the poor Botickeers or Shop-keepers, who before could pay him Taxes; however we being tifed of War as well as he, by the Mediation of a Seid, who was a Friend to both Parties, in ten Days after the first Overture was made, Peace was proclaimed on easy Terms for both Parties.

THERE is one Trick that the Priests yearly put upon the People in this Country, that would puzzle the best Merry-andrews in Europe to imitate, and that is, about the latter End of May, or the Beginning of June, there is a Feast celebrated to the infernal Gods, with a Divination or Conjuration to know the Fate of the ensuing Crop of Corn. The Ceremony I saw here, and at other Places on the Coast of Canara. The Priest having persuaded some Fools

Fools to bear a Part in the Farce, proclaim the Feast to be on such a Day, at a certain Grove, where several thou-fands of People assemble, and in the Middle of the Grove is placed a black Stone of three or four hundred Weight, without any designed Shape, but some Places bedaubed with red Lead mixt in Oil, to serve for a Mouth, Eyes and Ears, and a little earthen Pot of Fire placed before the Stone, and a Girl about ten Years of Age to attend it.

Some Priests, all naked, except a Bit of Cloth to hide their Privities, run and dance round the Stone and Fire for half an Hour, like mad Men, making strange Distortions in their Phizes, and now and then bellowing like And this was the first Scene. Those Priests had erected a Scaffold on two Axle-trees, that had Trucks fitted for them like the Carriage of Ship Guns. In the Middle of the Scaffold (which might be about fifteen Foot long, and as broad) was erected a Piece of Wood about fifteen Foot high, with a Notch cut in the upper End. like the Cheeks of a Ship's Pump, with Holes bored for a Bolt to pass through, as Pump Cheeks have. hewn for their Purpose, about forty Foot long, was laid about the Middle in the Notch, and a Bolt passing through the Cheeks and that Tree, like a Pump-brake. At one End of the Tree were placed two cross Pieces, one at the very End, and the other about four Foot within it. Each of those cross Pieces were about four Foot long, and, at the other End, had a Rope fastened to it. And this was the Vehicle for the Actors to hang on for a Mile or two.

THE Actors presenting themselves to the Priests, being four in Number, drest as the Priests were; only on their Heads, Crowns were made round their Temples, of Sugar-cane Leaves, open at the Top, like ducal Crowns. The Priests brought two Tenterhooks, such as the Butchers in Britain hang their Meat on, for each Actor, and, after some ridiculous Ceremony, hook'd them on each Side of the Back-Bone, a little above the Kidnies. Those Hooks had Cords fast to them, so they went dancing round the Stone, and the Priest holding their Strings sast, and, after two Minutes Dancing, they came tamely to the End of the Tree, where the cross Pieces were sastened, and the was seed up to each End of the cross Pieces, and the

Mob

Mob was ready to hawl down the other End, and fastened it to the End of the Scaffold, and the foolish Fellows were hung up by the Back, above ten Yards from the Ground. The Populace broke some old Cocoa-nuts on the Scaffold. and some hundreds of them got hold of the Ropes fastened to the Scaffold, and hawled it over plowed Ground, above a Mile, to another Grove; and the Girl with the Pot of Fire on her Head, walking all the Way before. When they came to the End of their Journey, they where let down, and going into the Grove, where was placed another black Stone Pagod, the Girl set her Fire before it, and run stark mad for a Minute or two, and then fell in a Swoon, and in that the lay fweating and foaming at the Mouth prodigiously. When she grew mad, the Men fell flat on the Ground before the Image, and then arose after she fell in her Trance. She continued immoveable abour a Quarter of an Hour, and then awoke, and feemed to be very fick. The Priefts interrogated her about what she had seen and heard from the terrestrial Gods, and she gave them a satisfactory Answer, on which they all bowed to the Image, and put their Hand on a Cow that was there ready, dedicated to the Image; and fo all departed fatisfied.

On fight of the new Moon in August they have another Piece of Superstition, in a Feast dedicated to the Sea, for the prosperous Navigation of the ensuing Season. They have the Essignes of the God Gunnies, which is a Man's Body, with an Elephant's Head, clapt cleverly on his Shoulders, and carried in Procession to a River's Side, and thrown into the River, upon which, all Rivers who have

Bars are opened for Navigation.

THERE are a Set of Brahmans in this Country called Buts, they study Astrology, and are in great Repute for their exemplary innocent Lives, and Skill in prophelying. In the Year 1684, one Moam But told some Things very surprising, when Mr. Walfel was Chief for the English at Carwar.

In the Space of three Years no English Ship from Europe had called there, and the Gentlemen longing for one, and Moam But coming to visit the Chief, Mr. Walfel ask'd him if he could tell when a Ship from Europe would call

there. He answered, he could tell, and musing a little While, told, that on the fame Day forty Days, which happened to fall out on a Sunday, one would arrive, and that she was, at that Time, at Anchor at an Island on this Side of the Cape of Good-hope, taking in Refreshments. The Chief told him, if he prophesied true, he would present him with as much scarlet Cloth as would make him a Coat. The But answered, that he thank'd him, but that neither of them would live to see her arrive, and therefore advised Mr. Walfel to set his House in Order; and that, to prove some Part of the Prophecy true, the But himself should die ten Days after the Day he prophefied, and that Mr. Walfel should die so many Days after. Accordingly the But died, which put the other's Mind out of Order, till the Day of his Death came, and that Morning Mr. Walsel said, he believed the Conjurer was out in his Reckoning, for he never was in better Health in his Days; but, after Dinner, he had an apoplectick Fit, that carried him off. And the Ship's Pinnace came ashore at the Factory Gate that Noon that the But told she should arrive. The Ship was the Mexico Merchant, commanded by Captain Roger Paxton.

The pretty nimble female Dancers at Cerwar are not fo by Choice; but all Trades and Occupations being lifted into Tribes, none can marry out of their own Tribe; and, as it fortuned, the Originals of this Tribe were Ladies that could not be confined to one Husband, and so would not marry. Their Posterity are not suffered to marry, because there are no Men in their Tribe allowed. When the Lasses bring forth Children, the Males are brought up Soldiers, and the Females are learned to dance, and what they earn by dancing goes to the Rajab, except a small Share for the Girl's Maintenance. What they get by their Kindness to Strangers is all their own; and I have seen some have very fine Clothes and Jewels

acquired by their Trade.

THE Portuguese have an Island called Anjediva (before mentioned) about two Miles from Batcoal. They fortified it, for fear that the Maskat Arabs or the Sevajees should have settled on it; if they had, they might have incommoded the Goa Fleet that goes yearly to Canara for Com.

At the Mouth of Carwar River, are two fortified Islands, called Shipe and Gur. One is fortified by Walls built round it, and some Guns mounted on it. The other is steril and dry, and not worth walling. They both belong to the Rajab of Sundab. There are some Islands lie athwart the Mouth of the Bay, that make the Harbour of Carwar, but none inhabited. The Bay has two large Entrances for Shipping. That to the North is clear from Danger; but the South Chanel has a sharp Rock like a Pyramid in the Middle of it, that seral large Ships have struck on, for there is too much Water on it for small Ships to be frightened by it, having at least fifteen Foot Water on its Top.

In Canara there are several Customs peculiar to itself; and many of them are spread abroad to remote Countries. Here it was, that the Custom of Wives burning on the same Pile with their deceased Husbands had its Beginning. It is reported, that before the Brahmans invented this Law Poison was so well known and practised, that the least Quarrel that happened between a married Couple, cost the Husband his Life, and this Law put a great Stop to it; and now Custom so far prevails, that if any faint-hearted Lady has not Courage enough to accompany her Spoule to the other World, she is forthwith shaved and degraded, and obliged to serve all her Husband's Family in all Kinds

of Drudgery.

I HAVE seen several burned. In this Country they dig a Pit about ten Foot long, and six broad, and sill it with Logs of Wood. One great Piece is set at the Brim of the Pit, ready to fall down on pulling a bit of String. When all is ready, there is good Store of Oil or Butter thrown on the Wood, and then the Husband's Corps is placed about the Middle of the Pile, and Fire set to it, which blazes in an Instant. Then the Spouse took her Leave of all Friends and Acquaintances, and Drums, Trumpets and Hautboys being playing cheerfully, she walked three or four Times round the Pile, which, by this Time, was all in a great Blaze, and then leaps in on the Corps. As soon as ever she leapt in, a Priest drew the String, and down sell the great Log of Wood, at least five hundred

Pound Weight, over her Body, and all confumed toge-

This Country of Canara is generally governed by a Lady. who keeps her Court at a Town called Baydour, two Days Tourney from the Sea. She may marry whom she pleases; but her Husband never gets the Title of Rajab, tho' if the has Sons, the eldest of them does; but neither Husband nor Son have any Thing to do with the Management of the Government, while she lives: Nor are the Queens obliged to burn with their Husbands. The Subjects of this Country observe the Laws so well, that Robbery or Murder are hardly heard of among them. And a Stranger may pass through the Country without being ask'd where he is going, or what Business he has.

No Man is permitted in this Country to ride on Horses, Mules or Elephants, but Officers of State, or Troopers, tho' we are allowed to ride on Oxen or Buffaloes: Nor none are permitted to have Umbrellas carried over them by Servants, but must carry them themselves if the Sun or Rain offend them; but in all Things else there is Li-

berty and Property.

THE next Sea-port, to the Southward of Onoar, is Batacola, which has the Vestigia of a very large City, standing on a little River, about four Miles from the Sea. There is nothing of it left now worth noticing, but ten or eleven small Pagods or Temples covered with Copper and Stone. The Country produces good Quantities of Pepper; and the English Company had a Factory there: But, about the Year 1670, an English Ship coming there to lade, had a fine English Bull-dog, which the Chief of the Factory begged of the Captain.

AFTER the Ship was gone, the Factory, which consisted of eighteen Persons, were going a hunting, and carried the Bull-dog with them; and paffing through the Town, the Dog seized a Cow devoted to a Pagod, and killed her. Upon which the Priests raised a Mob, who murdered the whole Factory; but some Natives, that were Friends to the English, made a large Grave, and buried them all in it. The Chief of Carwar fent a Stone to be put on the Grave, with an Inscription, That this is the Burial-place of John Best, with seventeen other English

Men.

Men, who were facrificed to the Fury of a mad Priesthood, and an enraged Mob. The English never resettled there

ince; but often buy Pepper there.

The next Town, to the Southward of Batacola, is Barceloar, standing on the Banks of a broad River, about four Miles from the Sea. The Country abounds in Rice, having in many Places two Crops in a Year, by the Advantage they have of some Lakes at the Feet of the Mountains of Gatti, whose Waters being confined by Sluices are let out at convenient Times to water their Rice Fields. The Dutch have a Factory here, only to buy up Rice for their Garrisons on the Malabar Coast. It stands about a Mile from the River's Mouth, that has a Bar of thirteen or southern Foot Water on it at spring Tides, and has a Castle on its North Side for its Guard, that none may go in or out without Leave.

MANGULORE is the greatest Mart for Trade in all the Canara Dominions. It has the Conveniency of one River produced by three that come into it by different Ways, viz. from the North, South and East, all proceeding from the great Rains and Dews that fall from the Mountains of Gatti, which lie twenty five or thirty Leagues up in the Country, and are the inland Bounds of the Canara Dominions. Those three Rivers join about a Mile from the Sea, and, at Mangulore, disembogue at one Mouth into the common Receptory of Rivers.

CHAP. XVIII.

Observations on the Samorin and his Country, and of Couchin; their Religion, Laws and Customs, Product of the Country and its Commerce; an Account of their War with the Dutch, begun in the Year 1708, and the Consequences of it.

HE Samorin's Country reaches along the Sea-coast from Ticori to Chitwa, about twenty two Leagues.

The Product of the Samorin's Country is Pepper in Abundance, Bettle-nut and Cocoa-nut, and that Tree products

duceth Jaggery, a Kind of Sugar, and Copera, or the Kernels of the Nut dried, and out of those Kernels there is a very clear Oil exprest, also Sandel-wood, Iron, Cassalignum and Timber for Building, all which Commodities

they export to the great Benefit of the Inhabitants.

Many strange Customs were observed in this Country in sormer Times, and some very odd ones are still continued. It was an ancient Custom for the Samoria to reign but twelve Years, and no longer. If he died before his Term was expired, it saved him a troublesome Ceremony of cutting his own Throat, on a publick Scaffold erected for that Purpose. He first made a Feast for all his Nobility and Gentry, who are very numerous. After the Feast, he saluted his Guests, and went on the Scassfold, and very decently cut his own Throat in the View of the Assembly, and his Body was, a little while after, burned with great Pomp and Ceremony, and the Grandees elected a new Samoria. Whether that Custom was a religious or a civil Ceremony I know not, but it is now laid asset.

And a new Custom is followed by the modern Samorins, that a Jubilee is proclaimed throughout his Dominions, at the End of twelve Years, and a Tent is pitched for him in a spacious Plain, and a great Feast is celebrated for ten or twelve Days with Mirth and Jollity, Guns siring Night and Day, so at the End of the Feast any four of the Guests that have a Mind to gain a Crown by a desperate Action, in sighting their Way through thirty or forty thousand of his Guards, and kill the Samorin in his Tent, he that kills him, succeeds him in his

Empire.

In the Year 1695, one of those Jubilees happened, and the Tent pitched near *Pennany*, a Sea-port of his, about fifteen Leagues to the Southward of *Calecut*. There were but three Men that would venture on that desperate Action, who fell in, with Sword and Target, among the Guards, and, after they had killed and wounded many, were themselves killed. One of the *Desperadoes* had a Nephew of sifteen or sixteen Years of Age, that kept close by his Uncle in the Attack on the Guards, and, when he saw him fall, the Youth got through the Guards into the

Tent,

Tent, and made a Stroke at his Majesty's Head, and had certainly dispatched him, if a large Brass Lamp which was burning over his Head, had not marred the Blow; but, before he could make another, he was killed by the Guards; and, I believe, the same Samerin reigns yet. I chanced to come that Time along the Coast, and heard the Guns for two or three Days and Nights successively.

WHEN the Samorin marries, he must not cohabit with his Bride till the Nambourie or chief Priest has enjoyed her, and, if he pleafes, may have three Nights of her Company, because the first Fruits of her Nuprials must be an holy Oblation to the God she worships. And some of the Nobles are fo complaifant as to allow the Clergy the fame Tribute; but the common People cannot have that Compliment paid to them, but are forced to supply the Priests Places themselves. Any Women, except the first Quality, may marry twelve Husbands if they please, but cannot have more at one Time, and they must all be of her own Cast or Tribe, under Pain of Excommunication and Degradation of Honour, if she marries into a lower Tribe; and the Men are under the same Penalty if the transgreis that Law, but they are not confined to a ser Number of Wives, as the Women are to Husbands.

When a Woman is married to the first of her Husbands, she has an House built for her own Conveniency, and that Husband cohabits with her till she takes a second, or so many as she is prescribed by Law, and the Husbands agree very well, for they cohabit with her in their Turns, according to their Priority of Marriage, ten Days, more or less, according as they can fix a Term among themselves, and he that cohabits with her, maintains her in all Things necessary, for his Time, so that she is plentifully

provided for by a conftant Circulation.

When the Man that cohabits with her goes into her House, he leaves his Arms at the Door, and none dare remove them, or enter the House, on Pain of Death; but, if there are no Arms to guard the Door, any Acquaintance may freely visit her. And all the Time of Cohabitation she serves her Husband as Purveyor and Cook, and keeps his Clothes and Arms clean.

WHEN she proves with Child, she nominates its Father, who takes Care of its Education, after she has suckled it, and brought it to walk or speak; but the Children are never Heirs to their Fathers Estates, but the Father's Sister's Children are, and if there are none, then to the nearest in Consanguinity from his Grandmother. And this Custom is also practised among the Mahometan Malabars.

THERE are many Degrees or Dignities in the Church as well as in the State. The Nambouries are the first in both Capacities of Church and State, and some of them are Popes, being fovereign Princes in both. The Brahmans or Bramanies are the fecond in the Church only. The Buts or Magicians are next to them, and are in great Veneration. The Nayrees or Gentlemen are next, and are very numerous. The Teyvees are the Farmers of Cocoanut Trees, and are next to the Gentry. Merchants are of all Orders, except Nambouries, and are in some Esteem. The Poulias produce the Labourers and Mechanicks. They may marry into lower Tribes without Danger of Excommunication, and so may the Muckwas or Fishers. who, I think, are an higher Tribe than the Poulias, but the Poulichees are the lowest Order of human Creatures. and are excluded from the Benefit of human and divine Laws.

IF a Poulia or Teyvee meet a Nayer on the Road, he must go aside to let his Worship pass by, lest the Air should be tainted, on Pain of a severe Chastisement, if not of Death; but the Poulichees are in a much worse State. for, by the Law, they are not permitted to converse with any other Tribe, nor can they wear any Sort of Cloth, but only a little Straw made fast before their Privities. with a Line round their Middle. They are not permitted to build Houses or Huts on the Ground, nor to inhabit the Plains where there is Corn Ground, but must dwell in Woods, and build on the Boughs of Trees, like Birds. with Grass and Straw. If accidentally they see any Body coming towards them, they will howl like Dogs, and run away, lest those of Quality should take Offence at their breathing in the same Air that they do. They are not permitted to till and fow the Ground, only in obscure

Places of the Woods they plant Fruits and Roots, whose Seeds they steal from the neighbouring Gardens in the Plains, in the Night, and if they are caught stealing, Death is their Punishment, on the Spot where they are taken, without any Form or Process of Law. When they want Food, they come to the Skirts of their Woods, and howl like Foxes, and the charitable Poulias and Teyvees relieve them with Rice boiled or raw, and some Cocoanuts and other Fruits, which they lay down in a convenient Place; and when their Benefactors come within twenty Paces of them with their Alms, they walk off, and let the Poulichees come to their Food, which they forthwith carry into the Woods. They are very swift in tunning, and cunning in catching wild Beasts and Fowl; but they have sew-or no Fish among the Mountains.

THE inferior Tribes have Liberty of Conscience in fancying their Deities, and worshipping them. I have seen, at many Muckwas Houses, a Stake of Wood, with a sew Notches cut about it, and that Stake drove into the Ground, about two Foot of it being lest above, and that is covered with some Cadjans or Cocoa-nut Tree Leaves, and is a Temple and a God to that Family. Some worship the first Animal they see in the Morning, let it be Cat, Dog or Serpent, and they pay their Adorations to it the whole Day. Others choose a Tree of their Father's or some dear Friend's planting, and that he gets consecrated, and it then becomes his God; but they all believe the Immortality of the Soul and Transmigration, and the Adoration of the great God, of whom they have many wild Opinions.

THE great God's Image they can neither fancy nor make, but believe, that he fent an huge large Fowl from Heaven, that laid a fwinging Egg in the Sea, and, in Process of Time, it was hatch'd by the Sun, and forth came the World, with all Animals, Vegetables, &c. that inhabit it now, and that poor Adam was set alone on the Top of an high Mountain in Zealean, which is called to this Day, Baba Adam, from that Tradition, but, being tired of so lonesome a Life, he descended into the Plain, and there he met with Hevab, whom he presently knew

. U ", "......"

to be his Kinswoman, and they struck Hands, and were

there married.

THE great Men of the Clergy build Temples, but they are neither large nor beautiful. Their Images are all black, and deformed, according as they fancy the infernal Gods to be shaped, who, they believe, have some Hand in governing the World, particularly about benign or malignant Seasons that happen in the Productions or Sterility of the Earth, for which Reason they pay a lateral Adoration to them. Their Images are all placed in dark Temples, and are never seen but by Lamp-light, that burns continually before them.

When criminal Cases are brought before the Magistrate that want the Evidence of Witnesses to support them, the Trial of Truth is by Ordeal. The accused Person is obliged to put his bare Hand into a Pot of boiling Oil, and if any Blister appears, the Party is found guilty; and I have been credibly informed, both by English and Dutch Gentlemen, as well as Natives, that had seen the Trial, that the innocent Person has not been in the least affected with the scalding Oil, and then the Punishment due to the

Crime, is inflicted on the Accuser.

THE Samorin entered into a War with the Dutch East-India Company in the Year 1714, and the Chief of the English Factory, who was a privy Counsellor to the Samorin, had a great Hand in promoting it. The Quarrel began about a small Fort that the Dutch were building at Chitwa. The Ground whereon it stood was a desart Morass by the River's Side, and was claimed both by the King of Couchin and the Samorin. The King of Couchin made over his Claim to the Dutch, who made small Account who had the best Title, but carried on their Work with Diligence, the Samorin, with, and by the Advice of his Council, got fome of his Soldiers to be entered into the Dutch Service, under the Difguise of daily Labourers to carry Stone, Mortar, &c. for building the Fort, and to take their Opportunity to lie in Ambuscade in a Morafs overgrown with Reeds near the Fort.

Two Dutch Lieutenants, who had the Overseeing of the Work, were one Evening diverting themselves with a Game at Tables in a Guard Room about half a Mile

from

from the Fort. They had let some of their Dutch Soldiers go straggling abroad, and the Sentinels were careless under the Security of Friendship, which gave the difguised Workmen an Opportunity to kill the Sentinels, and make their Signal for the Ambuscade, who, in a few Minutes, took the half-built Fort. The Lieutenants came presently after, with what Forces they had, to retake it, but one being killed dead in advancing, the other thought

it impracticable to attack greater Forces within than he had

without, and so embarked, with his Men, on board small Boats for Couchin, about ten Leagues from Chitwa.

I FORTUNED to be at Couchin when he and his Men arrived, and by a Court Martial, he was fentenced to be shot to Death, which Sentence I saw executed. The Samorin's People erected a Flag-staff, and hoisted the English Flag, which the English Chief had sent by the Ambuscade, and immediately after set about demolishing the Walls, that were built of the Fort, and carried off some great Guns belonging to the Dutch. And this was the Prelude of the War.

I KNEW pretty well the Strength of the Antagonists. what Power the Samorin had, and what Powers the Kings of Couchin, Paaru and Porcat could affift the Dutch with, and I wrote to the Chief the Resolutions of the Dutch, and advised him not to embark himself or his Masters in that Affair, because War was a different Province from his: He took my Advice so ill, that he wrote to Bombay, that I was in the Dutch Interest, opposite to the Right Honourable Company, and also to his Masters in England, as if the Dutch Company could need my Interest, Advice or Affistance; but, as I had forewarned him, he found the Samorin was forced, after three Years War, to conclude a dishonourable and disadvantageous Peace, wherein he was obliged to build up the Fort he had demolished, to pay the Dutch Company seven per Cent. on all the Pepper exported out of his Dominions for ever, and to pay a large Sum towards the Charges of the War. Some Part of the Money, I believe, he borrowed.

WHETHER OUR East-India Company got or lost by that: War, I know not, nor will I pretend to pass Judgment on their Affairs, but this I know, that the Chief lost a good

To

Milch Cow, for the Chiefs of Calecut, for many Years had vended between five hundred and a thousand Chests of Rengal Ophium yearly up in the inland Countries, where it is very much used. The Water Carriage up the River being cheap and fecure, the Price of Ophium high, and the Price of Pepper low, so that their Profits were great both Ways; for, if I mistake not, the Company paid the highest Prices for their Pepper, and the Nayers in the Company's Pay, were employed about the Chiefs Affairs; and by the unexpected Turn of Affairs caused by the War, that Trade is fallen intirely into the Dutch Company's Hands, and it will be a very difficult Task to get it out again.

THE English Company were formerly so much respected at Calecut, that if any Debtor went into their Factory for Protection, none durst presume to go there to disturb them; but that Indulgence has been fometimes made an ill Use of, to the Detriment of English private Traders.

THEY have a good Way of arresting People for Debt, viz. There is a proper Person sent with a small Stick from the Judge, who is generally a Brahman, and when that Person finds the Debtor, he draws a Circle round him with that Stick and charges him, in the King and Judge's Name, not to stir out of it till the Creditor is satisfied either by Payment or Surety; and it is no less than Death for the Debtor to break Prison by going out of the Circle.

THEY make use of no Pens, Ink and Paper, but write on Leaves of Flags or Reeds that grow in Moraffes by the Sides of Rivers. They are generally about eighteen Inches long, and one and an half broad, tapering at both Ends, and a small Hole at one End for a String to pass through. It is thicker than our Royal Paper, and very tough. They write with the Point of a Bodkin made for that Purpose, holding the Leaf athwart their left Thumb End over the foremost Finger, and what they have to write is indented, or rather engraven into the Leaf, but it does not pierce the Leaf above half Way through. And on two or three of these Leaves they'll write as much as we can on a Sheet of small Paper. All their Records are writen so on Leaves, and they are strung and rolled up in a Scroll, and hung some Time in Smoke, and then lock'd up in their Cabi-

nets.

of the EAST-INDIES. 309

nets. And I have feen fome fuch Leaves Smoke-dried, that, they told me, were above a thousand Years old.

In the Year 1703, about the Middle of Febuary, I called at Calecut in my Way to Surat, and standing into the Road, I chanced to strike on some of the Ruins of the sunken Town built by the Portuguese in sormer Times. Whether that Town was swallowed up by an Earthquake, as some affirm, or whether it was undermined by the Sea, I will not determine; but so it was, that in six Fathoms at the main Mast, my Ship, which drew twenty one Foot Water, sat fast afore the Chess-tree. The Sea was smooth, and in a short Time, we got off without Damage.

The unfortunate Captain Green, who was afterwards hanged in Scotland, came on board of my Ship at Sun-set, very much overtaken with Drink, and several of his Men came in the same Condition. He told me, that he had some small Arms, Powder, Shot, and Glass-ware to dispose of, and asked me if I would take them off his Hands at a very reasonable Rate. I told him, that next Morning I would see them, and perhaps be a Merchant for them. He told me that the Arms and Ammunition were what was lest of a large Quantity that he had brought from England, but had been at Don Mascherenas, and Madagascar, and had disposed of the rest to good Advantage, among the Pirates, and had carried some Pirates from

Don Mascherenas to St. Mary's.

ABOUT two Leagues to the Southward of Calecut, is a fine River called Baypore, capable to receive Ships of three or four hundred Tuns. It has a fmall Island off its Mouth about half a Mile from the Shore, that keeps it safe from the great Seas brought on that Coast by the South-west Monsoons. Four Leagues more southerly is Tannore, a Town of small Trade, inhabited by Mahometans. They are a little free State, but pay an Acknowledgment to the Samorin. Five Leagues to the Southward of Tannore, is Pennany, mentioned before. It has the Benefit of a River, and was formerly a Place of Trade. The French and English had their Factories there, but were removed about the Year 1670. And about four Leagues more to the Southward is Chitwa River, which bounds the Samorin's Dominions to the South.

U 3

THE King of Couchin's Dominions are next in Course along the Sea-coast, and reach from Chitwa about twenty four Leagues to the Southward. There are fo many Rivulets that run off the Mountains of Gatti, that they reckon above one thousand Islands made by their Streams. Cranganore is about five Leagues to the South of Chitwa. The Dutch have here a small Fort, which retains the Name of Cranganore. In Times of old it bore the Name of a Kingdom, and was a Republick of Jews, who were once fo numerous, that they could reckon about eighty thousand Families, but, at present, are reduced to four thousand. They have a Synagogue at Couchin, not far from the King's Palace, about two Miles from the City, in which are carefully kept their Records, engraven on Copper-plates in Hebrew Characters; and when any of the Characters decay, they are new cut, fo that they can shew their own History from the Reign of Nebuchadnezzar to this present Time.

THE first Europeans that settled in Couchin were the Portuguese, and there they built a fine City on the River's Side, about three Leagues from the Sea; but the Sea gaining on the Land yearly, it is not now above an hundred Paces from it. It stands so pleasantly, that the Portuguese had a common Saying, that China was a Country to get Money in, and Couchin was a Place to spend it in; for the great Numbers of Canals made by the Rivers and Islands, make Fishing and Fowling very diverting. And the Moun-

tains are well stored with wild Game.

On the Inside of Baypin Island, there is an old Fort built by the Portuguese, called Palliapore, to inspect all Boats that go between Cranganore and Couchin. And five Leagues up the Rivulets is a Romish Church called Verapoli, served by French and Italian Priests; and when a Bishop comes into those Parts, it is the Place of his Residence. The Padre Superior of Verapoli can raise, upon Occasion, four thousand Men, all Christians of the Church of Rome; but there are many more St. Thomas's Christians that do not communicate with those of Rome, and some Portuguese, called Topases, that communicate with neither, for they will be served by none but Portuguese Priests, because they indulge them more in their Villainy, and Absolutions

folutions from Crimes are easier purchased from the Portuguese than from the French or Italians, who are generally much more polite and learned than the Portuguse, who are permitted to take the Habit of some Order without being examined whether the Novice has the common Qua-

lifications of School-learning.

ABOUT two Leagues farther up towards the Mountains, on the Side of a small, but deep River, is a Place call'd Firdalgo, where the Inhabitants of Couchin generally affemble to refresh themselves in the troublesome hot Months of April and May. The Banks and Bottom of the River is clean Sand, and the Water so clear, that a small Peeble Stone may be feen at the Bottom in three Fathoms Water. Every Company makes Choice of a Place by the River's Side, and pitch their Tents, and drive some small Stakes before their Tents, in the River, on which they hang up Clothes for Blinds, to hide the Ladies when they bath; but most of them swim dextrously, and swim under Water through the Stakes, into the open River, where the Men are diverting themselves, and there they dive, and play many comical mad Tricks, till Breakfast or Supper call them ashore, for it is in Mornings and Evenings that they bath and fwim; for in the Heat of the Day the Sun scorches. Very often the Ladies lay Wagers of Treats with the Gentlemen, about their Swiftness and Dexterity in fwimming, but generally the Ladies win the Wagers, tho', I believe, if the Men would use their Art and Strength, they might win the Prize. The Heat of the Day they pass with a Game at Cards or Tables for Treats, by which Means they fare sumptuously every Day, fometimes in one Tent, and fometimes in another; and, at Night, every Family sleeps in their own Tent, on the foft clean Sand, Males and Females promiscuously.

THE Water of this Country, near the Sea-coast, from Cranganore to St. Andreas, which is about twelve Leagues, has a bad Quality of making the constant Drinkers of it have fwell'd Legs. Some it affects in one Leg, and some in both. I have feen Legs above a Yard about at the Ancle. It causes no Pain, but itching; nor does the thick Leg feem havier than the small one to those who have them: But the Dutch at Couchin, to prevent that Malady,

Malady, fend Boats daily to Verapoli, to lade with small portable Casks of ten or twelve English Gallons, to serve the City. The Company's Servants have their Water free of Charges, but private Persons pay Sixpence per Cask, if it is brought to their Houses; and yet, for all that Precaution, I have seen both Dutch Men and Women troubled with that Malady. And no Cure has been yet

found to heal or prevent it.

Couchin is wash'd by the greatest Outlet on this Coast, and being so near the Sea, makes it strong by Nature; but Art has not been wanting to strengthen it. The City built by the Portuguese was about a Mile and an half long, and a Mile broad. The Dutch took it from the Portuguese about the Year 1660, when Heitloff Van Ghonz was General of the Dutch Forces by Land, and Commodore of a Fleet by Sea. The Infolence of the Portuguese had made feveral neighbouring Princes become their Enemies, who joined with the Dutch to drive them out of their Neighbourhood, and the King of Couchin particularly affifted with twenty thousand Men. The Dutch had not invested the Town long before Van Ghonz received Advice of a Peace concluded between Portugal and Holland; but that he kept a Secret to himself. He therefore made a Breach in the weakest Part of the Wall, and made a furious Asfault for three Days and Nights, without Intermission, and relieved his Affailants every three Hours; but the Portuguese keeping their Men continually fatigued in Duty all the while, and finding Danger of being taken by Storm, capitulated, and delivered up their City. In the Town there were four hundred Topales, who had done the Por-. tuguese good Service in defending the City, but were not comprehended in the Treaty. As foon as they knew of that Omission, and the Cruelty and Licentiousness of the Dutch Soldiery in India, they drew up in a Parade, within the Port that the Portuguele were to go out at, and the Dutch to enter in, and swore, that if they had not the Tame Favours and Indulgence that were granted to the Portuguese, they would massacre them all, and set Fire to the Town. The Dutch General knew his own Interest too well to deny so just a Demand, so he granted what they defired, and moreover to take those, who had a Mind to of the EAST-INDIES. 313

ferve in the Dutch Service, into Pay, which many of them

did.

The very next Day after the Dutch had Possession, came a Frigat from Goa, with the Articles of the Peace made with Holland, and the Portuguese complained loudly of the General's unfair Dealings, but were answered, that the Portuguese had acted the same Farce on the Dutch, at their taking of Pharnabuke in Brasil, a few Years before. The English had then a Factory in the City of Couchin, but the Dutch ordered them to remove with their Essets, which

accordingly they did to their Factory at Pennany.

As foon as the Dutch became Mafters of the City, they thought it was too large, and so contracted it to what it now is, being hardly one Tenth of what it was in the Portuguese Time. It is about six hundred Paces long, and two hundred broad, fortified with seven large Bastions, and Curtains so thick, that two Rows of large Trees are planted on them, for Shades in the hot Times. Some Streets built by the Portuguese are still standing, with a Church for the Dutch Service, and a Cathedral for a Ware-house. The Commodore or Governor's House, which is a stately Structure, is the only House built after the Dutch Mode, and the River washes some Part of its Walls, and a Canal cut from the River up to the Middle of the City, that passes close by the Governor's House.

THEIR Flag-staff is placed on the Steeple of the old Cathedral, on a Mast of seventy sive Foot high, and a Staff a-top of it about sixty Foot, which is the highest I ever saw; and the Flag may be seen above seven Leagues off. The Garrison generally consists of three hundred effective Men: And from Cape Comerin upwards they are allowed, in all their Forts and Factories, sive hundred Soldiers. and one hundred Seamen, all Europeans, besides some Topases, and the Militia. They have their Stores of Rice from Barsalore, because the Malabar Rice will not keep above three Months out of the Husk, but in the

Husk it will keep a Year.

THE Country produces great Quantities of Pepper, but lighter than that which grows more northerly. Their Woods afford good Teak for Building, and Angelique and Pawbeet for making large Chefts and Cabinets, which are carried

carried all over the West Coasts of India. They have also Iron and Steel in Plenty, and Bees Wax for exporting. Their Seas afford them Abundance of good Fish of several Kinds, which, with those that are caught in their Rivers,

make them very cheap.

THE King of Couchin, who at best is but a Vassal to the Dutch, has a Palace built of Stone about half a League from the Dutch City; and there is a straggling Village not far from the Palace, that bears the Name of Old Couchin. It has a Bazaar or Market in it, where all Commodities of the Country's Product are fold; but there are no Curiofities to be found in it. The King's ordinary Residence is at another Palace, six Leagues to the Southward of Couchin, and two from St. Andrea; but he keeps

but a very small Court.

MUDBAY is a Place, that, I believe, few can parallel in the World. It lies on the Shore of St. Andrea, about half a League out in the Sea, and is open to the wide Ocean, and has neither Island nor Bank to break off the Force of the Billows, which come rolling with great Violence on all other Parts of the Coast, in the South-west Monfoons, but, on this Bank of Mud, lofe themselves an a Moment, and Ships lie on it, as fecure as in the best Harbour, without Motion or Disturbance. It reaches about a Mile along Shore, and has shifted from the Northward, in thirty Years, about three Miles. St. Andrea is only a Village, with a Church in it dedicated to St. Andrew, and is ferved by St. Thomas's Priests, who generally are both poor and illiterate. About two Leagues to the Southward of St. Andrea begin the Dominions to Porcat, or

PORKAH. It is of small Extent, reaching not above four Leagues along the Sea-coast. The Prince is poor, having but little Trade in his Country, tho' it was a free Port for Pirates when Every and Kid robbed on the Coast of India; but, fince that Time, the Pirates infest the northern Coasts, finding the richest Prizes amongst the Mocha and Persia Traders. The Dutch keep a Factory at

Parkab, but of small Consequence.

COILCOILOAN is another little Principality contiguous to Porkah, where the Dutch keep also a Factory. And next to it is.

-COILOAN

COILOAN another small Principality. It has the Benefit of a River, which is the southermost Outlet of the Couchin Islands; and the Dutch have a small Fort within a Mile of it, on the Sea-shore, which they took from the Portugueze when they took Couchin. It keeps a Garrison of thirty Men, and its Trade is inconsiderable.

ERWA lies two Leagues to the Southward of Coiloan, where the Danes have a small Factory standing on the Sea Side. It is a thatch'd House of a very mean Aspect, and their Trade answers every Way to the Figure their Factory

makes.

AU7ENGO lies two Leagues to the Southward of Erwa, a Fort belonging to the English, built at the Company's Charge in the Year 1695. It stands on a fandy Foundation, and is naturally fortified by the Sea on one Side, and a little River on the other. It is in the Dominions of the Queen of Attinga, to whom it pays. Groundrent. Before it was built, the English had two small Factories in her Country to the South of Aujengo. One was called Brinjan, the other Ruttera; but, being naked Places, were subject to the Insults of Courtiers, whose Avarice is feldom or never fatisfied: But I wonder why the English built their Fort in that Place, for there is not a Drop of good Water for drinking within a League of it; and the Road has a foul Bottom for anchoring, and continually a great Surf on the Shore, when they might as well have built it near the Red Cliffs to the Northward, from whence they have their Water for drinking, and where there is good Anchor-ground, and a tolerable good Landing-place for Boats in the North-east Monsoons. The Country produces good Quantities of Pepper and long Cloth, as fine as any made in India.

When our Factories were at Ruttera and Brinjan, they fent a yearly Present to the Queen of Attinga, whose Court is about four Leagues within Land from Aujengo. In the Year 1685, when the Present was sent, a young beautiful English Gentleman had the Honour to present it to her black Majesty; and as soon as the Queen saw him, she fell in Love with him, and next Day made Proposals of Marriage to him, but he modestly resuled so great an Honour: However, to please her Majesty, he stayed at Court

Court a Month or two, and it is reported, treated her with the same Civility, as Solomon did the Queen of Ethiopia, or Alexander the Great did the Amazonian Queen, and satisfied her so well, that when he left her Court she made him some Presents.

About the Year 1720, there were some civil Broils in this Country, and the annual Present being demanded, the English Chief resused to pay it to any but to the Queen herself, tho' those that demanded it assured him, that they came to demand it by the Queen's Order, and offered their Receipt of it in her Name; but he, being more positive than wise, continued obstinate in his Resusal, upon which the Queen gave him an Invitation to Court; and he, to appear great there, carried two of his Council, and some others of the Factory, with most Part of the Military belonging to the Garrison, and, by Stratagem, they were all cut off, except a few black Servants, whose Heels and Language saved them from the Massacre, and they brought the sad News of the Tragedy.

TEGNAPATAM, where the Dutch have a Factory, lies about twelve Leagues to the Southward of Aujengo. That Country produces Pepper, and coarse Cloth called Catchas: But Colicha, which lies between the Middle and West Point of the Cape Comerin, affords the best Cloth of that Sort, besides Tamarinds in Abundance; but the Road is foul. It also produces Salt; but neither the English nor Dutch have any Commerce or Traffick there. And close by Colicha, at the faid middle Point, there is a small Cave or Harbour that can secure small Vessels from all Winds and Weather. It has a clean Sandy Bottom, and three Fathoms in it at low Water. Four Leagues off the Cape, in the Sea, there is a small smooth Rock, bare at low Water, and shews itself like the Back of a Whale. About one hundred Paces from it, on all Sides, there is twenty-eight Fathom Water; and the Sea feldom breaks on it, which makes it the more dangerous. I knew a Ship that rubbed her Side on it, before those on board could discover it, tho' they look'd out for it.

MANAPAAR lies to the North-eastward of Cape Comerin, about eight Leagues distant, and the Dutch have a Factory there, standing on an high Ground about a

Mile

Mile from the Sea. And about ten Leagues more northerly is Tutecareen, a Dutch Colony, the' but small.

TUTECAREEN has a good safe Harbour, by the Benefit of some small Islands that lie off it. That Country produces much Cotton-cloth, the none sine; but they both stain and dye it for Exportation. This Colony superintends a Pearl Fishery, that lies a little to the Northward of them, which brings the Dutch Company twenty thousand Pounds yearly Tribute, according to common Report. There are several Villages on the Sea-shore between Tutecareen and Coil, but none in any Account for Traffick. This Coil is a Promontory that sends over a Reef of Rocks to the Island of Zeloan, called commonly Adam's Bridge.

That Reef of Rocks has so little Water on them, that the smallest Boats cannot pass but at an Island called Manaar, which lies almost Midway between Zeloan and Coil, and that Passage has not above six Foot Water on it, so that none but small Vessels can pass that Way; and they must unlade, and pay Customs to the Dutch who reside at Manaar, and, after the Vessel is halled over the Bridge,

they take in their Cargo again.

THE Dutch have fortified Manaar, and make use of it for a Prison for Indian Princes, whom they can overpower or circumvene, when they are suspected of making Treaties contrary to their Interest, or to such as would willingly re-assume their lost Freedom, by breaking the unjust Yoke of the Company's Tyranny, perhaps drawn on themselves by too much Faith or Incredulity; for that honest Company has always had a Maxim, first to foment Quarrels between Indian Kings and Princes, and then pioully pretend to be Mediators, or Arbitrators of their Differences, and always cast in something into the Scale of Justice to those whose Countries produce the best Commodities for the Company's Use, and lend the Assistance of their Arms to him who is so qualified by the Product above mentioned, and, at the Conclusion of the War; make the poor conquered Prince pay their Charges for affifting the Conqueror; and, when all is made up, and Treaties of Peace ready to be signed, then the Conqueror, their dear Ally and Friend, must suffer them to posse!3

Conqueror.

the best Sea-ports, and fortify the most proper and convenient Places of his Country, and must forbid all Nations Traffick but their dear *Dutch* Friends, under Pain of having the Company's Arms turned against them, in Conjunction with some other potent Enemy to the deluded

The King of Charta Souri, on the Island of Java, is a fresh Instance of the Truth of what I relate. In the Year 1704, I saw him at Samarang, a Sea-port on the said Island, in great Splendor, and in high Esteem with the Dutch Commodore; but in the Year 1707, he fell under the Displeasure of the General and Council of Batavia, and in 1708, falling into their Hands, he was brought their Prisoner to Manaar, and cooped up on that small Island, there to spend the Remainder of his Days in Contemplation or Comments on the Deceit of worldly Grandeur, and of the Power and Pleasure of Sovereignty, or in humble Thoughts on Consinement, Exile and Poverty.

CHAP. XIX.

Gives a short Description of Fort St. George, its sirst Settlement and Rise, its Situation and Sterility, and some Remarks on its Government, and the Actions of some of its Governors, with some Occurrences that bappened to the English Factory at Vizagapatam.

it, China Patam, is a Colony and City belonging to the English East-India Company, situated in one of the most incommodious Places I ever saw. It fronts the Sea, which continually rolls impetuously on its Shore more here than in any other Place on the Coast of Chormondel. The Foundation is in Sand, with a Salt-water River on its back Side, which obstructs all Springs of Fresh-water from coming near the Town, so that they have no drinkable Water within a Mile of them, the Sea often threatening Destruction on one Side, and the River in the rainy Season Inundations on the other, the Sun from April to September

September scorching hot; and if the Sea-breezes did not moisten and cool the Air when they blow, the Place could not possibly be inhabited. The Reason why a Fort was built in that Place is not well accounted for; but Tradition fays, that the Gentleman, who received his Orders to build a Fort on that Coast, about the Beginning of King Charles II's Reign after his Restoration, for protecting the Company's Trade, chose that Place to ruin the Portuguese Trade at St. Thomas. Others again alledge, and with more Probability, that the Gentleman aforesaid, which I take to be Sir William Langborn, had a Miftress at St. Thomas he was so enamoured of, that made him build there, that their Interviews might be the more frequent and uninterrupted; but whatever his Reasons were, it is very ill fituated. The Soil about the City is fo dry and fandy, that it bears no Corn, and what Fruits, Roots and Herbage they have, are brought to Maturity by great Pains and much Trouble. If it be true, that the Company gave him Power to fettle a Colony in any Part of that Coast that pleased him best, I wonder that he chose not Cabelon, about fix Lengues to the Southward, where the Ground is fertile, and the Water good, with the Conveniency of a Point of Rocks to facilitate Boats landing, or why he did not go nine Leagues farther northerly, and fettle at Policat on the Banks of a good River, as the Dutch have done fince, where the Road for Shipping is made eafy by some Sand Banks that reach three Leagues off Shore, and make the high turbulent Billows that come rolling from the Sea spend their Force on those Banks before they can reach the Shore. The Soil is good and the River commodious, and convenient in all Seasons.

However, the War carried on at Bengal and Bombay, by the English against the Mogus's Subjects, from 1685 to 1689, made Fort St. George put on a better Dress than he wore before; for the peaceable Indian Merchants, who hate Contention and War, came flocking thither, because it lay far from those Incumberers of Trade, and near the Diamond Mines of Golcondab, where there are, many Times, good Bargains to be made, and Money got by our Governors. The black Merchants resorting to our Colony, to secure their Fortunes, and bring their Goods

to a fafe Market, made it populous and rich, notwithstanding its natural Inconveniencies. The Town is divided into two Parts. One where the Europeans dwell is called the White Town. It is walled quite round, and has feveral Bastions and Bulwarks to defend its Walls. which can only be attacked at its Ends, the Sea and River fortifying its Sides. It is about four hundred Paces long, and one hundred and fifty Paces broad, divided into Streets pretty regular, and Fort St. George stood near its Center. There are two Churches in it, one for the English, and another for the Romish Service. The Governor supreintends both, and, in filling up Vacancies in the Romish Church, he is the Pope's Legate a latere in Spiritualities. There is a very good Hospital in the Town, and the Company's Horse-stables are neat; but the old College, where a great many Gentlemen Factors are obliged to lodge, is ill kept in Repair. It is a Town Corporate, governed by Mayor and Aldermen.

THE Black Town is inhabited by Gentows, Mahometans and Indian Christians, viz. Armenians, and Portuguese, where there are Temples and Churches for each Religion, every one being tolerated; and every one follows his proper Employment. It was walled in towards the Land,

when Governor Pit ruled it.

THE Company has their Mint her for coining Bullion that comes from Europe and other Countries, into Rupees, which brings them in good Revenues. They also coin Gold into Pagodoes of Teveral Denominations and Value. There are also Schools for the Education of Children, the English for Reading and Writing English, the Portuguese for their Language and Latin, and the Mahometans, Gentows, and Armenians for their particular Languages. And the English Church is well endowed, and maintains poor Gentlewomen in good Housewifery, good Cloths and Palankines.

THE Diamond Mines being but a Week's Journey from St. George, make them pretty plentiful there; but few great Stones are now brought to Market there, fince that great Diamond which Governor Pit fent to England.

THE current Trade of Fort St. George runs gradually flower, the Trader meeting with Disappointments, and

tome-

fometimes the Liberty of buying and felling is denied them: and I have feen, when the Governor's Servants have bid for Goods at a publick Sale, some who had a Mind to bid more, durit not, others who had more Courage and durft bid, were brow-beaten and threatened. And I was Witness to a Bargain of Surat Wheat taken out of a Gentleman's Hands, after he had fairly bought it by Auction, fo that many trading People are removed to other Parts. where there is greater Liberty and less Oppression.

THE Colony produces very little of its own Growth or Manufacture for foreign Markets. They had formerly a Trade to Pegu, where many private Traders got pretty good Bread by their Traffick and Industry; but the Trade is now removed into the Armenians, Moors and Gentows Hands, and the English are employed in building and repairing of Shipping. The Trade they have to China, is divided between them and Surat, for the Gold, and some Copper, are for their own Markets, and the Gross of their Cargo, which confifts in Sugar, Sugar candy, Alum, China Ware and fome Drugs, as China Root, Gallinggal. &c. are all for the Surat Market.

THEIR Trade to Persia must first come down the famous Ganges, before it can come into Fort St. George's Chanels to be conveyed to Perfia. They never had any Trade to Mocha in the Product and Manufactories of Chormondel before the Year 1713, and Fort St. David supplies the Goods for that Port, so that Fort St. George is an Emblem of Holland in Supplying foreign Markets with

foreign Goods.

THE Colony is well peopled, for there is computed to be eighty thousand Inhabitants in the Towns and Villages; and there are generally about four or five hundred Europeans residing there, reckoning the Gentlemen, Merchants. Seamen, and Soldiery. Their Rice is brought by Sea, from Ganjam and Orixa, their Wheat from Surat and Bengal, and their Fire-wood from the Islands of Diu, a low Point of Land that lies near Matchulipatam, fo that any Enemy that is superior to them in Sea Forces, may easily diffress them.

MATCHULIPATAM, in the latter Part of the last Century, was one of the most flourishing in all India, and the English Company found it to

be the most profitable Factory that they had. They had a large Factory built of Teak Timber; but now there are no English there, the the Dutch continue their Factory still, and keep above a Dozen of Hollanders there to carry on the Chint Trade, for that Commodity is not, as yet, forbid to appear in Holland.

NEXT to Matchelipatam is Narsipore, where the English had a Factory for long Cloth, for the Use of their Factory of Matchelipatam, when they manufactured Chints there.

VIZAGAPATAM, is regularly fortified with four little Bastions, and has about eighteen Guns mounted in it. It has the Advantage of a River, but a dangerous Bar to pass over before we get into it. The Country about asfords Cotton Cloths, both coarse and fine, and the best Dureas, or strip'd Mussins, in India; but the Factory is generally heart-sick for want of Money to refresh it.

In the Year 1709, the Factory drew a War on themselves from the Nabob of Chickacul, for one Mr. Simeon Holcomb, who had been Chief at Vizagapatam, had borrowed confiderable Sums of the Nabob, and affix'd the Company's Seal to the Bonds he gave for them. Mr. Holcomb dying, the Nabob demanded his Money from the succeeding Chief. who would not pay him, alledging, that Holcomb had borrowed it for his own private Use, and not for the Company's, and that he must get Payment out of Holcomb's. private Estate, if there was enough found to pay the Debt. otherwise he might get his Money from some inland Rajabs, who stood indebted to Holcomb, by his Books of Accounts, in a greater Sum than would pay his Principal and Interest; and that he being the Mogul's General, could compel those Rajabs to pay their just Debts, which they would make over to him: But the Nabob, not caring to enter into a War with his Country-men on fuch a Foundation, fent Agents to acquaint the Governor and Council of Fort St. George, with his Affairs at Vizagapatam. They proved deaf to all the Agent's Propositions and Arguments, and hardly treated him civilly, so he went back. to his Master, with the Account of his ill Success. Upon which the Nabob came to a Garden about half a League from Vizagapatam, accompanied with five hundred Horse, and three thousand five hundred Foot, to demand his Mo-

ney. I being accidentally there in a small Dutch-built Ship, that I had bought from the French, on my Credit, at Fort St. George, and the Factory being but ill mann'd, Mr. Hastings, who was then Chief, and my Friend, defired the Affistance of my Arms and Counsel in that Juncture of Affairs, which I very freely gave him; and my Opinion being ask'd in Council, what I thought about the Affair, I advised him and his Council to compound the Matter as well as they could, and spin out Time that we might better fortify the Avenues to the Factory. My Advice of compounding the Matter was rejected, but the other Part we followed, fo, with feven Europeans that belonged to the Factory, and twelve that were with me, and twenty Topases, and two hundred and eighty Natives, most of them Fishers, that lived under the Company's Protection, we fortified fome Rocks that the Enemy was obliged to pass within Pistol-shot of, if they had a Mind to attack us. We threw up Breast-works between the Rocks, and moored my Ship within Piftol-shot of the Shore, and had eight minion Guns to scour the Sands, if they had attempted to come that Way, and, for fix Weeks we continued on our Guard, and were often alarmed in the Night, but finding us always ready to receive them, they did not think it proper to force an Entry into the Town.

I had the Honour to command all the Outguards, and the Chief, with eight Europeans and twenty Blacks, kept the Fort. Thus we continued in perpetual Watchings and Alarms, till Reinforcements arrived from Fort St. George, and then I left them, and proceeded on a Voyage to Pegu. Both Parties being very bufy, one striving to get his Money by Compulsion, and the other, to save the Company's Money on any Terms, right or wrong. The War being drawn to a greater Length than was imagined at first, and Charges rising higher than was expected, inclined them to make all up amicably, which was at last effected by the Company's paying near the Sum that was at first demanded.

THE Nabob, whose Name was Fakirly Cawn, would hear of no Peace, without the Company's Merchant, who was a Gentow called Agapa, and a Subject of the Mo-X 2 gul's,

gul's, who was very active in the War, in encouraging the Town's People to defend themselves and the Compainy's Interest, and who also had wrote to some neighbouring Rajabs, to embroil the Nabob's Affairs in his Absence, in order to divert him from pursuing his Demands on Vizagapatam, should be delivered up to him, which, at last, he was, and was put to a very cruel Death. He was set in the hot scorching Sun three Days, with his Hands sastened to a Stake over his Head, and one of his Legs tied up till his Heel touched his Buttock, and, in the Night, put into a Dungeon, with some venomous Snakes to bear him Company, and this was repeated till the third Day he ended his miserable Life; but the Company's Merchants, for the suture, will be cautious how they espouse the Company's Interest again.

THERE was one Baily, a Recruit from Fort St. George, on fome Discontent, deserted the Company's Service, and entered into the Nabob's; but falling into an Ambush, was taken Prisoner by our Men, and was sent to Fort St. George, where, for his Desertion, he was deservedly whipt out of this World into the next, and there I leave him.

AFTER the War was ended, and all quiet, the Nabob returned to Chickacul, but could neither forget nor forgive his Treatment at Fort St. George and Viz gapatam, but finding by Force he could not get the Factory into his Hands, without great Loss of Men and Money, he had Recourse to Stratagem, by surprising it. He came into the Town one Day with a hundred Horse, and some Foot, without advertifing his coming, as was usual at the Towngate, and before the Chief could have Notice, he was got into the Factory, with twenty or thirty of his Attendants. The Alarm being given, a resolute bold young Gentleman, a Factor in the Company's Service, called Mr. Richard Horden, came running down Stairs, with his Fuzee in his Hand, and his Bayonet screwed on its Muzzle, and, prefenting it to the Nabob's Breast, told him in the Gentow Language, (which he was Master of) that the Nabob was welcome, but if any of his Attendants offered the least Incivility, his Life should pay for it. The Nabob was furprifingly aftonished at the Resolution and Bravery of the young Gentleman, and fat down to confider a little, Mr.

Mr. Horden keeping the Muzzle of his Piece still at his Breast, and one of the Nabob's Servants standing all the while behind Mr. Horden, with a Dagger's Point close to his Back, so they had a Conference of half an Hour long, in those above mentioned Postures, and then the Nabob thought sit to be gone again, sull of Wonder and Admiration at so daring a Courage.

THERE are many ancient Pagods or Temples in this Country, but there is one very particular that stands upon a little Mountain near Vizagapatam, where they worship living Monkies; and, by Report, many Hundreds breed there, which are nourished by the zealous Priests, whose Devotion consists mostly in boiling Rice and other Food for their comical little Gods, which, at Meal-times, assemble at the Pagod, and eat what is prepared for them, and retire again in good Order; but it is less dangerous to kill a Man near that Temple than a Monkey.

CHAP. XX.

Gives an Account of the famous Kingdom of Pegu, its Situation and Product, with its Laws, Customs, and Religion, &c.

HE Sea-coast from Negrais to Syrian Bar, is in the Dominions of Pegu, there are some of the Mouths of Pegu River open on that Coast into the Sea.

Is by Accident a Ship bound to Syrian, be driven a League or two to the Eastward of that River's Mouth, a strong Tide carries her on hard Sands till she sits fast on them, for Anchors are of no Use to stop them, because of the Rapidity of the Current; at low Water the Ships are dry when on those Sands, and the Sea leaves them, and retires sive or six Leagues, at which Time the ship-wreck'd Men walk on the Sands toward the Shore for their Sasety, for the Sea comes back with so much Noise, that the roaring of the Billows may be heard ten Miles off, for a Body of Waters comes rolling in on the Sand, whose Front is above two Fathoms high, and whatever Body lies

in its Way it overturns, and no Ship can evade its Force. but in a Moment is overturned.

ABOUT fix Leagues from the Bar of Pegu River is the City of Syrian, it is built near the River's Side on a rifing Ground, and walled round with a Stone-wall without Mortar. The Governor, who is generally of the Bloodroyal, has his Lodgings in it, but the Suburbs are four Times bigger than the City. It was many Years in Posfession of the Portuguese, till by their Insolence and Pride they were obliged to quit it.

THE ancient City of Pegu stands about forty Miles to the Eastward of Syrian, the Ditches that surrounded the City, which are now dry, and bear good Corn, testify that few Cities in the World exceeded it in Magnitude, for they are reckoned fix or feven Leagues round their

outward Polygon.

IT was the Seat of many great and puissant Kings, who made as great a Figure as any in the East, but now its Glory is in the Dust, for not one twentieth Part of it is inhabited, and those are but the lower Class of People who inhabit it. The Cause of the Ruin of the Kingdoms of

Pegu, and Martavan was thus.

THERE was great Love and Friendship between the Kings and Subjects of Pegu and Siam, being next Neighbours to one another, and they had a good Intercourse of Trade, both by Land and Sea, till in the fifteenth Century, a Pegu Vessel being at Odia the chief City of Siam, and when ready to depart for Pegu, anchored one Evening near a little Temple a few Miles below the City, and the Mafter of the Veffel, with some of his Crew, going to worship in that Temple, seeing a pretty well carv'd Image of the God Samsay, about a Covet high, fell in Love with it, and finding his Priefts negligent in watching, stole him away, and carried him on board Prisoner for Pegu. When the negligent Priests missed their little God they were in a deplorable Condition, lamenting their Loss to all their neighbouring Priests, who advised them to complain to the King of Siam of the Thest, which accordingly they elid, imploring his good Offices with the King of Pegu, to have their God sent back; and it happened that by the unseasonable Floods in the River that Year, there came to

be a great Scarcity of Corn, which Calamity was imputed by the Priests to the Loss of Samsay, upon which the pious Prince sent an Embassy to his Brother of Pegu, desiring the Restitution of the Image, whose Absence had caused so great Loss and Clamour in his Country.

THE King of Pegu being as great a Bigot as his Brother of Siam, would by no Means deliver back a God who had fled from the Impieties of his native Land to him for Protection, and with that Answer sent back the Siam Ambasfador, who was not a little mortified with the Disappoint-

ment.

Since fair Means could not persuade the Peguer to send back the little God, the Siamer was resolved to try what Force would do, and accordingly raised an Army of two or three hundred thousand Men to invade the King of Pegu's Dominions, and the first Fury of the War sell on the Province of Martavan, being contiguous to the Territories of Siam, and with Fire and Sword destroyed the open Country almost to the Gates of the City of Martavan, where often the King of Pegu kept his Court.

AFTER the Siamer had fatiated his Cruelty and Rage, by the Destruction of many poor innocents, he retired back to his own Country very much elevated with Pride and Vain-glory for his great Atchievements, but next Year he was pretty well humbled, for the Peguer raised a much greater Army, and embarking them in small Boats on the River Mennon, on which the City of Odia stands in one of its Islands, his Army was brought with fo much Celerity and Secrecy, that the Peguer brought the first News of his Invasion, and pitching his Tents round the City, foon brought it into great Straits, by stopping the daily Provisions that supported it, but unexpectedly the River bringing down great Floods of Waters, fooner than their ordinary Time, the Country about the City overflowed, and spoilt all the Peguer's Provisions of Corn, and drowned near half of his Army, which obliged him to raise the Siege, and retire to his own Dominions.

NEXT Year, the Siamer, to be revenged, levied another great Army, with which he over ran all the inland Countries of Pegu that lay near him, and annexed them to his own Dominions. The Peguer finding that he could not

X 4

recover his Land, without foreign Aid and Affistance, invited the Portuguese, whose Name began to be dreadful in India, and by the great Encouragement he gave them, got about a thousand Volunteers into his Service. Neither the Siamers nor the Peguers at that Time understood the Use of Fire Arms, and their Noise and Execution, at so great a Distance terrified them. With the Portuguese Asfistance, the Peguer went with his Army, which was very numerous to find out the Siamer, and having found him, gave him Battle, the Portuguese being in the Front with their Fire Arms, foon put the Siamer to Flight, before they could come to Handy blows, on which he left the Peguer's Country in greater Haste than he came into it.

THE King of Pegu was so sensible of the Portuguese Service in gaining the Battle, and driving the Siamers out of his conquered Country, that he made one Senbor Thoma. Pereyra (who commanded the Portugueje in the War, Generalissimo of all his Forces, which Preferment made the Portuguese so insolent, that in a few Years they became intolerable to all Ranks and Degrees of Persons in Pegu.

BOTH Kings grew tired of War, but both too proud to make Advances toward Peace, fo that for many Years they had skirmishing with small Parties tho' no set Battles, and where-ever the Portuguese Arms went, they had Vic-

tory to accompany them.

THE King of Pegu, to have his Forces nearer the Borders of Siam, fettled his Court at Martavan, and kept the Portuguese near him, to be ready on all Occasions, either to repel or affault the Siam Forces, as Opportunity served, and Thoma Pereyra was the darling Favourite at Court, he had his Elephants of State, and a Guard of his own Countrymen to attend him. One Day as he was going from Court in State, on a large Elephant, towards his own Palace, he chanced to hear Mufick in a Burgher's Houle, whose Daughter being a very beautiful Virgin, had been married that Morning to a young Man of the Neighbourhood. The General went to the House and wished them Joy, and defired to fee the Bride. The Parents took the General's Visit for a great Honour done them, and brought their Daughter to his Elephant's Side; he being smitten

with her Beauty, ordered his Guard to feize her and carry her to his House.

His Orders were but too readily obeyed, and the poor Bridegroom not being able to bear his Lofs, cut his own Throat, and the disconsolate Parents of their injured Children, rent their Clothes, and went crying and complaining through the Streets towards the King's Palace, imploring their Gods and Countrymen to avenge them on the insolent Portuguese, the common Oppressors of their Country. Crowds of People came from all Parts of the City, to hear and fee the Tragedy, their Numbers grew fo great that the Streets were hardly big enough for them, and their Noise so loud that it reached the King's Ears, who fent to know the Cause of their Uproar. The Messenger returning, acquainted the King what had been transacted. and he, to appeale the Tumult, fent them Word that he would punish the Criminal, and accordingly fent for his General, but he being much taken up with the Enjoyment of his new Purchase, made an Excuse that he was so much out of Order, that he could not then wait on his Majesty till he was better, which Answer so provoked the King, that he ordered the whole City to take Arms, and to make a general Massacre on all the Portuguese wheresoever they could be found in City or Country. The King's Orders were put in Execution fo speedily, that in a few Hours all the Portugueje were slaughtered, and the guilty Criminal was taken alive, and made fast by the Heels to an Elephant's Foot, who dragged him through the Street till there was no Skin nor Fleth left to cover his Bones, which Spectacle appealed the enraged Populace. There were only three Portuguese saved, who were accidentally in the Suburbs next the River, who hid themselves till Night favoured their Escape in a small Boat in which they coasted along the Shore, feeding on what the Woods and Rocks afforded them, and at length arrived at Malacca, to give an Account of the melancholy Scene.

BOTH Kingdoms being much weakened with bloody Wars, took Rest for many Years, but never entered on Treaties of Peace. So about the Middle of the seventeenth Century, the Siamer invaded the Dominions of Pegu, and conquered all to the Southward of Martavan, taking in the

Provinces

Provinces of Tanacerin and Ligore, who were Tributaries

to Pegu, and retains them still in his Possession.

THE Dominions of Barma are at present very large, reaching from Moravi near Tanacerin, to the Province of Yunan in China, about eight hundred Miles from North to South, and two hundred and fifty Miles broad from West to East. It has no Sea-port but Syrian, and that River is capable to receive a Ship of fix hundred Tuns. The Town drives a good Trade with Armenians, Portuguese, Moors and Gentows, and some English; their Import is several Sorts of Indian Goods, such as Beteellas, Mulmuls, Cossas, Sannis, Orangshays, Tangebs, European Hats coarse and fine, and Silver.

THE Country is very fruitful in Corn, Fruits, and Roots, and excellent Legumen of several Species, Abundance of wild Game either quardrupeds or winged. In the Months of September and October, wild Deer are so plentiful that I have bought one for three or four Pence; they are very fleshy, but no Fat about them. They have many Sorts of good Fish, and Swines Flesh and Poultry

are both plentiful and good.

THEY wear none of our European Commodities but Hats and Ribbons, and the Gentry will give extravagant Prices for fine Beaver Hats, and rich Ribbons flower'd with Silver and Gold, and if it be never fo broad it is ftretch'd up the Crown of the Hat as far as it can go, and they use no Sort of Cock to their Hats. Cotton Cloths from Bengal and Chormondel, with fome striped Silks, are best for their Market, and Silver of any Sort is welcome to them. It pays the King eight and an half per Cent. Custom, but in lieu of that high Duty, he indulges the Merchants to melt it down, and put what Alloy they please in it, and then to pass it off in Payments as high as they can.

THE King generally adds ten per Cent. on all Silver that comes into his Treasury, besides what was put on at first, and tho' it be not flower'd, it must go off in all his Payments, but from any Body else it may be refused if it is

His Government is arbitrary. All his Commands are Laws, but the Reins of Government are kept steady and

gently in the King's own Hand. He severely punishes his Governors of Provinces or Towns, if Oppressions or other illegal Practices are proved upon them; and to know how Affairs pass in the State, every Province or City has a *Mandereen* or Deputy residing at Court, which is generally in the City of Ava, the present Metropolis.

EVERY Morning these Mandereens are obliged to attend at Court, and after his Majesty has drest and breakfasted, which is generally on a Dish of Rice boiled in fair Water, and his Sauce is some Shrimps dried and powder'd, and some Salt and Cod-pepper mixt with those two Imgredients, and that Mixture makes a very pungent Sauce, which they call Prock, and is in great Esteem and Use

among the Peguers.

When his Breakfast is over, he retires into a Room so contrived that he can see all the Attendants, but none can see him, and a Page stands without to call whom the King would have give Account of the current News of his Province or City, which is performed with prosound Reverence toward the Room where the King stays, and with a distinct audible Voice; and if any particular Matters of Consequence is forgot or omitted, and the King comes to hear of it by another Hand, severe Punishments sollow, and so he passes his Mornings in hearing the necessary Cases of his own Affairs as well as those of his Subjects.

If he is informed of Treason, Murder, or such like heinous Crimes, he orders the Matter to be judicially tried before Judges of his own choosing, for that Time and Affair, and on Conviction he signs the dead Warrant, wherein he orders, that the Wretch convicted shall trade no more on his Ground, and Execution presently follows, either by beheading, or ordering them to be Sport for his Elephants, which is the cruelest Death. Sometimes he banishes them for a certain Time to the Woods, and if they are not devoured by Tigers, or killed by wild Elephants, they may return when their Term is expired, and pass the Remainder of their Days in serving a tame Elephant; and for smaller Crimes they are only condemned to clean his Elephants Stables for Life.

His Subjects, if they may be so called, treat him with fulsome Adulation. When they speak or write to him they

they call him their God (or in their Language Kiack) and in his Letters to foreign Princes, he affumes the Title of King of Kings, to whom all other Kings ought to be subject, as being near Kinsman and Friend to all the Gods, in Heaven and on Earth, and by their Friendship to him all Animals are sed and preserved, and the Seasons of the Year are regularly kept: The Sun is his Brother, and the Moon and Stars are his near Relations, Lord over the

Floods and Ebbing of the Sea.

The King's Palace at Ava is very large, built of Stone, and has four Gates for its Conveniencies; Ambassadors enter at the East Gate, which is called the golden Gate, because all Ambassadors make their Way to him by Presents. The South Gate is called the Gate of Justice, where all People that bring Petitions, Accusations or Complaints, enter. The West is the Gate of Grace, where all that have received Favours, or have been accusated of Crimes, pass out in State, and all condemned Persons carried out in Fetters; and the North Gate fronting the River, is the Gate of State where his Majesty passes through, when he thinks sit to bless his People with his Presence, and all his Provisions and Water are carried in at that Gate.

When an Ambassador is admitted to Audience in the Palace, he is attended with a large Troop of Guards, with Trumpets sounding, and Heralds proclaiming the Honour the Ambassador is about to receive, in going to see the Glory of the Earth, his Majesty, and between the Gate and the Head of the Stairs that lead to the Chamber of Audience, the Ambassador is attended with the Master of the Ceremonies, who instructs him to kneel three Times in his Way thither, and continue so with his Hands over his Head, till a Proclamation is read before he dare rise.

His Sword Officers have no Salary, nor his Soldiers for their Support, but there is a Province or a City given to fome Minion, who is to give Sustenance to such a Number of Soldiers, and find the Palace at Ava with such a Quota of Provisions as the Providore thinks fit to appoint.

WHEN there is a War, and Parties are fent on Expeditions; then the King allows them Pay, Clothes, Arms, and provides Magazines of Provisions for them; but as

foon

of the EAST-INDIES. 3

foon as the War is at an End, then the Clothes and Arms are returned.

ALL Cities and Towns under this King's Dominions. are like aristocratical Commonwealths. The Prince or Governor feldom fits in Council, but appoints his Deputy and twelve Counfellors or Judges, and they fit once in ten Days at least, but oftner when Business calls them. They convene in a large Hall, mounted about three Foot high, and double Benches round the Floor for People to fit or kneel on, and to hear the free Debates of Council. The Hall being built on Pillars of Wood, is open on all Sides, and the Judges fit in the Middle on Matts, and fitting in a Ring there is no Place of Precedence; there are no Advocates to plead at the Bar, but every one has the Privilege to plead his own Caufe, or fend it in Writing to be read publickly, and it is determined judicially within the Term of three Sittings of Council, but if any one questions his own Eloquence, or Knowledge of the Laws of Equity, he may impower a Friend to plead for him, but there are no Fees but what the Town contributes for the Maintenance of that Court, which in their Language is called the Rounday, and those Contributions are very small: There are Clerks fet at the Backs of the Judges, ready to write down whatever the Complainant and Defendant has to fay, and the Cafe is determined by the Prince and that Council, very equitably; for if the least Partiality is found awarded to either Party, and the King is made acquainted with it by the Deputies at Court, the whole Sentence is revoked, and the whole Board are corrected for it, so that very few have Occasion to appeal to Court, which they may do if they are aggrieved, and if an Appeal is made upon ill Grounds, the Appellant is chastisfed, which just Rigour hinders many tedious Suits that arise where there are no Penalties annexed to fuch Faults.

THE Judges have a particular Garb of their own. Their Hair being permitted to grow long, is tied on the Top of their Heads with Cotton Ribbon wrapt about it, and it stands upright in the Form of a sharp Pyramid. Their Coat is of a thin Betella, so that their Skin is easily seen through it. About their Loins they have a large Lungee or Scarf, as all other Peguers have, that reaches to their Ancles, and

against

against the Navel a round Bundle made of their Lungee, as big as a Child's Head, but Stockings and Shoes are not

used in Pegu.

THE Barmaes wear the same Habit, and imprint several Devices in their Skins, prick'd with a Bodkin, and powder of Charcoal rubbed over the little Wounds while the Blood continues wet in them, and the black Marks remain ever after. The Peguers dare not paint their Skins, so that the Natives of each Nation are easily known by the distinguishing Mark of Painting or Plainness. There are sew of their Men fat, but plump, well shap'd, of an Olive Colour, and well seatur'd.

The Women are much whiter than the Men, and have generally pretty plump Faces, but of small Stature, yet very well shap'd, their Hands and Feet small, and their Arms and Legs well proportioned. Their Head-dress is their own black Hair tied up behind, and when they go abroad, they wear a Shaul tolded up, or a Piece of white Cotton Cloth lying loose on the Top of their Heads. Their bodily Garb is a Frock of Cotton Cloth or Silk, made meet for their Bodies, and the Arms of their Frock stretch'd close on the Arm, the lower Part of the Frock reaching Half-thigh down. Under the Frock they have a Scarf or Lungee doubled fourfold, made fast about their Middle, which reaches almost to the Ancle, so contrived, that at every Step they make, as they walk, it opens before, and shews the right Leg and Part of the Thigh.

This Fashion of Petticoats, they say, is very ancient, and was first contrived by a certain Queen of that Country, who was grieved to see the Men so much addicted to Sodomy, that they neglected the pretty Ladies. She thought that by the Sight of a pretty Leg and Plump Thigh, the Men might be allured from that abominable Custom, and place their Affections on proper Objects, and according to the ingenious Queen's Conjecture, that Dress of the Lungee had its desired End, and now the Name of

Sodomy is hardly known in that Country.

The Women are courteous and kind to Strangers, and are very fond of marrying with Europeans, and most part of the Strangers who trade thither, marry a Wife for the Term they stay. The Ceremony is, (after the Parties are

agreed)

agreed) for the Bride's Parents or nearest Friends or Relations, to make a Feast, and invite her Friends and the Bridegroom's, and at the End of the Feast, the Parent or Bride-man, asketh them both before the Company, if they are content to cohabit together as Man and Wife, and both declaring their Consent, they are declared by the Parent or Friend to be lawfully married, and if the Bridegroom has an House, he carries her thither, but if not, they have a Bed provided in the House where they are married, and are left to their own Discretion how to pals away the Night.

THEY prove obedient and obliging Wives, and take the Management of Affairs within Doors wholly in their own Hands. She goes to Market for Food, and acts the Cook in dreffing his Victuals, takes Care of his Clothes. in washing and mending them; if their Husbands have any Goods to fell, they fet up a Shop and fell them by Retail, to a much better Account than they could be fold for by Wholefale, and fome of them carry a Cargo of Goods to the inland Towns, and barter for Goods proper for the foreign Markets that their Husbands are bound to. and generally bring fair Accounts of their Negotiations. If the proves false to her Husband's Bed, and on fair Proof convicted, her Husband may carry her to the Rounday, and have her Hair cut, and fold for a Slave, and he may have the Money; but if the Husband goes astray, she'll be apt to give him a gentle Dose, to send him into the other World a Sacrifice to her Resentment.

If the proves prolifick, the Children cannot be carried out of the Kingdom without the King's Permission, but that may be purchased for forty or fifty Pounds Sterl. and if an irreconcileable Quarrel happen where there are Children, the Father is obliged to take Care of the Boys, and the Mother of the Girls. If a Husband is content to continue the Marriage, whilft he goes to foreign Countries about his Affairs, he must leave some Fund to pay her about fix Shillings eight Pence per Month, otherwise at the Year's End she may marry again, but if that Sum is paid her on his Account, she is obliged to stay the Term of three Years, and she is never the worse, but rather the

petter

better look'd on, that she has been married to several Eu-

ropean Husbands.

THE Pegu Clergy are the best Observers of the Rules of Morality and Charity, that I have met with in my Travels, and the People are pious and hospitable. There are vast Numbers of Temples built in this Country, but most of Wood; every one has free Liberty to build a Temple. and when it is finished, purchases or bestows a few Acres of Ground to maintain a certain Number of Priests and Novices, who manure and cultivate the Ground for their own Sustenance, and in the Garden the Priests and Novices have a Convent built for their Conveniency of Lodgings and Study, and those are their settled Benefices, for they are no Charge to the Laity, but by their industrious Labour in managing their Garden, they have enough for themselves, and something to spare to the poor Indigent of the Laity; but if their Garden is too small or steril for the Subliftence of their Family, then they fend some Novices abroad with a large Orange-coloured Mantle about their Bodies, with a Basket hanging on their left Arm, a little Drum in the left Hand, and a little Stick in the right, and when they come to the People's Doors they beat three Strokes with the Stick on the Drum, and if none come to answer, they beat again, and so on to the third Time, and then if none answer, they proceed to the next House without speaking a Word, but they are seldom fent away without an Alms of Rice, Pulfe, Fruits, or Roots, which is their only Food, and what they receive more than they have present Occasion for, they distribute to the Poor, for they never take Care for to Morrow, living all their Days in Celibacy, they have none of the Anxiety of thinking about Provision for a Widow and Children. Their innocent exemplary Lives procure them many Free-will-offerings from the well disposed Laity, and what is faved after providing their Convents, of Eatables and Clothing, returns to the Maintenance of the diffress'd Laity, who, through Age, Sickness, or other Accidents, cannot maintain themselves by Labour, but none who are able to work, partake of their Charity.

THEY preach frequently, and have a numerous Auditory. Their Religion is Paganism, and their System of

Divini-

Divinity Polytheism. They teach, that Charity is the most sublime Virtue, and therefore ought to be extensive enough to reach not only to human Species, but even to Animals, wherefore they neither kill nor eat any, and they are so benevolent to Mankind, that they cherish all alike without Distinction, for the sake of Religion. They hold all Religions to be good that teach Men to be good, and that the Deities are pleased with Variety of Worship, but with none that is hurtful to Men, because Cruelty must be disagreeable to the Nature of a Deity: So being all agreed in that Fundamental, they have but sew Polemicks, and no Persecutions, for they say that our Minds are free Agents, and ought neither to be forc'd nor setter'd.

THERE are two large Temples near Syrian, so like one another in Structure, that they feem to be built by one Model. One stands about six Miles to the Southward. called Kiakiack, or, the God of Gods Temple. In it is an Image of twenty Yards long, lying in a fleeping Posture, and, by their Tradition, has lain in that Posture fix thousand Years. His Doors and Windows are always open, and every one has the Liberty to fee him; and. when he awakes, this World is to be annihilated. The Temple stands on an high champain Ground, and may easily be seen, in a clear Day, eight Leagues off. The other stands in a low Plain, North of Syrian, about the fame Diftance, called Dagun. His Doors and Windows are always shut, and none enters his Temple but his Priests. and they won't tell what Shape he is of, only he is not of human Shape. As foon as Kiakiack diffolves the Being and Frame of the World, Dagon or Dagun will gather up the Fragments, and make a new one. There are yearly Fairs held near those Temples, and the Free-will Offerings arising at those Fairs, are for the Use of the Temples.

THE Country is fruitful and healthful, and the Air fo good, that when Strangers come hither in a bad State of Health, they feldom fail of a speedy Recovery; but the Small Pox is dreaded as pestiferous, and in the Province of Kirian that Distemper is most dangerous and most infectious, so that if any one is seized by that Disease, all the

X

Neigh-

Neighbourhood removes two or three Miles Distance, and builds new Houses, which are easily done with Bambows and Reeds, which they have in great Plenty. They leave with the diseased Person a Jar of Water, a Basket of raw Rice, and some eathern Pots to boil it in, then they bid him farewel for twenty one Days. If the Patient has Strength enough to rise and boil Rice, he may then recover, if not, he must even die alone. And it is observable, that, while a Person has that Distemper, the Tyger, for all his Voraciousness, will not touch him. If the Patient dies within the Term of twenty one Days, then the Smell certifies them on their approaching the House, and if he live, they carry him to their new built City,

and make him a free Burgefs.

I saw the Ceremony of an high Priest's Funeral, and was not a little pleased with the Solemnity. After the Corps had been kept three or four Months by Spirits or Gums from Putrefaction, there was a great Mast fix'd in the Ground, so faft, that it could be moved no Way from its perpendicular Polition. Then, about fifty or fixty Yards on each Side of that Mast, four smaller Masts were placed, and fixed perpendicularly in the Ground. Around the great Mast, in the Middle, were erected three Scaffolds above one another, the lowermost bigger than the second, and the third fmaller than that, fo that it look'd like a Pyramid four Stories high. The Scaffolds were railed in on each Side except an open Place of three or four Foot wide on each Side. All the Scaffolds, and the Ground below them. were filled with Combustibles. From the Mast in the Middle four Ropes were carried to the other four Masts. and hawl'd tight, and a Fire-rocket on each Rope was placed at the respective small Masts. Then the Corps was carried to the upper Story of the Pyramid, and laid flat on the Scaffold, and, after a great Shew of Sorrow among the People there present, a Trumpet was sounded, which was a Signal to fer Fire to the Rockets, which, in an Instant, slew with a quick Motion along the Ropes, and fet Fire to the Combuttibles, and in a Moment they were all in a Flame, so that in an Hour or two all was. confumed.

This high Priest was held in so great Veneration, that he was reckoned a Saint among the People. He was in great Esteem with the King, and when any Nobleman fell into Disgrace, he used his Interest with the King to have him restored again to Favour, unless they were guilty of atrocious Crimes, and, in that Case, he used his endeavours to have the Rigour of the Punishment extenuated.

All the Pegu Clergy are Mediators in making up Cases of Debate and Contention that happen among Neighbours. They never leave mediating till there be a Reconciliation; and, in Token of Friendship, according to an ancient Custom there they eat Champock from one another's Hand, and that seals the Friendship. This Champock is Tea of a very unsavoury Taste, it grows, as other Tea does, on Bushes, and is in Use on such Occasions all over

Pegu.

And now, fince I must leave Pegu, I must not omit giving the Clergy their due Praises in another particular Practice of their Charity. If a Stranger has the Misfortune to be ship-wreck'd on their Coast, by the Laws of the Country, the Men are the King's Slaves, but, by the Mediation of the Church, the Governors overlook that Law; and when the unfortunate Strangers come to their Baws, they find a great deal of Hospitality, both in Food and Raiment, and have Letters of Recommendation from the Priests of one Convent to those of another on the Road they defign to travel, where they may expect Veffels to transport them to Syrian; and if any be fick or maim'd. the Priests, who are the Peguers chief Physicians, keep them in their Convent, till they are cured, and then furnish them with Letters, as is above observed, for they never enquire which Way a Stranger worships God, but if he is human, he is the Object of their Charity.

THERE are some Christians in Syrian of the Portuguese

Offspring, and some Armenians.

THE Islands off the Coast of Pegu are the Cocoes, uninhabited, but full of Cocoa-nut Trees. They lie about twenty Leagues West-south-west from Cape Negrais: And the Islands Perperies lie thirty six Leagues South of the said Cape. They are high Islands uninhabited, and so environed with Rocks under Water, that there is Danger in Y 2 landing

landing on them. They feem to be overgrown with Woods, and that is all that I could observe of them. There is another small Island called *Commoda*, that lies about ten Leagues off the Coast of *Pegu*, but is not inhabited.

CHAP. XXI.

Treats of Merjee and Tanacerin, and of the Sea-coast in the King of Siam's Dominions, of the Massacre there of the English in the Year 1687.

HE next Place on the Continent, to the Southward. is Merjee, a Town belonging to the King of Siam, situated on the Banks of the River of Tanacerin, lying within a great Number of small uninhabited Islands. Harbour is fafe, and the Country produces Rice, Timber for building, Tin, Elephants, Elephants Teeth and Agala Wood. In former Times a good Number of English free Merchants were fettled at Merjee, and drove a good Trade, living under a mild indulgent Government: but the old East-India Company envying their Happiness, by an arbitrary Command, ordered them to leave their Industry, and repair to Fort St. George, to serve them, and threatened the King of Siam with a Sea War, if he did not deliver those English up, or force them out of his Country, and, in the Year 1687, fent one Captain Weldon in a small Ship called the Curtany, to Merjee with that Message. He behaved himself very insolently to the Government, and killed some Siamers, without any just Cause. One Night when Weldon was ashore, the Siamers, thinking to do themselves Justice on him, got a Company together, defigning to feize or kill the Aggressor, but Weldon having Notice of their Delign, made his Escape on board his Ship, and the Siamers missing him, tho' very narrowly, vented their Rage and Revenge on all the English they could find. The poor Victims being only guarded by their Innocence, did not fo much as arm themselves, to withstand the Fury of the enraged Mob, so that seventy of the EAST-INDIES. 341

fix were massacred, and hardly twenty escaped on board of the Curtany; so there was the tragical Consequence of

one Man's Infolence.

Before that dreadful Time, the English were so beloved and favoured at the Court of Siam, that they had Places of Trust conferred upon them, both in the civil and military Branches of the Government. Mr. Samuel White was made Shawhandaar or Custom-master at Merjee and Tenacerin, and Captain Williams was Admiral of the King's Navy; but the troublesome Company, and a great Revolution that happened in the State of Siam, made some repair to Fort St. George, others to Bengal, and some to Atcheen.

THE Islands opposite to the Coast of Tenacerin, are the Andemans. They lie about eighty Leagues off, and are surrounded with many dangerous Banks and Rocks; they are all inhabited with Canibals, who are so fearless, that they will swim off to a Boat, if she approach near the Shore, and attack her with their wooden Weapons, notwithstanding the Superiority of Numbers in the Boat, and the Advantage of missive and defensive Arms of Iron, Steel and Fire.

I knew one Fergusson, who commanded a Ship from Fort St. George, bound from Malacca to Bengal, in Company with another Ship, going too near one of the Andeman Islands, was driven, by the Force of a strong Current, on some Rocks, and the Ship was lost. The other Ship was driven thro' a Channel between two of the same Islands, and was not able to affist the shipwreck'd Men, but neither Fergusson nor any of his People were ever more heard of, which gave Ground to conjecture that they were all devoured by those savage Canibals.

The next Place of any Commerce on this Coast, is the Island of Jonkceyloan, it lies in the Dominions of the King of Siam. Between Merjee and Jonkceyloan there are several good Harbours for Shipping, but the Sea-coast is very thin of Inhabitants, because there are great Numbers of Freebooters, called Salleiters, who inhabit Islands along the Sea-coast; and they both rob, and take People for Slaves, and transport them for Atcheen, and there make Sale of them

Υş

them, and Jonkceyloan often feels the Weight of their De-

predations.

THE North End of Jonkceyloan lies within a Mile of the Continent, but the South End is above three Leagues from it. Between the Island and the Continent is a good Harbour for Shipping in the Southwest Monsoons, and on the West Side of the Island Puton Bay is a safe Harbour in the North-east Winds. The Islands afford good Masts for Shipping, and Abundance of Tin, but a tew People to dig for it, by reason of the afore-mentioned Outlaws, and the Governors being generally Chinese, who buy their Places at the Court of Siam, and, to reimburse themselves oppress the People, in so much that Riches would be but a Plague to them, and their Poverty makes them live an easy indolent Life.

YET the Villages on the Continent drive a small Trade with Shipping that come from the Chormondel Coast, and Bengal, but both the Buyer and Seller trade by Retail, so that a Ship's Cargo is a long Time in selling, and the Pro-

duct of the Country is as long in purchasing.

THE Islands off this Part of the Coast are the Nicobars, and are about ninety Leagues distant from the Continent. The Northmost Cluster is low, and are called the Carnicubars, and by their Vicinity to the Andemans, are but thinly inhabited. The middle Clusters is fine champain Ground, and all but one, well inhabited. They are called the Somerera Islands, because on the South End of the largest Island, is an Hill that resembles the Top of an Umbrella or Somerera. About fix Leagues to the Southward of Somerera Mand, lies Tallang-jang the uninhabited Island, where one Captain Owen lost his Ship in the Year 1708, but the Men were all faved, and finding no Inhabitants, they made Fires in the Night, and next Day there came five or fix Canoes from Ning and Goury, two fine Islands that lie about four Leagues to the Westward of the defert Island, and very courteously carried the shipwreck'd Men to their Islands of Ning and Goury, with what little Things they had faved of their Apparel and other Necessaries.

NING and Goury are two fine smooth Islands, well inhabited, and plentifully furnished with several Sorts of good good Fish, Hogs and Poultry, but they have no Horses, Cows, Sheep, nor Goats, nor wild Beafts of any Sort, but Monkies. They have no Rice nor Pulse, so that the Kernel of Cocoa-nuts, Yams, and Potatoes ferves them for Bread.

ALONG the North End of the Eastmost of the two Iflands, are good Soundings from ten to eight Fathoms Sand, about two Miles off the Shore. The People come thronging on board in their Canoes, and bring Hogs, Fowl, Cocks, Fish, fresh, salted and dried Tams, the best I ever tasted, Potatoes, Parots and Monkies, to barter for old Hatchets, Sword-blades, and thick Pieces of Iron-hoops, to make defensive Weapons against their common Disturbers and implacable Enemies the Andemaners; and Tobacco they are very greedy of, for a Leaf of Tobacco, if pretty large, they will give a Cock, for three Foot of an Iron Hoop, a large Hog, and for one Foot in Length, a Pig. They all speak a little broken Portuguese, but what religious Worship they use, I could not learn.

THE Island Somerera lies about eight Leagues to the Northward of Ning and Goury, and is well inhabited by the Number of Villages that shew themseves as we fail along its Shores. The People, like those of Ning and Goury, are very courteous, and bring the Product of their Island aboard of Ships to exchange for the aforementioned :Commodities. Silver nor Gold they neither have nor care for, so the Root of all Evil can never fend out Branches of Misery, or bear Fruit to poison their Happiness. The Mens Clothing is a Bit of String round their Middle, and about a Foot and an Half of Cloth fix Inches broad, tuck'd before and behind within that Line. The Women have a Petticoat from the Navel to the Knee, and their Hair close shaved, but the Men have the Hair left on the upper Part of the Head, and below the Crown, but cut so short that it hardly comes to their Fars.

THE Southward Cluster of the Nicobars, is mountainous, and the People partake of its unpolished Nature, being more uncivil and furly than those to the Northward.

Y 4

Their Islands produce the same Necessaries as the others do.

CHAP. XXII.

Gives an Account of the Islands and trading Ports on the Coast of Sumatra, and of the Island of Java, &c.

ABON is the first Place noted for Gold Dust and Camphire, but has no Commerce with Strangers. Hog Island lies opposite to it, about ten Leagues off. This Island takes its Name from the great Numbers of wild Hogs on it, who are the only Inhabitants, as Cocoa Island close to it, takes its Name from the great Numbers of Cocoa-nut Trees growing on it.

BAROS is the next Place that abounds in Gold, Camphire, and Benzoin, but admits of no foreign Commerce. It lies within the South End of Hog's Island, about the same Distance from it that Labon is. This Place fets a

Boundary to the Kingdom of Atcheen.

AYERBANGY is the next Place of Note. It produces Gold and Pepper, it lies about one Degree to the Northward of the Æquator, and has the Advantage of a good fafe Harbour, but it is little frequented, because of the Treachery of the Natives, who make small Account of murdering Strangers, if they can but get the least Advantage by it. The Harbour lies in a small but deep Bay, and three small Islands lying before it, make it a most excellent Harbour; and the Channels between the Islands, and between the Shore and the Islands, are clear from Danger.

PADANG is about twenty Leagues to the Southward of the Æquator, where the Dutch have a Colony, and a strong Fort to defend it from the Insults of the Natives. The Island of Good Fortune lies about twenty Leagues

without it.

INDRAPURA is the next, and lies about fifty Leagues to the Southward of the Æquator. It was formerly an English Factory, but the Dutch infulted it in King William's War with France, and it has made but a forry Figure in

Trade

Trade fince. Its Commodity is only Pepper, but it affords great Plenty of it, and very cheap. The Island of

Nafaw lies about fifteen Leagues without it.

BENCOLON is an English Colony, but the European Inhabitants not very numerous. About the Year 1690, the East-India Company built a Fort there, and called it York Fort, but Brick or Stone Walls in that Country cannot long continue firm, because Concussions of the Earth are so frequent by Earthquakes, that folid Walls are rent by the shaking of their Foundations. It has the Conveniency of a River to bring their Pepper out of the inland Countries, but great Inconveniencies in shipping it off on board the Ships, for there is a dangerous Bar at the River's Mouth, which has proved fatal to many poor English The Road for Shipping is also inconvenient; for in the Southwest Monsoons, there being nothing to keep the great Swell of rolling Seas off them, but a small Island called Rat Island, the Ships are ever in a violent Motion while that Monfoon lafts.

The inland Princes are often at Variance among themfelves, and fometimes are troublefome to the Trade of our Colony, but as their Wars are short, the English are in little Danger by them. In the Year 1693, there was a great Mortality in the Colony, the Governor and his Council all died in a short Time after one another; and one Mr. Sowdon being the eldest Factor, had his Residence at Prayman, or Priaman, a subordinate Factory to Bencolon, being called to the Government of the Colony, but not very fit for that Charge, because of his intemperate drinking, it fortuned in his short Reign, that four Princes differed, and rather than run into Acts of Hostility, referred their Differences to the Arbitriment of the English Governor, and came to the Fort with their Plea. Mr. Sowdon foon determined their Differences in Favour of the two that complained; and because the others seemed diffatisfied with his Determination, ordered both their Heads to be struck off, which ended their Disputes effectually, and made them afterwards to make up Differences among themselves, without troubling the English with their Contentions and impertinent Quarrels, but Governor Sowdon was fent for to Fort St. George, and another

fent in his Place less sanguine.

And ever fince that Time there has been a Succession of moderate Governors, and some have been guilty of as much Temerity the other Way. For in the Year 1719, the then Governor, having some Disputes with some of the Natives, was somewhat fearful of them. On a sestival Day, in firing Guns, a Wad from one of them set Fire to an House thatch'd with Reeds, and several others contiguous to it took Fire from it, so that it spread through the Market Place. The Governor believing it to be done maliciously by the Natives, left the Fort precipitantly, and got on board of a Ship in the Road, leaving some Chests of Money, and all the Artillery, Arms, Ammunition, and other Effects of his Masters, behind him, and his Garrison, following their Leader, left their Posts, and got aboard also.

THE Natives being surprised with the sudden Departure of the English, went into the Fort, and took what they had most Occasion for; but some Chinese Merchants, who had settled at Bencolon, being also frightened, embarked on their Vessels, and dispersed themselves in Places

where they thought they might be most secure.

THE chief Merchant of the Chinese, who is generally called the China Captain, in the Places where the Chinese have Trade, went to Batavia to some Relations he had there; but the Dutch, according to their wonted Hospitality in India, punished him as a Criminal, and taught him to make Lime and carry Stones the Remnant of his Days, for daring to settle among the English. Some of the Chinese I saw the same Year at Trangano in Johore, who gave me this Account. Wherever these poor Chinese came, in Places where the Dutch had Power, they were as heartily persecuted as a Poor Protestant is that takes Sanctuary in a Country where the holy, charitable, zealous Romish Clergy have Power.

THE Natives were almost ruined by the English Desertion. For as their Trade lay all on their Pepper, none came to buy it, and their Regret being known at Fort St. George, there was a new Governor sent back with a new Garrison, to take Possession again of their own Fort. What

347

the Company lost by that unaccountable Piece of Temerity, I know not, but they gained very little Credit by it:

The Country above Bencolon is mountanious and woody, and I have heard that there are many Vulcanoes in this Island; but whatever may be the Cause, the Air is full of malignant Vapours, and the Mountains are continually clothed with thick heavy Clouds, that break out in Lightening, Thunder, Rain, and short-liv'd Storms. Their Food is not sit for every Stomach. Tame Buffalo may be had, but no Cow-beef. Poultry are scarce and dear, and so is Fish, but some Sorts of Fruit are pretty plentiful; however, the Gentlemen there live as merrily, tho not so long, as in other Places blest with Plenty, and so sociable, that they leave their Estates to the longest Liver.

SILLEBAR lies about four Leagues to the South-eastward of Bencolon, and has a fine convenient Harbour to shelter Shipping from all Dangers caused by Storms, but the fresh Water is bad, and if drank any considerable Time, causes Gripings and Fluxes, but it wants a River to bring Pepper from the inland Countries. There is no Place of Commerce or Note between Sillebar and Lampoun Point, which is the Southwardmost Point on Sumatra, nor any Thing remarkable on the Sea-shore, but a small Village called Pissangen, which has a small low Island lying a little Way off it, and there is above forty Fathoms deep within an English Mile of the Shore. And the Island of Engano lies in the Offing, about twenty Leagues from it. It is an Mand about three Leagues long, uninhabited, very smooth, without Mountains, and may be seen nine or ten Leagues off.

LAMPOUN lies twenty Leagues from the Point within the Streights of Sunda, at the Bottom of a deep Bay. The English had a good Pepper Factory there, but it being a Part of the King of Bantam's Dominions, that Factory was lost when the Dutch compelled the English to leave Bantam, in the Year 1683, and what Lampoun produces

is carried to them at Bantam.

PULLAMBAM is a Dutch Factory that brings them great Quantities of Pepper, being under Contract with the King of Pullambam, and other inland Princes, to take off all their Pepper at a certain Price, I think it is for ten

Pieces

Pieces of Eight, or fifty Shillings Ster. a Babaar, of four hundred Pounds English futtle Weight, one Half to be paid in Money, and the other Half in Cloth. The Cloth Part the Company pays at seventy per Cent. on the prime Cost; but all other Nations are debarr'd Commerce there, except the Chinese, and by their Means the English come in for a Share of their Pepper, as our Ships pass through the Streights of Ranka.

PULLAMBAM lies about eight Leagues from the Sea, on the Banks of a large River, which divides itself into several Branches, and they disembogue at four Mouths into the Sea. The Dutch keep two small Sloops cruising about those Mouths of the River, to prevent Smuggling, but I and many others have found Ways and Means to lade our Ships full with Pepper, notwithstanding the strict Guard. An hundred Pounds to the King, and as much to the Dutch Chief, make a Cargo of a thousand Bahaars easily procur'd.

The Pullambam Pepper is very foul, in so much that we seldom find less than ten or twelve per Cent. Garblage, but then we buy it for nine Pieces of Eight a Bahaar. The Dutch lade off about three thousand Tuns per Annum, from this Place, and the Chinese and Natives lade off as much more. The Natives are obliged to carry theirs to Batavia, and sell to the Dutch Company, but if they meet with a Market by the Way, they'll embrace it; for the Company's Payment being most in Cloth at high Rates, they are not fond of trading with them.

The Dutch Company formerly drove a good Trade in Ophium, at Pullambam, which (like French Claret and Brandy) drew much ready Cash out of his Country, as those do out of ours, but in the Year 1708, the King ordered only the Importation of three Chests, each containing about 160 Pound Weight, and if Smugglers were detected, they paid their Goods and Lives for their Disobedience.

THE first Place of Commerce is the samous Bantam, where the English and Danes had their Factories flourishing till the Year 1682, at which Time the neighbourly Dutch somented a War between the old King of Bantam and his Son, and because the Father would not come into their

Mea.

Measures, and be their humble Slave, they struck in with the Son, who was more covetous of a Crown than of Wisdom. They, with the Assistance of other Rebels, put the Son on the Throne, and took the old King Prifoner, and sent him to Batavia; and, in 1683, they pretended a Power from the new King to send the English and Danes a packing, which they did with a great deal of Insolence, according to Custom. They next fortisted, by building a strong Fort within a Pistol-shot of one that the old King had built before to bridle their Insolence.

The only Product of Bantam is Pepper, wherein it abounds fo much, that they can export ten thousand Tuns per Annum. The Road is good, and secure for the Sasety of Shipping. It is in a pleasant Bay, wherein are several small Islands, which retain their English Names still; and the Natives still lament the Loss of the English Trade among them, but the King has much more Reason than his Subjects to regret the Loss of their Commerce. The Good-will the Natives bear to the Dutch may be conjectured from their Treatment, when they find an Opportunity, for if an Hollander goes but a Musket-shot from their Fort, it is sive to one if ever he returns, for they are dextrous in throwing a Lance, or shooting of poisoned Darts thro' a wooden Pipe or Trunk; and the King never redresses them, pretending the Criminal cannot be found.

BATAVIA is about twenty Leagues to the Eastward of Bantam, and a great Number of small Islands lie scattered in the Way, too tedious to mention. Pullo-panjang off Bantam, and Edam off Batavia are the most conspicuous, and the Road of Batavia is almost surrounded with I-

flands, fome of them inhabited, and fome not.

JAPARA, which formerly had an English Factory, but now is altogether in the Dutch Hands, is defended by two Forts, one on an Hill, and the other in a Plain, where the Town stands, and has a small River to wash its Walls. The Road is secured by two Islands that lie about a League off the Town. I bought good white Sugar in Cakes here for two Dutch Dollars per Pecul, being one hundred and forty Pounds English suttle Weight.

THE Religion of Java is partly Mahometan and partly Pagan. The Pagans choose Women to be Priestess,

and they are generally old, and well skilled in Witchcrast. And it is reported, that they have frequent Conversation with the Devil, who appears to them in an horrid monstrous Shape, and the Priestesses sacrifice an Hog to him.

THE Island of Madura, that produces nothing for a foreign Market, but Deer Skins. They may be had in great Abundance, and very cheap. This Island confronts

Java to its very eastermost Point.

THE Island Timor lies within twenty Leagues to the South of those four Islands abovementioned. It is a large Island about ninety Leagues long, and eighteen broad. The Natives acknowledge the King of Portugal their Sovereign and have embraced the Romifb Religion. They permitted the Portuguese Colony of Maccao in China, to build a Fort on it, which they called Leifaw, and the Dutch a Factory called Coupang, but would never fuffer either to interfere with the Government of their Country. The Portuguese of Maccao drove a very advantageous Trade to Timor for many Years, and finding the Natives inclined to be passive Catholicks, tried by fair Means to get the whole Government of the Country into the Church's Hands, but could not beguile them that Way, therefore they tried Forces, and commenced a War, but to their Cost they found, that the Timoreans would not lose their Liberty for fear of the Loss of Blood. They chose one Gonsales Gomez their General. He was a Native of Timor, and had travelled to Maccao and Goa. He allowed the King of Portugal to be the Sovereign and Protector of their Country, and they would be his loyal Subjects, providing their Laws and Liberties might be fecured to them.

THAT War with the City of Maccao lasted about fifteen Years. It began about the Year 1688, and was not quite finished in the Year 1703, and Maccao in the End was ruined by it, for it exhausted both their Stock of Men and Money to such a Degree, that of one thousand Citizens the Town had before the War, there was hardly fifty left at the End of it, and of forty Sail of trading Ships, not above five left.

THE Vice-roy of Goa fent an Embassy to Gonfales Gomez, in the Year 1698, to persuade him to Peace, and to

he

we

rp

a-

70

accept of a Governor General and an Archbishop from Goa, but to no Purpose, for they declared, that they would admit of no foreign Governors in their Country, either in Church or State.

The Natives report, that at a certain Season of the Year, after the South-west Monsoons are set in, they can discern an high mountainous Land to the Southward of them, and continues in Sight from December to the latter End of February, or the Beginning of March, and then disappears. If the Report be true, it must be some floating Island, that comes from and goes to New Holland, which is the next Trast of Land to the South of Timor. These Accounts I had from a Portuguese Gentleman called Alexander Pinto, who was a Captain at Leisaw sour Years, and was bound from Batavia to Goa in the Year 1704. He went Passenger with me, and seem'd to be a Man of Probity.

The Islands of Banda, where Cloves, Nutmegs, and Mace grow, are now all engrossed by the Dutch, who allow one of them called Pullo-wey, to belong to the English, after they had been at forty Years Pains to cut down all the Clove and Nutmeg Trees that grew on it, and have made it Death for the Natives ever to plant any on

it.

THE English had also a Factory on Pulloron, but were glad to leave it about the Year 1618. The Dutch have that Island still, with Loutore and Nora, where they reap

plentiful Crops of Spice.

I MUST now steer West north-west about thirty Leagues, to the famous Island of Amboina, where as real a Tragedy was acted on the English, as ever happened among Friends and Allies. The Story is to well known to need a Place here. However, at present it has altered its Scene, and turned prodigiously religious, having no less than fifty Dutch Protestant Churches on that holy Island, and the Natives are very fond and forward to turn Converts, especially since some Amboinese Youths have been sent to Holland, and trained up in their Universities, and honoured with Church Orders. They coming back to their own native Land, loaded with such since Qualifica-

tions, and receiving great Respect from their Masters the Dutch, make the Conversion of the Populace very easy.

THE Dutch have so fortified Amboina, by their own. Report, that they think it impregnable. It is true Victoria Bay is fathomless till Shipping come within a Mile of their Forts, and there is no other Place for anchoring on that Side of the Island, but I have heard some Dutch Officers, in disputing their Knowledge of Amboina, say, that on that Side that fronts the Coast of Ceram, there are several Places of anchoring at a Mile or two distant from the Shore, and never a Fort built to impede an Enemy's landing, and that if an Army superior in Force to what the Dutch have at Victoria, would march but fix or feven Leagues by Land, they might come on the Back of the Town, and lodge on Hills fo near it, that none could not pass the Streets in the Town, nor appear on their Bulwarks or Batteries; but this was a Secret that the English or French ought not to know.

ONE Captain Ethrington, in a Ship called the Refolution, made a Trip to Gilolo about the Year 1692, and got forty Tuns of Spice. He called at Batavia in his Way to England, and the Dutch being very folicitous to know where he had been, he freely told them, to let them fee the English were not quite ignorant of that Navigation, if they

had a Mind to follow it.

I now continue my Courfe Westward along the Æquator, to the Island Celebes, the East-Side of which Island, and a great Number of smaller ones, are little frequented by Strangers, but on the South-west Corner of it is Maccassar, where the Dutch have a Factory, but its chief Product is Corn, which indeed all those eastern Islands abound in, and consequently in Poultry. The Natives are of a light Olive Colour, and the Women well shaped, and pretty beautiful, for which Reason they are in great Esteem among the Dutch and Chinese, who buy them for Bed-fellows, and often marry them. The Men and Women are both short in Stature, but well featured, and well limb'd. They are very loving and faithful if well used, but exceeding revengeful if ill used. The Country is populous and very large, being almost two hundred Leagues long, but the Breadth unequal. At the broadof the EAST-INDIES. 353 est it is about seventy Leagues. About thirty Leagues Westward lies Borneo.

CHAP. XXIII.

Gives an Account of Borneo.

HE great Island of Bornew, or Borneo, the largest except California, in the known World. The West Side of it is for the most Part desart. On the South End lies Pullo-laut, a most excellent Harbour for Shipping. The Island is but thinly peopled its Product being nothing but Rice, but the North End of it lies near many Rivers that come out of the Pepper Countries. The Island is about twenty Leagues long, but of an unequal Breadth,

tho' in some Parts it is twelve Leagues broad.

THERE is a Channel runs between Pullo-lout and the Island of Borneo, about two Miles broad, fome Places narrower, and fome broader, and from feven to five Fathoms deep, all the Way through, and there are feveral rifing Grounds along that Shore, fit to build Houses on, which is a Rarity on the Sea Coast of Borneo, seldom to be met with. I heard Mr. Sylvanus Landen, who had been Chief of Borneo, fay, that he much wondered why the Company of England should have settled a Factory at Banjar-masseen. where they were forced for feveral Years to keep their Factory on Flotes of great Trees tied together, and made fast to Trees growing in the Water, on the Side of a River, with Cables made of Rottans, and when they built a Factory, they were forced first to drive Poles in the Ground, to make a Foundation, as the Dutch do at Amsterdam, and raise Earth on them to build upon.

Captain Barry, a very ingenious Gentleman, drew the Plan, but died before the Work was brought to any great Forwardness, and Mr. Cunningham, who came thither from Pullo-condore, when that Factory was cut off by their Maccasser Soldiers, came to the Head of the Company's Affairs. He was bred a Surgeon, and had turn'd Virtuoso, would spend whole Days in contemplating on the Nature, Shape, and Qualities of a Buttersy or a Shell-

fish, and left the Management of the Company's Business to others as little capable as himself, so every one

but he was Master.

THEIR Foctory was not half finished before they began to domineer over the Natives, who past in their Boats up and down the River, and very imprudently would needs fearch one of the King's Boats, who was carrying a Lady of Quality down the River, which so provoked the King, that he sware Revenge, and accordingly gathered an Army, and shipp'd it on large Praws, to execute his Rage on the Factory and Shipping that lay on the River. The Company had two Ships, and there were two others that belonged to private Merchants, and I was pretty deeply concerned in one of them. The Factory receiving Advice of the King's Delign, and the Preparations he had made, left their Factory, and went on board the Shipping, thinking themselves more secure on board than ashore. When all Things were in a Readiness, the Army came in the Night, with above one hundred Praws, and no less than three thousand desperate Fellows. Some landed and burnt the Factory and Fortifications, while others attack'd the Ships, which were prepared to receive them. The English had made fast Nettings from the Mizon to the fore Shrouds, about two Fathoms high above the Gunnel, that they might not be too suddenly boarded by the Enemy, and to have the Opportunity of using their Blunderbusses and Lances, before the Enemy could get on their Decks. As foon as they in the Ships faw the Fleet approaching near them, they plied their Guns with double Round and Partridge, and made a great Carnage, but all did not deter the Affailants from boarding, who when they got as high as the Gun-wall or Gunnel, were at a Loss how to get over the Netting, and so were killed with great Ease. Some got in at the head Door of one of the Ships, and killed some English in the Fore-castle, but they were soon destroyed. The two great Ships, tho' in Danger, beat off the Enemy with small Loss, but the little Ships were both burnt, with most of their Men, and one Dutch Gentleman who was obliged to fly from Batavia on one of the imall Vessels, was also burnt in her. His Name was Hoogh

Hoogh Camber, and had been Ambassador to the King of

Perfia.

I HEARD some China Men say, who were there at the Time of the Engagement, that the English killed, (in two Hours that the Action was hot,) above one thousand five hundred Men, befides many wounded and maim'd, but the English were forced to be gone from their Settle-The King thought his Revenge had gone far ment. enough in driving them from their Settlement, and finding the Loss of the English Trade affected his Revenue, he let all English who traded to Johore and other circumjacent Countries, know, that he would still continue a free Trade with the English on the old Footing, but would never fuffer them, or any other Nation to build Forts in his Country. Several English have been there fince, and loaded Pepper, and have been civilly treated; and the Dutch fent a Ship from Batavia in the Year 1712, to trade with them, but the Natives refused Commerce with them.

The inland Country is very mountainous, but towards the Sea very low and marshy, occasioned by the great Rains that continue about eight Months in the Year. It produces Rice, and many Sorts of Fruits in great Abundance. Pepper is peculiar to the Countries about Banjaar; and to the westward about Succadaana, they have small Diamonds, but their Waters being inclined to be yellow, are not so much in Esteem as those of Golcondab.

The English had formerly a Factory at Succadaana, but why they left it I know not, unless it was for the Unwholesomness of the Country; yet in the Year 1694, I met with a Ship from Fort St. George, bound to Succadaana, commanded by one Captain Gullock, who had been there the Year before, and praised it for a wholsome Country, and the Inhabitants very civil and obliging. He bought some Surat Bastaes of me, at forty five per Cent. on Invoyce, and expected to make as much himself.

It is reported, that on the Coast of Borneo, between Lao and Sohar, there are many Canibals, but I never heard it confirmed by any but Chinese. And from Sohar to Succadaana, the People are civil enough to Strangers.

SAMBAS is the next Country of Commerce to the Northward of Succadaana. It produces but very little Pepper,

but some Gold, Pearls, and Bees-wax, which makes it well frequented by the Chinese, who carry Surat Piecegoods from Malacca and Johore, and barter to very good Purpose for the aforesaid Commodities. Bees-wax is the current Cash in that Country. It is melted but not refined, and cast in Moulds of an oblong Square, the Breadth about two Thirds of the Length, and the Thickness Half of the Breadth, and a Rattan Withy to lift them by, cast in the Wax. A Piece weighs a Quarter of a Pecul, which comes to in English Weight, thirty four Pounds, and a Pecul is valued in Payments at ten Masscies, or forty Shillings Sterl. They have also for smaller Payments Pieces of Eight to a Pecul and Sixteenths, and for smaller Money they have Couries. The Prince and People are very hospitable and civil, so that Strangers trade there with Security. I knew a French Armenian, who coming from Manilla, had the Misfortune to lose his Ship on that Part of the Coast that belongs to the King of Sambas. They had but little Goods, for generally Spanish Dollars are the common Return for Goods fold at Manilla. When the People that were shipwreck'd came ashore, they were carried to the King, who examined what they were, from whence they came, and whither bound, with what they were loaded, and feveral other Interrogatories, and then ordered them Provisions, and Men and Boats to affist them in faving their Treasure, for there was but very little lost besides the Ship and Stores that were not worth the Trouble of faving. The King gave him Pearls and Beeswax for his Silver, at fuch reasonable Rates, that the Armenian gained forty per Cent. at Batavia, (whither he went on a China Vessels) for the Goods he disposed of there. At Batavia he took Passage on board a French Ship for China, and in their Way called at Trangano, where I met with him in the Year 1719. I had the whole Account from himself, and saw some beautiful Pearls that he was carrying to the China Market, and among them a Pair of Pears worth fifty Pounds Sterl.

The Chinese drive a small Trade from Siam and Cambodia, to the Town called Borneo, that lies about eighty Leagues to the Northward of Sambas, and these are all the trading Places that lie about the North End of this Island,

that I could hear of. The Religion in Borneo is Pagan, except in some Places on the Sea Coast there are some Mabometans, and so I must leave Borneo, and steer my Course towards the Coast of Johore on the Continent, but in my Way there are two Clusters of Islands that lie half-way. One is called Anamba, and the other Natura, but by the Natives Sciantan, is the common Appellation for both Clusters. Their Inhabitants are called Bougies, a sierce desperate People, and the only Product of those Islands is Betle-nut, and the Religion Mahometan. The Islands are very high, and may be easily seen in a clear Day above sisteen Leagues.

The Johore Islands to the North-eastward of the Promontory of Romano, (from whence I took my Departure, when I steered among the Islands) are first Pullo-tingi, then Pullo-aure, then Pullo-pisang, and then Pullo-timoun, the highest and largest among them. They are all inhabited and produce Poultry, and small Goats, and some Fruits, but no Commodities for Export. Their Religion is Ma-

bometan.

PAHAUNG lies North-west of Pullo-timoun, about twenty Leagues distant. Pullo-varella lies in the Way, but it is rather a Rock than an Island, therefore hardly worth noticing. Pahaung River has a pretty large Island lying in its Mouth, which makes two Channels into it. The North Entry has no less than four Fathoms and an Half at High-water, and the Channel is about an hundred and fifty Yards broad. Just within the Bar is good secure Anchoring in fix Fathoms, and there are good fresh Water Springs within two hundred Paces of the Seashore. The River is a Mile broad, but so full of Banks, that it is with Trouble a small Vessel of thirty Tuns can go to the Town, which lies about twelve Miles up the River, where I left Rajah Bowncea, before I took my Ramble among the Islands. He was there in the Year 1719, with five or fix hundred Men to keep that Country firm to his Father.

PAHAUNG River runs far into the Country, and washes the Foot of Malacca Hill. There is abundance of Gold Dust found in it, and I have seen some Lumps of sive or six Ounces each. They do not dive for the Dust

Z 3

above

I GAVE an Account before of his Brother's tragical End, and the daring boldness of a Youth that shewed him the Way to die by his own Hand. In 1719, I saw the Youth waiting on the King, and fanning him with a Peacock's Tail. In my Way to Siam, I called at Trangano, and went to wait on him, and he remembered that he had been acquainted with me five and twenty Years before. I staid about a Week, and every Day he wanted to see me. He often repented his taking the Weight of Sovereignty on his Shoulders, and feared that his End would prove as tragical as his Brothers.

fenseless Devotion to Superstition, ruin'd his Country and

his own Family.

TRANGANO stands pleasantly near the Sea, on the Side of a River that has a shallow Bar, and many Rocks scattered to and again within the River, but Room enough in many Places to moor small Ships very securely, to keep them fafe from the Dangers of the Winds or Floods. There may be about one thousand Houses in it, not built in regular Streets, but scattered in ten or twenty in a Place distant a little Way from another's Villa of the same Magnitude. The Town is above half-peopled with Chineje, who have a good Trade for three or four Jonks yearly, besides some that trade to Siam, Cambodia, Tunqueen and

Sambas.

Sambas. When I came back from Siam with my Cargo unfold, as I mentioned before, I came to Trangano to dispose of what I could of my Goods, and to procure a new Cargo for Surat, the kind King affifted me in doing both, with all the Readiness and Cheerfulness imaginable.

WHILE my Ship lay in the Road, the Bougies came with a Fleet of two hundred Sail of Praws, deligning to plunder the Town of Trangano; but they were afraid to pass so near our Guns, as they must have been necessitated to do before they could get into the River. When they came to a Place about five Leagues off, they fent a Praw to my Ship, and the Officer told me, that he had a Commission to profer and pay me three thousand Spanish Dollars, if I would let them pass quietly into the River. I ordered him away, and threatened, that, if they came, they should feel the Force of my Powder and Shot. When I came ashore, the King ask'd me if I would protect him. I told him I would with all the Force I had. He wept, as if he had been diffident, and defired that I would take him on board of my Ship, and carry him whithersoever I went, for his Life was burdensome to him, and he could trust none of his own People. I persuaded him that I was sincere in my Resolution to protect him, and that it would look too mean to run away from his Kingdom, while there was a Possibility to regain it.

HE told me, that he had fent Ambassadors to the Dutch at Malacca for Affistance, according to the ancient League between his Ancestors and them, when they joined their Forces to expel the Portuguese from Malacca; but instead of finding Relief there, his Enemies were affifted with Powder and Shot, and his rebellious Subjects had a fafe Retreat at Malacca.

I ADVISED him to take Protection from the Dutch, and allow them the Monopolization of the Trade of his Country, and to part the Revenues between him and them. He seemed to be offended with the Proposal, but he said he would be glad if the English would fettle in his Dominions, and fortify what Places they pleased, and that he would willingly come under their Protection, and that there were none that ever entertained the Dutch in their Countries

Z 4

Countries as Guests but would willingly be quit of them

again, if they could.

THERE happened to come a French Ship thither at that Time, being bound to China. The King gave the Captain and me an Invitation to Dinner, and, after we had regaled ourselves, we entered on a Discourse of the miserable State of a Country under the Malignancy of a civil War. He asked us, if such Calamities had happened to England or France. We affured him there had been often fuch Diftempers among us, but that when the Disease was cured, our State became as strong and vigorous as ever.

He had several Times ask'd me, if I thought the English might be perfuaded to settle a Colony in his Country, that Pahaung might be made a Place of great Trade, if there were Shipping and Stock to carry off the Pepper and Tin which that Country alone could produce. I told him, I could give him no Encouragement to believe they

HE then despairing of getting an English Colony settled, proposed to Mr. Pedro-villamount Garden, who commanded the French Ship, if he thought the French Nation might be induced to fettle in his Dominions, and the French Gentleman gave him Hopes that the King of France might be induced to accept of his Friendship, and settle a Colony, providing he would certify his Request by a Letter, which the King of Johore readily agreed to. It was written in the Malayan Language, and translated by a Chinese into Portuguese, and I translated it from that Language into English. The Original and the English Tranflation were delivered to the French Captain, but I never heard of it since.

HE told me, that when I came to Bombay, I should acquaint the Governor of the Desire he had to live under the Protection of the English, and that with one hundred and fifty Men they might bridle the Infolence of his own rebellious Subjects, and their Allies the Bougies too.

TRANGANO is a very pleasant and healthful Country, and affords a fine Landskip from the Sea. The Hills are low, and covered with ever-green Trees, that accommodate the Inhabitants with Variety of delicious Fruits, fuch

as Lemons, Oranges, Limes, Mangoes, Mangostans, Rambostans, Letchees and Dureans: And in the Vallies, Corn, Pulse and Sugar-canes. The Ground is cultivated by the Chinese, for the lazy Malayas cannot take that Trouble.

The Product of the Country is Pepper and Gold, which are mostly exported by the Chinese. About three hundred Tuns are the common Export of Pepper, and we have it almost for one half of the Price that we pay for Malabar Pepper. From the Month of Oslober till March, their River is shut up by the Bar, which sills up by the Impetuosity of the great Seas sent on that Shore by the North-east Monsoons; but in the Months of July and August their Seas produce the finest Fish that ever I saw or tasted. There is one Sort exactly like a Salmon, both in Shape and Taste, but the Fish is white, as the Salmon is red. Their Poultry are large, plump and sweet, but Beef is scarce, except Bussalo Beef, and that is plentiful enough.

In the Year 1720, the Bougies came to Pullo-capass, which is but five Leagues from Trangano; but there are other Islands that lie twelve Leagues more southerly, called, in the Maps, by the Name of Pullo-capass, but their right Name, which the Natives call them by, is

Pullo-tetang.

However, from Pullo-capas the Bougies sent an Embassy to Trangano, pretending an Accommodation with the King, to fee if he would allow them to enjoy the Continent and Islands beyond the Promontory of Romano, and they would leave him the quiet Possession of the rest; and, while they were in a large Hall conferring, some unusual sudden Noise happened to be heard from without, which the guilty Bougies taking to be some Design in Execution against them, one of them runs to the King, and crest him to the Heart, which made a very great Disorder, and many were killed on both Sides; and what Bougies remained, got on board of their Gallies, and posted to their Fleet at Pullo-capafs, with the News of what had happened at Trangano, and next Day the Bougies went into the River, and plundered the Town, except certain Houses which belonged to the Dattabandaar, or first Minister, whom the King in his Life-time, ever mistrusted, but, by the ill Situation of his Affairs, was obliged to hide his Thoughts, and defer his Resentments till a pro-

per Time.

SIAM. The City stands on an Island in the River Memnon, which, by Turnings and Windings, makes the Distance from the Bar about fifty Leagues. The Country is low, and as fruitful as any Spot of Ground in the World, in Rice, Legumen, Fruits and Roots, Cattle wild and tame. And the River abounds in many Species of excellent Fish, which plentifully indulge the Inhabitants, and make them indolent and lazy, and consequently proud, superstitious and wanton.

THERE are reckoned no less than fifty thousand Clergymen or Tallapoys belonging to the Temples in and about the City of Siam; but they are easy to the State, having no stated Benefices or other Revenues, and yet they are plentifully supplied with all the Necessaries of Life by the

Charity and Benevolence of the Laity.

THERE is one Temple about three Miles below the City, on the opposite Side of the River, called the Fishes Temple, because annually in the Month of September. when the Floods overflow the low Ground, (as in Egypt) there are good Numbers of Fishes, almost like small Salmon, that frequent a Pond close to that Temple, and are to be found in no other Place in the Siam Dominions, and they are so tame, that they will come close to our Boats. and frisk and play on the Surface of the Water, if any Body has a Mind to feed them with Bread, Cocoa-nut Meat, or other Food that does not eafily separate. 'Tis only to hold some near the Surface of the Water, and they will take it familiarly from the Hand. I have often taken Pleasure to feed them, and see them play, but as foon as we leave off feeding them, they will withdraw, fo that hardly one is to be feen till a new Supply of Victuals is offered to them.

THE French have a Bishop at Siam, with a Church and a Seminary for the Education of Converts. They stand a little above the City, on the opposite Side of the River. They make but sew Converts, except when Corn is dear, and then some of the poorer Sort receive Baptism, which intitles them to a Maintenance from the Church, but,

when

when Plenty returns, they throw away their Beads and Saint, and bid farewel to Christianity. In the Year 1720, there were not above seventy Christians in and about Siam, and they the most dissolute, lazy, thievish Rascals that were to be found in the Country.

The Dutch have a Factory there, about a Mile below the Town, on the same Side of the River. Their greatest Investments are in Tin, Sapan-wood and Deers Skins, which they buy up for the Japon Market. The Siam Market takes off but little European Goods; however

the Dutch Chief makes a pretty good Figure there.

THE English, for many Years, had also a Factory there. till about the Year 1686, the East-India Company seeking Occasions to pick a Quarrel with the Siamers, in order to withdraw, they took hold of fuch as they could first find, tho' never fo frivolous. The first was about the Year 1684. The Carolina bound from England to China, had the Misfortune to lose her Passage, and coming to Siam to pass away the North-east Monsoons, and the King of Siam having Occasion for some Stores for Shipping out of the Carolina's Cargo, to equip some Ships that he had built in order to humble the Cambodians and the Couchin-chinese, who diffurbed the Navigation of his Country, he civilly requested the English Chief to supply him at the Prices the fame Commodities used to be fold at to Merchants, but he could not find that Favour, which he resented, and threatened to disturb their Commerce. At length they supplied him with some Part of what he demanded, to avert the ill Consequences that might happen by a total Refusal. This was represented to the Company in the darkest Colours, and they thought that sufficient to ground a War on; but they had, at that Time, a Fleet of large Ships, which they had equipp'd to regain their Trade of Bantam and other Places, which the Dutch had infolently robbed them of; but they were disappointed by the deep Politicks of King Charles II. as is before obobserved.

HOWEVER, the King of Siam continued his Indulgence to the Company and their Servants, in much Affluence and Luxury, continually caroufing in Debaucheries with Wine and Women, till their common Salaries and Gains

by Trade, were in no Proportion to their extravagant Expences, however that being a free Country, they had Liberty to spend their own and their Masters Estates, as

they pleased.

THE King of Siam having formed the Design of a War, as above mentioned, with Cambodia and Couchin-china, employed a good Number of English who had resorted to Siam, to partake of the King's Indulgence and Bounty, and to help the Company's Servants to spend their Money. All the English who had a Mind to list themselves on board of his Fleet, had great Encouragement of honourable Posts and good Salaries well paid, and they did perform Actions in the War worthy of the Bravery and Courage of the English Nation, by which the King's Favour to

the English, increased more than before the War.

ABOUT the Year 1680, there was one Constantine Falcon, a Greek by Birth, that some Years before had shipp'd himfelf Steward of an English Ship at London, bound to India, and being ordered for Siam, and finding some ill Treatment on board, he deserted from the Ship, and fled to a small Village some Distance from the City, where he amused himself in learning the Siam Language. He being a fober, ingenious, and industrious Person, soon made himself Master of the Language, and served as an Interpreter for the English at Court, where he was remarkably taken Notice of, and got a Post there. His Behaviour recommended him to greater Preferments, fo that in a very few Years he became prime Minister of State, and behaved himself so well in that high Station, that every Thing belonging to the State of the Country prospered, so that Siam became the richest and powerfullest Kingdom in that Part of the World.

The Jesuits hearing that one of the Romish Communion sat the Helm of the Siam Affairs, and it being a rich Country, brought whole Troops of them into Siam, who got the whole Management of Affairs into their Hands, through the Interest of the Barkalong, that being the Appellation of first Minister. They tickled themselves with the Fancy of bringing the whole Kingdom of Siam under the Pope's Jurisdiction, and in the Year 1683, the first Year of his Ministry, they got the King to send an Em-

baffy

reft

P 2- 10 t,

baffay to the King of France, which Ambaffador came alfo to London, and fettled a Treaty of Commerce for the

English that should trade in Siam.

THE Jesuits imposed on the King of France, and made him believe, that if he would send an Embassy to Siam, that King would leave his own Superstition, and embrace theirs. Accordingly an Ambassador was sent, with many valuable French Curiosities, and among them a very sine Mass-book, with beautiful Cuts of all the first Rate

Saints in the Romish Kalendar.

On the Ambassador's Arrival, he was received with the Respect due to his Character, and when the Presents were laid before the King, according to Custom, he seem'd much pleafed with their Curiofity, but when he viewed the Pictures in the Mass-book, he ask'd a Fesuit who was Interpreter, what they were, who answered, that they were the Pictures of holy Men now in Heaven, and such as his Brother the King of France adored, and as he defigned an eternal Friendship with his Majesty, he hoped that he would also adore those Pictures, and worship the Images of those Saints, rather than those Idols that were worshipped all over his Dominions. The King returned Answer, that the Gods of his Country had been auspicious to them who lived in it for Time out of Mind, and as it, would be unjust and ungrateful to banish those Gods that had been so long very kind to his Predecessors and himself, so he could not turn his old Gods off and take new ones in their Places that he did not fo well know, and that he would oblige his Brother of France in any Thing but that.

THE King of France complimented Mr. Falcon with the Order of Knighthood, and in his Letter to him, wherein he recommended the French Affairs to his Care, particularly that of Religion, he stil'd him Loving Cousin and Counsellor.

AFTER the Embassy was gone from Siam to France, the Jesuits thought of nothing but bringing the Trade of Siam under the Power of the French, and in order to that, got the King to order the building of a Fort on the River's Side, opposite to the Fort of Bencock, a Town about twenty Leagues below the City of Siam, and to have it

mann'd with a Garrison of French, to be paid by the Exchequer of Siam, and all this was granted according to their Mind. When the French got Possession they grew intolerably arrogant, which made the Siamers uneafy, and murmured at the King's Weakness, but that was in prire, for certain Destruction is the sure Reward of talkhe publickly of any Milmanagement of the State, for a thing of Siam can no more err in Politicks, than a Pope can in Matters of Faith.

YET about the Year 1688, by fome malevolent Planet that over-ruled his Actions, he made a War with his Neighbours the Kings of Cambodia, and Couchin-China. He fent an Army by Land, and a Fleet by Sea, to carry on the War, but was not successful by Land. However in the Land-army there was a mean Person, a Citizen of Siam, who kept a Fruit-shop, he had a bold daring Spirit, and behaved himself so well on all Occasions, in the Land War, that he came to Preferment, and at last was made Generalissimo, and then ended the War to the Satisfaction of the whole Army abroad, and his Prince at home; but when he brought back the Army to Siam, seeing the King wrapt up in the Opinion he had of the Jesuits Counsels, and the Management they had in the Affairs of State, by the Countenance of the King and his first Minister my Lord Falcon, he pick'd a Quarrel with the King, and having most of the Army at his Devotion, feized his Master and put him to Death, after the Manner of royal Criminals, or as Princes of the Blood are treated when convicted of capital Crimes, which is, by putting them into a large Iron Caldron, and pounding them to Pieces with wooden Pestles, because none of their royal Blood must be spilt on the Ground, it being by their Religion, thought great Impiety to contaminate the divine Blood, by mixing it with Earth. And after he had murdered his Master, he summoned all the Mandereens in the City, to hold a Council in the Palace.

My Lord Falcon, for that was generally his Defignation, had, by his civil Deportment towards People of all Ranks and Degrees, so ingratiated himself, that he had a stronger Party by far, both in the City and Country, than the General; and besides, had all the Fleet at his

Devotion.

Devotion. Many of my Lord's Friends dissuaded him from obeying the Summons, but to raise the Forces of the City, and revenge the Death of the King, and many Officers of the Army that detested the Regicide would have come over to his Party, which at least was above fifty thousand strong, but being infatuate, he was deaf to all good Advice, and went to the Palace, were as soon as he had set his Foot, he was seized by the General's Guards, and beheaded, so the Usurper took the Sovereignty into his own Hands, and at that Instant was by jure divino made an infallible Favourite of Heaven, and the Sun, Moon, and Stars, had the Honour to be his near Relations.

Had my Lord Falcon followed his Friends Advice, or had Courage answerable to his other good Qualities, he had certainly been honoured with the Diadem in Siam, and if he had introduced Popery in the Place of Paganism, he had been honoured with a Place in the Pope's Almanack, but his Pusillanimity made him unworthy of both.

I saw my Lady Falcon in the Year 1719, and she was then honoured with the Superintendency of his Majesty's Confectionary. She was born in Siam of honourable Parents, and at that Time much respected both in the Court and City, for her Prudence and Humanity to Natives and Strangers, when they came into Difficulties, or under the Weight of Oppressions from the Officers of the Court or City.

When the Siam Ambassador returned from France and England, in the murdered King's Time, his Master, among many other Questions, ask'd him, if the King of France had any Palaces like his at Siam, for Beauty and Magnitude, and the poor Man unadvisedly told him Truth, that in France were many finer, nay, that the King of France's Horse Stables in Paris, exceeded any Buildings in India, which his Majesty took so ill, that he disgrac'd him, and was very near losing his Head for his telling Truth.

THE King bestows his anniversary Blessing on his People in the Month of September, when he passes through the City attended with a numerous Train of Elephants, among whom is the white Elephant, but he is only of a

Crean

Cream Colour, and I have feen feveral at Bangary, a Village near Jonceyloan, as white as him. All the Elephants that Day are dreffed in their finest Trappings, with Drums, Trumpets, Hautboys, and other musical Instruments.

In the Month of November he also shews himself on the River, in a Ballong or Barge of thirty or forty Yards long about two Yards broad, and two Foot deep, with a Throne placed near the Middle of her Length, about feven Foot high and a rich Canopy over his Head, and being feated on the Throne, his greatest Lords or Minions sit under the Throne, and about fifty or fixty Rowers a-fore and be-aft the Throne, (clothed in Carnation coloured Waistcoats, with fine Caps or Turbands on their Heads) to row or paddle his Majesty wherever he orders them, and there are ordinarily above a thousand other Barges to wait on his Majesty, besides several thousands of other common Ballongs, infomuch, that for five or fix Miles, the River is covered with Boats, except near his Majesty's Barge, and there is half a Mile of the River clear for his Barge to move in.

ABOUT four or five in the Evening, he goes in his Barge to a Temple about three Miles above the City, on the opposite Side of the River, where the Priests pray for him, and present him with two Yards and an Half of Cotton Cloth, that must be spun and woven the same Day that the King comes to receive it. After Sun sets, he embarks again, and is attended in State to his Palace.

His Reason for honouring the River and his People that Time of the Year, is to forbid the River formally to flow higher or longer than such a Number of Inches in Height, or of Days in Time, as he sets it; yet sometimes it dis-

obeys his royal Commands.

ALL the Manderines belonging to the Government, whose Affairs require their Residence in the City, whose Numbers generally amount to three thousand, must daily attend in the Palace, except they have Leave to be absent, and if any one trangresses, he is severely whipt with split Rottans, which cut pretty deep into the Flesh, and leave conspicuous Marks behind them. The greater the Marks appear, the greater the Honour they take them to be.

And the pretty Ladies are not exempted from the Flagellation, for very small Faults. And I have seen some pretty agreeable young Gentlewomen with Rattan Marks on their Backs, which they are fo far from covering, that as they pass the Streets, they expose their Backs, tho' their Breasts, Bellies, and Necks are covered with a Scarf, feeming to glory in being so much taken Notice of by the greatest King on Earth.

THE Women in Siam are the only Merchants in buying Goods, and fome of them trade very confiderably. The Husbands in general are maintained by the Industry of their Wives. And the Europeans that trade to Siam, accommodate themselves as they do in Pegu, with temporary Wives, almost on the same Conditions too, and it is thought no Difgrace to have had many temporary Hufbands, but rather an Honour that they have been beloved by so many different Men. The Christian Priests cry down that Way of Marrying, and want every Heretick, as well as Christian Catholick, to be tied to some young Laffes of their bringing up, but the Hereticks, according to their innate Principles, generally continue deaf and obstinate to the grave Advice and found Doctrine of the holy Fathers, and marry according to the Siam Way.

AFTER the Usurper had settled himself on the Throne of Siam, he ordered the French to deliver their Fort at Benceck, to an Officer that he fent to take Poffession of it, but they refused, without first making Terms for themselves, on which he sent a Part of his Army to attack it, and threatened every Man's Life that returned before it was taken. His Orders were punctually put in Execution, and all the French got, was the Honour of dying bravely in Defence of their Liberty. The Fort ftands ftill undemolished, but no Artillery is in it.

In the Year 1719, I went thither with a Cargo to difpose on, expecting to trade on the Footing of the old Treaty concluded at London with the King of England, and the King of Siam's Ambassador, in the Year 1684; but on my Arrival, I found that Mr. Collet, Governor of Fort St. George, had cancelled that Agreement by his Ambaffador Powny, and the new Conditions being too hard for me to fland to, I folicited for Liberty to depart again with my Ship

Aa

Ship and Cargo, which I could not obtain in less than four Months.

Collet's Attorney at the Court of Siam, was a Persian by Birth, but had come to Siam with his Father when very young, and had remained about forty Years at Siam. He was as complete a Rascal as Collet could have found for his villainous Purposes, for by false Informations to the King, he had brought many honest Men into Trouble, and some Treasure into the King's Cossers.

When I understood that he was the Remora that had put a Stop to my Commerce, I tried if I could remove him by large Presents, but all to no Purpose, for if I traded, it must be on the Scheme laid down by Collet, by the Negotiation of Perony, who kept one Collison as his Resident at Siam, to consult and inform the Persian of the best Methods to ruin the Engisto Traders that had not

Collet's Letters of Protection.

This Persian (whose Name was Oia Sennerat) and I, were discoursing one Day of my Affairs in the Industant Language, which is the established Language spoken in the Mogul's large Dominions, and, among other Things, I was laying down to him the Difficulties that might attend the King of Siam's Trade, carried on from Merjee to Fort St. George, because if the rest of the English Colonies were forbid trading with Siam, they had just Cause to forbid his Subjects to trade to Fort St. George, or any where else, and that other Troubles might arise to the King's Affairs, by thus imposing on the King, who was ignorant of the Consequences that might follow in breaking the Agreement made in England, without so much as once giving Warning to the English Colonies of other Parts of India.

He answered me, that the King of Fort St. George could best give me an Answer, who was able to protect the King of Siam's Trade thither, and that his Majesty had no other foreign Trade but Japan that he valued, and the English had no Trade that Way to disturb his Master's Commerce, and that if I did not comply with the Agreement made by Powny in Collet's Name, I might

go away when I could.

SIAM Bar is only a large Bank of fost Mud, and, at Spring-tides, not above ten or eleven Foot Water on it.

It is eafy getting into it in the South-west Monsoons, because, in two or three Tides, with the Motion the Ship receives from the small Waves and the Assistance of the Wind, she slides thro' the Mud. My Ship drew thirteen Foot, and we had not above nine on the Bar when we went into the River, but coming out with the North-east Monsoons, the Sea being smooth, we are obliged to warp out with Anchors and Halsers, and, if the Ship draws any considerable Draught of Water, we are sometimes two Springs in warping over, but, at twelve Foot Draught, I got over in four Tides.

BANKASOY River lies but four or five Leagues to the Eastward of Siam Bar, and there are two Islands, called the Dutch Islands, where great Ships are obliged to stay in the South-west Monsoons, when they cannot get Water over the Bar that bears off it South-east and by

South, about nine Leagues distant

I OBSERVED before, that the Company fent the Herbert and another Ship from England in the Year 1685, and in 1686, as the Herbert lay at those Islands, one Captain Udal, who commanded her, died, and the fucceeding Captain carried his Corps ashore, and buried it in a pretty deep Grave. Two Days after, fome of the Ship's People going ashore, had the Curiosity to go and see the Grave. When they came near, to their great Wonder, they faw the Corps stripp'd of its winding Sheet, and set upright against a Tree. It was afterwards put again into the Coffin, and buried in the same Grave, with a Quantity of heavy Stones on it, and next Day they came to the Grave, and found it opened a fecond Time, with the Corps standing upright against another Tree, so they made fast fome Stones to it, and carried it a pretty Way into the Sea, and buried it in the Water, where it remained undiffurbed. This strange Resurrection left Room for various Conjectures, but the most probable seemed to be, that fome Sorcerers took it up, and put it in that Posture, whilft they, by their Sorceries or Incantations, interrogate it about future Events, and received Answers thro' human Organs. The Matter of Fact I have heard often affirmed by feveral who were there at the Time and faw it, which made me enquire, if any People in Siam used to A a 2 enquire

enquire about future Events after that Manner, and I was told that they did.

CHAP. XXIV.

Gives an Account of Cambodia, its Trade; also of a late War brought into their Country by the Siamer, and the ill Success they had.

The first Sea-port to be met with is Cupangsoap, a Town in the Dominions of Cambodia. It affords Elephants Teeth, Sticklack, and the Gum Cambouge or Cambodia; but there is no free Commerce allowed there,

without a Licence from the Court of Cambodia.

The next Place is *Ponteamas*, a Place of pretry good Trade for many Years, having the Conveniency of a pretty deep but narrow River, which, in the rainy Seafons of the South-west Monsoons, has Communication with Bansack or Cambodia River, which Conveniency made it draw foreign Commerce from the City of Cambodia hither; for the City lying near one hundred Leagues up the River, and most Part of the Way a continual Stream running downward, made the Navigation to the City so long and troublesome, that sew cared to trade to it, for which Reasons foreign Commerce chose to come to Ponteamass, and it flourished pretty well till the Year 1717, that the Siam Fleet destroyed it.

THE City of Cambodia stands on the Side of the great River, about fifty or fixty Leagues from Penteames by Land, or by Water in the South-west Montoons. The Country produces Gold of twenty one Crass fine, raw Silk at one hundred and twenty Dollars per Pecul, Elephants Teeth at fifty to fifty-five Dollars for the largest. The small are of different Prices. They have also much Sapan-wood, Sandal-wood, Agala-wood, Sticklack, and many Sorts of physical Drugs, and Lack for Japaning. They are very desirous of having a Trade with the English, but they will not suffer the Dutch to settle Fastories

in their Country.

PRO-

Provisions of Flesh and Fish are plentiful and cheap, and are the only Things that may be bought without a Permit from the King. I have bought a Bullock, that weighed between four and five hundred Weight, for a Spanish Dollar; and Rice is bought at Eight-pence per Pecul, which is about one hundred and forty lb. but Poultry are scarce, because the Country being for the most Part woody, when the Chickens grow big, they go to the Woods, and shift for themselves. Tigers and wild Elephants are numerous in the Woods, and there are also wild Cattle and Buffaloes, and Plenty of Deer, all which Animals every Body is free to catch or kill.

THERE are about two hundred Topasses, or Indian Portuguese settled and married in Cambodia, and some of them have pretty good Posts in the Government, and live great after the Fashion of that Country; but they have no Priests. nor will any venture to go among them; for in the Year 1710, a poor Capuchin went there to officiate, and finding one of the toppingest of his Congregation to have two Wives, ordered him, by virtue of his facerdotal Power. to put one of them away, but his Parishioner would not obey in that Point, which made the Priest use the Weapon of Excommunication against him, which the other took in fuch Dudgeon, that he knock'd his spiritual Guide's Brains out. Since that Time they wrote to Siam and Macao in China for some more ghostly Fathers, but not one will go.

THEY all of them have small Pensions from the King. but too narrow to maintain them, so they go to the Woods with Fire-Arms, and kill wild Elephants for their Teeth, which they fell to Foreigners; and their Way of killing them is very fingular, for they form a Piece of Iron like a Slug, and the foremost End is made sharp. In the Woods grow certain Trees with a thick Bark of a violent poisonous Quality. They drive the sharp End of the Slug into the Bark, and let it stay a short Time in it, then put the Slug into their Gun charged with Powder. and coming near the Beaft, fire the Slug into its Body. The Elephant being thus wounded, flees from the Man, but the Man keeps Sight of it for a small Space of Time,

and then it drops down dead.

A a 3

374. A New HISTORY

AND with the same poisoned Slugs they kill Cattle and Buffaloes, for their Tongues. This subtil Poison has also another strange Quality, that if Men become hungry or thirsty, (as they often do in the Woods) they squeeze a few Drops of it on a Leaf of a Tree, and they licking the Leaf, it gives immediate Refreshment; but if the Skin be broken, and the Juice touch the Part, it proves mortal without Remedy.

THE Cambodians are of a light-brown Complexion, and very well shap'd, their Hairlong, and Beards thin. Their Women are very handsome, but not very modest. The Men wear a Vestment like our Night-gowns, but nothing on their Heads or Feet. The Women wear a Petticoat reaching below the Ancle, and on their Bodies a Frock made close and meet for their Bodies and Arms, and both

Sexes dreis their Hair.

I saw none of their Priests, but understood from my Interpreter, that they worship the same Gods that are adored in Siam. They worship the great God under the Name of Tipedah, and Praw Prumb, and Praw Prout, are his Sons. The Church subsists by Free-will-offerings, and their Priests are not much respected, being generally chosen from among the lower Sort of the Laity.

THE Kingdom of Laos borders on Siam, Cambodia, Couchin-china, and Tonquin. It produces Gold, raw Silk, and Elephants Teeth are so plentiful, that they stake their Fields and Gardens about with them, to keep out wild Hogs and Cattle from destroying their Fruit and

Corn. They are all Pagans in Religion.

The Natives of Laos are whiter in Complexion than their circumjacent Neighbours. I faw fome of them at Siam, of both Sexes. Their Women were little inferior

to Portuguese or Spanish Ladies.

THERE are several Islands that lie off the Coast of Cambodia, but none are inhabited, because the Saleeters, or Pirates that infest that Coast, rob them of what they get by Pains and Industry, the there is one about three Leagues West of Ponteamass, called Quadrol, that has good Qualifications for a Settlement. It is about three Leagues long, and one broad. Wood and fresh Water are plentiful, the Ground of a moderate Height, the Soil black

black and fat, except along the East Side which faces *Ponteamass*, and that has feveral fine fandy Bays, and they are good fase Harbours in the rainy and windy Seasons.

PULLO-CONDORE is the largest and highest composed of sour or five Islands. It lies about fifteen Leagues South of the West Channel of Cambodia River. Pullo-condore had once the Honour of an English Colony settled on it, by Mr. Allan Ketchpole, in the Year 1702, when the Factory of Chusan, on the Coast of China, was broke up, he being then Director for the Affairs of the English East-

India Company in those Parts.

HE made a bad Choice of a Place for a Colony, that Island producing nothing but Wood, Water, and Fish for catching. He got some Macassars to serve for Soldiers, and help to build a Fortification, and made a firm Contract with them to discharge them at the End of three Years, if they were minded to quit his Service, but did not perform what was contracted, which was the Cause of his own Ruin, and the Loss of the Colony, for those Eastern Desperadoes are very faithful where Contracts and Covenants are duly observed when made with them, but in Defailiance, they are revengeful and cruel. Mr. Ketchpole having detained the Macassars beyond their Time of Agreement, still entrusted them with the Guard of his own Person and the Garrison, and they taking the Opportunity of the Night, when all the English were in their Beds, who lodged in the Fort, they inhumanly murdered them all. There was some Noise made by those who were awake, which a few who lodged without the Fort, hearing, took the Alarm, and ran to the Sea Side, where kind Providence directed them to a Boat ready fitted with Oars and Sails, which they imbarked in, and put off from the Shore, and were not a Stone's-throw off, till the bloody Villains on the Shore were in Quest of them. So those in the Boat, with much Fatigue, Hunger, and Thirst in failing, and rowing above one hundred Leagues, got to some Place of the King of Johore's Dominions, where they were treated with Humanity. The reverend and ingenious Doctor Pound, was one of those that escaped, and Mr. Solomon Lloyd (an old Acquaintance of mine) was another.

Aa4

THERE

THERE were two Harbours, or anchoring Places, at Pullot-Condore, but neither of them good. One at the North-east End, they were forced to use in the South-west Monfoons, the other on the West-side for the North-east Winds, the Bottom of which is rocky and therefore dangerous for lofing Anchors and Cables, yet that was the Place chosen to build their Fort on, but fince a Factory was thought necessary to be settled on that Coast, I wonder why they chose these Islands, rather than Quadrole which I mentioned before.

THE City of Cambodia is reckoned to lie one hundred Leagues up from the Bar, and the River filled with low Islands and Sand Banks. The Country of Laos is about forty Leagues farther up, but what Navigation is used above the City of Cambodia, is done by small rowing Vesfels, and the River being one of the longest in the World,

employs great Numbers of those rowing Boats.

CHAP. XXV.

Treats of Couchin-china, and Tonquin, their Religion, Laws, and Customs.

OUCHIN-CHINA is only divided from Cambodia, by the River, which in some Places is three Leagues broad. It is a Country far larger than Cambodia, and much richer, and the Inhabitants more couragious and hardier for enduring Fatigues in Labour or War, than the Cambodians, but are not fo conversable and civil to Strangers. The Couchin-chinese draw one Half of the Customs and Taxes raised in Cambodia by Commerce and Merchandizing, but they give little Encouragement for Strangers to trade with them. Their Country abounding in Gold, raw Silk, and Drugs, they bring them to Cambodia, to dispose of there, except what they send yearly to Canton in China.

COUCHIN-CHINA, about three or four Centuries ago, was but a Province of Tonquin, at least they were both under the Dominion of one King, who dying without Issue, divided the Government of his Dominions between a Brother and a Sister of his, whom he very much esteem'd for their good Qualities. He ordered his Brother to reside in *Couchin-china*, and take Care of Affairs there, while the Sister took Care of the Government of *Tonquin*, but to have a Meeting once a Year to consider and consult of Matters for the Good of the State.

THE Lady being young, thought fit to marry, and the Harmony of State foon ended by the Marriage. Husband grew ambitious, and wanted the Government wholly in his own Hands, but carried fair with his Brother-in-Law, and one Time talking with the Queen of the Necessity of uniting both Kingdoms into one, as formerly, and that of Right both belonged to her, as being posses'd of the most ancient and noble Kingdom, and that in order to get both Kingdoms into her Hands, he would find a Way to cut off her Brother, without Sufpicion of their being accessary to it. The Queen seeming to approve of the Defign, privately let her Brother know his Danger; being then at the Court of Tonquin, she advised him to pretend to go a hunting for a few Days, but to make what Haste he could unto his own Government, where he might be secure from Conspiracies on his Life. which Advice he followed, and got safe into Couchin-china, and calling a Council of his Nobles, related the whole Affair to them.

THE Couchin-chinese took the designed Injury to their Prince so ill, that from that Time they renounced all Friendship and Commerce with the Tonquiners, and the River Quambin being made the Bounds of Tonquin Dominions to the Southward, and of Couchin-china to the Northward, they both raifed Armies of forty or fifty thousand Men each, and they continue still facing one another, the River lying between them, and nothing of Action has happened all this while. If any Couchin-chinese happens to flee from the Justice of his own Country, to the Tonquiners, they receive him kindly, and treat him civilly; but if a Tonquiner fall under the same Circumstances, and go for Sanctuary to the Couchin-chinese, he is condemned to Slavery, and fo must continue till he gets a Pardon from his own Court, and pay his Ranfom.

HISTORY

TONQUIN is the next Kingdom where the English and Dutch both had their Factories, but the English Company's Affairs being a little out of Order, they withdrew theirs in January 1698, and the Dutch finding but little Advantage by their Trade in Tonquin, withdrew theirs about fix Years after. However, the English had a private Trade pretty good till the Year 1719, that an English Ship from Bengal ruin'd it by an Act of Violence.

THE Ship being laden and ready to fail, fell down the River from Catcheo the capital City of Tonquin, and in Defiance to the known Laws of the Country, the Supercargo got a Tonquin Girl on board, in order to carry her with him, but her Friends missing her, informed the civil Magistrate, who sent to demand her, but the Supercargo would not refign his Mistress, whereupon Acts of Hostility ensued, and some were killed on both Sides, and Captain Wallace who commanded the Ship, had the Fortune to b one of the slain, however, the English bravely carried off their Prize, but I never heard any more of the Tonquin Trade fince.

TONQUIN is bounded with Couchin-china on the South, Laos on the West, Quansi a Province of China on the North, and the Ocean on the East. The Country is prodigiously fruitful in all Things necessary for the Conve-

niency and Support of Life.

IT produces Gold and Copper, but neither of them fine. They have Abundance of raw Silks, and manufacture Part of it in wrought Silks, but none fine. Their Baaz is the best, which they generally dye black. It wears very long, because it is soft and well spun, and the oftner it is washed, the Colour looks brighter, if blacker may be fo called. They make Bowls, Cups, and Tables, of Rattans; and cover them very neatly with Lack of divers Colours, and gild them. They have also some Porcelline, but very coarse and ill painted. And those are the Commodities for Exportation from Tonquin.

THE Christian Religion is strictly forbidden to be preach'd in Tonquin, yet there are some Christians of the Romish Church there. Their own Religion is Pagan according to the Doctrine of China. And they have a Tradition, that

of the EAST-INDIES. 379

many Ages ago, Tonquin and Couchin-china were both Provinces of China.

THE Tonquiners used to be very desirous of having a Brood of Europeans in their Country, for which Reason the greatest Nobles thought it no Shame or Disgrace to marry their Daughters to English and Dutch Seamen, for the Time they were to stay in Tonquin, and often presented their Sons-in-Law pretty handsomely at their Departure. especially if they left their Wives with Child, but Adultery was dangerous to the Husband, for they are well versed in the Art of poisoning.

THE Men and Women are both well shap'd, and tolerably beautiful, but of a low Stature. The Maids keep their Teeth very white, till they have lost the blue of their Plumb, and then they dye them as black as Jet. with the Juice of a certain Herb which they hold in their Mouths for three Days successively, and the black Tincture continues ever after; but while that Juice is in their Mouths, they dare not swallow their Spittle, it being of

a poisonous Quality.

CHAP. XXVI.

Gives some Account of the Religion, Laws, Customs, Commerce, Riches, Cities, Temples, Gods, and Goddesses, Priests, Military Forces, Produce, and Manufactories. &c. of China.

HE Island of Aynam lies in the Bay of Tonquin, and 1 not above twelve Leagues distant from its Northern Confines. The Island is large, being about one hundred and eighty Miles in Length, and one hundred and twenty in Breadth. It was formerly under Tonquin, but at prefent a Part of the Dominions of China. Its greatest Product is Salt, and is not frequented on account of Trade. There is no Passage for Vessels of Burden, between it and the Continent, being so full of dangerous Banks and rapid Currents. The mid Lands feem very mountainous. The East and South Sides are low, but clear of Danger. About

bout two Leagues from its Shores, is from twenty to

twenty-five Fathoms Water.

THE next Course I steer is into Quanti, the Southermost Province of China, and as yet has not been brought to acknowledge the Tartar Domination. It admits of no Commerce either with Foreigners or Chinese, that are under the Tartar Government, but on all Occasions commit Acts of Hostility on them, and are so bold and couragious, that one of their little Gallies will attack four of the Emperor's, and make them flee before them, for they give Quarter to none that bear Arms under the Tartar Prince, as they call the Emperor. The Country is fruitful and populous, and produces much raw Silk and Drugs, fuch as China Root, Gallingal, &c. It has eighty Leagues of a Sea coast, and is bounded by the Limpacao Islands, and Canton River. Canton is the next maritime Province; and Maccaw, a City built by the Portuguese, was the first Place of Commerce. This City stands on a small Mand, and is almost surrounded by the Sea.

The City contains five Churches, but the Jesuits is the best, and is dedicated to St. Paul. It has two Convents for married Women to retire to, when their Husbands are absent, and orphan Maidens are educated in them till they can catch an Husband. They have also a Nunnery for devout Ladies, young or old, that are out of Conceit with the Troubles and Cares of the World. And they have a Santta Casa, or the holy House of the Inquisition, that frightens every Catholick into the Belief of every Thing that holy Mother Church tells them is Truth, whether it

be really fo or no.

The Forts are governed by a Captain-general, and the City by a Burgher, called the *Procuradore*, but, in Reality, both are governed by a *Chinese Mandereen*, who resides about a League out of the City, at a Place called *Casa Branca*. The *Partuguese* Shipping that come there, are admitted into their Harbour, and are under the Protection of the Town; but the *Chinese* keep the Custom-house, and receive Customs for all Goods imported.

I MADE a Calculation of the Number of Inhabitants within the Walls of *Canton*, by the Quantity of Rice daily expended in it; for they reckon ten thousand *Peculs* is the

daily

daily Import of that Grain. It is also reckoned, that every Person consumes one Pecul in three Months, so that by that Calculation, there must be above nine hundred thoufand People in it, and the Suburbs one Third of the Number; there is no Day in the Year but shews five thousand Sails of trading Jonks, besides small Boats for other Services, lying before the City.

THE Product of the Country, besides Corn and Fruits. is Gold, Quick-filver, Copper, Steel, Iron, raw and wrought Silks, and befides the Silk Manufactories, there are lack'd or japann'd Ware; and at Sachow there are much Porcelline or China Ware made. We have the same Sort of Clay in several Parts of Great Britain, that Porcelline is made of, but we want the warm Sun to prepare

THEY reckon that the Province of Canton or Quantung, pays yearly to the Emperor twelve hundred thousand Peculs of Rice, and twenty thousand Peculs of Salt, out of which is ferved out to the Military (who are reckoned eighty thousand continually kept in the Emperor's Pay) thirty two hundred thousand Peculs of Rice, and eight thousand Peculs of Salt. The rest is fold in Markets, at the common Price of five Macies a Pecul, which may amount to four hundred forty fix thousand Tayels, which is appropriated towards the Payment of the military Expence, which may amount to ten hundred thousand of Tayels yearly. The Customs on Merchandize and Pollmoney amounts to prodigious great Sums, all which are gathered according to the Book of Rates, and fent to the Treasury of the Province, for the Use of the Empire, which makes the Emperor's Treasury always full.

FOKIEN is the next maritime Province to the Eastward of Canton, a very mountainous Country, and has a-

bout ninety Leagues of a Sea-coast.

THE next Place of Safety for Shipping is the Island of Amoy, where the English once had a Factory, and a good Trade, but now it is shut up from foreign Trade, by the Emperor's Order. There are several small Islands lies off it, particularly the Island Tangsi, by the English called Chapel Island, and by some the Hole in the Wall, because there is a large Hole that passes quite through it, being undermined undermined by the Sea below, but above all is fast without Fracture. It appears like the Arch of a large Bridge. About seven Leagues within it, is the inner Harbour of Amoy, where Ships lie very secure in twelve Fathoms oozy Ground, within two hundred Yards of the Shore. The Town is built close to the Sea, and some Houses in it at high Water are washed by the Sea.

CHAP. XXVII.

Some Occurrences that happened among the English at Amoy in the Year 1700.

Being then bound to Amoy in a Ship from Surat, employed by Sir Nicholas Waite the new East-India Company's President there, and Commodore Littleton being then at Surat with a Squadron of four Men of War, by some considerable Reasons was persuaded by Sir Nicholas to let one of his Squadron go as far as Amoy, to look after the English Pirates that then insessed the Streights of Malacca.

THE Harwich was the Ship pitch'd on, a fifty Gun Ship, commanded by Captain Cock, and when we arrived there, we found three European Ships, and a Country Ship from Surat, employed by Sir John Gayer President for the old East-India Company. The Supercargoes of those Ships, on Sight of a Man of War, sent a Compliment of five hundred Tayels to the Teytock, to diffuade him from giving the Harwich Permission to come into the Harbour, for fear of losing a Feather that they had put in their own Caps, of wearing a Pendant at their Top-mast Heads; so that when I went to pay my Compliment to the Teytock, and give him an Account of our Cargo, and to defire Liberty for the Man of War and my own Ship to come into the Harbour; he told me, that my own Ship was welcome, but he could not, with Safety, admit of the King's Ship into the Harbour, but that she might be supplied with what she wanted in the Road.

THE Linguist very frankly told me, that it was none of the Teytock's Fault, but the English Captain and Super-

cargoes, who had fent him with a Message to the Teytock, to acquaint him, that if the Man of War was permitted to come into the Harbour, their Men would be rude to the Merchants, and would be tied up to no Rules or Laws which the Merchant Ships observed, that the Women would be debauch'd, and many other aggravating Crimes, they alledged, the Man of War's Men would commit, and withal had fent the Teytock a Present of five hundred Tayels to keep her out of the Harbour.

I CARRIED the Linguist into a Merchant's House that was my Acquaintance, to consult with that Merchant about removing that Remora that stopp'd the Man of War from entering into the Harbour, which could be done no other Way than by my being bound for the good Behaviour of the People belonging to the Man of War, and to give a Present superior to theirs, which I consented to.

Then we consulted how the Captain of the King's Ship should be received by the Teytock, when he should make his Visit, and we agreed, that all the Captains and Supercargoes should be called to the Teytock's, in Company with Captain Cock, and that he should enter before us, and have an high Chair placed a little before the Teytock's Chair, on the left Hand, which, among them, is the Place of Honour, and we Captains and Supercargoes to be fet on Felt Cushions on the Floor, and on the right Side of the Teytock's Chair, which was raised on a Platform of Deals, with three Steps of Ascent.

WE had no fooner done with our Confultation than I dispatch'd my. Friend Shawban, for that was the Merchant's Name, with the Linguist, to acquaint the Teytock with what we had resolved on, and he approved of all, and two Days after sent a Summons for the Captains and Supercargoes to accompany Captain Cock, and all obeyed but one, who pretended Indisposition; however he sent his

fecond Supercargo to supply his Place.

As foon as we were in the Citadel, we were conducted to the Teytock's Palace, and entered the Chamber of Audience, and were feated according to the Method before agreed on. The Teytock being feated before, he made a Speech pretty long, wherein he told how he had been informed of the loole Behaviour of Men of War's Men,

which

which had armed him with Caution, but that he knew of a more convenient Place on an Island within three Leagues of the Town, for the Man of War to hawl ashore, if we would be ruled by his Advice. The Captain made

a Bow, and acceded to that Motion.

He then wanted to know who would be Surety for the Captain and Men belonging to the Man of War, that they should observe the Laws and Customs of the Place, without being Molestation to the Natives. I found none cared to enter on so hazardous an Affair, so I stood up, and proffered myself, Ship and Cargo for Security. The rest not expecting that the Captain could have found such Security, one, who made a good Figure among us, told me, I was too forward in my Proffer. I answered him, that I only engaged what I had the Command of, but meddled with no Body's Affairs else.

THE Teytock seemed well satisfied, and gave us a very handsome Entertainment, and then dismiss'd us. The Man of War went to the Island, and landed some of her greatest Guns, but sound so much Dissiculty in carrying Things ashore, that we got an Order from the Teytock to bring her into the Harbour, and accordingly she came in.

Their Temples are built all after one Form, but, as in other Countries, very different in Beauty and Magnitude. Their Josses or Demi-gods are, some of human Shape, some of monstrous Figures, but in the Province of Fokien, they are more devoted to the Worship of Goddesses than Gods. Quantiem has the most Votaries. She is placed in State, sitting on a Cushion with rich Robes, and her little Son standing before her, with a charged Trident in his right Hand, ready to throw at Offenders of the Laws of Humanity and Nature, and also at those who make no Free-will-offerings to his Mother. The Chinese who have seen the Roman Catholick Churches and Worship, say that she is the Chinese Virgin Mary.

THERE is another Goddess called Matsoa, who swimmed from a far Country, through many Seas, and came in one Night to China, and took up her Residence there. She sits on a Platform, with a Cushion laid on it, and her Head is covered with blue Wooll instead of Hair. She is the Protectress of Navigation, for which Reason

none

none go a Voyage but they first make a Sacrifice of boiled Hogs Heads, and Bread baked in the Steam of boiling Water. It is set before the Image when reeking-hot, and kept before her till it is cold, she feeding on the Smoke, and the Devotees on the Substance, when it is cold. On their Return from a Voyage, they compliment her with a Play, either acted on board of the Ship, or before one of her Temples.

THEY have another Goddess in Form of a Virgin, called Quonin, who has many Votaries, but is mostly worshipp'd in the Provinces of Peking and Nanking, but being

a Virgin, she has many Lovers all over China.

THE God Fo has an human Shape, except his Head, which has the Figure of an Eagle's. Gan has a broad Face, and a prodigious great Belly. Fo is a very majestick God, and is always placed with a great Number of little Gods to attend him. Minifo in Fokien, I take to be the God Miglett at Canton, being alike in Shape and Countenance. He is called the God of Pleasure. Pussa is set cross-legged on a Cushion, bespangled with Flowers and Stars, and she has eight or nine Arms and Hands on each Side, and two before that she holds in a praying Posture. In every one of her Hands (except the two that are dedicated to Prayer) she bears some Thing emblematical, as an Ax, a Sword, a Flower, &c. The great God that made the Heavens and Earth, they bestow an human Shape on him, like a young Man in Strength and Vigour, quite opposite to the Church of Rome, who make his Picture like Salvadore Winter, old, cold, and hoary. I have feen many more whose Names I have forgot, some with human Bodies, and Dragons, Lions, Tigers, and Dogs Heads, and one I saw like Stour Yonker in Finland. with a Man's Body and Clothes, and with Eagle's Feet, and Talons in the Stead of Hands.

CONFUCIUS, was the Prince of their Philosophers. He was near contemporary with Artaxernes, Nebemiah, and Malachi, about 450 Years before our Saviour fejus Christ. He both taught and practised moral Philosophy to Perfection, and acquired so great a Veneration among his Countrymen, that his Sentences are taken for Postulata to this Day, not one fince having offered to con-

tradict any Thing that he has left behind in Writing. They have another Doctor of Philosophy called Tanfico, who was almost as ancient as Confucius, and wrote many excellent Tracts of a virtuous Life, and the Methods to attain to it, but his Character is inferior to Confucius's.

Their Preachers take some Apophthegm cut of those great Mens Writings, for Texts to comment and exspatiate on. They live very abstemicusly, and rise early before Day to pray. Every Temple has a Closser or Convent annext to it, and has a certain Stipend allowed by the Emperor to support the Priests and Novices, but they get much more by letting of Lodgings to Travellers, who generally lodge in their Cells, than the Emperor's Allowance. Besides, they have a genteel Way of begging from Strangers, by bringing Tea and Sweet-meats to regale them.

THE Fishers and Carriers by Water, who are born and bred in their Boats, and on the Water, must also be buried in it, unless they have Money enough to purchase a Bury-

ing-Place ashore.

THEY have many Sects among them, but all agree in the Transanimation of Souls, yet not one Sect perfecutes another, but allow free Liberty to believe what they think best, and it is very natural for Men to embrace what they

think is best, whether it is the best or not.

THE Christian Missionaries have converted many by the Indulgence of several Emperors, particularly of Chunghee, and those Apostles indulge their Proselytes in many Things opposite to the System and Canons of the Western Christianity, as Polygamy, Concubinage, and the Invocation and Adoration of Pagan Saints, as well as Christian, in their Apotheosis, which has caused no small Disturbance at Rome.

The Emperor of China's Revenues, by Report, amount to one hundred and eight thousand Millions of Tayels, out of which he maintains fifty Calces or Privy-countellors at one hundred thousand Tayels yearly. The Princes of the Blood are honoured with the Government of Provinces, and are allowed, out of the royal Treasury, from five hundred thousand to ten hundred thousand Tayels yearly. He has fourteen Provinces, wherein he maintains eighty hundred

hundred Soldiers in each, and each Soldier is allowed ten Tayels per Annum in Silver, and a Catty of Rice, and an Ounce of Salt per Day, which are delivered monthly out of the Emperor's Granaries. In a Word, I look on China to be the richeft and best governed Empire in the World.

THE next Island of Note is Formesa, but there are several small Islands between it and Luconia, which belong to China, tho' of no great Account, and because they are

flat and low, they are called the Bashee Islands.

FORMOSA is a noble Island, and affords Plenty of Gold, raw Silk, fine white Sugar, Sugar-candy, and Copper finer than in China. Before the Tartars subdued it, it had Kings of its own, but tributary to China. The Natives differ much from the neighbouring People of China and Luconia, both in Phisiognomy and Make. The English and Dutch had their Factories there, but about the Year 1678, when all Fokien had submitted to the Tartars, they were ordered to withdraw their Factories from Teywon, a small Island close to the great one, on which their Factories stood. The English obeyed, and removed over to Amoy, but the Dutch received Supplies from Batavia, and endured a long Siege, but were at last forced to submit, tho' they fold their Factory, and many of their Mens Lives pretty dear, for the Tartars loft above five thousand Men in reducing it. It is now wholly under the Tartars, and the Chungtock of Fokien has the Superintendency of it.

When it was tributary to China, about the Year 1650. there was a strange Distemper raged on the Island for three Years together, for most of the Virgins between twelve and eighteen Years of Age, had a Trick of hanging themselves, in so much that very sew Maidens were lest on the Island, nor could any Remedy be sound to prevent it, before an old China Man sound one out, and addressed himself to the King, desiring him to make a Trial of hanging (all those that hanged themselves privately) by one Leg on the Sides of High-ways, for Passengers to gaze on. The King took his Counsel, and hanged up some so, and in one Month's Time the Maidens refrained from hanging, and

have continued good Girls ever fince.

THE Religion of Formesa is purely Pagan. They all worship the Sun, Moon, and the Stars their Children. Some worship the first living Thing they see in the Morn-

ing, except a Lizard.

BITWEEN Teywon and the Coast of Fokien, lie the Piscadore Islands, so called from the great Quantities of Fish caught about them. There are many Shallows lie a good Distance of them, on which an English Ship from Surat, called the Josiah, was shipwreck'd in the Year 1697, but all the Men were saved; and on the Report of a Jesuit, Missionary who was Passenger, that he had some Things on board for the Emperor, on which Mr. Reynolds the first Supercargo, was forced to take a Journey to Peking, who cleared himself, but brought Scandal on holy Mother Church, for forging Things so palpably false, for the good Father's Trunk was saved, and opened by proper Officers, and not one Thing that he had reported to be in it, was found.

In the Year 1700, the new East-India Company of England, settled a Factory on Chusan by Mr. Allen Catchpole, but by the Oppression of the Tartar Officers, and the Company's Neglect of sending Money sufficient to carry on their Trade, Mr. Catchpole removed the Factory again in the Beginning of the Year 1703, and carried it to Pullocondore.

CHAP. XXVIII.

A short Account of the taking of the Manila Ship, in the East Indies, by Mr. Anson in the Ship the Conturion, in the Year 1743.

In the latter End of the Year 1739, it was foreseen that a War with Spain was inevitable; it was the Opinion of several considerable Persons then entrusted with the Administration of Affairs; that the most prudent Step the Nation could take, on the breaking out of the War, was the attacking that Crown in her distant Settlements; for by this Means (as at that Time there was the greatest Probability of Success) it was supposed we should

cut off the principal Resources of the Enemy, and reduce them sincerely to desire a Peace; as they would hereby be deprived of the Returns of that Treasure, by which alone they could be enabled to carry on a War. Had this Scheme been then executed with the utmost Expedition, the City of Manila would with Ease have fallen into our Hands, and we might have made ourselves Masters of the Island of Cuba. But as Mr. Anson, through the many Disappointments he met with in fitting out his Squadron, and the Delays of his failing Orders did not arrive in the Indies till after the Departure of the Manila Ships, he missed an Opportunity which might not only have humbled the Pride of Spain, but might also have furnished this Nation with a sufficient Sum to have paid off the National Debt.

AT length Mr. Anson as Commodore sailed from St. Helen's in the Centurion, having under his Command seven other Ships, the Pearl, the Gloucester, the Severn, the Wager, the Tryal, and two Pinks, Victuallers; on the eightheenth of September, in the Year 1740, and in forty Days we arrived off the Island of Madera, where Mr. Anson received Intelligence of the Squadron commanded by Don Joseph Pizarro, the Spanish Admiral, confisting of fix Men of War; not one of which returned to Europe except the Asia, the other five were lost in Consequence of the Precautions they took to avoid the Enterprize of the English. From hence Mr. Anson sailed to St. Catharine's, and then to Port Julian, and on the ninth of June 1741, at Break of Day, arrived at the Island of Juan Firnandes. But during these Transactions, the Wager was loft with many of her Men, and the Remainder, which were about one hundred became diforderly, drunken and mutinous, and returned towards England in the Long Boat. Mr. Anson lying in the Bay at the Island of Juan Fernandes spied a Spanish Merchantman, took her, which was the first Prize he had taken, her Burthen was about four hundred and fifty Tuns, with fifty three Sailors on board white and black, and twenty-five Passengers. With this Prize he left the Mand of Juan Fernandes, and steered to the Eastward. From hence he went on a Cruize towards Paita, and the Tryal fell in with a Spanish Merchantman of fix hundred Tuns, of which she soon made a Prize;

a Prize; but the Tryal being in a bad Condition we deferted her, and put on Board the Spenish Ship every Thing that was valuable, we funk her, calling our Frigate by the Name of the Tryal's Prize. Soon after which we faw another Sail, which we chaced, and firing fourteen Shot at her she struck, she was a Biscayer; of three hundred Tuns, and named the Santa Terefa de Jesus. Approaching Paita, the Nuestra Senora del Carmin, whose worth was four hundred thousand Dollars, fell into our Hands. This Merchantman had but just left the Harbour: where we entered with all the Celerity possible, besieged the Town of Paita, and took it without any confiderable Lofs. The Sailors entered the Houses in Search of Pillage, and what chiefly occurred to them were the laced and embroidered Clothes, with the Tye or Bag-wig and laced Hat, and the Womens fine Gowns and Perticoats of the Spamards. These glittering Habits our Tars put on over their own dirty greafy Trowsers and Jackets; so that when a Partv of them first appeared thus ridiculously metamorphosed one could not be easily satisfied they were our own People. Having removed every Thing that was valuable in the Town into the Centurion, and secured the Treasure of the whole Fort, and taken on board eighty Prisoners we burnt down the Town, whose Buildings were but of one Story, built of Wood, and covered with Leaves, we left it, and failed for Quibo. In this Paffage we found, that the Glocester had picked up two Spanish Snows, one whose Cargo confisted of Wine, Brandy, Olives, with Spices to the Amount of seven thousand Pound, and the other had a great Quantity of Double Doubloons and Dollars to the Amount of near twelve thousand Pound. After this we took a Spanish Bark called the Jesu Nazareno, of inconsiderable Value.

FROM Quibo we failed for the Coast of Mexico in hopes of succeeding in the great Purpose we had in View, that of intercepting the Manila Galeon. We cruized off the Port of Acapulco for some Time without Success, but at length to our inexpressible Joy, on the twentieth of June we discovered a Sail to the South East. The Commodore with the Centurion stood immediately towards her, and in a short Time came so near as to see her from the Deck.

The

The Galeon did not change her Course, but bore down upon us, and fired a Gun, and took in her top-gallant Sails, and an Engagement enfued, which was maintained on both Sides with great Resolution and Briskness; but at length overpowered with the fuperior Bravery and Courage of our Men the Nostra Seigniora de Cabadonga (for that was the Manila Ship's Name) was taken, a Prize, amounting in Value to near a Million and half in Dollars. The Galeon was much larger than the Centurion, had five hundred and fifty Men, and thirty-fix Guns mounted for Action, besides twenty-eight Pidreroes in her Gunwale, Quarters and Tops, each of which carried a four Pound Ball, and she was well provided with small Arms. She had fixty-seven killed in the Action, and eighty-four wounded; while the Centurion had only two killed and a Lieutenant, and fixteen wounded; all of whom but one recovered.

The Particulars of the Cargo of the Galeon being afcertained it was found, that he had on board one Million three hundred and thirteen thousand eight hundred and forty-three Pieces of Eight, and thirty five thousand fix hundred eighty two Ounces of Virgin Silver, besides some Cochineal, and a few other Commodities, which, however, were but of small Account, in Comparison of the Specie. And this being the Commodore's last Prize, it hence appears, that all the Treasure taken by the Centurion was not much short of four hundred thousand Pound. independent of the Ships and Merchandize, which she either burnt or destroyed, and which by the most reasonable Estimation could not amount to a less Sum than fix hundred thousand Pound more; so that the Loss of the Enemy by our Squadron did greatly exceed a Million. To which, suppose we add, the Charge of the Court of Spain in fitting out Pizarro, with the Loss of his Men of War, the Total of all these Sums will be most exorbitant, and shews, that notwithstanding the numerous Disadvantages the English Commodore and his Men laboured under, did yet prove exceeding prejudicial to the Spaniards.

Mr. Anson with his Prize sailed for the River of Canton, where he arrived on the sourceenth of July sollowing, and anchored somewhat short of the Bocca Tigris. Here he

Cc

flayed several Months, and having took in Provisions on the seventh of December the Centurion and her Prize unmoored, and stood down the River on her Return to England; but some Chinese Merchantmen in his Passage down the River offered the Commodore a certain Sum for the Galeon, which on some Consideration he accepted and delivered her to the Merchants on the sisteenth of December, and the same Day got under Sail. And on the third of January 1743-4, the Centurion came to an Anchor at Prince's Island in the Streights of Sunda, and continued there wooding and watering till the eighth; when she weighed, and stood for the Cape of Good Hope, where on the eleventh of March she anchored in Table-Bay.

During his Stay here he entered about forty new Men; and having, by the third of April 1744, compleated his Water and Provision, he, on that Day weighed, and put to Sea; and the nineteenth of the same Month saw the Island of St. Helena, which he did not touch at, but stood on his Way; and on the tenth of June spoke with an English Ship from Amsterdam bound for Philadelphia, from whom Mr. Anson received the first Intelligence of a French War; on the twelfth he got Sight of the Lizard; and on the sisteenth in the Evening, to the infinite Joy of all concerned, they came safe to an Anchor at Spithead. Thus was this Expedition sinished, when it had lasted three Years and nine Months.

APPENDIX

SECT. I.

The Success of an English Squadron in the East Indies.

HE War which broke out between France and England in 1744, soon spread to the East-Indies; where-upon Commodore Barnet was sent thither with a Squadron of His Majesty's Ships, in order to protect the Trade, which he performed with great Spirit and Resolution; as appears from the sollowing Account published in

the Gazette, in August 1745.

The Deptford, Captain Barnet, Commodore, and the Preston, Lord Northesk, of fixty and fifty Guns, separated from the Medway, Captain Peyton, and the Diamond, Captain Moore, of fixty and twenty Guns, some Time after they left Madagascar, where they had been for Water and Provisions; the two first went for the Streights of Sunda, and thence to the Streights of Banca, and the two last proceeded for the Streights of Malacca. The Commodore and his Confort disguised their Ships by Painting, &c. after the French and Dutch Manner; after being some Time in the Streights of Banca, appeared the three French Company's Ships, laden from Canton, for Europe, viz. the Dauphin, Captain Butler, the Hercules, Captain Dufrein, and Le Jason, Captain Delametrie; the English hoisted Dutch Colours, and, as soon as the French came near they lowered the Dutch Colours and hoisted English, calling at the same Time to strike theirs to the King of England, which not being done, the Commodore gave the French Captain, Butler, a Broadfide, which he and his Conforts returned, during which the Dauphin, with a Cannonshot carried away Commodore Barnet's Tiller Rope, which difconcerted him for fome Time.

The Hercules and Jason, by Reason of the little Breeze and their Distance, could not in Time come to the Dauphin's Aid, and jointly attack the fifty Gun Ship, while the other could not for some Time after, which Circumstance, it is said, might have given Occasion to the Hercules to escape, sailing better than the

Cc2

rest: After a brave Resistance they were forced to strike; then the Commodore sent Officers and Men to take Possession, and to bring the French Officers and Men on board his Ship, where he received them like a gallant and generous Officer, shewing them all the Favour and Friendship depending on him, and usual in such Cases; the like good Treatment received the rest of the Gentlemen from Lord Northesk on board the Preston.

The two chief Supercargoes, Mc. Margrin and La Val, with the three second Captains and two Officers were, by Order of the Commodore, put on board the English China Ships, and the rest,

with the Ships, carried to Batavia.

The other two Ships, Medway and Diamond, in their Way to the Streights of Malacca, called at Achin, where they found a French Privateer, fitted out and fent by the Company from Pondicherry, to cruise in the China Seas; they carried her with them through the Streights of Malacca, and in their Way took a French Ship from Manila, said to be rich.

When we came through the Streights of Banca (says the Officer who gave this Account) these two Ships were lying with the two Prizes disguised like their Consort, who took the three French China Men, of which they had no Account, but being told by us, that the French Ships had lest Canton long before us, they therefore resolved to go to their Rendezvous at Batavia.

The St. Louis, Captain Johannes, worth 12,000 l. laden from Canton and bound to Mauritius, was taken some Days afterwards by Captain Cumming in the Fame, a Privateer of thirty

Guns from England.

A Letter from Commodore Barnet in the Gazette of the seventcenth says, that these Ships were about seven hundred Tons, thirty Guns, and an hundred and fifty Men each, very deeply and richly laden, chiefly with Tea, China Ware, and Silk; and the Supercargoes say, the Cargo of each would in France have been worth more than 100,000 l. Sterling.

Other Accounts added, that the French Manila Ship had on board seventy-two Chests of Dollars, of 3000 l. each, and two

Chefts of Gold alone worth 30,000 l.

SECT. II.

An Account of an Engagement between the French and English Fleets, and the Taking of Madras, in a Letter from Fort St. David, dated Aug. 17.

JUNE 25. 1746, at Day-break, his Majesty's Squadron in Negapatan Road made several Ships to the Offing, to which they went out, and sound them to be nine French Ships. The Wind being light, could not get up with each other, till Half past Four in the Evening, at which Time the Engagement be-

gan, and lasted till about Seven, when it grew dark. The two Squadrons continued near one another all the next Day. At Four in the Afternoon Captain Peyton fummoned a Council of War, where it was agreed not to engage the Enemy, but to proceed to Trincomaly Bay; as the French did for Pondicherry, and arrived there the feventeenth, fourteen killed, and forty-fix wounded in the English Squadron. The French Squadron confisted of the Achilles, a feventy Gun Ship, fix Company's Ships, and two Country Ships. Captain Peyton kept the Squadron at Trincomaly till the Beginning of August, when he came on the Coast, and the fixth appeared off Negapatan. The French Squadron. of eight Ships (one being gone to Bengal, and fince lost in the River with two hundred and eighty Europeans) weighed from Pondicherry, July 24, for the Southward, and stood out to meet the English Squadron, which stood to the Southward from them, and the French then returned.

The seventeenth the eight Ships weighed for Madras Road, where they arrived the eighteenth, and fired on the Ship Princefs Mary, which was returned from the Ship, and the Fort; each Ship gave a Broadfide as she stood to the Northward, and another as the return'd, and then stood to the Southward again. We are fince inform'd, the French had two Motives for this Expedition; one was, to make a Plea with the Country Government that the English committed the first Hostilities ashore; the other, to see if Captain Peyton would come to our Affistance

or not.

The twenty-third Captain Peyton, with the Squadron, stood in to Pullicat Road, where he fent his Lieutenant Mr. Wemys, on board a Vessel in the Road, who was there told of all the Circumstances of their attacking the Ship Princess Mary, and of their then being between Madras and Pondicherry; on which Captain Peyton disappeared, and has never been heard of, or from, by any of the English, though there have been no Cost or Pains spared for that Purpose, as may easily be imagined from the melancholy Situation of Affairs on the Coast. The last Letter received from any one belonging to the Squadron, was from Captain Peyton to Governor Morfe, dated August 4, when he was just come out refitted.

This unhappy Conduct of his fo animated the French, that they determined on attacking Fort St. George. We call it unhappy, because it has truly proved so in its Consequence; though what Reasons Captain Peyton may have had for this Proceeding, we know not. Accordingly, Sept. 2. in the Morning, they weighed again from Pondicherry; the fourth they landed their Men at St. Thomas, and thereabouts; and on the fifth began the Attack, chiefly depending on their Shells; the tenth the Town furrendered, but on what Terms we are not perfectly inform'd; as yet no Terms are complied with. M. de Primency is gone thither

from Pondicherry to command the Garrison.

Ostob. 2. the feven French Ships in the Road, having taken what Quantity of Money, Goods, Ammunition and Stores they thought proper, were to fail the third for Pondicherry, and from thence immediately hither (Fort St. David) to attack this Place. But it pleased God that Night and the next Morning it blew so hard, as to founder the Duke of Orleans, their second Ship in Force, and two more. The Achilles of seventy Guns, the Commodore's, and only Ship of confiderable Force, either cut away or lost all her Masts, as did the three others; so that twelve hundred Men have perished, together with upwards of fixty English Prisoners, and the whole Squadron utterly disabled, and their Design against this Place rendered impracticable for the present. The Company's Veffels, the Mermaid and the Advice Snows, were both taken by the French Squadron in Madras Road, and both lost in the Storm. The Princess Mary was scuttled, and run into the Surf, but is fince got off by the French. The Sumatra and Brillanta, from the West Coast, passed by this Place the nineteenth of August, and not observing the Signal, failed on into the Squadron, which having English Colours, they took for our's, and are loft. The French fay, they had the Nabob's Permission for committing these Hostilities ashore, and declare publickly they gave him one hundred thousand Pagodas for the Liberty of so doing, though he now disowns it, saying, that his Son was going to the Affistance of Madras, but that it was given up before he could get thither.

August 25. arrived at Mibie three French Ships, one called the Centurion of seventy Guns, one of forty, and another of twenty Guns, which three Ships arrived at Pondicherry, Sept. 27. and sailed from thence the twenty-fourth Instant; four that came out of Europe in Company with them are said to be gone for China. The three Ships advised above to be sailed from Pondicherry are returned, so that there are now in the Road and Offing five Ships

compleatly rigged, and five disabled, besides small Vessels.

July 1. 1747, the East-India Company received the following Advices: On Octob. 17. 1746, the Nabob, by Order of Nizam Mulmullock, the Vizier, came with nine hundred Men, to compel the French to evacuate the Town of Madras to the English; but on the twenty-tecond two hundred French, out of five hundred in Madras, sallied out and surprized Part of his Camp, and with three hundred more from Pondicherry, attacked the Nabob at St. Thomas on the twenty-third at Night, and being joined the next Morning by a Party from Madras, routed his Forces: On which he returned to Aratt, and it was said was there raising more Forces to come down against the French.

Octob. 30. M. Paradis, who commands at Madras, published by Beat of Drum, that all Treaties of Ransom and Capitulation made with M. de la Bourdinay to be void, and required all the English to quit Madras, the Mount, and More, in two Days; on which, notwithstanding the Inclemency of the Season, they

all

all dispersed to different Places, except the Governor and Mr.

Monson, who were fent Prisoners to Pondicherry.

On Dec. 8. the whole French Garrison of Pondicherry, confishing of about a thousand regular I roops, two hundred train'd Peons, and many others, with Cannon, Mortars, &c. arrived within a Mile of the Bound Hedge of Fort St. David, the Deputy Governor of which Place detached fixteen hundred of his Black Military, with Orders to attack the French immediately, and harrafs them as much as possible all Night, which they did, and at Day-break began a regular Engagement, the Enemy having Cannon forced their Way quite to the Garden-house, when the Moors came advancing upon them, and a hundred Men of the Garrison, which was all they could spare, at the same Time fallying out, the Enemy fearing to be furrounded, retreated with great Precipitation, and being purfued by the whole Force, loft above two hundred Men, among them four Officers of Diffinction, with all their Tents, Ammunition, fix Camels, two Mortars with their Shells, three or four Drums, two Chefts of Arms, Provisions, Palankees, &c.

M. Bourdenay, Commander of the Squadron that took Madras, on his Return to Pondicherry, laid down his Command, and retired to Eustatia, a Dutch Settlement, where converting the Plunder of Madras into Jewels, he took Shipping for Holland. By the Loss sustained at Madras the French said it appeared, that M. Bourdenay had secreted thirteen Millions of Livres, about feven hundred thousand Pound Sterling, and were resolved to imprison him till he refunded; but were prevented, at least for some Time, by his being taken on board a Dutch Ship, with two of his Officers, and fome of his Treasure, by an English Privateer, and was lodged in Pendennis Castle, from whence he was

brought to London in Custody of two Messengers.

The English, to repair their Losses, and be revenged of the Enemy, resolved to attack Pondicherry; and having collected all their Forces, besieged the Place both by Sea and Land with great Vigour, and it was as ffrenuously defended for a considerable Time by the Garrison. But the Winter being far advanced, and the Severity of the Weather too intense to continue the Siege with any Probability of Success, it was broke up: And that it was not renewed the ensuing Summer, was owing to the Peace, which, this Year 1748, was concluded at Aix la Chapelle; by which an End was put to all Hostilities, and Madras returned to the Possession of the English.

The general Tranquillity occasioned by this Peace, did not continue long in the East Indies; where, though the French did not directly break it, yet by stirring up Quarrels between the Nabobs in Alliance with either Party, and fiding with their Allies by Degrees brought on a War between the two Companies, more violent and destructive than had been known in those

. Countries.

308 The HELLINDIA.

Countries for many Years, as we shall see in the Sequel: But first shall give an Account of some remarkable Occurrences that happened in the Interim.

SECT. III.

An Account of the Dutch surprising the Island of Madras. Written by a Person on the Spot, and authenticated by the Testimony of several others present.

MADURA is in the East-Indies near Java. It is a pleafant, fertile, and rich Island; and, till the Year 1747, was governed by its own King. It is inhabited by Malays, diffinguished by their Courtesy to Strangers, particularly to the British,

and by the general Integrity of their Dealings.

The Dutch have, on various Pretences, made themselves Mafters of many of the Indian Islands; and are Tyrants over the Princes of those which remain unconquered. Amongst the last was, till that Time, Madura; upon which, on some shameful and ridiculous Pretext, they made several Descents in that Year; sending Ships from Batavia, their capital City in India, to which unhappily, Madura lies near; and plundering, murthering, and making Slaves of all they met.

The Sovereign of Madura, a Person of distinguished Courage and Conduct, opposed them often with Spirit, but seldom with Success. His People were unskilled in the European Art of War;

and their Numbers availed them nothing.

At length, perceiving there was no defending the Island against the Enemy, he determined to throw himself into the Protection

of the Sultan of Benjar, to whom he was related.

He communicated his Resolution to his People; he advised them to submit to a Power they could not resist; but as himself must be destroyed or carried off a Slave, he informed them of his intended Escape. They took their Leave with Tears, committing his sacred Person to the Care of Heaven.

He took with him one of his Sons, a Number of his Wives, a Body of faithful Domesticks, and his most valiant Soldiers, and a great Treasure in Gold and precious Stones. Thus furnished, getting into some Boats, he made the best of his Way towards

the intended Afylum.

The Dutch attacked his little Party in several Boats as they made off; but were repulsed with Loss. The Madurians were always valiant, but now they were desperate. Having freed themselves from this Opposition, they made for Benjar. And the Dutch, expecting this would be their Refuge, sent a Vessel to intercept their Passage, or to arm the Sultan against their Reception; which was in Benjar River before them.

They

They discovered it in Time; and they kept concealed under Shore. In the Night they got by the *Dutch* Vessel, and came up with a larger, which proved an *English* one; it was the *Onflow*, Captain *Congreve*.

The Son of the Sovereign of Madura was at that Time with the English at Bencoolen; and the Father's great Opinion of our People's Virtue, made him immediately throw himself into their Protection; desiring to be carried to England, or to some of the

English Settlements in India.

He proposed to resign his Title to the Kingdom to the Englist; to deliver up to them the very considerable Treasures he had with him; and direct them to the richest Part of the Island, where they should come into immediate Possession of a much greater.

The Captain, who was on Shore at Caytonia, accepted the Proposal; and the Sovereign of Madura, who all this while lay concealed in a Creek, was, with his Wives and Servants, taken on board in the Night, dismissing his Soldiers. But, inconsiderately, the Mandurian Boats were left in Sight about the Ship in

the Morning.

The Dutch saw this, and not daring to attack the Vessel, they demanded him of the Sultan of Benjar. "The Captain of the English Vessel, said they, is in your Power; secure him till "the King of Mandura be given up, or expect the same Fate yoursels." This was the insolent Message of the Hollanders to the Sultan. He obeyed; he seized Captain Congreve, laid him in Irons, and resused to set him at Liberty, till the Sovereign demanded should be given up by his People. The Captain at first resused; but after some Days; seeing the Sultan resolute, he wrote Orders for delivering up the unhappy Monarch, with all that belonged to him.

The King, whose Person and Manner were full of Dignity, had gained, during his Stay on board, the Respect of his Officers; and his Condition had obtained him the Compassion of all in the Vessel. He had ordered Presents, and they were delivered; every Sailor declared himself ready to spill his Blood, with-

out Reward, in his Defence.

The King was at Supper with the commanding Officer in the Round-house, when the Letter from the Captain was delivered. He read its Contents in the other's Face, who abruptly retired to the great Cabbin; he there got his People together, and sent his Servant to know truly what was intended. He received no satisfactory Reply; and he could perceive Treachery and approaching Ruin. He found they were about to assault him by Violence, and he prepared for the Destruction, not for an impossible Desence.

They forced open the Door, and he saw them enter against him, armed with Cutlasses, Guns, and Bayonets. He saw his own Fate, and he determined, according to the savage Greathers

D d

The APPENDIX.

of the East, his Wives should not, after his Death, be carried into Slavery. When he was no longer able to protect, he destroyed them. He began in the Presence of the astonished Crew to facrifice them by his own Hand. Tears waited upon every Blow; but beginning with the greatest Favourite, whom he stabled to the Heart; he would have gone round, had not our People forced in upon him. They wounded him, and made him Prisoner; he was put in Irons, and then first acquainted

with his Fate. 66 O English! English! is it you, exclaimed he, who refuse " Protection to the Oppressed! You! who join to destroy " them! Can the good English (they were always called so) fee " their Friends, the Madurians, enflaved; and not affift them? " Can they see a King insulted by Usurpers, and not defend " him? There is no Generosity in white Men? Nay, there is " no Truth !-Why did you promife to protect me? You, not " the Dutch, have dethroned the Sovereign of Madura! How " came I here but by your Engagements to defend me? Do " it! Or if you are afraid of that, be honest, set me on Shore again, and leave me to my own Valour. If I must die, let " me not think the English false and fearful."

"Where, continued he exclaiming, where is now your "Greatness and your Power? Your Generosity and Justice! "Lords of the Seas, you are afraid of Dutchmen? Protectors of the Diffressed, you give me up, who threw myself and King-

"dom into your sworn Protection!

When the unhappy Monarch was out of Breath with Upbraidings, the Officer told him, they pitied him, and pointed to the Tears of all present. " I see it, answered he; but I demanded on not your Pity, it was your Protection I asked; it was that " you promifed, and Heaven will punish you unless you grant

ec it 1 " The Dutch Boats now appeared; and he was informed, that he must go on board them. He turned to his People, and with a serious Dignity bad them follow: " And, says he, if any here-"after name the English in your Hearing, tell them they are not "that good People the honest Malays think !- However, con-" tinued he, taking his Leave of our People, be kind to the " Prince my Son, whom you have amongst you. Give him the es Protection you refuse to his Father. Tell him, O English! of my Sufferings; and tell him that his Father, when he went to Death, commanded him to revenge them. If Virtue, concluded he, cannot enforce this, let me buy it of you! "Take my Treasures: - for why should I enrich my greater

" Enemies!" As he spoke this, he poured out his Gold and Jewels, and descended without Emotion into the Boat which the Dutch had sent for him. Our People faw it with weeping Eyes; but the Dutch exprefied no more Concern than if a Malefactor had been delivered

to them for Execution. They returned to their Ship; which without Ceremony failed off as foon as it was dark, and was no more heard of till in Port.

The Island remains in the Hands of the Dutch; and the King's Condition may be gueffed, for he was carried to their Settle-

ments at the Cape.

But to shew that the Duich have as little Regard to their Friends and Allies, as they have even to Strangers and Enemies, and that the Laws of God and Man, of Nations and Humanity, are but as Threads of Flax before a Candle, when they happen to obstruct their Interest, has been manifest on many Occasions, and will farther appear from the following Petition of the East-India Company:

To the King's Most Excellent Majesty,

"That Your Petitioners conceive the Freedom of Navigation" " to Your Majesty's Subjects, and those of the States General " of the United Provinces, are lettled by the Marine Treaty of " 1674; notwithstanding which about 1746, the Dutch East-

" India Company caused Notice to be given to Your Petitio-" ners Servants in India, that they claimed an exclusive Right

to many Islands there, though not possessed or settled by them,

and particularly to that of Borneo.

"And Your Petitioners having in 1746, fent the Dragon and 66 Onflow to load Pepper at Benjar in Borneo, before the same " could be compleated, a Squadron of five Dutch Ships of Force

44 and two Sloops appeared before the Place, and the Commo-

"dore went on Shore, and compelled the Sultan not to deliver

" any Pepper; so that the Onslow was obliged to depart with " about half her Loading, and the Dragon went empty from

"thence to Batavia, where she met with the Prince Edward,

" whose Supercargoes directed the Captain of the Dragon, as

"by their Instructions they had a Power to do, to go back to "Benjar, and take in his Loading of Pepper: Upon which

"Baron Imboff, the Dutch Governor of Batavia, gave Your Petitioners Supercargoes Notice in Writing, that, if she did,

"it must be at her Peril; on which Your Petitioners Super-

" cargoes were obliged to delift.

" In 1747, the Ship Fanny, of Fort Marlborough in Ben-" coolen, being furnished with a Pass from Your Petitioners Go-" vernor there, and destined to Priamong, a free and neutral

"Port upon the West Coast of Sumatra, was hindered from

of profecuting her intended Voyage, by a Protest from the "Dutch Settlement at Pandang, claiming an exclusive Trade to

"the West Parts of Sumatra, and several adjacent Islands, to

the great Loss of the Owners. Your Petitioners Servants and those under their Protection at Bencoolen, having enjoyed a

" free Trade upon these Coasts, and knowing that the late

Dutch Claim was without Foundation, and not suspecting Dd 2

The APPENDIX. sthat any Nation could be capable of afferting fuch pretended Right by Acts of Cruelty and Barbarity, some Time in June " or July 1748, a Chinaman refiding there, fitted out two Praws, which, with their Cargoes, were of the Value of twelve or ce thirteen Thousand Spanish Dollars, upon a Voyage to Sinhel, " Porto Nias, and Natal, which are free and open Ports of the " Island of Sumatra; and, having obtained a proper Pass, pro-66 fecuted their Voyage, in the Course of which they fell in with " a Vessel well manned, commanded by a Dutchman, and fitted out for the Purpose from Pandang, who forcibly seized both the faid Praws, and producing their Passes, tore them in Pieces, and threw them overboard, and bound the whole "Crews in Fetters, and deliberately determined to murder them " all, confifting of thirty-feven Persons, Inhabitants of Bencoo-66 len: And for that Purpose the said Dutch Captain, in cool Blood, ordered them to be brought severally upon Deck, and " most inhumanly slain before him, and their Bodies thrown into the Sea, and afterwards carried both the Vessels to Pance dang. But one of the faid Persons who had received several Wounds, endeavouring to save himself by swimming, the co Dutch fired at him, whereby he had the Misfortune of a " Musket-Ball passing through both his Cheeks; he neverthese less reached to Shore, and gave this Account of the Transacction. Your Petitioners Governor and Council represented this Matter to the Dutch Settlement at Pandang, and de-" manded Satisfaction for this Infult, and Restitution of the said "Veffels and Cargoes, but without Effect; and by a Letter from the Dutch Governor of Batavia, they afferted the Right of the Netherlands East India Company to such exclusive Trade; and Baron Imhoff, the Governor, having repeated " the same by his Protest of the twenty-fifth of March 1749, against the Ship Delawar, another Ship belonging to Your Petitioners, destined to Benjar for Pepper. 66 Should the Behaviour of the Dutch pass unobserved, and "the exclusive Trade by them infished upon be permitted, Your Petitioners have too just Reason to apprehend, that they would foon not only establish themselves in this exclusive Trade they " now so unjustly claim, but totally exclude Your Petitioners from all free Trade to or in the East-Indies. "Your Petitioners, therefore, most humbly beseech Your "Majesty, that You will be pleased to take the same into Your "Confideration, and give fuch Directions as may procure am-

of ple Satisfaction for what is past, and may for the future effectually maintain and secure the Trade carried on in the East-

"Indies, by Your Petitioners, &c.

East-India-House, Octob. 27. 1749.

We shall now proceed to give an Account of the War that was begun and carried on between the Nabobs in Alliance with

The APPENDIX. 4

the French and English, and the Share that each Side had in the Contest.

Extract of a Letter from Fort St. George, in the East-Indies, dated July 5, 1752.

The President and Council of Fort St. George having received Information fome Time ago, that the Chunda Saib and his Allies were endeavouring to harrass us in our Districts, sent for a Reinforcement from Bengal, and also sent Captain Clive to Madras, who having collected our Forces, and taken the Field, found the Enemy strongly encamped at Vendalour, a Place about fifteen Miles distant from hence. The Enemy decamped in the Night, and took the Rout of Arcot, and were pursued by the Nabob's Forces; they gained Covercepante, about fixty Miles off, which Place was appointed for their Rendezvous, their Intention. having been to surprize Arcot. Here an Engagement ensued, in which most of their European Forces were killed and taken Prifoners, and their Cannon and Baggage were also taken. Upon this Advice Captain Clive was immediately ordered to march; he took St. David in his Way; and while he was there, the Ship Dorrington arrived, with Major Lawrence, who, at his own Request, had the Command of the Forces given to him, and he fet out on the seventeenth of March from Fort St. David, at the Head of a Party of four hundred Europeans, and one thousand Seapoys, and took under Convoy a large Quantity of Stores and Ammunition for Trichinopoly, and proceeded, without Molestation, till he came with his Forces to Coiladdy on the twentyeighth, when the Enemy strove to take Advantage of his Situation, a strong Detachment of French from Chunda Saib's Army having thrown up an Intrenchment in the Way he was to march cannonaded him from it, and endeavoured to interrupt his Paffage; which induced Major Lawrence, on the Nabob's Part, to return it, and occasioned the Loss of some Men on both Sides: But, the Enemy not advancing, he went on the next Day for Trichinopoly, about fixteen Miles distant, and as the Road was in Sight of the Enemy's Camp, they came out with their whole Force to oppose him, Major Lawrence, in order to secure the Baggage, marched to meet them; this brought on a Cannonading from them, which did him but little Damage; but his Guns galled the Enemy very much, and forced them to retreat into a hollow Way; upon this Major Lawrence drew off his Men, and joined the Army that Night. In this Action the Enemy loft above three hundred Horse, besides Allam Gawn, a Man of great Interest in the Country. Chunda was soon obliged to raise the Siege of Trichinopaly, and collect his Forces in Syringham, a neighbouring Island; and the English Forces having possessed themfelves of all the strong Posts quite round it, they so effectually

prevented Provisions from coming to the Enemy, that Chunda's great Army of above thirty thousand Men was dispersed in less than two Months; and himself, with the French, and a few black Horse Seapoys, who held out, were in a miserable Condition for Want of Sustenance. Upon this the Nabob summoned them to furrender Prisoners; and after they had sent Chunda in the Night-time to Monacice, they delivered up the Island of Syringham on the third of June, on Condition that the French Officers should have Leave to go to Pondicherry on their Parole, never to serve against the Nabob or his Allies; and the Soldiers to be fent to Europe by the first Opportunity, but in the mean Time to be kept Prisoners. As the Allies could not agree who should keep Chunda, who was taken at Monacjee by the Tanjore Ally, to end the Dispute, his Head was struck off. The whole Butiness was done in a few Sieges and some Skirmishes, in several of which not a Man of our Forces was loft; fo that in reducing the Blacks to the Nabob's Obedience, and making thirty Officers, and near a thousand European Soldiers Prisoners, we had not fifty Men killed.

M. Dupleix, at the Desire of Salabad Jing, solicited for a Peace, which the Nabob was willing to consent to, provided it was made to our Satisfaction, as he owned himself much obli-

ged to us.

Extract of a Letter from Major Lawrence, at Trichinopoly in the East-Indies, dated June 12. 1752.

We have killed and taken Prisoners an Army, with all their Artillery, which amount to about forty Pieces of Cannon and ten Mortars. We found among the Prisoners thirty French Officers, about six killed, and about eight hundred private Men: They were acting as Allies to the Rebels, that have almost destroyed this Country; and we gave our Affistance to the lawful Prince, who is so sensible of his Obligation to the English, that I have great Hopes our Company will be able to carry on their Trade here to more Advantage than any other European Nation. I am going to begin my March through the Arcot Country to settle the Tranquillity of it, and am about an hundred Miles from the Sea-side.

Letters, which afterwards arrived from the East-Indies, confirmed all the above Accounts of the Advantages the English had obtained over the French and their Allies; and likewise mentioned three fresh Battles in that Country, in which the English were victorious, and greatly to the Honour of Captain Clive and Major Lawrence.

In October 1753, Captain Clive arrived in England from the Enft-Indies, and gave the Company an Account, That the English maintained themselves in all the Posts which they became possessed

possessed of after the last Engagement between them and the French. That the latter had made some new Motions, as if they intended an important Enterprize, but, it was imagined, their only View was to embarrass the English: That the French seemed rather inclined to stand upon the defensive, rather than to act offensively, on Account of the considerable Losses they had sustained, which had greatly discouraged the Nabobs their Allies: That M. Dupleix had recalled all the regular Troops that had been joined with the Indians, leaving with them only a Body of Troops which he lately raifed in the Country, and disciplined in the Manner of the Europeans: That there was great Reason to presume, that there would be a Scarcity of Provisions at Pondicherry, all Kinds of Provisions being very scarce in the Neighbourhood, and the Ships from Europe not bringing a sufficient Quantity to supply their Necessities: That the English had still a sufficient Supply of military Stores to defend themselves in Case they were attacked, and that Provisions were furnished them in

great Abundance by the Indians in Alliance with them.

Letters from Fort St. David, February 15. 1753. advised, that there had been a great Mortality among the Swiss Troops in the Service of the East-India Company, and that the Face of Affairs is much altered fince the great Repulse which the French met with before Trichinopoly. The King of Massour, who had marched to the Affistance of the Nabob, in the Interest of the English, and had obliged the French to raise the Siege of Trichinopoly, is fince become an Enemy to that Nabob, upon Pretence that he had broke his Word with him, and now actually blocks up that Town himself. A Chief of the Marattes, named Moraro, who had joined us, is also gone over to the French Army, at a little Distance from our's, which is encamped and entrenched at Trivady, where the Nabob is in Person. There we wait for the French, who will find it very difficult to attack us; but, in the mean Time, the Marattes destroy every Thing near the Camp, and we are obliged to live with the greatest Frugality. The Black Troops in the Service of the Nabob defert in whole Droves for Want of Provisions and Pay; and, the Nabob having very little Resources from his Province, great Part of which is occupied and laid waste by the Enemy, the whole Weight and Expence of the War will fall upon the English who are already confiderably in Debt, and perhaps they one Day or other may have a War with the Nabob for the Payment of the Money they have advanced. According to the Advices we have received from the Officers of our Nation, who are Prisoners at Pondicherry, the French were foon to be joined by a new Nabob, whom they had caused to be proclaimed, and that he is Brother-in-law to him who lately had his Head cut off. These Advices add, that a Peace was concluded between the King of Golconda, and another powerful Nation of the Marattes, which has engaged to fend to the Affilance

Affistance of the French, a Body of twenty-five thousand Horse. Thus the War is brisker than ever, and becomes more and more difficult to put a Stop to.

Extract of a Letter from Major Stringer Lawrence to the Court of the Directors of the East-India Company, dated at the Camp near Trichinopoly, Sept. 26. 1753.

Since my Letter of the twenty-fourth Instant, Captain Ridge joined me with a Detachment of above two hundred Europeans. This Addition made me refolve to attack the Enemy, as the Nonfoons approached, and their Situation was such, that they cut off our Provisions, which must have ended in the Loss of Trichinopoly: Accordingly, on the nineteenth I made a Motion in the Night towards the Left of the Enemy's Camp, for they had Poffession of two large Rocks, about a Mile distant from each other, and I found it necessary to gain one of them. The whole Day of the twentieth was spent in cannonading, and the better to conceal our Design, I had ordered out an eighteen Pounder from the Fort, that they might think we had no other View than that of disturbing them in their Camp with our Shot. This lulled them into a Security; and at Four of the Clock in the Morning of the twenty-first, our Europeans being disposed into three Lines, with the Seapoys on our Flank, and the Horse in our Rear, we attacked the Rock on our Left, called the Golden Rock, and gained it without any Lofs, the Enemy retiring after a faint Resistance, and leaving behind them two Pieces of Cannon. This Earnest of Success encouraged the Men greatly, and determined me to push on to the main Body; so, that no Time might be loft, I disabled the two Guns, and advanced towards the Sugar Loaf Rock, just as the Day began to break. The Enemy were drawn up close to the Rock, and had fortified themfelves with Breaftworks; so it was necessary to gain their Black Camp, that we might fall upon them in the Rear. This was effected with little Trouble, and our Soldiers marched through a constant Fire from nine Pieces of Cannon, attacked a Line of Men, which greatly out-numbered themselves, and in ten or twelve Minutes drove the Enemy out of their Lines.

They however rakied, and made fome faint Refistance afterwards, supported by the Marattes, who rode up very desperately: But as these could not sustain a galling Fire, which sell upon them from all Quarters, they at length ran away, and lest us compleat Masters of the Field of Battle, their whole Camp, Baggage, Ammunition, and ten Pieces of Cannon. The Remains of their Army retreated, some towards Altora and Syringham, some towards Tondamons Country, and some towards Tanjore. The Polligars and Seapoys bring in Prisoners every Minute.

The

The Action lasted near two Hours: We took eight Officers, and one hundred Soldiers, besides the killed, which might be about fixty more. The Marattes saved the rest, and prevented a Pursuit, as they were vastly superior to Monage, our Tanjore Friend. On our Part, we had fix Officers wounded, and several Men killed and wounded. I received a slight Wound in the Arm with a Musket-Ball; but I thank God it does not prevent me from

keeping the Field.

Letters from the East Indies also mentioned the Death of Captain Chafe, who had the Command of a Company in that Service, and had ferved in the Marines here in the last War. This young Gentleman, (the younger Brother of a good Family in Buckinghamshire) being an Officer whom Major Lawrence knew he could confide in, was left by the Major with a small Party in a Village called Tividy; which, as foon as the Major retired with the main Army, was furrounded and attacked by the whole French Forces. Captain Chase had the Courage to make a Sally on them in the Night, in which he lost two Officers and several Indian Soldiers. The next Day they summoned him to surrender, which he refusing, they battered his little Fortification in Breach, and his Indian Soldiers mutinying and refusing to defend it, they were all taken Prisoners. The Captain was carried to Pondicherry, where he furvived his Misfortune but a few Days. leaving behind him the Character of a brave and experienced Officer, though under twenty-eight Years of Age, and is much lamented at Fort St. George.

Letters from Fort St. George, dated November 28. 1756. gave an Account, that the French made an Attempt to take Trichonopoly (by Surprize) a strong Place belonging to the Nabob, in which was a Garrison commanded by Captain Kilpatrick. They made the Attack about Four of the Clock that Morning with eight hundred Europeans. Their Black Forces were to make feveral false Attacks on different Parts of the Town. By the Darkness of the Night, and the Carelesness of the Guard, they got over the Ditch, fixed their Ladders, and fix hundred of them, without firing a Shot got Possession of a Battery on the outward Wall, called Dalton's Battery: By this Time an accidental Shot or two alarmed the Garrison, who immediately repaired to their Posts, and attacked the Party on the Battery, who defended themselves till Day light, and made several Attempts to scale the inward Wall, and petard the Gate, but were kept off by the Garrison. By Day break, those who did not chuse to venture their Necks, by jumping off of the Battery to fave themselves, called out for Quarter, which was given them. There were taken in the Battery two bundred ninety-seven Europeans Prisoners, befides fixty-five wounded, and forty-two killed in the Ditch, besides nine Officers. The rest of their Loss was not known, but it was believed, must be pretty considerable. In this Action the Garrison had scarce any Loss.

E e

From

From the Time of the before-mentioned Action, until the Middle of February following, nothing material happened, when Colonel Lawrence, who was then encamped near Trichonopoly, was obliged, according to Custom, to fend a Party to escort Provisions to the Camp, confisting of two hundred and thirty Eur peans, eight Officers, about five hundred Seapoys, and four Pieces of Cannon. They marched on the twelfth of February, and on their Return on the fifteenth, were attacked by a Party of the Enemy, confifting of one hundred and twenty French, two Companies of Foreigners, the French Troop of one hundred and twenty Men, one thousand Topasses, six thousand Seapoys, all their Black Cavalry, in Number about eight thousand, and feven Pieces of Cannon. This Detachment moved in the Night, and came up with Colonel Lawrence's detached Party by Break of Day, as they were on the March. What Men could do, they did; but the commanding Officer afraid of lofing his Baggage, divided his Force to fave it; upon which the Enemy fell in amongst them, and, although they paid dear for it, killed or took Prisoners almost the whole Party.

The Governor and Council of Fort St. George, on receiving Advice of this Action, dispatched two Vessels with Troops on board for Fort St. David, to join Colonel Lawrence, where they arrived about the Middle of March last; and the Colonel advised, that his Men were in good Spirits, and only wished for an

Opportunity to repair this Slip of their Countrymen.

Extract of a Letter from a Gentleman in India, dated at Calcutta, Jan. 10. 1754.

Since my last I can give you a Piece of News, which is authentick. We have had another fmart Engagement in these Parts, and have put the French fo entirely to the Rout, that I should think they will not be able to face us again, our Forces were inferior much to theirs, nine thousand Europeans and Indians, and on their Side, twenty-one thousand. The Want of Provisions, and extreme hard Service in our Army induced them to attack the French in their Trenches, and they have obtained a compleat Victory, taken all their Artillery, confiffing of eleven Pieces of Cannon, several Mortars, &c. all their Baggage, four or five hundred European Prisoners, with the Officers of the Dey, the General being gone to make a Visit to the neighbouring Nabob. In the Bazar, or Market, was great Plenty of all Manner of Refreshments, which was of the greatest Confequence. The Number of killed and wounded on our Side was inconsiderable; as to theirs I cannot give any Account, the Letter. I received from one of the Officers, being wrote in fo great a Hurry, that he does not mention any other Particulars; but the French themselves were so secure of Victory, that they had

posted a Party of Horse to oppose our Retreat; and a Report

was spread, that they were ordered to give no Quarter.

These Hostilities between the French and English Companies in the East-Indies were a great Detriment to the Trade on both Sides, and would probably have ended in the Ruin of one or both, had they been continued much longer. The Directors therefore of the French Company, commissioned M. Duvalaer, their Agent at London to enter into Conferences with those of the English, and after some Time a Convention was agreed upon between them, which was presented to and approved of by the Ministers of both Courts. According to this Convention, the two Companies were reciprocally to restore the Territories taken by the respective Troops since the Year 1748, except certain Districts, of which the English reserved the Possession on Account of their favourable Situation for the Security of their Settlements. Thus the French ceded to the English certain Territories in Golconda, and the latter, in Return, gave the French certain Districts contiguous to Pondicherry. A Line was to be drawn to separate their respective Territories, and the Conditions were fettled of the Neutrality to be observed, whenever a War broke out among the Indian Princes: They were neither of them to interfere in their Differences; and the two Nabobs, who were raised to that Dignity by the Influence of either Party, are acknowledged such by both. By this Agreement the Commerce of the two Nations in the East-Indies would meet with no Obstruction so long as the Peace should subsist in Europe.

SECT. IV.

Some Account of Angria the Pirate, and the Taking of Geriah by Vice-Admiral Watson.

TULAGEE Angria is a petty Prince of India, or Indolstan, a vast Extent of Country in Asia, subject to the Great Mogul, who governs it by Viceroys, called Nabobs, Chans, and Rajas, who are absolute Sovereigns over their several Provinces, to which they succeed by hereditary Right, and acknowledge the Mogul as Supreme Lord only by an annual Tribute. These Princes have frequently made War on each other, without Permission from the Mogul, and have often refused to pay him the Tribute. At this Time they affect Independence with Impunity, as the Mogul was a few Years fince divested of almost all his Power by Kouli Kan; and in the Year 1754, was deposed by the Morrattoes, a People who inhabit a large inland Tract of his Dominions, and whose Power has always made them insolent and rebellious. Tulagee Angria's Dominion confifts of feveral Islands near Bombay, and an Extent of Coast along the neighbouring

bouring Continent of above one hundred and twenty Miles in Length, and fixty in Breadth, with feveral Forts that were taken by his Ancestors from European Setlers. As many Particulars concerning these Ancestors, and the Manner how their Territory was acquired, as Books, or Intelligence could furnish, will be found in the following Narrative.

About the Year 1643, an Arabian Vessel was by the Stress of Weather driven down the Coast of Concan to the South of Bombay, as far as Cheul, and forced on Shore on the Dominions of a Tributary to the Great Megul, called the South Raja. The

People on board got on Shore, but the Crew as foon as they had escaped Shipwreck, accused the Master of great Cruelty and Injustice, and the Officers of the Raja, upon this Accusation, put

him to Death, and seized the Vessel.

The principal Man among the Crew, was one Lamb Angria, by Extraction a Caffree, born in an Island in the Gulph of Ormus, and by Religion a Mahometan. It happened that at this Time the South Raja was at War with the Mogul, and had been twice defeated; the Crew of this Vessel, therefore, being sixteen in Number, were fent as Recruits to his Army, which was then encamped near Surat, escorted by an Officer and one hundred Men. This Party, on the third Day of their March, fell in with an advanced Party of the Mogul's Troops, confifting of five hundred Men. The Officer, seized with a sudden Pannic, immediately deferted his Command, and the whole Company would have been taken Prisoners, if Angria had not, with a Courage and Audacity, that often on fudden Emergencies is implicitly obeyed, put himself at their Head, and by taking Advantage of fome loaded Carriages, which ferved as Barricadoes against the first Onset, and improving the Situation of some neighbouring Defiles and the Approach of Night, not only defended his Party, but iffuing unexpectedly upon their Rear the next Morning, through a Defile through which he had filently marched in the Night totally defeated, and, except about thirty-fix, cut them all to Pieces. He then heaped the Spoils upon the Carriages which had ferved him for a Bulwark, and proceeded in his Route.

The Raja received the first Account of this Atchievement from Angria's own Mouth, and as a Reward for his Bravery and Conduct, immediately premoted him to a confiderable Command in the Army. Angria foon after fignalized himself in a general Engagement with the Mogul's Forces, over which he gained a compleat Victory. He was advanced to be Commander in Chief, and soon after married the Daughter of the Raja's first Minister, by whom he had a Son, named Pusab Angria, who at the Age of twenty Years had obtained, by his Father's Interest, a very considerable military Command.

About two Years afterwards the South Raja died, and his Succellor refuling to pay the Tribute demanded by the Mogul, the

Mogul

Mogul ordered the Nabob of Surat to invade his Dominions. The Raja, whether he had taken any Displeasure against Angria, or whether he thought him too young for a Command that required not only Courage but Experience, gave the Post, which

Angria expected in this Expedition, to another.

Angria was so much offended at this Disappointment, that he took an Opportunity to quit the Raja's Dominions, and offer his Service to the Nabob that was marching against him. The Nabob accepted the Offer, and gave him a confiderable Command. The Nabob was victorious, and Angria, urged by his Refentment and his Pride, to shew that he was not unworthy the Command which the Raja refused, and that he was able to punish whoever should offend him, performed many Feats of desperate Bravery, and took the Officer Prisoner that had been appointed in his Stead. Angria infulted in this Instance of Succefs with a favage and malicious Joy, and commanding that his Captive should be brought before him in the Presence of the Nabob, he drew his Sword, and after infulting him with many opprobrious Terms on his Change of Fortune, he turned to the Nabob, and told him, he should now see him facrifice to his Revenge a Man to whom he owed his first Disgrace. He then advanced furiously to the Victim, in order to strike off his Head. but the Nabob commanded his Guards to interpose. He told him, that he would admit no Prisoner of any Man who had fought under his Banners to be murdered in cold Blood. Angria knew it would be in vain to contend, and therefore fuddenly put up his Sword; but from that Moment he conceived fo violent a Hatred against the Nabob, that he was perpetually contriving his Ruin.

While his Mind was in this State fome Emissaries of the Raja whom he had deferted, made him Offers of great Advantage if he would return. These Offers he secretly accepted, but would not withdraw, that he might improve the first Opportunity that

should offer of betraying the Nabob to his Enemies.

In Consequence of this Resolution, he soon after advised the Raja to advance against the Nabob with his whole Army, promising to join him as soon as the Troops should engage. The Raja considing in Angria, and minutely following his Instructions, came upon the Nabob with so much Advantage, that being joined by Angria with fifteen hundred Men, and three hundred Horse, he obtained a compleat Victory, killing near six thousand on the Spot, and plundering the City of Surat.

This War was foon followed by a Peace, greatly to the Advantage of the Raja, who gave Angria his Sifter in Marriage, by whom he had two Sons, Pusah Angria, and Connagee Angria.

Angria the Father died in the Infancy of these Children, who were educated by the Raja their Uncle with great Kindness. Pusab died a Boy; and when Connagee was twenty Years old, the
Raja gave him the Island of Kennery, being a Rock of about a
Mile

Mile and a half in Circumference, as a petty Sovereignty, placing feveral Officers of State about him, and giving him also a Number of Vessels, called Galley-wats, about the Size of our Gravefend Tilt-boats, carrying fix Swivel Guns, and fixty

With this Territory, and this Fleet, Connagee Angria commenced Pirate. Kennery lies just in the Mouth of Bombay Harbour, so that no Vessel could pass without coming into Angria's Reach; and the Rock besides its natural Advantages, was fortified by an impregnable Fort. After feveral Years of fuccefsful Rapine, in which he was abetted by the Raja and his Successor, he obtained not only a more confiderable naval Force, but an Army of the Raja's People, with fixteen thousand auxiliary Morattoes, with which he conquered the Coast as far as Dabul, and took Geriah, where the Portuguese had built a strong Fort, which he garrifoned and improved, fo as to render it one of the most formidable Places in all India.

By a perpetual Acquisition of new Territory and new Treafure, Angria obtained the Power and State of a Sovereign Prince; and in the Year 1712, he had twenty thousand Men constantly in his Pay; he sent out his Generals to fight his Battles, and gave Audience to Ambassadors from the neigh-

bouring States.

He now began to meditate the Conquest of some Parts of the Dominions of his Friend the South Raja, and having obtained Powder and Ball from the Portuguese, and formed many offenfive Alliances with the neighbouring Princes, he fuddenly invaded the Territories of his Friend, and took Allabeg, a Place of great Strength and Importance. He next seized upon Hannary, a small Island near Kennery, where he established a Fishery: After many Struggles between Angria and this Prince, a Treaty of Peace, offensive and defensive was made between them; the principal Article of which was, that Angria, in Confideration of holding quietly all he had conquered, should attempt to conquer

Angria having now founded a new Kingdom, and being acknowledged as a Sovereign by the neighbouring Powers, became formidable even to the Mogul, with whom after many Battles with various Success, he concluded a Peace. The European Nations also thought it their Interest to enter into Treaty with him for Security of their Trade, which it was so much in his Power to annoy. A Treaty was concluded with him by England in 1715, after an unsuccessful Attempt by a very considerable naval Force, with a numerous Army on board, under the Command of Governor Boone.

Angria having foon after violated this Treaty, as he had done every other, another Squadron was sent against him from England, under the Command of the late Admiral Matthews, in 1721, but this Expedition was rendered unsuccessful by the

Treachery

Treachery or Timidity of the Portuguese, who had engaged to affish Matthews with Troops from Goa, but did not fulfil their Engagement.

In 1734 Connagee Angria died, and was succeeded by Sambajee Angria his Son, who added to his hereditary Dominions, and became the Terror of all his Neighbours, particularly of the South Raja.

Sambajce Angria died in 1745, and having no Children, he was succeeded by Tulagee Angria, his Brother, from whom Ge-

riah, his Capital, is now taken.

This Man is now about forty Years of Age, about five Feet ten Inches high, of an olive Complexion, and a bold Aspect. His Dominions extended from Bombay to Manlo, a Sea-port, diffant about one hundred and twenty Miles South, and they extend seventy-six Miles in Length. He had the Ports of Zivanchi, Antiguria, Dabul, and South Rook, besides his Islands of Kennery and Hannary, and his Forts of Allabeg and Golaby. He generally kept up an Army of thirty thousand Caffres, Seapoys, and Topasses, and as many Morattes as he could seduce from their Allegiance to the South Raja their Sovereign. His Gunners and Sea-Officers were mostly renegado Europeans; he had a large Train of Artillery, besides the Cannon of his Forts and Shipping, and twelve Elephants. His Island of Kennery is nine Miles distant from any Part of the Continent; all the North, South, and West Parts are rocky, but to the Eastward there is a fine fandy Cave, which the Castle fronts, flanked by two Bastions on each Side mounted with six Guns each, from which any Boat attempting to land, may be funk with great Surety.

Fort Geriah has an excellent Harbour, in which the Tide rifes and falls as regularly as in the River Thames. This Harbour is one of the best upon the Coast, and the Fort might be rendered almost impregnable. The Island of Golaby lies between Golaby and Chaule, about sourceen Leagues from Bombay, and ten Miles

from Chaule.

The naval Force of Tulagee Angria, confifted of about fifteen Grabs, which carried fix and nine Pounders, and a great Number of Men at small Arms; five Ketches, two Ships and forty Guns, and about forty Galley-watts, and other small Craft.

Tulagee Angria has withheld his Tribute two Years, and, when the South Raja sent to demand it, he slit the Ambassadors Noses, and sent them ignominiously back. The South Raja thus outraged, sent last Winter to Bombay, to desire the English would join him to destroy Angria, and has ever since ravaged his Country, and blocked up his strong Holds by Land. The English promised to affist, and in October 1755, Vice-Admiral Watson left the Coromandel Coast with his Squadron, and coming to Bombay to resit, informed Governor Bourchier, he was ready to act against Angria, and, whilst Things were preparing, sent his first Lieutemant.

Lieutenant, Sir William Hewitt, in an armed Vessel, to sound the Harbour of Geriah, and make proper Observations, and great

Part of our Success was owing to his Discoveries.

On Feb. 6. 1756, the Land Forces embarked, confifting of feven hundred European Soldiers, three hundred Topasses, or black Foot Soldiers, and three hundred Scapoys, under the Command of Colonel Clive. On the feventh the Squadron fet Sail from Bombay, and joined the Moratia Fleet, confifting of three or four Grabs, and forty or fifty Galley-watts, commanded by Narypunt, in a Creek to the Northward of Geriah, called Rajipour, where stood a small Fort, which they had just taken from Angria. On the Shore lay the Moratta Army, confifting of five thousand Foot, and four thousand Horse, under Ramajecpunt. Here Angria had been treating to furrender the Fort to the Morattes, who had been fent against him by the South Raja, upon certain private Stipulations; but endeavouring to go by Land from Geriah to Golaby, he was taken by a Detachment of their Army, and was at this Time Prisoner amongst them, having left his Brother-in-law in Command of the Fort.

When the Admiral arrived off the Harbour, on the eleventh, he fummoned the Castle to surrender; but receiving no Answer in the Time he proposed, and finding the Morattoes (from whom he had received no Affistance) were trifling with him, he weighed, in the Afternoon, and stood into the Harbour in two Divifions, the King's Ships and those of the Company. The Enemy fired at our Ships as they passed their Batteries; but as soon as they were got by them, and properly placed, they began such a Fire as foon filenced the Batteries, and likewife the Fire from their Grabs. Soon after four of the Clock, a Shell was thrown into the Restoration, an armed Ship, which Angria some Time ago took from the East-India Company, which fet her on Fire, and very foon after his whole Fleet shared the same Fate, and were all entirely destroyed. The Fort fired briskly about Half an Hour; but the incessant Fire from our Ships and Bomb Ketches, not only leffened the Fire, but destroyed the Houses.

At five of the Clock the Signal was made to cease Firing, which raised the Spirits of the Enemy, and encouraged them to renew their Cannonade. On this the bloody Flag was hung out, and we continued firing till fix of the Clock, at which Time a Flag of Truce was sent on Shore, expecting the Garrison would furrender. At nine of the Clock our Troops landed a Mile and a half from the Fort, and were joined by near ten thousand Morratios. In the Morning, seeing the Flag of Truce hung over the Walls, we marched towards the Garrison; but as soon as we were got to the Bottom of the Hill near the Fort, they fired upon us, though they killed only one Man, and wounded an Officer in the Shoulder, on which we retreated to our former Ground. Colonel Clive then went on board the Admiral to concert Measures for another Attack. On this a Signal was

hung

hung out for the Line of Battle Ships only, and the Bomb-ketches to renew their Fire, which was continued with fuch Success for three Hours, that the Enemy capitulated, upon which a Company of our Soldiers took Possession, and hoisted the British Flag on the Ramparts: But when the Fort was furrendered, the Movattes attempted to take Possession of it before us, which had they done, a very small Part of the Plunder would have fallen to our Lot; and this they would have done, had it not been for the gallant Behaviour of Captain Forbes, who commanded the Company fent to take Possession of the Fort : He drew his Sword. made his Men face to the Right about, and swore by his Maker he would cut the Moratta General's Head off, if he offered to advance a Step farther; which so terrified him and his Men. that without further Molestation he left Captain Forbes to take Possession of the Fort.

In the Fort were two hundred and fifty Iron and Brass Cannon of all Sizes, and a prodigious Quantity of Ammunition and Provisions, of rich Goods and some Money. The Garrison confifted of about three hundred, though there were near two thoufand in the Fort; and Angria's Mother, two Wives, two Children and Brother-in-law, are among the Prisoners, who have been treated by the Admiral with Generofity and Humanity, In Silver Rupees we have found about one hundred thousand Pounds, and in other Effects near thirty thousand Pounds, but we are fearching in Expectation of a great deal more; so that I hope we shall share very considerably in the Plunder of this notorious Pirate. We released eight English, two Scots, and three Dutchmen from Imprisonment in Geriah, who had been taken in several Vessels by Angria.

SECT. V.

An Account of the Loss of the Company's Settlements at Bengal, in a Letter from a Gentleman at Fort St. George.

I N the Month of September 1756, we heard that our Settlement at Bengal was taken, and in the Beginning of October, we had a Confirmation of it. The Destruction of that Place will be a great Loss to that Company. As I have seen the Letter which was fent to the Governor and Council here, I shall give you the Substance of the Affair:

It feems the Governor and Council at Bengal protected an old Nabob, deposed, from the Resentment of the young one his Successor. The latter sent to demand him, but the English refused to deliver him up, Upon which he raised an Army of thirty thousand Horse and the same Number of Foot, with three or four hundred Elephants of War. The English fent out Spies

to discover their Number, which they never knew exactly till they were just upon them. They summoned the Fort to deliver up the old Nabob, promising upon that Condition to withdraw their Troops immediately. The Enemy then threw up a small Breastwork opposite the Fort, and mounted two twelve Pounders upon it. They fired two or three Times in an Hour: but if they had fired till Doomsday, they could never have made a Breach. Finding our Gentlemen determined not to give up the Factory without making an Opposition, he proposed a Truce, and inveigled Mr. Watts, our Chief, to his Tent, under Pretence of accommodating Matters. When he had got him to his Tent, he made him fign a Paper, acknowledging himfelf indebted to the Nabob in a large Sum of Money; and then ordered him to fend Mef. Collet and Batson, two of the Council. As from they came to the Nabob's Tent, he fent Mr. Batlon, and Mr. Collet to prevail on our People to surrender the Factory, with the Guns, Ammunition, &c. at Discretion, keeping Mr. Watis as a Hostage for the Performance of it.

On the fourth of fune the Factory of Cassimbuzar was surrendered, notwithstanding it was warmly opposed by many of

the Gentlemen.

As foon as he had performed this Exploit, he immediately marched with all his Forces, confifting of seventy thousand Horse and Foot to Calcutta, threatening to drive the English out of the Country. On the fifteenth, he began the Siege by attacking one of the Redoubts at the Entrance of the Town, but was repulsed with a great Slaughter of his Men. The next Day he he made an Attack on our advanced Posts at the Goal and Courthouse, which kept a constant Fire on his Troops, by which many of them were killed.

Notwithstanding this Opposition another Attack was made on the eighteenth, when those Posts were abandoned by our Troops, which gave the Nabob's Forces an Entrance into the Town,

which obliged us to retreat to the Fort.

A Council of War being called to consider of the State of Affairs, the Captain of the Frain acquainted the Council, that there was no Ammunition in the Fort for three Days; on which the Women were sent on board the Shipping lying before the Fort. The Governor and some of the principal Officers likewise got on board the Ships and went away, leaving the People

in the Fort without a Possibility of securing a Retreat.

The whole Number left in the Fort being two hundred and fifty effective Men, we held out the twentieth in the Evening, when the Ammunition being near spent, a Flag of Truce was hung out. During the Parley of the Walls, the back Gate was betrayed by the Dutch Guard, and we were obliged to surrender at Discretion. The same Night one hundred and seventy of us were crammed into a Hole not large enough for fifty of us to breathe in; the Effect of it was, that only sixteen were alive

the next Morning. Four of us were fent to the Nabob's Camp, and put into Irons; but what became of the other twelve that escaped I tell in Miniature, I have not been able to learn.

The twenty-eighth of October we fent three Ships full of Troops and Ammunition, to reinstate the Company's Servants, as we hear it will be delivered up to us shortly. The Company is reported to have lost by this Affair two Crows of Rupees. Each Crow contains a hundred Lack, and each Lack an hundred thousand; that is, twenty Millions of Rupees, which make two million, two hundred and fifty thousand Pound Sterling.

The same Day, October the twenty-eighth, our Ambassadors arrived from Pooner; where they had been three Weeks treating with the Moratto Prince, to whom we have delivered Geriah, and they in Return, have given us several Villages at Seven-

rooke.

This amazing Catastrophe of Fort Williams, and the City of Calcutta in Bengal is so much the more surprising, as the English had always lived in a good Understanding with the old Nabob, who, on many Occasions, had shewn them much Respect and Favour. It is certain that for some Time past the Country Government in India have had a secret Jealousy of the Europeans, and were therefore willing to lay hold of any Opportunity to convince them that they were not Proprietors of the Places in which they were settled, but held them by Permission, according to the good Pleasure of the Great Mogul.

It is here, that the old Nabob and the young one shew no great Deference or Respect to the Court of Dilly, but notwith-standing this they would have Foreigners believe, that they are upon good Terms with, and derive their Authority from the Mogul. It is said, that Monarch has sent his eldest Son, with one of the principal Generals, and a great Army to attend him, in order to disposses the young Nabob, and to place the young Prince in the Government of Bengal, and two other great Provinces; the News of which obliged him to leave Calcutta, as

foon as he had taken it.

SECT. VI.

An Account of the Retaking of Calcutta, and the other Forts.

LETTERS from Admiral Watson, Jan. 31. 1757. off Calcutta, in the River Hughley, advised, that having sailed the sixteenth of October last, with all the Squadron, and the Walpole and Marlborough Indiamen, from Madras to Bengal, he anchored, after a tedious Passage, on the fifth of December, in Ballasere Road; and having crossed the Braces on the eighth, proceeded up the River, and arrived at Fulta on the sisteenth, where

he found Governor Drake, and the Gentlemen of the Council on board fuch Ships and Veffels as had escaped falling into the Hands of the Moors. As the Pilots would not take the Charge of the Ships till the Springs were over, the Admiral could not proceed till the twenty-eighth, when he failed with the Kent, Tyger, Salisbury, Bridgwater, and King's Fisher Sloop. The next Afternoon Colonel Clive was landed, in order to march and attack Bashudgia Fort by Land, at the same Time that the Squadron appeared before the Place, which anchored, and began to cannonade the Place about eight of the Clock in the Morning on the thirtieth; and at Half past Eight, the King's Troops were landed to support Colonel Clive. The Ships foon silenced the Enemy's Fire; and, at Seven in the Evening, one hundred Seamen were landed under the Command of Captain King. At Half past Eight the Body of the Fort was on Fire, and immediately News was received that the Place was taken, but the few People in it had all escaped. One of the Company's Captains was killed, and four Soldiers wounded. This Fort was extreamly well fituated for Defence, having a wet Ditch round it, but badly provided with Cannon, only eighteen Guns, from twentyfour Pounders and downwards, and about forty Barrels of Powder, with Ball in Proportion, being found in it. On the first of January, the Kent and Tyger anchored between Fort Fama and a Battery opposite to it, both which the Enemy abandoned as the Ships approached. About forty Guns, some fourteen Pounders, and all mounted on good Carriages, with fome Powder and Ball, were found in this Fort and Battery; and the Admiral left the Salisbury as a Guardship to prevent the Enemy from regaining them. In the Night the Admiral fent the Boats, manned and armed, up the River, to burn a Ship and some Vessels, said to be filled with Combustibles, which was executed without Oppofition. The next Morning early, the Company's Troops were landed, and immediately began their March to Calcutta. The Kent and the Tyger soon after proceeded up the River, together with the twenty Gun Ship and Sloop. At forty Minutes after Nine the Enemy began to fire upon the Tyger from their Batteries below Calcutta, which they abandoned as the Ships approached. At twenty Minutes past Ten the Tyger and Kent made a very warm Fire, infomuch that the Enemy were foon drove from their Guns, and presently after ran out of the Fort, which Captain Grote, with the King's Troops, and an Officer from the Kent, entered a little before Eleven. Four Mortars, thisty-one Guns of different Sizes, and a confiderable Quantity of all Kinds of Ammunition, were found in the Fort. The Ships have suffered very little in their Masts, Yards, and Rigging, and have only lost nine Seamen and three Soldiers killed, and twenty-fix Seamen and fix Soldiers wounded. An Expedition was then proposed against Hughley, to be executed by the twenty Gun Ship and Sloop, the Boats of the Squadron manned and armed, affisted by all the King's Troops, amounting to one hundred and seventy, the Company's Grenadiers, and two hundred Seapoys, which were to be landed under the Command of Major Kilpatrick; and every Thing being prepared they sailed the fifth of January, under the Command of Captain Smith of the Bridgewater; and on the eleventh, the Admiral received an Account of the taking that Place, in which were found forty Guns, from twenty-four Pounders downward, with a Quantity of Ammunition. The City of Hughley has been since burnt and destroyed, together with the Granaries and Storehouses of Salt, situate on the Banks of each Side of the River, which will be of great Prejudice to the Nabob, as they contained a Store for the Subsistence of his Army, while in that Part of the Country.

Some farther Particulars of the above Expedition, in a Letter from an Officer of the Kent, dated at Calcutta, Febr. 1.
1757.

We arrived in the Ganges the twelfth ult. at Fulta, the unhappy Rendezvous of our poor Countrymen, who were excluded their Settlements. We remained there putting our Land and Sea Forces to rights, till the twenty-first at Night, when we sailed to Burgefort, it being the strongest the Moors had on the River, the twenty-ninth at Night we landed at Maypow, about four Miles from that Fortress, and marched till Eight next Morning, without halting, though almost often out of Sight in Mud and Water. The thirtieth in the Morning we found ourselves about two Miles above the Fort, and the same Distance from the River; about Eight, the Kent, Tyger, Salisbury came-to, and began a most furious Cannonade. The Reason of this forced and hazardous March was to cut off the Garrison's Retreat. and prevent a Reinforcement from Calcutta, who were then on their March; about Ten, when we were amufing ourselves with the Fire from the Ships, we were alarmed, and about ten Minutes after, a Body of three thousand Horse were within Pistol Shot of us; our People stood the Shock, and our two Field Pieces flanked them with Grape and Round Shot, which obliged them to retreat, though they rallied several Times with great Refolution; the Engagement lasted an Hour, and was just over, when a thousand of our brave Coast Seaprys joined us, who were posted on the River Side, with Part of Oldbriton's Regiment. They left near five hundred Men on the field with Horfes, Camels, and one Elephant. We last but one Officer, Ensign Kerr, a Relation of Lord Ancram, our Loss of Men was inconsiderable. At Three in the Afternoon we marched down to the River Side, which covered us from the Fort, the Ships keeping a constant Fire; before Night, made leveral Breaches, while our whole Body disposed themselves, and made it so hot for the Be, fieger.

fieged, that their Fire did little Execution. At Ten we stormed and took it, when our Friend Captain Dugald Campbell going on the Bastion to forbid the Sailors and Seapoys siring from without, as they were killing our Men, was shot dead on the Spot, being wounded in five Places, and died univerfally esteemed and regretted. We demolished Part of the Works on the thirty-first, spiked up the Guns, &c. and sailed for Tannas Forts, about two Miles below Calcutta the first of January; but they abandoned them on our Approach. The Salisbury was left a Guardship here; and the fecond, we marched over Land, while the Admiral and Tyger came before Calcutta, which held out Half an Hour, and killed the Tyger seven or eight Men. They had no Notion of our being able to take it, as they had built an elegant Mosque, and left the Company's Warehouses almost full of Goods. We are clearing away, and fortifying the Place with all possible Expedition we have got a fortified Camp four Miles Distance, where we expect an Engagement soon, as a Body of Moors, &c. are about twenty Miles diffant. We have taken fince we came here the great City Hughley, forty Miles up the River, and reduced most of it to Rubbish.

SECT. VII.

An Account of an Engagement between three East Indiamen and two French Men of War, in a Letter from Captain Wilson, of the Suffolk.

N the eighth of March 1757, in Lat. 35: 40 South; and and 6: 30 to the Eastward of the Cape of Good Hope, in Company with the Houghton, Captain Walpole, and the Godolphin, Captain Hutchinson, we saw two Sail, who gave us Chace; and coming up with us in the Night, kept on our Weather Beams till Morning. Being suspicious of a War we made ready to engage. At Dawn of Day we all spread our Colours, and I made a Signal for a Line of Battle a-head, which being prefently formed, we hauled up our Courses, took in our small Sails, and laid-to, to receive them. As the Day broke we could perceive the Ships to be French, they largest being a Two-Decker, within twenty-four Ports in her lower Tier, and the other a Frigate of twenty-fix Guns; they bore down to us, and before they came within Gun-shot, hoisted their Colours, and the large Ship fired a Shot at us, which I immediately returned, but both falling thort, we defisted firing till they came within our Reach, when a general Fire beginning on both Sides; they hauled up to the Westward to bring their Broadsides, and began also. The Attack was short; our Heads lay different Ways, we were foon out of the Bearings, of each others Guns. All our Ships received some Shot; and the great Ship's Main-top Sail being brought down,

down, they made Sail to the Westward; on which we wore, and making Sail after them, foon came up, got confiderably nearer, and brought our Larboard Guns to bear. A warm Engagement ensued for about Half an Hour, when the French Ship hoisting her Main-top Sail made Sail from us; we immediately crowded after them, but they went from us fast. Being out of Gun-shot they spoke with each other, and soon after tacked; there being little Wind they fell much to Leeward, before they could bring their Ships to; when they fet all their Sail, we hauled up our Courses to receive them. They came much nearer than before, and a very smart Fire was maintained on both Sides, whilst they were passing. When they were out of the Bearing of our Guns, we let all our Sail, making a Shew of standing for their Wakes: But as they continued their Course to the Eastward with all their Sail, we shaped our's to the Westward, and lost Sight of each other in less than fix Hours. By the Shot lodged in our Hulls, we found that the great Ship carried twenty-four and twelve Pounders, and the small one twelve Pounders.

As these Ships were not in a proper Station for Cruifing, we

conclude they were on their Passage for Mauritius,

I should do our Officers and Seamen Injustice, if I did not inform you they behaved with all the Bravery and Intrepidity peculiar to our English Seamen.

SECT. VIII.

An Account of the Taking of several Forts by the English, and of the Articles of Peace acceded to and signed by the Nabob of Bengal: And also the Articles agreed to be tween Admiral Watson and the Council of the French East-India Company: In three Letters from Vice-Admiral Watson.

N the second of February the Nabob's army were seen marching by the English Camp, about a Mile Distance towards the Town; and when they were got to a convenient Spot of Ground, they encamped there. Hereupon Colonel Clive applied to the Admiral for a Party of Seamen to reinforce him. Accordingly Captain Warrick received Orders on the fourth to take upon him the Command of a Detachment of Sailors to join Colonel Clive, in order to drive the Nabob out of his Camp. On the fifth, at One in the Morning, Captain Warrick landed his Men a little above Kelfal's Octagon, which were as follows one hundred and eighty from the Kent, one hundred seventy three from the Tyger, one hundred and twenty from the Sailory, twenty-nine from the Bridgewater, thirty-seven from the Sloop, and thirty from the India Men, in all five hundred

fixty-nine Men. About Two he joined the Colonel, whose Troops were under Arms, and ready to march, on which our Men were disposed of, to guard and attend the Train, which confifted of fix Field Pieces, and one Haubitzer. Soon after this, they marched off the Ground in the following Order: The King's Troops and Company's Grenadiers in the Front, the Sailors with the Train next, the Battalion after, and Seapoys in the Rear. At Three the Colonel altered his Disposition, and marched the Battalion before the Train. In this Order they marched till Five, when the Troops in the Van were charged by the Enemy's Horse in their Camp; but it did not seem to retard our March; by the Time our Rear-guard were entered the Engagement became general from Hedges and Bushes; on which we played our Artillery, defending to the Right and Left our Army all the Way through the Camp, in which we found dead Men and Horses. Here our Men were diverted by killing their Bullocks, Camels, and what Horses were left in our March, which we continued with great Rapidity, driving the Enemy before us, till they lodged themselves in a Tope near Meter's Garden, behind the Hedges: From hence they detached a large Body of Horse, with two Pieces of Cannon, to the Cross-road of Bunglo, which we foon dislodged with our Field Pieces, after receiving a few Shot; and from thence marched into the Fort. In this Action were killed twelve Seamen, two Captains of the Company's Troops, seventeen private Men, and ten Seapoys. The Number wounded were about fifteen Seamen, and fifty Soldiers and Seapoys. Lieutenant Lutwidge of the Salisbury was the only Officer mortally wounded.

The Nabob's Army was faid to confift of fifteen thousand Foot, and ten thousand Horse. We have had various Accounts of his Loss. A Bremin, who was soon after in the Camp, says, thirteen hundred Men were killed and wounded, and that twenty-one of the former were Officers. Besides this Loss, upwards of five hundred Horses were killed, several Draught Bullocks, and three Elephants. This Attack, though not attended with all the wished for Success, yet it was sufficient to make the Nabob very sollicitous to hasten the Business of a Peace, which was

concluded on, and confifts of the following Articles.

Articles acceded to, and figned by the Nabob of Bengal, Febr. 9, 1757.

I. Whatever Rights and Privileges the King has granted the English Company in the Phirmaund, and Husbulhorrums fent from Dilly, shall not be disputed or taken from them, and the Immunities therein mentioned be acknowledged and stand good. Whatever Villages are given the Company by the Phirmaund shall likewise be granted, notwithstanding they have been denied

100 12 1 2 2 2

by former Subabs. The Zemindars of those villages, not to be hurt or displaced without cause.

Signed by the Nabob in his own Hand, I agree to the Terms of the Phirmaund.

II. All Goods passing and repassing through the Country by Land or Water, with English Dustricks, shall be exempt from any Tax, Fee, or Imposition, from Chokeys, Gaulwalls, Zemindars, or any others.

I agree to this.

III. All the Company's Factories, seized by the Nabob, shall be returned. All Monies, Goods and Effects belonging to the Company, their Servants and Tenants, and which have been seized and taken by the Nabob shall be restored. What has been plundered and pillaged by his People, made good by the Payment of such a Sum of Money, as his Justice shall think reasonable.

I agree to restore whatever has been seized and taken by my Or-

ders, and accounted for in my Sincany.

IV. That we have Permission to fortify Calcutta in such Manner as we may think proper, without Interruption.

I confent to this.

That we shall have Liberty to coin Siccas both of Gold and Silver, equal Weight and Fineness to those of Muxadavad, which shall pass in the Provinces.

I consent to the English Company's Coining their own Imports

Bullion and Gold into Siccas.

VI. That a Treaty shall be ratisfied, by signing and sealing, and swearing to abide by the Articles therein contained, not only by the Nabob, but his principal Officers and Ministers.

I have sealed and signed the Articles in the Presence of God.

VII. That Admiral Charles Watson and Colonel Robert Clive, on the Part and Behalf of the English Nation, and of the Company, do agree to live in a good Understanding with the Nabob; to put an End to these Troubles, and be in Friendship with him while these Articles are performed and observed by the Nabob.

I have sealed and signed the foregoing Articles upon these Terms; That if the Governor and Council will sign and seal them with the Company's Seal, and will swear to the Performance on their Part.

I then confent and agree to them.

Extract of a Letter from Vice-Admiral Watson, dated on board the Kent, off Chandenagore, March 31.1757.

Colonel Clive being joined with three hundred of the Bombay Troops, who by this Reinforcement had with him seven hundred European and fixteen hundred Blacks, he immediately marched to Chandenagere, where he had not been long, before he took Possession of all the French Out-posses there, except one Redoubt, situated between the River-side and the Fort Walls, wherein were Green mounted

mounted eight Pieces of Cannon of twenty-four Pounders, four of which pointed down the River. On the twenty-fifth Instant I failed with the Kent, Tyger, and Salisbury. The twenty Gun Ship and Sloop I ordered up the River fome Days before to cover the Boats attending on the Camp. On the eighteenth I anchored about two Miles below Chandenagore, and observed the French had done every Thing in their Power to obstruct our Paffage, by finking two Ships, a Ketch, a Hulk, a Snow, and a Veffel without any Masts, all directly in the Channel, within Gun-shot of the Fort, and laying two Bombs, mocred with Chains, across the River. This caused some Delay, till the Bombs were cut adrift, and I could discover, by founding, a proper Channel to pass through, which the Pilots found out without being at the Trouble of weighing any of the Veffels. Before this was sufficiently known to venture, Admiral Pocock came up to me in his Boat, and hoisted his Flag on board the Tyger. On the twenty-fourth, at Six in the Morning, I weighed, and failed up in the following Order; the Tyger, Kent, and Salisbury. At ten Minutes after Six the Enemy began to fire from the Redoubt, which was abandoned as foon as the leading Ship got a-breast of it. At three Quarters after Six the Ships were placed, when I caused the Signal to be made for engaging, which continued very brisk on the both Sides till a Quarter past Nine. The Enemy then waved over their Walls a Flag of Truce, and defired to capitulate; and the Articles being agreed upon and figned, I fent Captain Latham, of the Tyger, ashore to take Possession of the Fort. Colonel Clive marched in with the King's Troops about Five in the Afternoon. They had in the Fort twelve hundred Men, of which five hundred Europeans and feven hundred Blacks, eighty-three Pieces of Cannon from twenty-four Pounders downwards, three small Mortars, and a considerable Quantity of Ammunition. Besides the Ships and Vessels funk below, to stop up the Channel, they funk and run ashore five large Ships above the Fort; and we have taken four Sloops and a Snow. The Enemy had killed in the Fort forty Men, and seventy wounded. The Kent had nineteen Men killed, and forty-nine wounded; the Tyger thirteen killed, and fifty wounded. Among the Number killed were, my first Lieutenant, Mr. Samuel Pereau, and the Master of the Tyger. Among the Number wounded were, Mr. Pocock flightly hurt, Captain Speke and his Son by the same Cannon-Ball; the latter had his Leg shot off, Mr. Rawlins Heyn my third Lieutenant, had his Thigh much shattered, and is in great Danger. Mr. Stanton, my fourth Lichtenant, flightly wounded by Splinters; but the greatest Part of the Wounded have suffered much, being hurt chiefly by Cannon-thor Several of them cannot possibly recover. I must do this Justice to all the Officers and Men in general, to fay, agreeable to their utial Bravery, they behaved with great Spirit and Resolution on this Occasion; as did also, the Land Forces, who Winney is kept

kept a good and constant Fire the whole Time from two Batteries of four and two Guns, they had raifed very near the Fort.

Kent, off Calcutta in the River Hughley, Apr. 14. Since the Date of my last Letter several of the Wounded are dead, among whom is Mr. Rawlins Hey, my late third Lieutenant, and Captain Speke's Son. There are many more in great Danger.

Articles of Capitulation proposed by the Director and Council for the French East-India Company's Affairs at Chandenagore to Vice-Admiral Watson, with his Answers, on the twenty-third of March, 1757.

Articles of Capitulation for Fort d'Orlean of Chandenagore, proposed by Peter Renault, Esq; Director General, and the Gentlemen of the Council for the French East-India Company's Affairs, to Charles Watson, Esq; Vice-Admiral of the Blue Squadron of his Britannic Majesty's Fleet, and Commander in Chief of all his Majesty's Ships and Vessels employed in the East Indies; and of the Marine Force of their united Company of Merchants trading to, and in these Parts. And,

Answers made by Charles Watson, Esq; Vice-Admiral of the Blue Squadron of the Britannic Majesty's Fleet, and Commander in Chief of all his Majesty's Ships and Vessels employed in the East-Indies; and of the Marine Forces of the united Company of Merchants trading to, and in these Parts, in the Name of his Britannic Majesty, to the Proposals made by the Governor and Council for the Affairs of the French Company at Chandenagore.

Art. I. The Lives of all the Deferters shall be saved. Anfw. The Deferters to be absolutely given up.

Art. II. All the Officers of this Garrison shall be Prisoners on their Parole of Honour: that they shall have Liberty to carry with them all their Effects, and go where they please on promifing they will not serve against his Britannic Majesty during the present War.

Answ. The Admiral agrees to.

Art. III. The Soldiers of the Garrison shall be Prisoners of War, fo long as the prefent War continues; and when Peace is made between the King of France and the King of England, they shall be fent to Pondicherry, and till then be entertained at the Expense of the English Company.

Anjw. The Admiral likewise agrees, with this Difference only, that instead of sending the Soldiers to Pondicherry, they shall be fent to Madras or to England, as the Admiral shall hereafter think proper; and that flich Foreigners, who are not of the French Nation, and choose voluntarily to enter into the English a Service. shall have Liberty.

Art. IV. The Seapoys of the Garrison thall not be Prisoners of War, they shall have Leave on the contrary to return on the Coast in their Country. Anfw.

The APPENDIX.

Anfw. The Admiral agrees to.

Art. V. The Officers and Men of the European Ship St. Contest, shall be fent to Pondicherry in the first English Ship which goes to the Coast.

Answ. The Officers and Men of the European Ship shall be upon the same Footing as the Soldiers, and to be fent to Madras

or to England as foon as possible.

Art. VI. The French Jesuit Fathers shall have Liberty to exercife the Functions of their Religion in the House which has been assigned them, since the demolishing of their Church: the Silver Ornaments, and every Thing that belongs to the Church, shall be given them, and also their Effects.

Answ. The Admiral cannot agree to any Europeans reliding here, but that the French Jesuits may go to Pondicherry, with all

the Ornaments of their Church, or wherever they please.

Art. VII. All the Inhabitants, of what Nation or Quality foever, as Europeans, Mustees, Christians, Blacks, Gentils, Moors and others, shall be put in Possession of their Houses, and all in general as frail be found belonging to them, either in the Fort, or on their Estates.

Anfw. In Regard to this Article, to be left to the Admiral,

who will do Justice.

Art. VIII. The Factories of Cassembuzar, Dacca, Patna, Jeuda, and of Ballafore, shall remain at the Command of the Chiefs who direct them.

Answ. To be settled between the Nabob and the Admiral.

Art. IX. The Director, Counsellors, and those employed under them, shall have Leave to go where they please, with their Cloaths and Linen.

Anjw. The Admiral agrees to.

At Fort d'Orlean of Chandenagore, March 23. 1757. Sugues

Laportiere P. Renault F. Nicolas M. Fournier

A. Gaillott.

The Admiral expects an Answer by Three o'Clook this Afternoon, and that the British Forces may take Possession of the Fort by Four.

The abovementioned Propositions have been accepted of by the Council; in Consequence of which we have delivered up the

Fortress of Chandenagore to Admiral Watson.

Chandenagore, Maich 23. 1757.

F. Nicolas Laportiere P. Renault M. Fournier

Sugues A. Caillott.

Thus, at length, have been fettled the Animofities and Differences between the English and French, and may the Peace now concluded be lafting and uninterrupted! With this happy Event we will beg Leave to finish our History of the East-Indies.
